1 Introduction

1.1 Purpose

This Waste Management Plan (Plan) has been prepared by Arcadis U.S., Inc. (Arcadis) to define measures necessary to safely manage and characterize waste generated from the February 3, 2023, Norfolk Southern (NS) East Palestine, Ohio derailment. Waste characterization will be conducted in accordance with applicable Federal, State, and County waste regulations. This Plan provides procedures for onsite management, characterization, and offsite disposal of waste associated with the derailment. Waste profiles will be reviewed and approved by NS and disposal facilities prior to transportation and disposal of waste. Characterization of the waste streams generated by the derailment will be based on field screening data, laboratory analysis, Safety Data Sheets (SDS) of the product(s) released, generator knowledge, site inspections, and interviews with local responders. This is a working document that will be updated as needed as emergency response and remediation activities progress.

In the event of an emergency involving hazardous wastes that could result in an immediate or potential threat to human health or the environment personnel identifying the emergency should

- **Contact 911**
- **Secure the area and if possible, attempt to stop or contain the release**
- **Immediately notify NS Emergency Contacts**

EMERGENCY COORDINATORS

Title	Name	Emergency Number
Primary Emergency Coordinator(s)	Bryan Naranjo - NS Unified Command Group Robert Wood - NS Operations	Exemption 6 - PII
Secondary Coordinator(s)	Daniel Hunt - NS Remediation Manager Robert Scoble - NS Environmental Operations Chad Edwards – NS Liquid Waste Operations David Patten – NS Solid Waste Operations	404-273-4472 Exemption 6 - PII

LOCAL EMERGENCY RESPONSE AGENCIES

FIRE	East Palestine Fire Dept. Keith Burch, Fire Chief	911
POLICE	East Palestine Police Dept	911
HOSPITAL	Mercy Health St. Elizabeth 8401 Market St. Youngstown, OH 44514	911

Emergency Contact information will be posted in areas where hazardous waste is generated or accumulated.

Contact information for all subcontractors and Federal and State contacts along with associated roles and responsibilities are summarized in the East Palestine Incident Action Plan, OP6 (Appendix A). The following list is an abbreviated version of key contacts for onsite waste management tasks.

Contact	Email	Phone	Role
Michelle Clayton, Arcadis	Michelle.clayton@arcadis.com	Exemption 6 - PII	Waste segregation, onsite storage & labelling, sampling, profiling, manifesting and tracking
Josh Lindley, SPSI	Lindley@callspsi.com	Exemption 6 - PII	Coordination and billing for transportation of Liquid wastes, equipment operator for solid waste loading
Chad Runnion, Green Rock	Crunnion@greenrockllc.com	Exemption 6 - PII	Coordination and billing for transportation of solid wastes
JT Wilson, CTEH Vandra, CTEH		Exemption 6 - PII	Air monitoring Tank Farm area Air monitoring solid waste area
Justin Hahn, HEPACO	jhahn@hepaco.com	Exemption 6 - PII	Traffic coordination for Tank Farm loading/offloading, moving drums to drum staging area, covering solid waste staging piles, dust control
Jimmy, US Ecology (SPSI subcontractor)		Exemption 6 - PII	Loading for offsite liquids
Rob Cronin, Cronin		Exemption 6 - PII	Loading for offsite
Nesto, Clean Harbors		Exemption 6 - PII	Pump out secondary containment
Frank Zingales, OEPA	Frank.Zingales@epa.ohio.gov	330-963-1108	Regulatory oversight for OEPA Division of Environmental Response and Revitalization
Adam Vrabec, USEPA R5		312-448-3853	Regulatory oversight for wastewater transfer and loadout
Jackie Cole, USEPA R5		312-597-4421	Regulatory oversight for solid waste loadout
USCG		443-718-1327	Regulatory oversight of liquid loading

Any deviations from this Plan must be approved by NS and the United States Environmental Protection Agency (USEPA). For questions on waste management requirements, contact the Arcadis project manager (Jason Artrip) or the Arcadis waste coordinator (Michelle Clayton).

1.2 Site History

On February 3, 2023, a NS train derailment and subsequent fire occurred in East Palestine, Ohio. The derailment involved 51 rail cars and resulted in a fire and breaches to tank cars that contained hazardous materials and non-

hazardous materials. The releases affected stormwater infrastructure and surface water, including Sulfur Run and Leslie Run. The exact volumes released are not yet available.

On February 21, 2023 Norfolk Southern and the USEPA entered into a Unilateral Administrative Order for Removal Actions (UAO) (Comprehensive Environmental Response, Compensation, and Liability Act [CERCLA] Docket No. V-W-23-C-004; USEPA 2023). A List of the Contents of the Rail Cars Which Derailed is provided in Appendix A of the USEPA Unilateral Administrative Order for Removal Actions. Site specific constituents of concern (COCs) are also identified in the Main Line 1 Track Excavation Plan. Based on visual inspections and generator knowledge of the railcar inventory, the following liquid commodities were released as a result of the derailment and have been used to identify COCs targeted for waste disposal. SDS for the chemicals released are included as Attachment 1:

- Vinyl Chloride, stabilized (VC)
- Propylene glycol*
- Polypropyl glycol*
- Diethylene glycol*
- Dipropylene glycol*
- 2-Ethyl hexyl acrylate*
- Butyl acrylates, stabilized*
- 2-butoxyethanol (ethylene glycol mono butyl ether) *
- Petroleum lube oil*
- Beer Cars (ethyl alcohol) *
- Polyvinyl (plastic beads) *
- Semolina Flour*

*These COCs are not identified listed chemical sources and do not have universal treatment standards (UTS). COCs exhibiting a hazardous waste characteristic are exclusive to ignitability (D001). Analysis of these COCs is limited to ignitability for recovered liquids. Analysis of these COCs is not required by the disposal facilities for solid wastes and will not be used for decision making for waste determinations of the solid waste.

During response activities, approximately 40 gallons of T-storm aqueous film forming foam (AFFF) concentrate was utilized by the local fire department to control the fire prior to NS arrival at the scene. The local fire department was not able to confirm the location where the AFFF was utilized. A SDS for the AFFF is included in Attachment 1. The composition of the AFFF is listed in Section 3 of the SDS. Based on the SDS and knowledge of the product, this brand of AFFF contains per- and polyfluoroalkyl substances known as PFAS and PFOA.

On February 6, 2023, five VC car(s) were deemed unstable and at risk of explosion as a result of the fire and intense heat. It was determined that a controlled vent and burn was necessary to protect human health and establish a safe working environment for the remedial activities. The use of a controlled vent and burn minimized the potential for bulk releases to the surface, however minor surface releases of VC may have occurred during the controlled vent and burn. The location where the controlled vent and burn occurred is documented in Figure 1. The generation of dioxins was identified as a potential COC resulting from the initial and secondary vent and burn that resulted from the derailment.

1.3 Waste Management Activities Prior to UAO

Prior to the effective date of the UAO, all waste management were performed under the direction of Ohio Environmental Protection Agency (OEPA) and the USEPA. General waste management activities such as containerization and storage requirements were described in the Draft Site Waste Management Plan (February 12, 2023). Remedial activities generating waste included excavation of soil from between the tracks and continuous collection of impacted surface water. Sampling and analyses requirements for waste characterization were discussed with OEPA and subsequently presented as a memo for approval (see Attachment 3). All waste sampling and analyses plans were presented to OEPA and approved prior to execution.

1.3.1 Immediate Response Exemption

Resource Conservation and Recovery Act (RCRA) regulations in 40 Code of Federal Regulations (CFR) Parts 264 and 265 Subparts C and D require immediate actions to minimize hazards to human health and the environment from any unplanned, sudden or non-sudden releases of hazardous waste or hazardous constituents. Action taken under emergency response situations are covered under the USEPA immediate response exemption [RO12748]. The immediate response exemption excuses facilities from permitting (270.1(c)(3)) and RCRA substantive management standards (264.1(g)(8) and 265.1 (c)(11)). The exemption also excludes transportation of wastes during emergency response actions, generators, and transporters are excluded from obtaining USEPA IDs and manifests. RCRA requirements not covered by the immediate response exemption include Subpart M - Preparedness and Prevention and Contingency Plan and Emergency Procedures. Waste management actions conducted prior to the UAO were performed under an immediate response exemption, this exemption ended on February 21, 2023, NS and USEPA entered into the UAO (CERCLA Docket No. V-W-23-C-004; USEPA 2023).

1.3.2 Waste Generation and Storage

Prior to the effective date of the UAO, the following waste streams were generated and staged onsite as described below.

- **Soil impacted with VC and butyl acrylate placed in roll-off containers and in staging piles.** The staging piles were located within the area of contamination (AOC). Piles were placed on welded high-density polyethylene (HDPE) secondary containment pads and covered in poly sheeting when not in use. The boxes were not on secondary containment, but routine visual inspections were performed. Any observed issues were immediately addressed.
- **Recovered liquids to include surface water, fire water, and decontamination water impacted with VC and recovered product (acrylates, glycols, lube oil).** All liquids were collected via vacuum trucks and consolidated into temporary storage tanks for storage pending offsite disposal. Temporary storage tanks were placed in individual secondary containment pads. Four primary tank staging areas were constructed based on proximity to locations where large volumes of surface water were being collected. Figure 1 shows the locations of the now former tank staging areas.
- **Impacted debris (Absorbent booms & pads, personal protective equipment [PPE]) was staged in roll-off boxes.** The boxes were not on secondary containment, but routine visual inspections were performed.
- **Street sweepings.** Material was placed in roll-off and staged in the asphalt parking lot of Leake Oil.

- **Non-hazardous waste (unimpacted commodities).** Material was placed in roll-off and or directly loaded into dump trucks and vacuum trucks for transport to the approved disposal or recycling facility as described later in this section.
- **Municipal trash.** Material was placed into roll-off containers and transported offsite for disposal.

1.3.3 Sampling and Analyses

A summary of the waste sampling and analyses performed under OEPA direction is provided below.

Sampling of Solid Waste

- Staging Pile 1A, generated from an 0 to 18 inch excavation between the tracks in the VC release area:
 - Collected 10 grab samples, submitted for analyses of total volatile organic compounds (VOCs), total semivolatile organic compounds (SVOCs), toxicity characteristic leaching procedure (TCLP) metals.
 - Lab generated two composite samples from the 10 grab samples; composite samples were analyzed for TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides, PFAS/PFOA and Total PCBs. One of the composite samples was subsequently selected for dioxin/furan analyses.
- Staging Pile 1B, generated from an 18 to 48 inch excavation between the tracks in the Vinyl chloride release area:
 - Collected 10 grab samples, submitted for analyses of total VOC, total SVOC, TCLP metals.
 - Lab generated 2 composite samples from the 10 grab samples; composite samples were analyzed for TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides, PFAS/PFOA and Total PCBs. One of the composite samples was subsequently selected for dioxin/furan analyses.
- Staging Pile 2, generated from an 0 to 48 inch excavation between the tracks in the butyl acrylate release area:
 - Collected 14 grab samples, submitted for analyses of total VOC, total SVOC, TCLP metals.
 - Lab generated 2 composite samples from the 14 grab samples; composite samples were analyzed for TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides, PFAS/PFOA and Total PCBs. One of the composite samples was subsequently selected for dioxin/furan analyses.
- Staging Pile North, generated from excavation of the north ditch within the Vinyl chloride release area
 - Collected 10 grab samples, submitted for analyses of total VOC, total SVOC, TCLP metals
 - Lab generated two composite samples from the 10 grab samples; composite samples were analyzed for TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides, PFAS/PFOA and Total PCBs. One of the composite samples was subsequently selected for dioxin/furan analyses.
- Roll-off boxes generated from surface scrap of North Ditch in areas west of the vinyl chloride release area:
 - Collected 10 grab samples, submitted for analyses of total VOC, total SVOC, TCLP metals.
 - Lab generated 2 composite samples from the 10 grab samples; composite samples were analyzed for TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides, PFAS/PFOA and Total PCBs. One of the composite samples was subsequently selected for dioxin/furan analyses.
- Roll-off and Vacuum boxes containing plastic pellets and soil:
 - Collected five grab samples from containers with plastic pellets only and collected five grab samples from containers with plastic pellets and soil, submitted for analyses of total VOC, total SVOC, TCLP metals.

- Lab generated one composite for plastic pellet each waste stream; composite samples were analyzed for TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides, PFAS/PFOA and Total PCBs. Dioxin impacts are not considered a potential COC for this waste stream, no dioxin analyses were performed.
- Roll-off box of Street sweepings:
 - Collected one grab sample which was submitted for analyses of total VOC, total SVOC, TCLP metals, TCLP VOC, TCLP SVOC, TCLP Pesticides, TCLP Herbicides and Total PCBs.

Sampling of Liquid Waste

- Collected samples from five of the original 10 temporary storage tanks generated following the derailment. Samples were collected with a bailer and submitted for analyses of VOC, SVOC, metals, pH, flashpoint, total suspended solids and total organic carbon. One composite sample was generated by the lab and submitted for PFAS/PFOS analyses.

1.3.4 Waste Determinations and Disposal

Waste determinations were made based on generator knowledge of a U-listed source, commercial grade unused vinyl chloride, and analytical results. The following is a summary of the waste determination completed prior to the UAO.

- Surface water, fire water, decontamination water and recovered product are characterized as listed hazardous waste, U043. Based on analyses the liquid waste does not exhibit any characteristics of hazardous waste other than toxicity for vinyl chloride and is not Toxic Substances Control Act (TSCA) regulated. The VC characteristic is covered under the U listing.
- Contaminated soils in staging piles and soil and wastes in roll-of boxes (mentioned in Section 1.3.2) are characterized as U043 (VC) listed hazardous waste based on generator knowledge that these wastes were generated from the cleanup of a release of a U-listed chemical. Contaminated soil and roll-offs were sampled prior to the UAO effective date; however, the analyses were not received until after the UAO effective date. Waste determinations for the soils and soil and waste in roll-off boxes which were performed after the UAO identified that these wastes do not exhibit any characteristics other than toxicity for vinyl chloride of hazardous waste. The VC characteristic is covered under the U listing.

Waste disposal facilities for liquid wastes and disposal methods are summarized below. Copies of the waste profiles and approvals are provided in Appendix B.

Liquid Waste, Hazardous					
State	Disposal Facility	Address	CERCLA Approved	Profile Status	ID Number
OH	Vickery (Deep Well Injection)	3956 State Route 412, Vickery OH 43464	Y	Approved	OHD020273819
TX	Texas Molecular Deer Park (Deep Well Injection)	2525 Independence Rd Deer Park, TX 77536	Y	Approved	TXD000719518
MI	Romulus (Deep Well Injection)	28470 Citrin Drive Romulus, MI 48174	N	Approved	MIR000016055

Transportation and disposal of the wastewater began on February 14, 2023. Prior to execution of the UAO a total of 172 loads (approximately 817,228 gallons) of U043, Hazardous wastewater was shipped offsite for disposal.

The following is a list of commodities being transported by the train that derailed (see Appendix B, USEPA Unilateral Administrative Order for Removal Actions, CERCLA Docket No. V-W-23-C-004; USEPA 2023). Railcars containing these commodities were not breached and there was no release to the environment associated with these products. Based on generator knowledge, the commodities listed below were fully contained within railcars and were not contaminated by the VC release. Commodities in rail cars that were not breached were identified as non-RCRA hazardous waste and managed under applicable OEPA solid waste regulations. The following is a list of commodities that have been offloaded and managed for recycling, disposal of purchased as off-spec commercial products.

Commodity	Disposal Method	Disposal /Recycling Location
Polypropylene (Polyol)	Solidification/ landfill	Republic Services Carbon Limestone Landfill 8100 S State Line Rd, Lowellville, OH 44436
Dipropylene glycol	Solidification/ landfill	
Propylene glycol	Solidification/ landfill	
Paraffin Wax (Carbon wax)	Solidification/ landfill	
Lube oil additive (non-recyclable)	Solidification/ landfill	
Lubad (Lube oil additive)		
food commodities (veggies)	landfill	
powder flakes (hysorb)	landfill	
Malt Liquor Containers (bottles of beer)	Empty containers only - landfill	
Petro Oil (Lube Oil)	Oil recycling	Everclear Oil Ltd. 3700 Oakwood Ave, Austintown, OH 44515 PetroMax Ltd 301 Prestley St, Carnegie, PA 15106
Fuel Additives (Lube Oil Additive)	Oil recycling	Petromax
Passenger vehicles	Recycled as scrap metal	D&D Salvage 6375 Railroad Street Pittsburgh, PA 15201
Diethylene glycol	recyclable material purchased as is	American Chemical Products 5041 W 161st St, Cleveland, OH 44142

2 Regulatory

On February 21, 2023, NS and the USEPA entered into the UAO (CERCLA Docket No. V-W-23-C-004; USEPA 2023). The response action is now being performed under a UAO issued under authority of CERCLA. As such, the response action must ensure that all waste characterization and management comply with applicable and relevant and appropriate requirements (ARARs) of federal, Ohio, and local environmental laws, including RCRA Subtitle C (hazardous waste identification and management), as set forth in Section 121 of CERCLA and 40 CFR 300.415(j) of the National Oil and Hazardous Substances Contingency Plan (NCP). While NS meets the definition of a “generator” under RCRA regulations (see 40 CFR 260.10) and is responsible for determining whether any waste meets the definition of a RCRA hazardous waste, the lead agency (USEPA) and support agency (OEPA) will review all waste characterizations and management of wastes to identify ARARs and ensure compliance with ARARs, as necessary. All hazardous waste determinations will be made at the point of generation concurrent with

determining whether hazardous waste is prohibited from land disposal (i.e., compliance with the Land Disposal Restriction [LDR] treatment standards in 40 CFR Part 268). In addition, offsite disposal of any waste (hazardous or non-hazardous) generated by the response is subject to all applicable requirements, including permits, as well as the procedures for planning and implementing off-site response actions at 40 CFR 300.440 of the NCP (i.e., CERCLA Off-Site Rule). This section presents the regulations governing onsite management and disposition of waste under the UAO and the Ohio Administrative Code (OAC).

2.1 Hazardous Waste Regulations

Current waste sampling and analyses procedures are consistent with the procedures implemented under OEPA. Additional details are provided in Section 4. RCRA identifies requirements for characterization of wastes and for management of hazardous waste, requirements applicable to the site are specified below.

2.1.1 Determination of When Contamination is caused by a Listed Hazardous Waste

The regulations in 40 CFR §261.33 provide a definition of hazardous wastes that are discarded commercial chemical products, off-specification species, container residues, and spill residues thereof. The commercial chemical products, or off-specification commercial chemical products listed in 40 CFR 261.33(f) are known as U-listed wastes. Per 40 CFR 261.33(d) contaminated soil or water (media) generated from the cleanup of releases of U-listed chemicals is hazardous waste and the spill residues must carry the same listed waste codes as the chemical that was spilled.

Spill residuals from the release of a U-listed chemical must be managed as a U-listed hazardous waste unless the constituents from a U-listed chemical are present in the media at concentrations less than health-based levels, in which case the contaminated media will no longer be regulated as a RCRA U-listed hazardous waste (referred to as a "Contained-In Decision for Media and Debris). This process is known as the "contained-in determination" and requires written approval by USEPA. Contained-in requests will be prepared and submitted separately to the OEPA and USEPA. Copies of contained in requests and approvals will be maintained in the project records for a minimum of 10 years.

2.1.2 Determination of Whether a Waste Exhibits a Characteristic of Hazardous Waste

If the waste is not listed, it must be determined if it exhibits any of the four characteristics of a hazardous waste. This evaluation can be based on laboratory analyses or generator knowledge. A waste is a characteristic waste if it exhibits the properties of ignitability, corrosivity, reactivity, or toxicity as defined in 40 CFR 261, Subpart C.

2.1.3 LDR for Waste Carrying a Listed and/or a Characteristic Code

All RCRA hazardous wastes, including hazardous contaminated media, generated during the removal response must comply with applicable RCRA LDRs regulations found in 40 CFR Part 268 prior to disposing of those wastes at an approved off-land disposal facility. NS will follow the regulations at 40 CFR 268.9 for identifying all the RCRA waste codes applicable to a hazardous waste for purposes of determining the applicable LDR treatment standards found in 40 CFR Part 268 subpart D. For those wastes where the LDR treatment standard includes

treatment of underlying hazardous constituents (UHCs), NS will identify all reasonably present UHCs in those RCRA hazardous wastes and hazardous contaminated soils to determine if the concentration of those UHCs are above their respective UTS and require treatment.

If the generator determines that a listed code is applicable, then it is always applicable to the waste. If the waste is not listed, then the generator must determine if the waste exhibits any characteristics. However, for the purpose of compliance with LDR, the generator must determine if the listed waste also exhibits a characteristic. Where a waste is both listed and exhibits a characteristic, the treatment standard for the listed waste code (40 CFR part 261, subpart D) will operate in lieu of the standard for the characteristic waste code (40 CFR part 261, subpart C), provided that the treatment standard for the listed waste includes a treatment standard for the constituent that causes the waste to exhibit the characteristic. Otherwise, the waste must meet the treatment standards for all applicable listed and characteristic waste codes. Note that assigning a characteristic code to a listed waste often requires a generator to determine if the waste contains UHCs. If UHCs are present, they must be identified on the LDR paperwork, and the receiving facility must ensure that all UHCs are treated to meet UTS prior to land disposal.

2.1.4 Regulations applicable to waste impacted with PFAS/PFOA and Dioxins/Furans

Currently wastes impacted with PFAS/PFOA are not regulated under the RCRA or under TSCA. As such, acceptance criteria and disposal methods are being reviewed on a site-specific basis. Per disposal facility requirement sampling for PFAS/PFOA was performed on the five staging piles generated. Based on the analytical results PFAS/PFOA were not a disposal concern and additional sampling for PFAS/PFOA analyses was not required.

While dioxins or furans created during the controlled burn of VC do not affect the classification of contaminated soil or groundwater as a RCRA hazardous waste, dioxins and furans in RCRA hazardous soils may require treatment to meet the RCRA LDRs. Dioxins and furans are identified as UHCs and subject to treatment standards if NS will use the RCRA Alternative LDR Treatment Standards for Soil at 40 CFR 268.49 to comply with the RCRA LDR requirements. Therefore, NS must sample and document that the concentrations of dioxins and furans in RCRA hazardous contaminated soils are below their applicable LDR UTS for non-wastewater dioxins/furans found in 40 CFR 268.48 if those soils will be managed under the Alternative LDR Treatment Standards for Soil. In accordance with LDR requirements, NS will analyzing all suspect waste streams (soil, sediment, street sweepings, booms in dams) for dioxins and furans. To date, all analytical results are below 10X UTS for dioxins/furans.

2.2 Non-Hazardous Waste Regulations

All non-RCRA wastes (i.e., "solid waste" as defined by federal RCRA regulations and "waste" as defined by OEPA), will be characterized and managed in accordance with applicable OEPA and any local solid waste regulations.

3 Onsite Management of Waste

Arcadis will manage all waste, hazardous and non-hazardous, in a manner that prevents unauthorized releases to the environment. Arcadis will comply with all federal and state regulations and will adhere to best management practices while managing waste containers and storage areas to ensure proper waste management and a safer working environment. Generator requirements for management of hazardous waste are based on generator status. If more than 2,200 pounds per calendar month of hazardous waste is generated from the emergency response activities, the site will be considered a large quantity generator of hazardous waste (LQG). As a LQG, the generator must comply with waste management requirements in OAC Chapter 3745-52-17.

The following is a summary of the regulatory requirements and best management practices for onsite management of hazardous and non-hazardous wastes.

- All water/product resulting from response activities will be containerized upon generation. For bulk recovery, liquids may be temporarily stored in a vacuum truck prior to consolidation in a temporary storage tank. Recovered liquids and products may be combined provided they are associated with the same release area and the waste is compatible.
- All Soil will be stockpiled within the AOC or will be placed into containers and transported to a designated storage area. Soil piles in the AOC will be covered when soil is not actively being added or removed from the storage area.
- Waste may be transported from the point of generation to a temporary onsite storage area without triggering the requirement for waste transportation permit.

3.1 Segregation of Potential Waste Streams

NS will make a RCRA hazardous waste determination and the LDR determination in 40 CFR 268.9 (if the waste is RCRA hazardous) for all wastes at the point of generation prior to consolidating or combining wastes. This will avoid potentially mixing RCRA hazardous waste with non-RCRA waste or violating the dilution prohibition as a substitute for treatment identified by the LDR regulations at 40 CFR 268.3. All hazardous waste determinations will be made at the point of generation (§262.11) concurrent with determining whether hazardous waste is prohibited from land disposal (i.e., compliance with the LDR treatment standards in 40 CFR Part 268).

The following is a list of the waste streams generated since the work plan was originally developed.

- Hazardous waste, soil generated from excavation activities;
- Hazardous waste, water/product recovered from dams, interceptor trenches, sumps, surface puddles and storm sewer clean-outs;
- Hazardous waste, decontamination water;
- Non-hazardous and recyclable commodities;
- Municipal trash (non-impacted food waste, paper, plastic, cardboard);
- Scrap metal;
- Hazardous waste, asbestos containing materials (Transite panels) mixed with debris and soil;
- Hazardous waste, debris (silt fence, sediment curtains, booms, PPE, absorbent pads, HDPE liner, plastic pellets, vegetation);

- Non-hazardous vegetation; and
- Hazardous waste, railroad ties.

Arcadis will work with contractors to segregate wastes being generated. It is understood that segregation abilities will be limited by schedule and available storage space. However, at a minimum the following segregation will be required.

- Decontamination water will be containerized separately from surface and groundwater.
- Unimpacted municipal trash will be segregated from remediation wastes.
- Soil from the VC burn area and soil from north of the track that contains significant concentrations of flour will be placed in a separate staging pile.
- Clean soil and vegetation (outside of the AOC) will be staged separately.

During waste generation, the Arcadis Waste Advisor will confirm with the field staff that the material currently being generated is similar in composition and impacts. If field staff indicate waste has changed based on field screening, composition, or visual appearance, that material will be placed into a separate stockpile/ container.

3.2 Onsite Management Methods for RCRA Hazardous Waste and Contaminated Media

The response action is being conducted pursuant to a CERCLA Section 106 UAO (USEPA 2023). Under CERCLA section 121 and 40 CFR 300.415(j), onsite removal actions will comply with ARARs accordingly, and RCRA regulations for management of hazardous remediation waste. ARARs within the scope of this project include RCRA regulations pertaining to handling, storage, and disposal of certain waste materials and United States Department of Transportation (USDOT) regulations pertaining to transport of hazardous waste found at 49 CFR Part 171 will be met to the extend practical. Corrective Action Temporary units (40 CFR 264.553) may be used in the design, operation, monitoring, and closure of containers, tanks, or waste piles created “on-site” (as defined by CERCLA) during the response. Unified Command will be notified prior to establishment of any new temporary waste management units.

RCRA Hazardous wastes and contaminated media will be generated during excavation, consolidation, and removal of contaminated soils from drainage and other areas (40 CFR 300.415 (e)(6)) and activities associated with the removal of a release of a CWA hazardous substance (40 CFR 300.415 (c)). The following is a list of potential RCRA Hazardous waste and contaminated media that may be generated during Removal Actions. This list is not exhaustive and is not intended to prevent the generation of additional waste streams. A complete list of currently profiled waste streams is provided in Appendix B. A summary of waste generation and applicable regulations is provided in Attachment 4.

- RCRA Hazardous Waste Solids, Soil impacted with listed hazardous waste (VC);
- RCRA Hazardous Waste Solids, Soil impacted with listed hazardous waste (VC) and asbestos containing material;
- RCRA Hazardous Waste Solids, Debris impacted with listed hazardous waste (VC);
- RCRA Hazardous Waste Liquids, Water (surface water and groundwater) impacted with listed hazardous waste (VC);
- RCRA Hazardous Waste Liquids, Water (decontamination water) impacted with listed hazardous waste (VC);

3.2.1 AOC Policy

In the USEPA AOC Policy (USEPA 1996) the USEPA interprets RCRA to allow certain discrete areas of generally dispersed contamination to be considered RCRA units (usually landfills). Because an AOC is equated to a RCRA land-based unit, consolidation and *in situ* treatment of hazardous waste within the AOC does not create a new point of hazardous waste generation for purposes of RCRA. Therefore, wastes can be consolidated or treated *in situ* within an AOC without triggering LDRs or minimum technology requirements. This AOC interpretation may be applied to any hazardous remediation waste (including non-media waste) that is in or on the land. The AOC concept is particularly useful for consolidation of contiguous units or areas of contaminated soil. The AOC policy does not apply to *ex situ* waste management or transfer of wastes from one area of contamination to another.

Ohio recognizes the USEPA AOC Policy. Ohio regulations for staging piles (OAC 3745-57-74) are not applicable to soil consolidated into piles within the AOC.

Remedial activities will include excavation of impacted soil. All excavated soil will be consolidated into staging piles for sampling and storage prior to offsite disposal. All staging piles will be located within the AOC and constructed with welded HDPE liners and hay bale berms. Soil placed in staging piles will be covered whenever the pile is not actively being added to or removed from and covers will be inspected daily. Staging piles have no size restrictions other than all materials staged must be able to be contained within the designated liner. Designated staging pile locations and waste storage areas are identified in Figure 1.

The following is a summary of the staging piles names (some utilized prior to the UAO) and the current staging pile names.

Previous Name	Current Name
Staging pile 1A – Vinyl chloride release area, shallow excavation	Staging pile 1
Staging pile 1B – vinyl chloride release area, deep excavation	Staging pile 3
Staging pile 2 – butyl acrylate excavation area	Staging Pile 2
North Staging Pile	Staging pile 6
Tank Area Staging Pile	Staging pile 4
South Track west Staging Pile	Staging Pile 5
South Ditch Staging Pile	South Ditch Staging Pile

3.2.2 Corrective Action Temporary Units

The response action is being conducted pursuant to a CERCLA Section 106 UAO (USEPA 2023). Regulations applicable to the use of Corrective Action Temporary Units are found in 40 CFR 264.553 and OAC rule 3745-57-73. The use of temporary units (TUs) is being authorized by USEPA as an ARAR during a CERCLA cleanup under the Section 106 UAO.

TUs are tanks or container storage areas that USEPA has designated to be used only for the treatment or storage of remediation wastes during cleanups. TUs allow wastes to be stored for up to one year and are not limited to

media. TUs must be within contiguous property where the wastes originate. For the purpose of this removal action the contiguous property where the waste originates is defined in the UAO Amendment 1 as the “site” (UOA for Removal Actions First Amendment, March 27, 2023). EPA or authorized states can modify the design, operating and closure standards that normally apply in order to facilitate the prompt cleanup of a site. Table 2 provides a summary of standards applicable to the TUs and documents compliance with those standards.

The following TUs may be used for management of solid and liquid remediation wastes:

- Tanks: Temporary storage tanks and modular tanks including
 - Approximately 155 temporary storage tanks in Tank Farms 1, 2, 3, 4, 5, 6, Stand by Tank Farms 1, 2 and 3 and the waste water treatment plant
 - 2 one-million-gallon modular tanks located in Tank Farm 1
- Container storage areas to include:
 - Tank Farms 5&6 which contains approximately 222 roll-off boxes and vacuum boxes
 - Waste Water Treatment Plant which contains drums and totes

Unified Command will be notified prior to establishment of any new waste management units or areas.

Transportation and offsite disposal for listed hazardous waste managed in TUs is ongoing. Per 40 CFR 264.553

(c) the following is a list of factors used to establish the standards that will apply to a temporary units used onsite.

List of Factors	Answer
(1) Length of time such unit will be <u>in operation</u> ;	It is anticipated that units will be operational less than 1 year and the number of units in use will decrease as remedial activities progress.
(2) Type of unit;	Container Storage Areas: remedial waste is stored in roll-off containers, vacuum boxes, intermodal containers, drums, totes Tanks: modular tanks, temporary storage tanks
(3) Volumes of wastes to be managed;	Temporary storage tanks and Modular tanks volumes are monitored and reported daily <ul style="list-style-type: none"> • Temporary storage tanks each have a capacity of 20,000 gallons each; based on the number of temporary storage tanks onsite the maximum volume of remediation waste that could be stored in temporary storage tanks is 3.1 million gallons. • Modular tanks have a capacity of 1 million gallons each; the maximum onsite storage volume would be 2 million gallons. Roll-off containers and drums are inventoried weekly <ul style="list-style-type: none"> • Roll-off containers have a capacity of 20 cubic yards (CY) each; maximum volume would be 4,440 CY. • Drums have a capacity of 55 gallons each; maximum storage volume would be 4,125 gallons or 20 CY.
(4) Physical and chemical characteristics of the wastes to be managed in the unit;	Hazardous Waste Liquids, impacted with vinyl chloride (U043), toxic will be stored in the following TUs: <ul style="list-style-type: none"> • Tanks: Temporary storage tanks and modular tanks. • Container storage areas. Hazardous waste, Solids impacted with vinyl chloride (U043), toxic will be stored in the following TUs <ul style="list-style-type: none"> • Container storage areas.

List of Factors	Answer
	<p>Other Hazardous Waste Liquids, characteristic (corrosive, flammable) will be stored in the following TUs:</p> <ul style="list-style-type: none"> • Tanks: Temporary storage tanks. • Container storage areas. <p>Non-Hazardous Waste Liquids, managed under contained-in approval will be stored in the following TUs:</p> <ul style="list-style-type: none"> • Tanks: Temporary storage tanks.
<p>(5) Potential for releases from the unit;</p>	<p>All tanks and container storage areas are equipped with secondary containment. Any liquid releases would be recovered from the existing secondary containment network</p> <ul style="list-style-type: none"> • Tank Farms 5 and 6 have HDPE liner covering the entire tank farm area with additional HDPE installed under the temporary storage tanks. Rig mats have been placed over the liner to prevent punctures. A containment berm was created using hay bale berms overlain by HDPE liner. • Tank Farms 2 and 3, Stand by Tank Farms 2 and 3 and the waste water treatment plant have individual HDPE liners installed under each temporary storage tank and container storage area. • Both Modular tanks were installed within a single secondary containment consisting of an impermeable liner (120 mil Linear Low-Density Polyethylene (LLDPE) liner manufactured by ATARFIL), steel sheet piles, and earthen berms. • There is a network of over 10 vacuum trucks assigned to various remediation tasks. If there was a release of liquids the liquids would be immediately recovered by the vacuum trucks. Likewise, there are numerous pieces of equipment (excavators, dump trucks, bobcats) capable of recovering solids if a release occurred. <p>All tanks (temporary storage tanks and modular tanks) and containers (roll-off boxes, vacuum boxes, drums, totes) are constructed of high-quality steel and are constructed according to recognized engineering standards. Modular tank construction and installation are also described in the Modular Tank Summary Sheet (April 7, 2023, Arcadis).</p> <p>At a minimum, all tanks and container storage areas are inspected daily. Integrity issues such as leaks are immediately repaired. If the issue is not able to be immediately corrected, the waste is removed from the tank/container and placed into a new container.</p> <p>Loading and unloading of temporary storage tanks is visually monitored by someone on top of the tank to prevent overfilling and someone at the pumps; additional secondary containment (buckets/ kiddie pools) are placed under hose connections; Loading and offloading operations for the modular tanks is provided in the Modular Tank Summary Sheet (April 7,2023, Arcadis)</p>
<p>(6) Hydrogeological and other relevant environmental conditions at the facility which may influence the migration of any potential releases; and</p>	<p>Due to the various secondary containment efforts made, specialized emergency response equipment available, monitoring of the proposed temporary units (e.g., inspections, etc.) and required final cleanup of these areas (e.g., UAO and workplans for soil and groundwater characterization, including remediation), any potential hydrogeological and other relevant environmental conditions at the site which may influence the migration of any potential releases has been minimized to the extent necessary to be protective of human health and the environment while achieving overall cleanup at the site.</p>

List of Factors	Answer
(7) Potential for exposure of humans and environmental receptors if releases were to occur from the unit.	Except for the wastewater treatment plant all areas where tanks and containers are store are covered in the Site Security Plan. All TUs are maintained in secure areas (fenced or security guard) with access restricted to authorized personnel only. Personnel permitted in the tank and container storage areas are all 40 hour HAZWOPER trained and anyone with a hazardous waste task is RCRA trained.

3.2.3 Management of Waste in AOC and TUs

To ensure the integrity of the TUs (container storage areas and tanks) and staging piles at the site is properly maintained, the following criteria will be monitored:

- Each waste stream will be stored in a different container, tank or staging pile that is compatible with the waste contained.
- All containers and tanks will be maintained in good condition, with no leaks, corrosion, rust, or bulges. If a container is not in good condition or is leaking, transfer the waste into a container that is in good condition.
- Waste containers will be kept closed and staging piles will be covered unless waste is actively being added to the container.
- All waste containers and tanks must be labelled. All Staging piles must be identified by signs. Containers, tanks and staging piles with missing or damaged labels/sign will be relabeled. All signs and labels must be properly maintained.
- All containers will be transported to the storage area, handled, and stored in a manner to prevent them from rupturing and to prevent the waste from leaking or spilling.
- Tanks and containers will be stored in a secure area and protected from traffic. Tanks and containers will be protected from the weather to prevent freezing, volatilization, or flooding.
- At a minimum, TUs and staging piles will undergo daily visual inspection. Inspections will be documented on the Daily Inspection Form (Attachment 8).
- Tanks, TUs and staging piles will be placed on secondary containment and the secondary containment will be maintained in accordance with the Secondary Containment Standard Operating Procedures (Attachment 7).
- The liquid transfer process will be manned at both ends of the transfer. The employee manning the liquid transfer at the manhole opening on top of the temporary storage tank will be required to wear appropriate PPE. Air monitoring will be conducted in accordance with the Site Health and Safety Plan during the transfer process.
- The following Preparedness and Prevention Measures will be maintained in the storage area:
 - A list of emergency contacts,
 - Personnel working in the storage area will carry an emergency radio/cell phone anytime waste is being placed in the storage area or loaded for offsite transport, and during sampling and inspection activities,
 - Fire extinguishers if flammable liquids are present,
 - Materials to control spills (i.e., spill absorbents, extra 55 gallon drums to transfer wastes),
 - PPE supplies (i.e., eyewash, first aid kit).

3.2.4 Labeling

Waste labels must identify, at a minimum, the following information (see Attachment 2 for examples of completed labels):

- The words “Hazardous Waste,” “non-hazardous waste”, “Analyses Pending”;
- Site Address and USEPA ID number;
- Identify the hazards of the contents of the containers using a description (e.g., toxic, ignitable, reactive, corrosive, USDOT label, greenhouse gas label or Occupational Safety and Health Administration [OSHA] label); and
- Generator name and contact information.

Examples of waste labels are provided in Attachment 2. If the waste determination and hazards are unknown pending receipt of analytical data, use the “analyses pending” label. Once the analysis is reviewed the “analyses pending” label should be removed and replaced by a more appropriate label.

3.3 Onsite Management of Non-RCRA Waste

Ohio’s regulations for non-hazardous solid waste are contained in OAC 3745-27. Solid waste generated and managed prior to the UAO is discussed in Section 1.3. The current generation of non-hazardous waste is limited to municipal trash, which is placed into designated roll-off containers. General best management practices applicable to the non-hazardous wastes generated as a result of the derailment include:

- Solid waste may be stored onsite in labeled containers or stockpiles while awaiting disposal.
- All Non-Hazardous Waste for offsite disposal transport within Ohio will comply with Ohio's general safety rules administered by the Public Utilities Commission of Ohio. No transport permit is required to transport solid waste within the State of Ohio.

4 Sampling and Analyses

On February 21, 2023, NS and the USEPA entered into the UAO (CERCLA Docket No. V-W-23-C-004; USEPA 2023). The response actions are now being performed pursuant to a CERCLA Section 106 UAO. Waste sampling and onsite management activities comply with ARARs of federal, state, and local environmental laws including RCRA Subtitle C (hazardous waste identification and management), as set forth in Section 121 of CERCLA and 40 CFR 300.415(j) of the NCP.

Personnel tasked with collecting waste samples will comply with NS and Arcadis health and safety requirements. Task-specific Job Safety Analyses will be prepared to address specific hazards associated with the waste sampling activities. All personnel whose job involves management of hazardous waste will be trained in accordance with Federal RCRA requirements. PPE requirements will be determined by the Project Health and Safety Manager based on known and/or anticipated contaminants and review of SDS. Prior to opening any waste containers, field staff will check with the Health and Safety Manager regarding required PPE, respirator use, and other safety equipment.

Federal regulation states that it is the responsibility of the generator to accurately characterize the waste generated (40 CFR 262.11). In general, OEPA follows Federal guidance and leaves it up to the generator to

determine the number of samples needed to accurately represent the waste stream. Neither OEPA regulations nor the OEPA Contained-In Determination guidance provide a requirement for the number of samples per volume required.

Sampling procedures implemented prior to the UAO are discussed in Section 1.3. Due to public concern a very conservative sampling approach was utilized for characterization of the wastes generated during the initial remedial activities. All sampling and analyses plans were submitted in writing to OEPA and approved prior to execution. OEPA provided direct oversight of all sampling activities.

Sampling performed after the execution of the UAO will be provided to USEPA so they may verify compliance with ARARs. All sampling will be performed in accordance with the USEPA RCRA waste Sampling Draft Technical Guidance and the conservative approach approved by OEPA.

Arcadis will collect samples in accordance with the following:

- All waste streams will be sampled in accordance with federal and state regulations.
- Based on experience, waste streams generated during the initial response activities and surface soils will exhibit the highest concentrations of COCs and impacts. As the remediation progresses, COC concentrations will decrease. The initial sampling and analyses approach will be conservative regarding the number of samples collected and analytical parameters. It is anticipated that based on analytical data a subsequent approach with reduced sampling will be requested.
- Because there is no generator knowledge of the COCs present in the soil prior to the derailment, the initial sampling and analyses plan will include sampling for the full list of RCRA TCLP parameters to assess if the waste exhibits any characteristics of hazardous waste. Analyses will also include PCBs to assess TSCA applicability. Following review of the initial analytical data, a reduced sampling will be requested that focuses on COCs present in the waste based on the initial analyses.
- When testing to determine if a waste stream is characteristic, waste samples will be collected as a composite sample that are representative of the average properties expected to be exhibited by the whole.
- When evaluating LDR applicability, grab samples will be collected and submitted for total VOCs, total SVOCs and TCLP metals. Results will be compared to the UTS.
- The following sample nomenclature is recommended:
 - Waste Characterization Sample (WC) – Staging Pile # (SP2) – Source location (South Track)
 - Waste Characterization Sample (WC) – Container # (SB2008) – Waste Matrix (Soil and Debris)

To expedite data assessment and remedial actions, for new waste streams Arcadis will develop task-specific sampling and analyses plans specific to response activities. Arcadis will present the proposed sampling and analyses plans to the USEPA and the incident command team. New sampling plans will not be executed until NS and USEPA approval is received. Copies of previously approved task specific sampling plans are included in Attachment 3. As additional plans are approved, they will be added to Attachment 3.

NS will provide a specific sampling approach as a stand-alone request for a contained-in determination for RCRA hazardous media.

5 Waste Determinations

Under RCRA requirements, a person who generates a solid waste as defined in 40 CFR 261.2 must determine if that waste is a “listed” hazardous waste in Subpart D of 40 CFR 261, or if it exhibits a “characteristic” of hazardous waste as described in Subpart C of 40 CFR 261. With the adoption of the Generator Improvement Rule, the USEPA further emphasized that “The Generator is ultimately responsible, and always has been, for making accurate waste determinations (November 28, 2016; 81 FR 85750). OEPA regulations for applying generator knowledge to make an accurate waste determination are summarized in Hazardous Waste Evaluation and Use of Generator Knowledge in Complying with OAC rule 3745-52-11 (OEPA 2020).

A hazardous waste determination can be based on generator knowledge or analyses. All hazardous waste determinations will be made at the point of generation (§262.11) concurrent with determining whether hazardous waste is prohibited from land disposal (i.e., compliance with the LDR treatment standards in 40 CFR Part 268).

Soil impacted by the releases of hazardous materials associated with the derailment are being excavated and consolidated into 6 staging piles within the AOC. Based on generator knowledge that impacts to the soil are associated with a release of a U-listed chemical, VC (U043) the soil in all staging piles is characterized as s U043 listed hazardous waste. Based on analyses the soil in these staging piles does not exhibit any characteristics of hazardous waste and is not TSCA regulated. All waste determinations are documented in facility specific waste profiles that are signed by NS. Waste profiles and supporting analytical data are provided to USEPA for approval prior to offsite transportation and disposal. The following is a summary of the waste determinations and proposed disposal methods for each staging pile.

- Soils in staging piles 1B (currently called staging Pile 3) and 2 (currently called staging pile 2) and the North Ditch soil in roll-off boxes were characterized as listed hazardous waste, U043 (VC) to be managed in accordance with the Alternative soil standard (vinyl chloride < 10x UTS) and sent to a Subtitle C, hazardous waste landfill for direct land disposal.
- Soil in staging pile 1A (currently called pile 1) was characterized as listed hazardous waste, U043 (VC). The soil in staging pile 1A is mixed with waste and therefore the Alternative Soil Standard is not applicable. Concentrations of VC exceed LDRs, as such soil from pile 1A will require incineration.
- Soils in north staging pile (currently called Staging Pile #6) are characterized as listed hazardous waste, U043 (VC). Concentrations in one of the 10 grab samples exceeded 10x UTS as such soil from the North staging pile will require incineration.
- Based on analyses the concentrations of vinyl chloride in all 10 grab samples of the plastic pellets and the one sample of street sweepings was reported as non-detect. Because the plastic pellets and street sweepings were recovered from areas included in the AOC and the contained-in policy cannot be applied to non-media the roll-off and vacuum boxes containing plastic pellets, plastic pellets mixed with soil and street sweepings are characterized as U043 listed hazardous waste. Based on analyses these waste streams meet land disposal criteria at the point of generation and therefore will be sent to a Subtitle C, hazardous waste landfill for direct land disposal.

Upon determination that the waste generated were listed hazardous waste, the analytical results for the grab samples were compared to applicable UTS to determination of compliance with LDR and the alternative soil standard. Per 40 CFR 268.49 When applying the soil treatment standards in paragraph (c) of this section, constituents subject to treatment are any constituents listed in § 268.48 Table UTS-Universal Treatment Standards that are reasonably expected to be present.

5.1 Generator Knowledge

To make an accurate determination that the waste is a listed hazardous waste, acceptable knowledge that can be used includes waste origin, composition, the process producing the waste, and other reliable and relevant information (§262.11(c)).

To make an accurate determination that the waste is a characteristic hazardous waste, the generator must apply knowledge of the hazard characteristic of the waste in light of the materials or the processes used to generate the waste. Acceptable knowledge includes:

- Process knowledge (e.g., information about chemical feedstocks and other inputs to the production process);
- Knowledge of products, by-products, and intermediates produced by the manufacturing process;
- Chemical or physical characterization of wastes;
- Information on the chemical and physical properties of the chemicals used or produced by the process or otherwise contained in the waste;
- Testing that illustrates the properties of the waste; or
- Other reliable and relevant information about the properties of the waste or its constituents (§262.11(d)).

The following generator knowledge will be applied to all waste streams generated:

- The derailment resulted in the release of hazardous materials. One of the materials released was VC, a listed hazardous chemical. Five railcars containing VC were breached, the breached cars were adjacent to each other in the train. The VC release was focused in the area beneath the breached cars.
- SDS (Attachment 1) will be used as generator knowledge for hazards and COCs associated with the release. Based on a review of the commodities released, there is one listed hazardous chemical, VC. Based on a review of SDS, some of the released materials are characteristically hazardous for ignitability. This property would only be applicable to recovered liquids. Other than the VC, there are no released chemicals that exceed RCRA toxicity criteria
- No UHCs are associated with the vinyl chloride however dioxins may have been generated by the fires that resulted from the explosions. As such, UHC identification includes sampling and analyses for dioxins and furans. To date no UTS exceedances have been identified.

5.2 Are the Wastes Listed?

The primary criteria for applying a listed code to waste is generator knowledge of the source of the waste and the process that generated the waste. Based on generator knowledge a release of VC, a listed hazardous chemical, occurred within the hot zone. In accordance with §261.33, the spill residuals from a listed chemical must be managed as a listed hazardous waste and carry the same codes as the chemical.

5.3 Are the Wastes Characteristic?

To support the characteristic waste determination, NS will obtain a representative sample (§260.10) of the waste for the testing. The samples will be submitted under chain of custody to an accredited laboratory and analyzed in accordance with the test method specified in subpart C of 40 CFR part 261. Results will be compared to RCRA

characteristic criteria in 40 CFR 261.21 through §261.24 (ignitability, corrosivity, reactivity, toxicity). The results of the analysis, when properly performed, are definitive for determining the regulatory status of the waste.

6 Disposal Options

The derailment occurred in Columbiana County Ohio. Based on information provided by OEPA Division of Solid Waste, the Carroll/Columbiana/Harrison (CCH) Joint Solid Waste Management District has designated 37 solid waste facilities as the only facilities that may accept non-hazardous solid waste generated within the District. A copy of the CCH designated facilities is provided in Attachment 6.

All hazardous wastes will require disposal at a RCRA permitted facility. Prior to offsite disposal of any wastes, the notification requirements in Paragraph 46.b of the UAO will be completed in addition to any notifications NS has committed to. Currently CERCLA OSR notification are being handled by the USEPA. NS will provide USEPA with the names, addresses and EPA IDs of any proposed disposal facilities and will not ship waste offsite until USEPA OSR approval is received.

Disposal options include Subtitle C landfills, treatment, disposal and Storage Facility, deep well injection sites, or hazardous waste incinerators. To date, soils have been profiled into every permitted Subtitle C facility within the continental United States. Available disposal options have been greatly impacted by concerns for public perception and negative public relations that could impact a disposal facilities ability to renew a permit or expand. Proposed waste disposal facilities for solid waste and disposal methods are summarized below. Copies of the waste profiles and approvals are provided in Appendix B.

Liquid Hazardous Waste, U043					
State	Disposal Facility	Disposal Method	Address	CERCLA Approved	ID Number
OH	WM Vickery Deepwell	Deep Well Injection	3956 State Route 412, Vickery OH 43464	Y	OHD020273819
TX	Texas Molecular	Deep Well Injection	2525 Independence Rd Deer Park, TX 77536	Y	TXD000719518
MI	Republic Romulus Deep Well Injection Site	Deep Well Injection	28470 Citrin Drive Romulus, MI 48174	N	MIR000016055

Solid Hazardous Waste, U043					
State	Disposal Facility	Disposal Method	Address	CERCLA Approved	ID Number

7 Emergency Response

Emergency Contact information will be posted in the waste storage area and in the job trailers of the responders. All personnel working at the derailment must be provided emergency contact information. NS will immediately be notified if any of the following occur:

- Fire, Explosion;
- Personal injury;
- Unsafe working conditions due to inclement weather;
- Spill or release.

7.1 Notification Procedures

Emergency Response and notification of releases will be performed in accordance with Section XVII of the UAO (USEPA 2023). A summary of the requirements is provided below:

If any event occurs during performance of the Work that causes or threatens to cause a release of any Waste Material on, at, or from the Site that either constitutes an emergency situation or that may present an immediate threat to public health or welfare or the environment, NS will immediately take all appropriate action to prevent, abate, or minimize such release or threat of release. NS will take these actions in accordance with all applicable provisions of this Order, including, but not limited to, the Health and Safety Plan. NS will immediately notify the OSCs or, in the event of his/her unavailability, the Regional Duty Officer for Region 5 (at 312/353-2318) and Region 3 (at 215/814-3255) of the incident or Site conditions.

If a release of hazardous waste or hazardous substances occurs where NS is required to report pursuant to Section 103 of CERCLA, 42 U.S.C. § 9603, or Section 304 of the Emergency Planning and Community

Right-To-Know Act (EPCRA), 42 U.S.C. § 11004, NS will immediately call the OSC, or, in the event of his/her unavailability, the Regional Duty Officer at Region 5 (at 312/353-2318) and Region 3 (at 215/814-3255) and the National Response Center at (800) 424-8802. This reporting requirement is in addition to, and not in lieu of, the reporting required by CERCLA §§ 103 and 111(g), or EPCRA § 304.

For all Emergencies and releases a written report to EPA within 7 days after the onset of such event, setting forth the action or event that occurred and the measures taken, and to be taken, to mitigate any release or threat of release or endangerment caused or threatened by the release and to prevent the reoccurrence of such a release or threat of release

7.2 Spill Response

If any waste container, tank or staging pile is observed to be leaking, is in a condition that it is likely to leak, or has any damage or corrosion that may compromise the integrity of the containment, the Site Waste Coordinator should be immediately notified and necessary corrective actions will be performed. NS personnel must also be notified immediately. For leaks or threats of leaks, efforts shall be made to seal or stop the leak (with caulking foam, other sealant, or other safe measures), contain, and collect leaking material. If leaks cannot be readily stopped, then the container and/or tank shall be taken out of service and waste transferred to a non-leaking container.

- Releases that are contained by the secondary containment will be recovered as much as possible using common recovery methods such as vacuum trucks, absorbents and shovels.
- Releases to the ground will be recovered with vacuum trucks and absorbents. Following recovery of the liquids, any visibly impacted soil/gravel will be excavated and placed into containers for disposal.

8 Offsite Transportation and Disposal

Remedial waste generated at East Palestine will be shipped offsite using tanker trucks, end dump trucks, trailers carrying intermodal boxes or roll-offs and box trucks carrying drums. Loads may be shipped by road transport directly to the final disposal facility, or they may be shipped by road to a NSRC yard where they will be transloaded into rail tank cars or railcars for shipment by rail to the final disposal facility. Trucks with direct loads and trucks taking loads to the transloading yards will be loaded at the same East Palestine loading location. All trucks will be manifested, cleaned, placarded & inspected prior to leaving site in accordance with this plan. All movements of the hazardous waste will be managed in accordance with USDOT, 49 CFR Part 171-174 and OAC Rules 3745-52-30 to 3745-52-33 and OAC 3745-53-12. Hazardous waste shipments will comply with OAC Rule 3745-52-23, manifest use, hazardous waste loaded onto rail will comply with 3745-52-23(D) for rail shipments.

Procedures for Emergency Response notifications and spill response procedures are provided in Section 7. If a release were to occur during transport or transloading notification will be immediately made to USEPA at 800-282-9378, Norfolk Southern at 800-453-2530 and if greater than the reportable quantify the National Response Center at 800-424-8802.

8.1 UAO and CERCLA OSR Requirements

Prior to offsite disposal of any wastes the notification requirements in Paragraph 46.b of the UAO will be completed in addition to any notifications NS has committed to. Currently CERCLA OSR notification are being

handled by the USEPA. NS will provide USEPA with the names, addresses and EPA IDs of any proposed disposal facilities. NS will not ship waste offsite until NS receives confirmation from USEPA that the OSR approval has been received. NS will ensure that all off-site disposal facilities for RCRA hazardous wastes and non-RCRA wastes are in compliance with the CERCLA Off-Site Rule at 40 CFR 300.440 and OSR approvals will be maintained in the project records.

Additionally, in accordance with Section 46(b) of the UAO, NS will provide written notice to the appropriate state environmental official in the receiving facility's state and to the On-Scene Coordinators (OSCs) prior to any waste shipment. This notice requirement will not apply to any off-Site shipments when the total quantity of all such shipments will not exceed ten cubic yards. The written notice will include the following information, if available: (1) the name and location of the receiving facility; (2) the type and quantity of Waste Material to be shipped; (3) the schedule for the shipment; and (4) the method of transportation. NS will also notify the state environmental official referenced above and the OSCs of any major changes in the shipment plan, such as a decision to ship the Waste Material to a different out-of-state facility. NS will notify USEPA before the Waste Material is shipped.

8.2 Air Monitoring

A NS contractor will provide continuous air monitoring per the Air Monitoring plan during all waste loading activities, waste sampling and gauging activities. As appropriate, staff tasked with loading, sampling and gauging may be required to wear half face respirators based on air monitoring.

8.3 RCRA and USDOT Requirements for Off-Site Shipments of Hazardous Waste

USDOT regulates the identification, packaging, and transportation of hazardous materials, including hazardous waste (USDOT, 49 CFR §171-173). Offerors of hazardous material must identify the hazardous material, package, label, and mark each container of hazardous material and complete a hazardous waste manifest for the transport of hazardous waste. To ensure compliance with USDOT manifest requirements for hazardous waste generators in 40 CFR Part 262 subpart B, pre-transport requirements in 40 CFR Part 262 subpart C, notices and/or certifications required by the RCRA LDR tracking regulations in 40 CFR 268.7, every waste shipment will be managed according for the following criteria:

- Hazardous material/waste shipments will be labeled, marked, and placarded in accordance with applicable USDOT requirements.
- No waste containers will be transported offsite without approval from NS and receipt of an approved waste profile for the material being shipped from the receiving disposal facility.
- All waste shipped offsite must be accompanied by USDOT shipping papers (40 CFR Part 262 subpart B, OAC rules [3745-52-20](#) and [3745-53-21](#) and section 49 part 205 of the CFR, respectively).
- Class 9 does not require a hazmat endorsement on the drivers commercial driver's license, even if a placard is used. However, per 49 CFR 172.704 drivers without HazMat endorsements are still required to have HazMat training. (<https://www.phmsa.dot.gov/regulations/title49/interp/14-0102>). Contractors coordinating transportation will be responsible for ensuring that the drivers have the appropriate license or training.
- At a minimum, a LDR notification will accompany the first load of all hazardous waste shipped offsite.

- No waste will be accepted at the receiving facility unless it is on a pre-populated carbon copy manifest signed by Arcadis, designated rep, or NS.
- The Arcadis onsite field representative will review all shipping papers and sign the shipping papers “as an agent of Norfolk Southern Railway Company”.
- Visual inspections will be conducted by Arcadis and the USEPA/USCG prior to offsite transport to verify that the waste stream in the container is consistent with waste name identified on manifest.
- All roll-offs and dump trucks will be inspected to verify they are tarped prior to leaving the site.
- There are currently five truck wash stations (See Figure 1). All offsite waste transportation trucks must have tires washed prior to leaving the Site. Washing of additional truck surfaces will be completed as necessary.
- Prior to receiving a manifest all transportation vehicle/containers will be inspected to verify compliance with RCRA labelling and USDOT placarding requirements.
- All offsite transportation vehicles will at a minimum have wheels washed prior to leaving the site.
- There are two scales in the staging pile waste loadout area. All trucks loading from the staging piles will be weighed prior to leaving the site. Transporters are responsible for communicating general weights with the equipment operator that is loading the truck. If the scale indicates the truck is overweight, the driver will return to the staging pile where the material was derived, and the operator will remove waste.
- Liquid loads are not required to be weighed, however driver must gauge the tank and provide an estimated volume prior to leaving the site. This volume will act as the quality assurance/quality control for overweight loads.
- Trucks hauling containers (roll-offs, vacuum boxes, drums) are not required to scale out, however if the transporter is concerned, they are overweight they are encouraged to use the scales.

8.3.1 Transportation Management

NS Contractors are responsible for ensuring each transportation contractor and subcontractor confirms drivers have the appropriate training to be onsite and are authorized to haul the hazardous waste offsite to the designated disposal facility. Each driver must have:

- Appropriate USDOT training and licensed to haul USDOT class 9 hazardous waste;
- Knowledge and understanding of the:
 - Hazardous of the waste,
 - Onsite PPE requirements,
 - Truck routes onsite and to the designated facility,
 - Tarping requirements and procedures (NS training),
 - Decontamination requirements and procedures,
 - Site security requirements, and
 - Air Monitoring requirements and procedures.

8.3.2 Transloading Waste from Truck to Rail

8.3.2.1 Liquid Transfer at NSRC Yard, Lordstown, OH

The purpose of this section is to document the intended transfer methodology and operational controls to execute safe product transfer of loaded tank trucks of liquid hazardous waste, UN3082 into tank cars. The anticipated hours of operation of the transfers will be 24/7 as needed.

Truck Route to NS Yard Lordstown, OH:

- Trucks transporting hazardous waste from the East Palestine Site to the NS Yard in Lordstown, OH at 7378 South Tod Blvd., SW.
- Josh Lindley with SPSI (Exemption 6 - PII) or Robert Wood with Norfolk Southern (Exemption 6 - PII) will serve as point of contact at Lordstown, OH.
- Upon being off-loaded at the site, the trucks will reverse route back to East Palestine, OH. Cleaning of the tanks between loads is not required because these trucks are dedicated to the East Palestine hazardous waste liquids.
- Number of daily truck shipments will vary depending on availability of empty rail tank cars at Lordstown Yard. Tank cars are not loaded every day. Depending on the tank car specification, it generally takes four to five trucks to load one rail tank car.

Tank Car Management at Lordstown Yard:

- A solid rock access road for off-loading tank trailers has been established for safe access to the tank car in order to facilitate this waste water transfer.
- Receiving tank cars will be spotted on Track 106 in NS Lordstown Yard.
- Blue Flag Protection (Form is included in Attachment 8) will be in place for the track utilized for transfer operations.
- A job safety briefing will be conducted prior to any transloading operations.
- Hand brakes will be engaged, and wheel chocks shall be deployed for the receiving tank cars being loaded.
- A NS contractor will provide continuous air monitoring per the Air Monitoring Plan.
- Transfer fittings, hoses, and pumps shall be deployed, and leak tested with air or nitrogen at 20 pounds per square inch prior to transfer operations. Any leaks detected shall be corrected and retested to verify tightness prior to transferring liquids.
- Daily inspection of the rail tank car will be made while the tanks are being staged at the NS Lordstown Yard. Inspections will include looking for leaks, spills, or releases. If a leak, spill, or release is observed, corrective actions to address will be identified. The tank inspection forms is included in Attachment 8.
- Spill containment will be in place beneath truck off-load connections, transfer equipment, and receiving tank cars. Containment under rail cars, trucks and at connections/valves will be 4-mil HDPE (landfill liner) custom cut portable containment berms.
- Spill response equipment stored on-site during the transfers and immediately available includes absorbent pads, absorbent socks, and oil dry.

Hazardous Waste, Liquid Transfer Operations:

- Transfer procedures will follow AAR Pamphlet 34 guidelines.
- Hazardous waste transfer personnel will be in attendance during all transfer operations for monitoring conditions and rapid intervention contingency measures.
- Each rail tank car will be loaded to volumes roughly between 22,000 to 25,000 gallons each which is waste from four tank trucks (approx. 5,000 gallons per truck).
- After the transfer of hazardous waste and liquids has been completed, each transfer hose shall be safely cleared with nitrogen or compressed air back into the unloaded tank truck and/or into the receiving tank car prior to disassembly and container securements.
- The loaded tank car(s) will be placarded, secured, and prepared for shipment in accordance with USDOT regulations in 49 CFR Parts 172-174, including inspection of all valves, fittings, manway gaskets, and manway bolts.
- The hazardous materials shipping description is NA 3082 // Hazardous Waste, Liquid, N.O.S. (Vinyl Chloride Water) // 9 // PG III // RQ(U043) – HMRC 4860132.
- Security seals shall also be applied to the loaded tank cars.
- Tank car Waybilling information and Hazwaste Manifest PDFs will be submitted electronically to NS Revenue Waybilling via natasha.ford@nscorp.com.
- The paper manifests must be attached to a Tank Car Inspection Worksheet for each tank car loaded. The manifests and Liquid Waste Manifest Checklist must be sent to the receiving facility for completion.

Rail Service to Texas:

- There are 122 tank cars being used in the pool of cars used to transport the wastewater to Texas.
- The tank cars are being shipped to three rail stations on the Union Pacific (UP) for further handling by VLS Texas Molecular:
 - VLS, 1050 S. FM 565, Baytown, TX 77523;
 - Henniff, 4300 N. Interstate 35 E Road, Waxahachie, TX 75165; and
 - VLS, 403 Warehouse Road, Victoria, TX 77904.
- The Environmental Compliance Manager for the off-loading is Ronidell Baluyot **Exemption 6 - PII** and Project Oversight is provided by Frank Marine **Exemption 6 - PII** and Jimmy Bracher **Exemption 6 - PII**.
- The liquid will be received at the above rail yards and will be transferred back into USDOT approved trucks for transportation to the final disposal facility at 2525 Independence Parkway, South Deer Park, TX, 77536. The facility USEPA ID for Texas Molecular is TXD000719518. Transfer from the rail cars to the trucks will follow the same procedures utilized at East Palestine, OH.

Maps from East Palestine to the NSRC Lordstown Yard and maps to from each of the UP rail stations to Texas Molecular are included in Appendix C.

8.3.2.2 Solid Waste Transfers at NSRC Yard, Maple Heights, OH

Staging/Clean Box Mobilization:

- Clean EPIX specialized flat cars and boxes will be delivered to NS Maple Heights, OH Intermodal Yard (Flat cars and boxes will be stationed at Maple Heights (Cleveland, OH area) located at 5300 Greenhurst Drive, Maple Heights, OH 44137.
- Each EPIC box will be loaded onto a truck and transported from Maple Heights, OH to East Palestine, OH. At East Palestine, the intermodal box will be live loaded, placarded, and weighted. The intermodal box will then be returned to the Maple Heights Yard where it will be staged prior to being loaded onto rail.

Truck Route to Maple Heights IMF:

- Trucks transporting hazardous waste from the site to Maple Heights will do so in accordance with the approved transportation route procedure in this plan.
- Upon being loaded at the site, the truck will reverse route back to 5300 Greenhurst Drive, Maple Heights, OH.
- Upon arrival at Maple Heights, the EPIC boxes will not be removed from the chassis, and will be staged for loading onto flat cars.
- When the EPIC boxes are loaded, an intermodal crane will pick them up from the chassis and place them on a specialized flat car as they become available (no facility USEPA ID required as box just transferred from truck to rail car).
- The hazardous waste will not be removed from the EPIC box and placed into another container during shipment.

Rail Service to and from Facility:

- The containers will be staged for loading on chassies at Maple Heights but in no event will the containers be staged for more than 10 days.
- Transfer facilities can store manifested hazardous waste shipments in USDOT packages for up to 10 days without needing a hazardous waste storage permit, as described in OAC rule 3745-53-12.
- Upon placement of the boxes on the train, the movement of the boxes by rail will be in accordance with 49 CFR Part 174 – Carriage by Rail.
- As required by 49 CFR 174.9, at each location where a hazardous material is accepted for transportation or placed in a train, the carrier will inspect each rail car containing the hazardous material, at ground level, for required markings, labels, placards, securement of closures, and leakage. These inspections may be performed in conjunction with inspections required under 49 CFR Parts 215 and 232.
- The loaded intermodal/EPIC boxes are being temporarily staged at the receiving facility prior to placement on the train. This is consistent with 49 CFR 174.14, the “48-hour Rule” as recognized by the regulations and PHMSA guidance. Section 171.1(d)(1) states that the Hazardous Materials Regulations (49 CFR Parts 171-180) do not apply to “the storage of a freight container...containing hazardous material at an offeror facility prior to a carrier taking possession of the hazardous material for movement in transportation in commerce...” Per PHMSA guidance document 08-0077 the “48-hour rule is a forwarding regulation while the shipment is in transport and does not cover delivery. (Delivery requirements are outlined in §174.16). Section 174.14 (a) does not apply to intermodal transfer operations, nor does it apply to highway shipments, or residue quantities.”

- Upon placement on the train and in accordance with 49 CFR 174.14, the rail carrier must forward each shipment of hazardous materials promptly and within 48 hours (Saturdays, Sundays, and holidays excluded), after acceptance at the originating point or receipt at any yard, transfer station, or interchange point, except that where biweekly or weekly service only is performed, a shipment of hazardous materials must be forwarded on the first available train not to exceed ten days.
- The cars are placed on an interchange track after all waybill and hazardous waste manifest information are transmitted electronically to the receiving railroad. The receiving railroad continues moving those shipments in accordance with 49 CFR Parts 171 through 180.
- WCS in Andrews, TX
 - Flat cars waybilled to WCS in Andrews, TX will be interchanged in Chicago with Union Pacific Railroad to continue to the destination (rail served, direct delivery, USEPA ID Number TX988088464), where boxes will be dumped, cleaned, and returned on flat cars using the reverse route to Maple Heights, OH for reloading.

8.3.3 Truck Routes

Site truck traffic will consist of movement of waste to onsite storage area and truck traffic to facilitate offsite shipments. Onsite movement of waste will be limited to using East Taggart Street, North Pleasant Drive, and East Martin Street. Transportation plans documenting the designated routes for truck loading and truck transport through town will be provided to USEPA prior to offsite transport and disposal. Designated routes will take drivers out of East Palestine to the nearest highway. Approved truck routes for onsite and offsite movement and site features, such as scales and truck wash stations, are included as Appendix C:

1. Onsite Movement to Tank Farm Storage Areas
2. Onsite Route for Loading Offsite Disposal – Soil
3. Onsite Route for Loading Offsite Disposal – Water
4. Offsite Route for Soil to Clean Harbors Deer Trail, CO
5. Offsite Route for Soil to Heritage Thermal Services East Liverpool, OH
6. Offsite Route for Soil to Heritage Environmental Services Roachdale, IN
7. Offsite Route for Soil to Ross Incineration Services Grafton OH
8. Offsite Route for soil to NS Railyard Maple Heights, OH for disposal at Waste Control Specialists, TX
9. Offsite Route for Water to Texas Molecular Deer Park, TX
10. Offsite Route for Water to Vickery Environmental Vickery, OH
11. Offsite Route for Water to NS Lordstown Railyard, OH for disposal at Texas Molecular, TX
12. Offsite Route for Soil to Clean Harbor Deer Park, TX

NS or their designated contractor will work with the disposal facilities to determine if a designated route is needed for incoming loads.

8.4 Manifested Load Tracking

Daily reports are being provided to NS, USEPA, FRA and the onsite contractors documenting all manifested loads, the receiving facilities and waste transporters, including USEPA ID numbers. Additionally total volume and

available storage capacity is also provided in the daily reports. An example of the daily deliverable is provided in Attachment 5.

Arcadis is tracking receipt of the final manifests to ensure all manifests are received within 30 days of the load leaving the site. Exception reporting will be completed, if necessary and copies will be submitted to NS, USEPA, and OEPA.

9 Training

According to OSHA standard 29 CFR Part 1910.120, HAZWOPER training is required for any workers who perform cleanup, emergency response, or corrective actions that involve the uncontrolled release of hazardous substances. All employees involved in remedial activities and management of hazardous waste must have current HAZWOPER training. Training certificates must be maintained in the project files and be available upon request. These requirements should also be documented in the Contractor's site-specific Health and Safety Plan.

Arcadis personnel responsible for any hazardous waste task, including sampling, profiling, signing manifests, labelling, moving drums to storage, etc., will have RCRA hazardous waste training. Additional site-specific hazardous waste management training and emergency spill response training will be completed prior to management of any hazardous waste.

Arcadis personnel who are tasked with any packing and shipping samples, or signing waste manifests will have current USDOT hazardous materials transportation training per 49 CFR § 172.704.

Arcadis field personnel will comply with client-specific PPE requirements as determined by the Project Health and Safety Manager based on known and/or anticipated contaminants. Prior to opening any waste containers, field staff will check with the Health and Safety Manager regarding required PPE, respirator use, and other safety equipment.

10 Recordkeeping

NS will maintain records in accordance with Section XV of the UAO and will provide to USEPA and the States, upon request, copies of all records, reports, documents, and other information (including records, reports, documents, and other information in electronic form. All records will be available to USEPA (Section XIV of UAO; USEPA 2023). Records will be maintained in hard copy and electronic format.

Arcadis will maintain cradle to the grave records associated with the management, transportation, and disposal of waste generated at the site. These records may include but are not limited to the following:

- Waste generation logs (Record of Waste Counting);
- Waste Profile Packages (Waste profiles, analytical, approval letters);
- Waste transportation and disposal logs;
- Shipping papers (hazardous and non-hazardous manifests) and LDR documentation;
- Certificates of Disposal; and
- Manifest Exception Reporting.

A separate transportation and disposal log will be maintained that documents the offsite disposal. An example log is provided as Attachment 4. At a minimum, the transportation and disposal log will include the following:

- Date shipped offsite;
- Date received at the disposal facility;
- Waste name;
- Name of disposal facility;
- Profile approval number;
- Transporter name;
- Volume shipped (manifested volume); and
- Volume received (weight ticket).

All waste records will be maintained in the project files for a minimum of 10 years.

Acronyms:

ACM = Asbestos Containing Material
AOC = Area of Contamination
CID = Contained-In Determination
EPA = Environmental Protection Agency

OEPA = Ohio Environmental Protection Agency
UTS = Universal Treatment Standard
WWTP = East Palestine Waste Water Treatment Plant

Notes

1. Waste and Debris < 60 mm includes street sweepings and plastic pellets
2. AOC policy is not codified in the regulations but has been adopted as policy by USEPA

Table 2 - Regulatory Requirements for Temporary Units

Requirements for Temporary Unites (TUs)	Regulation	How Requirements Will Be Met
Labelling	40 CFR 262.15(a)(5) OAC rule 3745-52-17(A)(5) Ohio Admin. Code 1301:7-7-50	All waste containers and tanks will be labelled with, at a minimum, the words "hazardous waste" and an indication of the hazard. All Staging piles must be identified by signs. Modular tanks will be equipped with NFPA labels. Containers, tanks and staging piles with missing or damaged labels/sign will be relabeled. All signs and labels will be properly maintained (Section 3.2.3 of Waste Management Plan).
Container Storage Areas	40 CFR 262.17(a)(1) OAC 3745-55-70 to 55-78	
Condition of containers.		All containers and tanks will be maintained in good condition, with no leaks, corrosion, rust, or bulges. If a container or tank is not in good condition or is leaking, transfer the waste into a container that is in good condition (Section 3.2.3 of Waste Management Plan).
Compatibility of waste with containers.		Each waste stream will be stored in a different container, tank or staging pile that is compatible with the waste contained (Section 3.2.3 of Waste Management Plan).
Management of containers.		Waste containers will be kept closed and staging piles will be covered unless waste is actively being added to the container. All containers will be transported to the storage area, handled, and stored in a manner to prevent them from rupturing and to prevent the waste from leaking or spilling (Section 3.2.3 of Waste Management Plan).
Inspections- containers.		At a minimum, TUs and staging piles will undergo daily visual inspection. Inspections will be documented on the Daily Inspection Form (Section 3.2.3 of Waste Management Plan).
Containment.		TUs (containers and tanks) and staging piles will be placed on secondary containment and the secondary containment will be maintained in accordance with the Secondary Containment Standard Operating Procedures (Section 3.2.3 of Waste Management Plan).
Special requirements for ignitable or reactive waste.		NA - no ignitable or reactive wastes onsite.
Special requirements for incompatible wastes.		NA - no incompatible wastes being generated.
Closure.	40 CFR 262.17(a)(8)	Notification of Closure will be provided upon removal of TUs. Data obtained from the <i>Characterization and Remediation Work Plan for Derailment - Area Soil</i> will be used to demonstrate compliance with Closure performance standards Temporary Units (container storage areas and tank systems).
Tank systems	40 CFR 264 (subpart J) OAC rule 3745-55-90 to 55-99	
Assessment of existing tank systems integrity.		Not applicable to this derailment Site, no existing tank systems were in place prior to the derailment.

Table 2 - Regulatory Requirements for Temporary Units

Requirements for Temporary Unites (TUs)	Regulation	How Requirements Will Be Met
Design and installation of new tank systems or components.		Only pre-manufactured temporary storage tanks and modular tanks will be used as TUs to store hazardous waste. All tanks (temporary storage tanks and modular tanks) and containers (roll-off boxes, vacuum boxes, drums, totes) are constructed of high quality steel and are constructed according to recognized engineering standards.
Containment and detection of releases.		<p>Farms 5 and 6 have HDPE liner covering the entire storage area with additional HDPE installed under the temporary storage tanks. Rig mats have been placed over the liner to prevent punctures. A containment berm was created using hay bale berms overlain by HDPE liner.</p> <p>Tank Farms 2 and 3, Stand by Tank Farms 2 and 3 and the waste water treatment plant have individual HDPE liners installed under each temporary tank and container storage area.</p> <p>Both Modular tanks were installed within a single secondary containment consisting of an impermeable liner (120 mil Linear Low-Density Polyethylene (LLDPE) liner manufactured by ATARFIL), steel sheet piles, and earthen berms. Modular tanks are equipped with visual and audible high-level alarms will be installed on each tank. All tank inflow pumps will be programmed to automatically shut down when the tank level reaches the maximum usable capacity as indicated by the first level alarm.</p> <p>Tank Farms are monitored 24/7 by personnel gauging tanks and providing oversight of offloading/loading operations. Release detection for temporary tanks is limited to visual inspection and observation.</p>
General operating requirements.		For modular tanks the loading and offloading procedures and tank system operations is provided in the <i>Modular Tank Summary Sheet (April7, 2023, Arcadis)</i> General operating requirements for temporary storage tanks are provided by the manufacturer.
Inspections - tank systems.		All tanks and tank systems will be inspected daily, at a minimum.
Response to leaks or spills and disposition of leaking or unfit for use tank systems.		See section 7 of Waste Management Plan for emergency response procedures and notifications in accordance with UAO.
Closure and post-closure care.		Notification of Closure will be provided upon removal of TUs. Data obtained from the Characterization and Remediation Work Plan for Derailment - Area Soil will be used to demonstrate compliance with Closure performance standards Temporary Units (container storage areas and tank systems).

Table 2 - Regulatory Requirements for Temporary Units

Requirements for Temporary Unites (TUs)	Regulation	How Requirements Will Be Met
Special requirements for ignitable waste or reactive waste - tank systems.		NA - no ignitable or reactive waste have been generated from remedial activities.
Special requirements for incompatible wastes.		NA - no incompatible wastes have been generated.

Safety Data Sheets

SAFETY DATA SHEET

M9192 - North America - EN

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

SECTION 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Company Identification:	Oxy Vinyls, LP 14555 Dallas Parkway, Suite 400 Dallas, Texas 75254-4300
24 Hour Emergency Telephone Number:	1-800-733-3665 (USA); CANUTEC (Canada): 1-613-996-6666; CHEMTREC (within USA and Canada): 1-800-424-9300; CHEMTREC (outside USA and Canada): +1 703-527-3887; CHEMTREC Contract No: CCN16186
To Request an SDS:	MSDS@oxy.com or 1-972-404-3245
Customer Service:	1-800-752-5151 or 1-972-404-3700
Product Identifier:	VINYL CHLORIDE (MONOMER)
Synonyms:	VCM; Monochloroethylene; Chloroethene; Ethylene, chloro-; Vinyl chloride monomer
Product Use:	PVC Manufacturing
Uses Advised Against:	Aerosol propellant.
Restrictions on Use (United States):	FOR INDUSTRIAL USE ONLY.
Restrictions on Use (EU):	In accordance with Article XVII of the regulation, vinyl chloride should not be used as an aerosol propellant.
Other Global Restrictions on Use:	FOR USE IN INDUSTRIAL INSTALLATIONS ONLY. Other restrictions on use based on local, regional, or national regulations may exist and must be determined on a case-by-case basis.

VINYL CHLORIDE (MONOMER)

SDS No.: M9192
 Supersedes Date: 2015-06-April

Rev. Date: 30-Nov-2020

SECTION 2. HAZARDS IDENTIFICATION

OSHA REGULATORY STATUS: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

EMERGENCY OVERVIEW:

Color: Colorless
Physical State: Compressed, liquefied gas
Odor: Sweet

Signal Word: **DANGER**

MAJOR HEALTH HAZARDS: CONTAINS VINYL CHLORIDE, A KNOWN HUMAN CANCER AGENT. CONTACT WITH LIQUID MAY CAUSE FROSTBITE TO EXPOSED TISSUE. MAY PRODUCE SYMPTOMS OF CENTRAL NERVOUS SYSTEM DEPRESSION INCLUDING HEADACHE, DIZZINESS, NAUSEA, LOSS OF BALANCE AND DROWSINESS. MAY CAUSE RESPIRATORY IRRITATION. CAUSES DAMAGE TO THE NERVOUS SYSTEM, MUSKOSKELETAL SYSTEM, LYMPHATIC SYSTEM AND RESPIRATORY SYSTEM THROUGH PROLONGED OR REPEATED EXPOSURE. SUSPECTED OF CAUSING GENETIC DEFECTS. MAY CAUSE CANCER. THIS MATERIAL IS A POTENTIAL ENDOCRINE DISRUPTOR.

PHYSICAL HAZARDS: MAY MASS EXPLODE IN FIRE. EXTREMELY FLAMMABLE GAS. CONTAINS GAS UNDER PRESSURE, MAY EXPLODE IF HEATED. POLYMERIZATION CAN OCCUR.

PRECAUTIONARY STATEMENTS: Keep away from heat/ sparks/ open flames/ hot surfaces - No smoking. Requires stabilizer to prevent potential dangerous polymerization. Keep only in original container or container compatible with product (see Section 7 - Safe Storage Conditions). Ground/ bond container and receiving equipment. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe vapors. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves, protective clothing, eye, and face protection.

HAZARD CLASSIFICATION:

GHS: PHYSICAL HAZARDS:	Flammable Gas - Cat. 1 Extremely Flammable Gas Under Pressure - Liquefied Explosive - Division 1.5
GHS: TARGET ORGAN TOXICITY (SINGLE EXPOSURE):	Category 3 - May cause respiratory tract irritation Category 3 - May cause drowsiness or dizziness
GHS: TARGET ORGAN TOXICITY (REPEATED EXPOSURE):	Category 1 - Causes damage to the nervous system, musculoskeletal system, lymphatic system and respiratory

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

	system through prolonged or repeated exposure
GHS: CARCINOGENICITY:	Category 1A - May cause cancer
GHS: GERM CELL MUTAGENICITY:	Category 2 - Suspected of causing genetic defects

GHS SYMBOL: Flame, Gas cylinder, Exclamation mark, Health hazards**GHS SIGNAL WORD:** DANGER**GHS HAZARD STATEMENTS:****GHS - Physical Hazard Statement(s)**

- May mass explode in fire
- Extremely flammable gas
- Contains gas under pressure; may explode if heated

GHS - Health Hazard Statement(s) -

- May cause respiratory irritation
- May cause drowsiness or dizziness
- Suspected of causing genetic defects
- May cause cancer
- May cause damage to organs through prolonged or repeated exposure: (nervous system, musculoskeletal system, lymphatic system, respiratory system)

GHS - Precautionary Statement(s) - Prevention

- Keep away from heat/sparks/open flames/hot surfaces - No smoking
- Stabilize with a polymerization inhibitor (e.g. p-Methoxyphenol [Hydroquinone Monomethyl Ether]) or purging to remove oxygen
- Keep only in original container or container compatible with product (see Section 7 - Safe Storage Conditions)
- Ground/ bond container and receiving equipment
- Obtain special instructions before use
- Do not handle until all safety precautions have been read and understood
- Do not breathe dust/fume/gas/mist/vapors/spray
- Use personal protective equipment as required
- Wear protective gloves/protective clothing/eye protection/face protection
- Wash thoroughly after handling
- Do not eat, drink or smoke when using this product
- Use only outdoors or in a well-ventilated area

GHS - Precautionary Statement(s) - Response

- Leaking gas fire: Do not extinguish, unless leak can be stopped safely
- Eliminate all ignition sources if safe to do so
- IF INHALED: Remove person to fresh air and keep comfortable for breathing
- IF INHALED: Call a POISON CENTER or doctor/physician if you feel unwell
- IF exposed or concerned: call a POISON CENTER or doctor/physician

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

GHS - Precautionary Statement(s) - Storage

- Store in accordance with manufacturer's recommendations (See Section 7 of the SDS)
- Store in a well-ventilated place. Keep container tightly closed
- Protect from sunlight
- Store in a secure manner

GHS - Precautionary Statement(s) - Disposal

- Dispose of contents and container in accordance with applicable local, regional, national, and/or international regulations

Physical Hazards Not Otherwise Classified

- Polymerization can occur

Hazard Not Otherwise Classified (HNOC)-Health

- Repeat occupational exposure to Vinyl Chloride have been associated with Raynaud syndrome and associated scleroderma-like skin changes on the hands
- Direct contact with liquid or rapidly expanding gas may cause frostbite to contacted tissue (eyes, skin, etc.)
- Vinyl Chloride is listed on The Endocrine Disruptors Exchange's (TEDX) List of Potential Endocrine Disruptors database of chemicals with the potential to affect the endocrine system. Every chemical on the TEDX List has one or more verified citations published, accessible, primary scientific research demonstrating effects on the endocrine system
- May displace oxygen and cause rapid suffocation

See Section 11: TOXICOLOGICAL INFORMATION

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS Number	Percent [%]
Vinyl Chloride	75-01-4	99 - 100

SECTION 4. FIRST AID MEASURES

INHALATION: If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. If breathing is difficult, oxygen should be administered by qualified personnel. If respiration or pulse has stopped, have a trained person administer basic life support (Cardio-Pulmonary Resuscitation and/or Automatic External Defibrillator) and CALL FOR EMERGENCY SERVICES IMMEDIATELY.

SKIN CONTACT: If frostbite or freezing occur, immediately flush with plenty of lukewarm water (100-105 °F, 38-41 °C). GET MEDICAL ATTENTION IMMEDIATELY.

EYE CONTACT: Immediately flush eyes with a directed stream of water for at least 15 minutes, forcibly holding eyelids apart to ensure complete irrigation of all eye and lid tissues. Washing eyes within several seconds is essential

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

to achieve maximum effectiveness. GET MEDICAL ATTENTION IMMEDIATELY.

INGESTION: Not a likely route of exposure in occupational environment.

Most Important Symptoms/Effects (Acute and Delayed):

Acute Symptoms/Effects:

Inhalation (Breathing): Respiratory Tract Irritation: rhinitis, scratchy throat, cough, sore throat, runny nose, wheezing, difficulty breathing (dyspnea). Inhalation of this material may cause central nervous system depression (narcotic effects).

Skin: Skin Irritation. If spilled on skin, rapid evaporation can cause local frostbite with redness, blistering, and scaling.

Eye: Eye Irritation. Rapid evaporation can cause local frostbite with corneal and conjunctival irritation or burns. High concentrations of vapor can cause eye irritation.

Ingestion (Swallowing): Ingestion is not a likely route of exposure.

Other Health Effects: Narcotic Effects (Central Nervous System Depression): Ataxia or dizziness, drowsiness or fatigue, loss of consciousness, headache, euphoria and irritability, visual or hearing disturbances, nausea, memory loss.

Delayed Symptoms/Effects:

- Carcinogen: Long term significant occupational overexposure to VCM has been associated with a specific cancer (angiosarcoma of the liver) and is associated with hepatocellular cancer
- Suspected mutagen and suspected of causing reproductive damage
- Repeated exposure can damage the skin (scleroderma), bones (acro-osteolysis) and blood vessels in the hand (Raynaud's Syndrome)
- Scleroderma is characterized by a hardening and tightening of patches of skin
- Raynaud's syndrome is characterized by an exaggerated response to cold temperatures or emotional distress, which can cause numbness, pain or color changes in the fingers or toes

Protection of First-Aiders: Protect yourself by avoiding contact with this material. Direct contact with liquid may cause frostbite to exposed tissue (eyes, skin, etc.). Use personal protective equipment (PPE). Refer to Section 8 for specific PPE recommendations. At minimum, treating personnel should utilize PPE sufficient for prevention of bloodborne pathogen transmission.

Notes to Physician: There is no specific antidote. Treat symptoms with supportive care. Cardiac stimulants such as epinephrine should be avoided in persons overexposed to chlorinated hydrocarbons.

Interaction with Other Chemicals Which Enhance Toxicity: Alcohol may enhance toxic effects.

Medical Conditions Aggravated by Exposure: Alcoholic Liver Disease. Infectious Hepatitis. Cirrhosis.

SECTION 5. FIRE-FIGHTING MEASURES

Fire Hazard: Severe fire hazard. Vapor/air mixtures are explosive. Vapors or gases may ignite at distant sources and flash back. Containers may rupture or explode if exposed to heat.

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

Extinguishing Media: Stop flow of gas before extinguishing fire. Use carbon dioxide, regular dry chemical, foam or water. Use water spray to keep containers cool.

Fire Fighting: If material on fire or involved in fire: Do not extinguish fire unless flow can be stopped. Use water in flooding quantities as fog. Cool all affected containers with flooding quantities of water. Apply water from as far a distance as possible. For fires in cargo or storage area: Cool containers with water from unmanned hose holder or monitor nozzles until well after fire is out. If this can't be done, then take the following precautions: Keep unnecessary people away, isolate hazard area and deny entry. Let the fire burn. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tanks due to fire. For tank, rail car or tank truck: Stop leak if possible without personal risk. Let burn unless leak can be stopped immediately. Wear NIOSH approved positive-pressure self-contained breathing apparatus operated in pressure demand mode.

Hazardous Combustion Products: Oxides of carbon; Hydrogen chloride; Phosgene

Sensitivity to Mechanical Impact: Not sensitive.

Sensitivity to Static Discharge: Electrostatic charges may build up during handling and may form ignitable vapor-air mixtures in storage containers. Ground equipment in accordance with industry standards and best practices such as NFPA 77 [Recommended Practices on Static Electricity (2007)] and American Petroleum Institute (API) RP Recommended Practice 2003 [Protection Against Ignitions Arising out of Static, Lightning, and Stray Currents (2008)].

Lower Flammability Level (air): 3.6%

Upper Flammability Level (air): 33.0%

Flash point: -108 °F (-78 °C)

Auto-ignition Temperature: 882 °F (472 °C)

GHS: PHYSICAL HAZARDS:

- Flammable Gas - Cat. 1 Extremely Flammable
- Gas Under Pressure - Liquefied
- Explosive - Division 1.5

Physical Hazards Not Otherwise Classified

- Polymerization can occur
-

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Isolate hazard area and deny entry. Keep unnecessary and unprotected persons away. Eliminate all sources of heat and ignition. Ventilate closed spaces before entering. Wear appropriate personal protective equipment recommended in Section 8, Exposure Controls / Personal Protection, of the SDS. Refer to Section 7, Handling and Storage, for additional precautionary measures.

Environmental Precautions: Keep out of water supplies and sewers. Releases should be reported, if required,

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

to appropriate agencies.

Methods and Materials for Containment, Confinement, and/or Abatement: Remove sources of ignition. Ventilate closed spaces before entering. Stop leak if possible without personal risk. Vapors or gases may ignite at distant ignition sources and flash back. See Section 13, Disposal considerations, for additional information.

SECTION 7. HANDLING AND STORAGE

Handling:

Precautions for Safe Handling: Avoid breathing vapor or mist. Avoid contact with skin, eyes and clothing. Keep away from heat, sparks and flame. Ground any equipment used in handling. Use non-sparking tools and equipment. All energized electrical equipment must be designed in accordance with the electrical classification of the area.

Technical measures/precautions: Do not allow liquid Vinyl Chloride to be trapped between closed valves, resulting in extremely high pressure, which could result in a gasket or line leak.

Other precautions: Simple Asphyxiant - May displace oxygen and cause rapid suffocation.

Prevention of contact: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe vapors. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves, protective clothing, eye, and face protection.

Storage:

Safe Storage Conditions: Store and handle in accordance with all current regulations and standards. Keep container tightly closed and properly labeled. Store in a cool, dry area. Store in a well-ventilated area. Do not enter confined spaces unless adequately ventilated. Avoid heat, flames, sparks and other sources of ignition. May be subject to storage regulations: U.S. OSHA 29 CFR 1910.106. Keep separated from incompatible substances (see below or Section 10 of the Safety Data Sheet).

Technical measures: An unstable polyperoxide may be formed in Vinyl Chloride through oxidation by atmospheric oxygen in the presence of any of a variety of contaminants. Storage under these conditions for a long period increases the concentration of unstable polyperoxide to hazardous levels.

Incompatible Substances: Oxidizing agents, oxides of nitrogen, metals, aluminum, aluminum alloys, copper, metal alkyl complexes and alkali metals such as sodium, potassium and their alloys.

Packaging Material: Containers of Vinyl Chloride shall be legibly labeled either: VINYL CHLORIDE: EXTREMELY FLAMMABLE GAS UNDER PRESSURE: CANCER SUSPECT AGENT or with the additional legend, CANCER-SUSPECT AGENT applied near the label or placard. 29 CFR 1910.1017. Procedures for the handling, use, and storage of cylinders should comply with OSHA 1910.101 and 1910.169, as with the recommendations of the Compressed Gas Association. A regulated, marked area should be established where this chemical is handled, used, or stored in compliance with OSHA Standard 1910.1045.

GHS: PHYSICAL HAZARDS:

- Flammable Gas - Cat. 1 Extremely Flammable
 - Gas Under Pressure - Liquefied
-

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

- Explosive - Division 1.5

Physical Hazards Not Otherwise Classified

- Polymerization can occur

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION**REGULATORY EXPOSURE LIMIT(S):**

See 29 CFR 1910.1017 (OSHA's regulatory standard for Vinyl Chloride) for additional requirements when 8-hour action level (0.5 ppm TWA) is exceeded. Listed below for the product components that have regulatory occupational exposure limits (OEL's).

Component	OSHA Final PEL TWA	OSHA Final PEL STEL	OSHA Final PEL Ceiling
Vinyl Chloride 75-01-4 (99 - 100 %)	1 ppm	5 ppm	-----

OEL: Occupational Exposure Limit; OSHA: United States Occupational Safety and Health Administration; PEL: Permissible Exposure Limit; TWA: Time Weighted Average; STEL: Short Term Exposure Limit

Component	Canada - TWAs	Canada - STELs	Canada - Ceilings
Vinyl Chloride 75-01-4 (99 - 100 %)	Ontario - 1 ppm (TWA) Alberta - 1 ppm (TWA) Alberta - 2.6 mg/m ³ (TWA) British Columbia - 1 ppm (TWA)	-----	-----

NON-REGULATORY EXPOSURE LIMIT(S):

Listed below are the product components that have advisory (non-regulatory) occupational exposure limits (OEL's) established.

Component	ACGIH TWA	ACGIH STEL	ACGIH Ceiling	Skin Absorption - ACGIH	OSHA TWA (Vacated)	OSHA STEL (Vacated)	OSHA Ceiling (Vacated)
Vinyl Chloride 75-01-4 (99 - 100 %)	1 ppm	-----	-----	-----	-----	-----	-----

- The American Conference of Governmental Industrial Hygienists (ACGIH) is a voluntary organization of professional industrial hygiene personnel in government or educational institutions in the United States. The ACGIH develops and publishes recommended occupational exposure limits each year called Threshold Limit Values (TLVs) for hundreds of chemicals, physical agents, and biological exposure indices.

ENGINEERING CONTROLS: Use closed systems when possible. Provide local exhaust ventilation where vapor may be generated. Ensure compliance with applicable exposure limits.

VINYL CHLORIDE (MONOMER)

SDS No.: M9192
Supersedes Date: 2015-06-April

Rev. Date: 30-Nov-2020

PERSONAL PROTECTIVE EQUIPMENT:

Eye Protection: Wear safety glasses with side-shields. If eye contact is likely, wear chemical resistant safety goggles. Provide an emergency eyewash fountain and quick drench shower in the immediate work area.

Skin and Body Protection: Wear appropriate chemical resistant clothing.

Hand Protection: Wear appropriate chemical resistant gloves. Consult a glove supplier for assistance in selecting an appropriate chemical resistant glove.

Protective Material Types: Butyl rubber, Nitrile, Silver Shield®, Viton®

Respiratory Protection: Refer to 29 CFR 1910.1017 for selection of respirators for vinyl chloride. A respiratory protection program that meets applicable regulatory requirements must be followed whenever workplace conditions warrant use of a respirator.

HYGIENE MEASURES: Obtain proper training prior to use.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Compressed, liquefied gas
Color:	Colorless
Odor:	Sweet
Molecular Weight:	62.5
Molecular Formula:	C ₂ H ₃ Cl
pH:	Not applicable
Melting Point/Range:	-244.82 (°F)
Freezing Point/Range:	No data available
Flash point:	-108 °F (-78 °C)
Vapor Pressure:	2660 mmHg @ 25 °C
Vapor Density (air=1):	2.15
Relative Density/Specific Gravity (water=1):	0.91 @ 25/25 °C
Water Solubility:	2.7 g/L
Partition Coefficient (n-octanol/water):	Log Kow = 1.36
Auto-ignition Temperature:	882 °F (472 °C)
Decomposition Temperature:	Not applicable
Odor Threshold [ppm]:	Not reliable to prevent excessive exposure
Evaporation Rate (ether=1):	>15
VOC Content (%):	100%
Volatility:	100%
Flammability (solid, gas):	No data available
Lower Flammability Level (air):	3.6%
Upper Flammability Level (air):	33.0%
Viscosity:	Not applicable

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Generally stable at normal temperatures and pressures; however, may violently polymerize or generate other hazardous conditions when not stabilized and/or stored correctly.

Reactivity: Explosive or violent polymerization can occur when exposed to air, sunlight, or excessive heat if not properly stabilized. Polymerizes exothermically in the presence of light, air, oxygen or catalyst. Reacts with the following incompatible materials and create a strong exothermic reaction: oxygen, moisture, polymerization additives, copper, aluminum, oxidizing agents, strong alkalis, and strong acids. Reacts with air to form peroxides. Shock sensitive compounds may be formed.

Possibility of Hazardous Reactions: In addition to violent polymerization, Vinyl Chloride may also react with organic peroxides, strong bases, and oxidizing agents resulting in potential heat generation, fire, and/or explosion. At 15°C – 208°C ultraviolet (UV) can initiate a reaction between VCM with excessive oxygen, to produce peroxides (e.g. polyperoxides, polyvinyl peroxides) which can automatically ignite on their own to create an explosive condition under extreme heat or impact. Peroxides may also cause uncontrollable polymerization reactions at high concentrations or temperatures. Further heating to 358°C causes peroxides to decompose to formaldehyde, carbon monoxide and hydrogen chloride.

Conditions to Avoid (e.g., static discharge, shock, or vibration): Electrostatic charges may build up during handling and may form ignitable vapor-air mixtures in storage containers. Ground equipment in accordance with industry standards and best practices such as NFPA 77 [Recommended Practices on Static Electricity (2007)] and American Petroleum Institute (API) RP Recommended Practice 2003 [Protection Against Ignitions Arising out of Static, Lightning, and Stray Currents (2008)]. Avoid air and sunlight. Avoid heat, flames, sparks and other sources of ignition. Containers may rupture or explode if exposed to heat.

Incompatible Substances: Oxidizing agents, oxides of nitrogen, metals, aluminum, aluminum alloys, copper, metal alkyl complexes and alkali metals such as sodium, potassium and their alloys.

Hazardous Decomposition Products: Oxides of Carbon, Chlorine, Hydrogen chloride, Phosgene.

Hazardous Polymerization: Polymerization can occur. Exposure to the following conditions or mixtures with the following elements and materials can cause explosive or violent polymerization of VCM: Air, Sunlight, Excessive heat, Oxidizers, Catalytic metals, such as copper, aluminum and their alloys and certain catalytic impurities. Avoid elevated temperatures, oxidizing agents, oxides of nitrogen, oxygen, peroxides, other polymerization catalysts/initiators, air and sunlight.

SECTION 11. TOXICOLOGICAL INFORMATION

POTENTIAL HEALTH EFFECTS:

ACUTE TOXICITY:

Eye contact: Causes eye irritation. Rapid evaporation of the material may cause frostbite.

Skin contact: Causes skin irritation. Rapid evaporation of the material may cause frostbite.

VINYL CHLORIDE (MONOMER)

SDS No.: M9192
Supersedes Date: 2015-06-April

Rev. Date: 30-Nov-2020

Inhalation: May cause respiratory tract irritation. Several minutes of exposure to high, but attainable concentrations (over 1000 ppm) may cause difficulty breathing, central nervous system depression and symptoms such as: ataxia or dizziness, drowsiness or fatigue, loss of consciousness, headache, euphoria and irritability, visual and or hearing disturbances, nausea, memory loss. Prolonged, high concentration exposures may cause unconsciousness or death. Cardiac: Acute intoxication may cause irregular heartbeats.

Ingestion: Not a likely route of exposure in occupational settings.

CHRONIC TOXICITY:

Chronic Effects: Chronic exposure to Vinyl Chloride monomer (VCM) may cause damage to the nervous system, respiratory system, musculoskeletal system, and lymphatic system. Occupational overexposure has produced a specific cancer (angiosarcoma of the liver) and is associated with hepatocellular cancer. Repeated prolonged exposure may damage: skin (scleroderma), bones (acro-osteolysis), blood vessels in the hands (Raynaud's Syndrome). Suspected of causing genetic defects. Suspected of damaging fertility or the unborn child. Reproductive effects and testes damage occurred in rats exposed to vinyl chloride. These endpoints, however, were generally noted at concentrations greater than those necessary to cause liver damage.

SIGNS AND SYMPTOMS OF EXPOSURE:

Inhalation (Breathing): Respiratory Tract Irritation: rhinitis, scratchy throat, cough, sore throat, runny nose, wheezing, difficulty breathing (dyspnea). Inhalation of this material may cause central nervous system depression (narcotic effects).

Skin: Skin Irritation. If spilled on skin, rapid evaporation can cause local frostbite with redness, blistering, and scaling.

Eye: Eye Irritation. Rapid evaporation can cause local frostbite with corneal and conjunctival irritation or burns. High concentrations of vapor can cause eye irritation.

Ingestion (Swallowing): Ingestion is not a likely route of exposure.

Other Health Effects: Narcotic Effects (Central Nervous System Depression): Ataxia or dizziness, drowsiness or fatigue, loss of consciousness, headache, euphoria and irritability, visual or hearing disturbances, nausea, memory loss.

Interaction with Other Chemicals Which Enhance Toxicity: Alcohol may enhance toxic effects.

GHS HEALTH HAZARDS:

GHS: TARGET ORGAN TOXICITY (SINGLE EXPOSURE): Category 3 - May cause respiratory tract irritation
 Category 3 - May cause drowsiness or dizziness

GHS: TARGET ORGAN TOXICITY (REPEATED EXPOSURE): Category 1 - Causes damage to the nervous system, musculoskeletal system, lymphatic system and respiratory system through prolonged or repeated exposure

GHS: CARCINOGENICITY: Category 1A - May cause cancer

GHS: GERM CELL MUTAGENICITY: Category 2 - Suspected of causing genetic defects

TOXICITY DATA:

PRODUCT TOXICITY DATA: Data is from studies conducted internally.

LD50 Oral: > 4,000 mg/kg oral-rat LD50	LD50 Dermal: -----	LC50 Inhalation: -----
--	------------------------------	----------------------------------

COMPONENT TOXICITY DATA: The component toxicity data is populated by the LOLI database and may differ

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

from the product toxicity data given.

Component	Oral LD50	Dermal LD50	Inhalation LC50
Vinyl Chloride	500 mg/kg (Rat)	No data available	18 pph (15-min Rat)

Skin/Eye Irritation/Corrosion: Liquid Vinyl Chloride may freeze tissue and produce a chemical burn as it evaporates, causing damage to the underlying tissue.

Skin Absorbent / Dermal Route: NO.

RESPIRATORY OR SKIN SENSITIZATION: Not classified as a skin or respiratory sensitizer per GHS criteria.

CARCINOGENICITY: Category 1A - May cause cancer. Vinyl Chloride is a multi-site carcinogen in animals inducing angiosarcomas at many sites (though predominantly liver), hepatocellular tumors, tumors of the mammary, and lung tumors. Worker cohort studies indicate that occupational exposure to Vinyl Chloride is not strongly associated with increased mortality risk from respiratory disease or cancers other than liver and biliary tract cancers (predominantly angiosarcomas).

SPECIFIC TARGET ORGAN TOXICITY (Single Exposure): Category 3 - May cause drowsiness or dizziness. Category 3 - May cause respiratory irritation.

SPECIFIC TARGET ORGAN TOXICITY (Repeated or Prolonged Exposure): Chronic exposure to Vinyl Chloride monomer (VCM) may cause damage to the nervous system, respiratory system, musculoskeletal system, and lymphatic system.

INHALATION HAZARD: Inhalation is associated with both acute and chronic health effects.

IN-VITRO / IN-VIVO GENOTOXICITY: Vinyl Chloride has tested positive for mutagenicity in in vitro and in vivo test systems. Category 2 - Suspected of causing genetic defects. Mutagenic in bacteria studies. Genetic studies in animals were negative in some cases and positive in others.

REPRODUCTIVE TOXICITY: In a recent well conducted combined two-generation reproductive/developmental study in rats the NOAEC for developmental effects was 1,100 ppm (2816 mg/m³), the highest dose tested (Thornton, 2002). There was no effect of treatment on sex ratio, fetal body weight or number or type of malformations. The substance is not classified as toxic for reproduction, according to GHS.

DEVELOPMENTAL TOXICITY: No maternal or developmental toxicity was seen at the 10 ppm exposure level. At the 100 ppm level only maternal toxicity seen was an increase in kidney weight relative to Day 20 gestation weight. At the 1100 ppm exposure level both kidney and liver weights increased. No developmental toxicity was seen at either level.

ASPIRATION HAZARD: Not classified as an aspiration hazard per GHS criteria.

TOXICOKINETICS: The pattern of pulmonary elimination of 10 and 1000 ppm Vinyl Chloride is similar first-order kinetics, with half-lives of 20.4 and 22.4 minutes respectively. The half-lives for the initial phase of excretion of (14)°C radioactivity in urine were 4.6 and 4.1 hours, respectively.

METABOLISM: Vinyl Chloride is primarily and rapidly metabolized in the liver, and this metabolism is saturable. The first step in the metabolism of vinyl chloride is oxidation, which is predominantly mediated by human cytochrome P450 (CYP) 2E1, to form the highly reactive chloroethylene oxide, which can spontaneously rearrange to chloroacetaldehyde. Conjugation of chloroethylene oxide and chloroacetaldehyde with glutathione (GSH) eventually

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

leads to the major urinary metabolites N-acetyl-S-(2-hydroxyethyl)cysteine and thiodiglycolic acid. Chloroethylene oxide and chloroacetaldehyde can also be detoxified to glycolaldehyde by microsomal epoxide hydrolase (mEH) and to the urinary metabolite chloroacetic acid by aldehyde dehydrogenase 2 (ALDH2), respectively.

BIOLOGICAL DISTRIBUTION: See Toxicokinetics above.

ENDOCRINE DISRUPTOR: Vinyl Chloride is listed on The Endocrine Disruptors Exchange's (TEDX) List of Potential Endocrine Disruptors database of chemicals with the potential to affect the endocrine system. Every chemical on the TEDX List has one or more verified citations published, accessible, primary scientific research demonstrating effects on the endocrine system.

NEUROTOXICITY: Neurotoxicity/ Neuropathological alterations were observed in rats exposed to 78,000 mg/ m³ vinyl chloride (4 hr/day, 5 days/week) for 12 months. During the exposure period, the rats were slightly soporific. Histopathology revealed diffuse degeneration in the gray and white matter of the brain and at the level of the white matter zones of reactive gliosis. In the cerebellum, atrophy of the granular layer and degeneration of Purkinje cells were most prominent. In addition, peripheral nerve bundles were often surrounded and invaded by fibrotic processes.

IMMUNOTOXICITY: The major immunological abnormalities reported in vinyl chloride disease patients include hyperimmunoglobulinemia with a polyclonal increase in IgG, cryoglobulinemia, cryofibrinogenemia, and in vivo activation of complement.

Hazard Not Otherwise Classified (HNOC)-Health

- Repeat occupational exposure to Vinyl Chloride have been associated with Raynaud syndrome and associated scleroderma-like skin changes on the hands
- Direct contact with liquid or rapidly expanding gas may cause frostbite to contacted tissue (eyes, skin, etc.)
- Vinyl Chloride is listed on The Endocrine Disruptors Exchange's (TEDX) List of Potential Endocrine Disruptors database of chemicals with the potential to affect the endocrine system. Every chemical on the TEDX List has one or more verified citations published, accessible, primary scientific research demonstrating effects on the endocrine system
- May displace oxygen and cause rapid suffocation

SECTION 12. ECOLOGICAL INFORMATION**ECOTOXICITY (EC, IC, and LC):**

<i>Component:</i>	<i>Freshwater Fish:</i>	<i>Invertebrate Toxicity:</i>	<i>Algae Toxicity:</i>	<i>Other Toxicity:</i>
Vinyl Chloride 75-01-4 (99 - 100 %)	*LC50 Brachydanio rerio: 210 mg/L 96h	-----	*EC50 Chilomonas paramecium (48 h) =943 mg/L	No data available

Aquatic Toxicity:

This material is believed to be practically non-toxic to fish on an acute basis (LC50>100 mg/L).

FATE AND TRANSPORT:

PERSISTENCE: Tropospheric half-life is estimated to be 23 hours. If released to air, this material will remain in the gas phase. If released to soil, volatilization will occur, but material that does not volatilize may be highly

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

mobile. If released to water, evaporation will occur.

BIODEGRADATION: Vinyl chloride may degrade under anaerobic conditions.

BIOCONCENTRATION: Bioconcentration potential is low (BCF <100 or log Kow <3).

BIOACCUMULATIVE POTENTIAL: This material is believed not to bioaccumulate.

MOBILITY IN SOIL: The Koc of vinyl chloride has been reported to be 57. According to a classification scheme, this Koc value suggests that vinyl chloride is expected to have high mobility in soil.

SECTION 13. DISPOSAL CONSIDERATIONS

Waste from material:

Reuse or reprocess, if possible. May be subject to disposal regulations. Dispose in accordance with all applicable regulations. Generators of waste (equal to or greater than 100 kg/mo) containing this contaminant, EPA hazardous waste number U043 and D043, must conform with USEPA regulations in storage, transportation, treatment and disposal of waste.40 CFR 240-280, 300-306, 702-799 (USEPA). If the material is to be incinerated, the chemical incinerator must be equipped with an afterburner (to assure complete combustion to prevent the formation of phosgene) and an acid scrubber (to remove the halo acids produced).

Container Management:

Refer to manufacturer/supplier for information on recovery/recycling. Dispose of container in accordance with applicable local, regional, national, and/or international regulations. Container rinsate must be disposed of in compliance with applicable regulations.

Contaminated Material:

Contaminated material must be disposed of in a permitted waste management facility.

SECTION 14. TRANSPORT INFORMATION

LAND TRANSPORT

U.S. DOT 49 CFR 172.101:

UN NUMBER: UN1086
PROPER SHIPPING NAME: Vinyl chloride, stabilized
HAZARD CLASS/ DIVISION: 2.1
LABELING REQUIREMENTS: 2.1
RQ (lbs.): RQ 1 Lbs. (Vinyl chloride)

Special provisions for transport: 21, B44, N86, T50.

VINYL CHLORIDE (MONOMER)

SDS No.: M9192
Supersedes Date: 2015-06-April

Rev. Date: 30-Nov-2020

Packaging Exceptions 306.
Non-bulk Packaging: 304.
Bulk Packaging: 314, 315.

CANADIAN TRANSPORTATION OF DANGEROUS GOODS:

UN NUMBER: UN1086
SHIPPING NAME: Vinyl chloride, stabilized
CLASS OR DIVISION: 2.1
LABELING REQUIREMENTS: 2.1
RQ (lbs): RQ 1 Lbs. (Vinyl chloride)

MARITIME TRANSPORT (IMO / IMDG)

UN NUMBER: UN1086
PROPER SHIPPING NAME: Vinyl chloride, stabilized
HAZARD CLASS / DIVISION: 2.1
LABELING REQUIREMENTS: 2.1

AIR TRANSPORT (ICAO / IATA)

Special Instructions CAO: IATA Certificate for shipping personnel is required

SECTION 15. REGULATORY INFORMATION**U.S. REGULATIONS****OSHA REGULATORY STATUS:**

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

CERCLA SECTIONS 102a/103 HAZARDOUS SUBSTANCES (40 CFR 302.4):

If a release is reportable under CERCLA section 103, notify the state emergency response commission and local emergency planning committee. In addition, notify the National Response Center at (800) 424-8802 or (202) 426-2675.

Component	U.S. DOT Hazardous Substances/ RQs	CERCLA Hazardous Substances / RQs	CERCLA Section 302 EHS EPCRA RQs	Section 302 Threshold Planning Quantity (TPQ)
Vinyl Chloride 75-01-4 (99 - 100)	1 lbs(RQ)	1 lb	Not listed	Not Listed

SARA EHS Chemical (40 CFR 355.30)

Not regulated.

EPCRA SECTIONS 311/312 HAZARD CATEGORIES (40 CFR 370.10):

Acute Health Hazard, Chronic Health Hazard, Fire Hazard, Sudden Release of Pressure

SARA HAZARD CATEGORIES ALIGNED WITH GHS (2018):

Physical Hazard - Flammable (gases, aerosols, liquids, or solids)
Physical Hazard - Gas Under Pressure
Physical Hazard - Explosive
Health Hazard - Carcinogen

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

Health Hazard - Germ Cell Mutagenicity
 Health Hazard - Specific Target Organ Toxicity (STOT) Single Exposure (SE)
 Health Hazard - Specific Target Organ Toxicity (STOT) Repeat Exposure (RE)

EPCRA SECTION 313 (40 CFR 372.65):

The following chemicals are listed in 40 CFR 372.65 and may be subject to Community Right-to Know Reporting requirements.

Component	SARA 313 - Emission Reporting	SARA 313 PBT
Vinyl Chloride 75-01-4 (99 - 100)	0.1% (de minimis concentration)	Not Listed

DEPARTMENT OF HOMELAND SECURITY (DHS)- Chemical Facility Anti-Terrorism Standards (6 CFR 27):

This product is regulated under the U.S. Department of Homeland Security (DHS) Chemical Facility Anti-Terrorism Standards (CFATS) as follows:

- DHS - Security Issue
- DHS - Release Screening Threshold Quantity
- DHS - Release Min. Concentration

Component	DHS - Security Issues	DHS-Sabotage Screening Threshold Qty.	DHS-Sabotage Min. Conc.	DHS-Theft Screening Threshold Qty.	DHS-Theft Min. Conc.	DHS-Release Screening Threshold Qty.	DHS-Release Min. Conc.	CWC Toxic Chemicals:
Vinyl Chloride 75-01-4 (99 - 100)	Release - Flammable	Not Listed	Not Listed	Not Listed	Not Listed	10000 lb STQ	1.0% Minimum Concentration	Not Listed

OSHA SPECIFICALLY REGULATED SUBSTANCES:

OSHA 29 CFR 1910.1017 (Vinyl chloride); The U.S. Department of Labor, Occupational Safety and Health Administration specifically regulates manufacturing, handling and processing of vinyl chloride. Such regulations have been published at 29 CFR 1910.1017.

OSHA PROCESS SAFETY (PSM) (29 CFR 1910.119):

The PSM standard may apply to processes which involve a flammable liquid or gas in a quantity of 10,000 pounds (4535.9 kg) or more.

Component	EPA RMP Toxic or Flammable TPQ	PSM - Highly Hazardous Substances, Toxics and Reactives	Flash Point
Vinyl Chloride 75-01-4 (99 - 100)	Flammable (10000 lb threshold quantity)	Not Listed	-78°C Open cup

EPA'S CLEAN WATER AND CLEAN AIR ACTS:

Regulated as noted in table below.

Component	Clean Water Act - Priority Pollutants	CAA - ODS CLASS 1 AND CLASS 2	CAA - Volatile Organic Compounds (VOCs) in SOCM1	CAA - HON Rule - Organic HAPs	CAA - Hazard Air Pollutants	CAA - Urban HAPs List (Integrated Urban Strategy)	SNAP - Substitutes for ODS	EPA RMP Toxic or Flammable TPQ
Vinyl Chloride 75-01-4 (99 - 100 %)	Present	Not Listed	Present	Present	Present	Present	Not Listed	Flammable (10000 lb threshold quantity)

NATIONAL INVENTORY STATUS**U.S. INVENTORY STATUS: Toxic Substance Control Act (TSCA):**

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

Component	TSCA Inventory	TSCA ACTIVE LIST	TSCA 12(b)	TSCA - Section 4	TSCA - Section 5	TSCA - Section 6	TSCA - Section 8

SECTION 16. OTHER INFORMATION

VINYL CHLORIDE (MONOMER)

SDS No.: M9192

Rev. Date: 30-Nov-2020

Supersedes Date: 2015-06-April

Prepared by: Occidental Chemical Corporation - HES&S Product Stewardship Department

Rev. Date: 30-Nov-2020

Reason for Revision:

- Revised Major Health Hazards: SEE SECTION 2
- Revised GHS Information: SEE SECTION 2
- Updated First Aid Measures: SEE SECTION 4
- PPE recommendations have been modified: SEE SECTION 8
- Toxicological Information has been revised: SEE SECTION 11
- Updated Disposal Considerations. SEE SECTION 13
- Updated Transportation Information: SEE SECTION 14
- A component has been added to the formulation. SEE SECTION 3

IMPORTANT:

The information presented herein, while not guaranteed, was prepared by technical personnel and is true and accurate to the best of our knowledge. NO WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE, OR WARRANTY OR GUARANTY OF ANY OTHER KIND, EXPRESSED OR IMPLIED, IS MADE REGARDING PERFORMANCE, SAFETY, SUITABILITY, STABILITY OR OTHERWISE. This information is not intended to be all-inclusive as to the manner and conditions of use, handling, storage, disposal and other factors that may involve other or additional legal, environmental, safety or performance considerations, and Occidental Chemical Corporation assumes no liability whatsoever for the use of or reliance upon this information. While our technical personnel will be happy to respond to questions, safe handling and use of the product remains the responsibility of the customer. No suggestions for use are intended as, and nothing herein shall be construed as, a recommendation to infringe any existing patents or to violate any federal, state, local or foreign laws.

OSHA Standard 29 CFR 1910.1200 requires that information be provided to employees regarding the hazards of chemicals by means of a hazard communication program including labeling, safety data sheets, training and access to written records. We request that you, and it is your legal duty to, make all information in this Safety Data Sheet available to your employees.

End of Safety Data Sheet

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name : PROPYLENE GLYCOL USP/EP
Synonyms : Propylene Glycol, 1,2-Propanediol, 1,2-Dihydroxypropane, Monopropylene Glycol
Substance name : 1,2-Propanediol
Substance No. : 200-338-0 (EINECS)
Chemical characterization : Glycols

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Solvent; Intermediate; Functional Fluids
Prohibited uses : Active pharmaceutical ingredient (API); Tobacco; Electronic cigarettes (E-cigarettes); Cannabis; Theater fogs; Artificial smoke; Cat food; Sprinkler systems over 30%

1.3 Details of the supplier of the safety data sheet

Company	Registration number	Telephone
E-mail address :		
Responsible/issuing person		

1.4 Emergency telephone number

Poison Center:
National Poisons Information Service
UK: +44 131 242 1383
24 hours all days

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)
Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.2 Label elements

Labeling (REGULATION (EC) No 1272/2008)
Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

SECTION 3: Composition/information on ingredients

3.1 Substances

Substance name : 1,2-Propanediol
EC-No. : 200-338-0 (EINECS)

Components

Chemical name	CAS-No. EC-No.	Concentration (% w/w)
Propylene Glycol	57-55-6 200-338-0	>= 99.5

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice : May cause irritation of the eyes, skin and mucous membranes.
Always observe self-protection methods
Move out of dangerous area.
Remove contaminated shoes and clothing.
Show this material safety data sheet to the doctor in attendance.

If inhaled : Remove to fresh air.
In the case of inhalation of aerosol/mist consult a physician if necessary.
Not expected to present a significant inhalation hazard under anticipated conditions of normal use.
Avoid inhalation of hot vapors or extremely high concentrations of aerosols.

In case of skin contact : Wash skin thoroughly with mild soap and water.

In case of eye contact : Flush eyes with water thoroughly and continuously for 15 minutes.
Remove contact lenses, if present and easy to do. Continue rinsing.
If eye irritation persists, consult a specialist.

If swallowed : Not expected to present a significant ingestion hazard under anticipated conditions of normal use.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms : High doses may cause CNS depression (fatigue, dizziness and possibly loss of concentration, with collapse, coma and death in cases of severe over-exposure).

Risks : May cause eye, skin, and respiratory tract irritation.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Treat symptomatically.
Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media : SMALL FIRE: Use dry chemicals, CO₂, water spray or alcohol-resistant foam. LARGE FIRE: Use water spray, water fog or alcohol-resistant foam.

Unsuitable extinguishing media : Do not use solid water stream.

5.2 Special hazards arising from the substance or mixture

Specific hazards during fire fighting : Heat from fire can generate flammable vapor. When mixed with air and exposed to ignition source, vapors can burn in open or explode if confined. Vapors may be heavier than air. May travel long distances along the ground before igniting and flashing back to vapor source. Fine sprays/mists may be combustible at temperatures below normal flash point. Fight fire from a safe distance/protected location. Heat may build enough pressure to rupture closed containers/spreading fire/increasing risk of burns/injuries. Use water spray/fog for cooling. Avoid frothing/steam explosion. Although water soluble, may not be practical to extinguish fire by water dilution. Notify authorities immediately if liquid enters sewer/public waters.

5.3 Advice for firefighters

Special protective equipment for fire-fighters : Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighter's protective clothing will only provide limited protection.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : Use personal protective equipment. Clean-up to be performed only by trained and properly equipped personnel.

6.2 Environmental precautions

Environmental precautions : Try to prevent the material from entering drains or water courses.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version	Revision Date:	SDS Number:	Date of last issue: 11/05/2021
1.9	01/16/2023	BE129	Date of first issue: 11/29/2010

6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Extinguish ignition sources; stop release; prevent flow to sewers or public waters.
Notify fire and environmental authorities.
Impound/recover large land spill; soak up small spill with inert solids.
Soak up small spills with inert solids.
Use suitable disposal containers.
On water, material is soluble and may float or sink.
Contain/collect rapidly to minimize dispersion.
Disperse residue to reduce aquatic harm.
Report per regulatory requirements.

6.4 Reference to other sections

For personal protection see section 8., For disposal considerations see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling : Handle empty containers with care - residue can burn if heated.
Empty containers should be thoroughly rinsed with copious amounts of clean water.
The rinse water can be used for makeup water for any necessary dilution of the concentrated product before use, or it can be properly discarded.

Advice on protection against fire and explosion : Normal measures for preventive fire protection.

Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Handle empty containers with care - residue may be combustible. Empty containers should be thoroughly rinsed with copious amounts of clean water. The rinse water can be used for makeup water for any necessary dilution of the concentrated product before use, or it can be properly discarded.

Advice on common storage : Carbon/Mild steel with suitable internal coating, or stainless steel

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Further information on storage stability : No decomposition if stored and applied as directed.

7.3 Specific end use(s)

Specific use(s) : See Section 1.2.
Development of Exposure Scenarios for such use are not required by the REACH Regulation other than what is provided in other sections of this SDS.

No use-specific Risk Management Measures are proposed.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Propylene Glycol	57-55-6	STEL (particulate)	30 mg/m ³	WEL (GB)
		TWA (particulate)	10 mg/m ³	WEL (GB)
		STEL (total vapour and particulates)	450 ppm 1,422 mg/m ³	WEL (GB)
		TWA (total vapour and particulates)	150 ppm 474 mg/m ³	WEL (GB)

Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End Use	Exposure routes	Potential health effects	Value
1,2-Propanediol	Workers	Inhalation	Long term	168 mg/m ³
	Remarks: Systemic effects			
	Workers	Inhalation	Long term	10 mg/m ³
Remarks: Local effects				
	General Population	Inhalation		50 mg/m ³
Remarks: Systemic effects				
	General Population	Inhalation		10 mg/m ³
Remarks: Local effects				

Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

Substance name	Environmental Compartment	Value
1,2-Propanediol	Fresh water	260 mg/l
	Remarks: Assessment factor - 50	
	Sea water	26 mg/l
Remarks: Assessment factor - 500		
	Water	183 mg/l
Remarks: Intermittent Releases, Assessment factor -100		
	Fresh water sediment	572 mg/kg dw
	Sea sediment	57.2 mg/kg dw

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

	Soil	50 mg/kg dw
	Sewage Treatment Plant	20000 mg/l
	Remarks:Assessment factor -1	

8.2 Exposure controls

Engineering measures

No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control.

Personal protective equipment

- Eye protection : Use splash goggles when eye contact due to splashing or spraying liquid is possible.
- Hand protection
Material : Chemical resistant gloves made of butyl rubber or nitrile rubber category III according to EN 374.
- Remarks : Not normally considered a skin hazard.
- Skin and body protection : No special clothing/skin protection equipment is recommended under normal conditions of anticipated use.
Where use can result in skin contact, practice good personal hygiene.
- Respiratory protection : No special respiratory protection equipment is recommended under anticipated conditions of normal use.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- Appearance : liquid (20 °C, 1,013.25 hPa)
- Color : clear
- Odor : Little or no odor.
- Odor Threshold : No value available.
- pH : no data available
- Melting point/range : < -20 °C
- Boiling point/boiling range : 184 °C (1003.20 hPa)
- Flash point : 104 °C(1000.010 hPa)
- Flammability (solid, gas) : Not applicable
- Upper explosion limit / Upper flammability limit : ~ 17.4 vol%
- Lower explosion limit / Lower flammability limit : ~ 2.4 vol%

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9	Revision Date: 01/16/2023	SDS Number: BE129	Date of last issue: 11/05/2021 Date of first issue: 11/29/2010
----------------	------------------------------	----------------------	---

Vapor pressure	:	0.2 hPa (25 °C)
Relative vapor density	:	no data available
Density	:	1.03 g/cm ³ (20 °C)
Solubility(ies) Water solubility	:	completely soluble (20 °C) pH: 7.1 - 7.8
Partition coefficient: n- octanol/water	:	log Pow: -1.07 (20.5 °C) pH: 6.2 - 6.4
Decomposition temperature	:	Incomplete combustion may produce carbon monoxide and other toxic gases.
Viscosity Viscosity, kinematic	:	42.1 mm ² /s (25 °C)
Explosive properties	:	Not explosive
Oxidizing properties	:	The substance or mixture is not classified as oxidizing.

9.2 Other information

Surface tension	:	71.6 mN/m, 1.01 g/l, 21.5 °C
Self-ignition	:	> 400 °C

SECTION 10: Stability and reactivity

10.1 Reactivity

Stable under recommended storage conditions.

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions	:	Not expected to occur. This material is stable when properly handled and stored.
---------------------	---	--

10.4 Conditions to avoid

Conditions to avoid	:	High temperatures, oxidizing conditions. May degrade when exposed to light or other radiation sources.
---------------------	---	---

10.5 Incompatible materials

Materials to avoid	:	Reacts with strong oxidizing agents. Strong acids. Isocyanates.
--------------------	---	---

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

10.6 Hazardous decomposition products

Combustion may produce oxides of carbon and other toxic gases.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Components:

Propylene Glycol:

Acute oral toxicity : LD50 Oral (Rat): 22,000 mg/kg

Acute inhalation toxicity : Assessment: The substance or mixture has no acute inhalation toxicity

Acute dermal toxicity : LD50 (Rabbit): > 5,000 mg/kg

Skin corrosion/irritation

Product:

Remarks : Based on skin irritation values, not classified.
May cause slight transient skin irritation.

Components:

Propylene Glycol:

Assessment : Non-irritating to the skin.

Serious eye damage/eye irritation

Product:

Remarks : May produce minimal, fully reversible eye irritation.

Components:

Propylene Glycol:

Assessment : Non-irritating to the eyes.

Respiratory or skin sensitization

Product:

Test Type : Respiratory sensitization
Remarks : no data available

Test Type : Skin sensitization
Remarks : Skin reactions of unknown etiology have been described in some hypersensitive individuals following topical application.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Components:

Propylene Glycol:

Assessment : Not sensitizing

Germ cell mutagenicity

Product:

Germ cell mutagenicity- Assessment : No adverse effect observed.

Components:

Propylene Glycol:

Germ cell mutagenicity- Assessment : Negative for genotoxicity using both in vitro and in vivo tests.

Carcinogenicity

Product:

Carcinogenicity - Assessment : No adverse effect observed.

Components:

Propylene Glycol:

Carcinogenicity - Assessment : No increase in tumors was noted in rats and dogs exposed to high concentrations of propylene glycol via the diet for up to 2 years. The incidence of skin tumors was unaltered in mice following dermal application over a lifetime.

Reproductive toxicity

Product:

Reproductive toxicity - Assessment : No adverse effect observed.
No adverse effect observed.

Components:

Propylene Glycol:

Reproductive toxicity - Assessment : No adverse effect on reproductive performance was seen in male and female mice exposed continuously to high doses of propylene glycol in drinking water for up to 3 months. Results from studies in pregnant rats, mice, hamsters and rabbits demonstrate that propylene glycol is not teratogenic or fetotoxic.

STOT-single exposure

Product:

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Assessment : Based on single exposure toxicity values, not classified.

Components:

Propylene Glycol:

Assessment : The substance or mixture is not classified as specific target organ toxicant, single exposure.

STOT-repeated exposure

Product:

Assessment : Based on repeated exposure toxicity values, not classified., Propylene glycol is of low inherent toxicity in rats and dogs after repeated oral exposure, while cats show species-specific hematological changes in red blood cells (other tissues unremarkable). Rats exposed repeatedly to high aerosol concentrations exhibited signs consistent with irritation of the eyes and nasal mucosa but showed no evidence of systemic toxicity.

Components:

Propylene Glycol:

Assessment : Long-term studies in rodents conducted with high oral doses found no evidence of adverse effects. Ingestion by cats, however, results in species-specific hematological changes.

Repeated dose toxicity

Components:

Propylene Glycol:

Species : Rat, male
NOAEL : 1,700 mg/kg
Application Route : Oral
Remarks : Long-term studies in rodents conducted with high oral doses found no evidence of adverse effects. Ingestion by cats, however, results in species-specific hematological changes.

Species : Rat
LOAEL : 0.16 mg/l
Application Route : Inhalation
Remarks : High aerosol concentrations inhaled by rats caused minor nasal and ocular signs that may have been due to mild irritation or drying effects on mucous membranes.

Further information

Product:

Remarks : no data available

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Components:

Propylene Glycol:

Remarks : Propylene glycol is of low acute toxicity after ingestion or skin contact. It is not a skin irritant, although repeated contact with undiluted product may dry the skin resulting in cracking and/or fissuring. It is not a skin sensitizer, however skin reactions of unknown etiology have been described in some hypersensitive individuals following topical application. Neat liquid may also produce minimal, fully reversible eye irritation. Propylene glycol is of low inherent toxicity in rats and dogs after repeated oral exposure, while cats show species-specific hematological changes in red blood cells (other tissues unremarkable). Rats exposed repeatedly to high aerosol concentrations exhibited signs consistent with irritation of the eyes and nasal mucosa but showed no evidence of systemic toxicity. Results from studies in pregnant rats, mice, hamsters and rabbits demonstrate that propylene glycol is not a teratogen while no adverse effect on reproductive performance was apparent in male and female mice exposed continuously to high doses of propylene glycol in drinking water for up to 3 months. It is not genotoxic in vitro or in vivo. There was no increase in tumors in rats or dogs exposed to high concentrations of propylene glycol via the diet for up to 2 years, while the incidence of skin tumors was unaltered in mice following dermal application over a lifetime.

SECTION 12: Ecological information

12.1 Toxicity

Product:

Ecotoxicology Assessment

Acute aquatic toxicity : Based on acute aquatic toxicity values, not classified.

Chronic aquatic toxicity : Not classified, based on readily biodegradability and low acute toxicity.

Components:

Propylene Glycol:

Toxicity to fish : LC50 (Oncorhynchus mykiss (rainbow trout)): 40,613 mg/l
Exposure time: 96 HOURS

Toxicity to daphnia and other aquatic invertebrates : EC50 (Ceriodaphnia dubia): 18,340 mg/l
Exposure time: 48 HOURS

EC50 (Americamysis bahia (Mysid shrimp)): 18,800 mg/l
Exposure time: 96 HOURS

Toxicity to algae/aquatic : EC50 (Pseudokirchneriella subcapita (formerly Selenastrum

SAFETY DATA SHEET

plants capricornutum): 19,000 mg/l
Exposure time: 96 HOURS

EC50 (Skeletonema costatum): 19,100 mg/l
Exposure time: 96 HOURS

Toxicity to microorganisms : NOEC (Pseudomonas putida): 20,000 mg/l
Exposure time: 18 HOURS

Toxicity to fish (Chronic toxicity) : Remarks: Not expected to exhibit chronic toxicity to fish.

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOEC: 13,020 mg/l
Exposure time: 7 DAY
Species: Ceriodaphnia dubia

12.2 Persistence and degradability

Components:

Propylene Glycol:

Biodegradability : Result: Biodegradable
Biodegradation: 72 - 100 %

12.3 Bioaccumulative potential

Product:

Bioaccumulation : Remarks: This material is not expected to bioaccumulate.

Components:

Propylene Glycol:

Bioaccumulation : Bioconcentration factor (BCF): 0.09
Remarks: This material is not expected to bioaccumulate.

Partition coefficient: n-octanol/water : log Pow: -1.07 (20.5 °C)

12.4 Mobility in soil

Product:

Distribution among environmental compartments : Stability in soil
Remarks: Low potential for soil adsorption expected

Components:

Propylene Glycol:

Distribution among environmental compartments : Remarks: Environmental releases of propylene glycol will tend to partition to water and soil, with little potential for evaporation.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

12.5 Results of PBT and vPvB assessment

Product:

Assessment : Not applicable.

Components:

Propylene Glycol:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT).

12.6 Other adverse effects

Product:

Environmental fate and pathways : No additional information available.

Endocrine disrupting potential : The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Components:

Propylene Glycol:

Environmental fate and pathways : This material is not expected to persist in the environment and should pose little if any physical or toxicological hazards.

Additional ecological information : This material is expected to be non-hazardous to aquatic species.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product : Comply with applicable local, state or international regulations concerning solid or hazardous waste disposal and/or container disposal.
Landfill solids at permitted sites.
Burn concentrated liquids, diluting with clean, low viscosity fuel.
Dilute aqueous waste may biodegrade.
Assure effluent complies with applicable regulations.

SECTION 14: Transport information

14.1 UN number

Not regulated for transport

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

14.2 UN proper shipping name

Not regulated for transport

14.3 Transport hazard class(es)

Not regulated for transport

14.4 Packing group

Not regulated for transport

14.5 Environmental hazards

Not applicable

14.6 Special precautions for user

No special precautions required.

14.7 Maritime transport in bulk according to IMO instruments

Description of the goods	PROPYLENE GLYCOL
Pollution category	OS
Ship type	NONE

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Other international regulations

Global Inventory Status

The ingredients of this product are compliant with the following chemical inventory requirements or exemptions.

Country/Region	Inventory	Status Description
Australia	AICS	Listed
Canada	DSL	Listed
China	IECSC	Listed

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Trade name : PROPYLENE GLYCOL INDUSTRIAL
CAS Number: : 57-55-6
Chemical characterization : Glycols
Chemical name : 1,2-Propanediol
Synonyms : Propylene Glycol, 1,2-Propanediol, 1,2-Dihydroxypropane, Monopropylene Glycol

Identified uses : Solvent; Intermediate; Functional Fluids

Prohibited uses : Pharmaceutical excipient; Active pharmaceutical ingredient (API); Applications involving human consumption; Cosmetics; Toiletries; Personal care products; Tobacco; Electronic cigarettes (E-cigarettes); Cannabis; Theater fogs; Artificial smoke; Cat food (21 CFR 582.1666); Sprinkler systems over 30%

2. HAZARDS IDENTIFICATION**GHS Classification**

Not classified as hazardous according to OSHA Hazard Communication Standard 29 CFR 1910.1200 (HazCom 2012).

Label elements

Not classified as hazardous according to OSHA Hazard Communication Standard 29 CFR 1910.1200 (HazCom 2012).

Other hazards

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

No additional information available.

3. COMPOSITION/INFORMATION ON INGREDIENTS**Substances****Components**

Chemical name	CAS-No. EC-No.	Weight %	Component Type
Propylene Glycol	57-55-6	>= 99.0 %	A

Key:
(A) Substance**4. FIRST AID MEASURES**

- General advice : May cause irritation of the eyes, skin and mucous membranes. Always observe self-protection methods. Move out of dangerous area. Remove contaminated shoes and clothing. Show this material safety data sheet to the doctor in attendance.
- If inhaled : Remove to fresh air. In the case of inhalation of aerosol/mist consult a physician if necessary. Not expected to present a significant inhalation hazard under anticipated conditions of normal use. Avoid inhalation of hot vapors or extremely high concentrations of aerosols.
- In case of skin contact : Wash skin thoroughly with mild soap and water.
- In case of eye contact : Flush eyes with water thoroughly and continuously for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, consult a specialist.
- If swallowed : Not expected to present a significant ingestion hazard under anticipated conditions of normal use.

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

Notes to physician

- Symptoms : High doses may cause CNS depression (fatigue, dizziness and possibly loss of concentration, with collapse, coma and death in cases of severe over-exposure).
- Hazards : This product is of low acute toxicity.
May cause irritation of the eyes, skin and mucous membranes.
Hot vapors may cause lung damage.
- Treatment : Treat symptomatically.
Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

5. FIRE-FIGHTING MEASURES

- Suitable extinguishing media : SMALL FIRE: Use dry chemicals, CO₂, water spray or alcohol-resistant foam. LARGE FIRE: Use water spray, water fog or alcohol-resistant foam.
- Unsuitable extinguishing media : Do not use solid water stream.
- Specific hazards during fire fighting : Heat from fire can generate flammable vapor.
When mixed with air and exposed to ignition source, vapors can burn in open or explode if confined.
Vapors may be heavier than air.
May travel long distances along the ground before igniting and flashing back to vapor source.
Fine sprays/mists may be combustible at temperatures below normal flash point.
Fight fire from a safe distance/protected location.
Heat may build enough pressure to rupture closed containers/spreading fire/increasing risk of burns/injuries.
Use water spray/fog for cooling.
Avoid frothing/steam explosion.
Although water soluble, may not be practical to extinguish fire by water dilution.
Notify authorities immediately if liquid enters sewer/public waters.
- : Refer to NFPA Code 13 for guidance in using propylene glycol in sprinkler system applications.
- Special protective equipment for fire-fighters : Wear positive pressure self-contained breathing apparatus (SCBA).
Structural firefighter's protective clothing will only provide

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

limited protection.

6. ACCIDENTAL RELEASE MEASURES

- Personal precautions : Use personal protective equipment.
Clean-up to be performed only by trained and properly equipped personnel.
- Environmental precautions : Try to prevent the material from entering drains or water courses.
- Methods for containment /
Methods for cleaning up : Extinguish ignition sources; stop release; prevent flow to sewers or public waters.
Notify fire and environmental authorities.
Impound/recover large land spill; soak up small spill with inert solids.
Soak up small spills with inert solids.
Use suitable disposal containers.
On water, material is soluble and may float or sink.
Contain/collect rapidly to minimize dispersion.
Disperse residue to reduce aquatic harm.
Report per regulatory requirements.

7. Handling and storage**Precautions for safe handling**

- Advice on safe handling : Handle empty containers with care - residue can burn if heated.
Empty containers should be thoroughly rinsed with copious amounts of clean water.
The rinse water can be used for makeup water for any necessary dilution of the concentrated product before use, or it can be properly discarded.

- Advice on protection against fire and explosion : Normal measures for preventive fire protection.

Conditions for safe storage, including any incompatibilities

- Requirements for storage areas and containers : Handle empty containers with care - residue may be combustible.
Empty containers should be thoroughly rinsed with copious amounts of clean water.
The rinse water can be used for makeup water for any

SDS No.: BE130

necessary dilution of the concentrated product before use, or it can be properly discarded.

Advice on common storage : Carbon/Mild steel with suitable internal coating, or stainless steel

Other data : No decomposition if stored and applied as directed.

Specific end use(s)

: See Section 1.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Control parameters****Ingredients with workplace control parameters**

Consult local authorities for acceptable exposure limits.

Exposure controls**Engineering measures**

No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control.

Personal protective equipment

Respiratory protection : No special respiratory protection equipment is recommended under anticipated conditions of normal use.

Hand protection : Not normally considered a skin hazard.
Use chemical resistant gloves appropriate to conditions of use.
Wear chemical resistant gloves such as:
Nitrile rubber
Latex

Eye and face protection : Use splash goggles when eye contact due to splashing or spraying liquid is possible.

Skin and body protection : No special clothing/skin protection equipment is recommended under normal conditions of anticipated use.
Where use can result in skin contact, practice good personal hygiene.

Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

SDS No.: BE130

of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use.
Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices.
Wash hands before eating, drinking, smoking, or using toilet facilities.
Take off contaminated clothing and wash before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	: liquid at 20 °C (1,013.25 hPa)
Color	: Clear, colorless.
Odor	: Little or no odor.
Odor Threshold	: No value available.
Flash point	: 104 °C at 1000.010 hPa (750.071 mm Hg)
Lower explosion limit	: ~ 2.4 vol%
Upper explosion limit	: ~ 17.4 vol%
Flammability (solid, gas)	: Not applicable
Oxidizing properties	: The substance or mixture is not classified as oxidizing.
Autoignition temperature	: > 400 °C at 1000.10 - 1014.40 hPa
Decomposition temperature	: not determined
Melting point/range	: < -20 °C
Boiling point/boiling range	: 184 °C at 1003.20 hPa
Vapor pressure	: 0.2 hPa at 25 °C
Density	: 1.03 g/cm ³ at 20 °C
Water solubility	: 20 °C

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

Miscible in water.

Partition coefficient: n-octanol/water	:	log Pow: -1.07 at 20.5 °C
Viscosity, kinematic	:	42.1 mm ² /s at 25 °C
Relative vapor density	:	no data available
Surface tension	:	71.6 mN/m 1.01 g/l at 21.5 °C
Explosive properties	:	Not explosive
Other Information	:	No additional information available.

10. STABILITY AND REACTIVITY

Reactivity	:	Stable under recommended storage conditions.
Chemical stability	:	Stable under recommended storage conditions.
Hazardous reactions	:	Not expected to occur. This material is stable when properly handled and stored.
Conditions to avoid	:	High temperatures, oxidizing conditions. May degrade when exposed to light or other radiation sources.
Materials to avoid	:	Reacts with strong oxidizing agents. Strong acids. Isocyanates.
Hazardous decomposition products	:	Carbon Monoxide and other toxic vapors.
Thermal decomposition	:	Incomplete combustion may produce carbon monoxide and other toxic gases.

11. TOXICOLOGICAL INFORMATION

Product Summary	:	The below given information is based on the assessment of the product including impurities.
Acute toxicity	:	
Acute oral toxicity	:	Based on acute toxicity values, not classified.

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

- : LD50 Oral: > 5,000 mg/kg
Species: Rat
- Acute inhalation toxicity** : Based on acute toxicity values, not classified.
- : LC50 (Inhl): > 20 mg/l
Exposure time: 4 HOURS
Species: Rabbit
- Acute dermal toxicity** : Based on acute toxicity values, not classified.
- : LD50 Dermal: > 2,000 mg/kg
Species: Rabbit
- Skin corrosion/irritation** : Based on skin irritation values, not classified.
May cause slight transient skin irritation.
- Serious eye damage/eye irritation** : Based on eye irritation values, not classified.
May produce minimal, fully reversible eye irritation.
- Respiratory or skin sensitization** : Respiratory sensitization
Not classified
no data available
- : Skin sensitization
Not classified
Skin reactions of unknown etiology have been described in some hypersensitive individuals following topical application.
- Chronic toxicity**
- Carcinogenicity : Not classified
No adverse effect observed.
- Germ cell mutagenicity : Not classified
No adverse effect observed.
- Reproductive toxicity**
- Effects on fertility / : Not classified
Effects on or via lactation : No adverse effect observed.

PROPYLENE GLYCOL INDUSTRIAL

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE130

- Effects on Development : Not classified
No adverse effect observed.
- Target Organ Systemic Toxicant - Single exposure** : Based on single exposure toxicity values, not classified.
- Target Organ Systemic Toxicant - Repeated exposure** : Based on repeated exposure toxicity values, not classified., Propylene glycol is of low inherent toxicity in rats and dogs after repeated oral exposure, while cats show species-specific hematological changes in red blood cells (other tissues unremarkable). Rats exposed repeatedly to high aerosol concentrations exhibited signs consistent with irritation of the eyes and nasal mucosa but showed no evidence of systemic toxicity.
- Aspiration hazard** : Based on physico-chemical values or lack of human evidence, not classified.

12. Ecological information**Ecotoxicology Assessment**

- Short-term (acute) aquatic hazard** : Based on acute aquatic toxicity values, not classified.
- Long-term (chronic) aquatic hazard** : Not classified, based on readily biodegradability and low acute toxicity.
- Toxicity to fish** : Low acute toxicity to fish
- Toxicity to daphnia and other aquatic invertebrates** : Low acute toxicity to aquatic invertebrates.
- Toxicity to algae** : Low toxicity to algae.
- Toxicity to bacteria** : Low toxicity to sewage microbes.
- Toxicity to fish (Chronic toxicity)** : No study available.
- Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity)** : Low chronic toxicity to aquatic invertebrates.

Persistence and degradability

- Biodegradability** : Rapidly degradable.

PROPYLENE GLYCOL INDUSTRIAL

15. REGULATORY INFORMATION**TSCA 12b**

No substances are subject to TSCA 12(b) export notification requirements.

Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

No SARA Hazards

SARA 313

This product contains no known chemicals regulated under SARA 313.

State Reporting

This material does not contain listed substance(s) known to the State of California to cause cancer, birth defects, or other reproductive harm that would require warning under the California Proposition 65 State Drinking Water and Toxic Enforcement Act.

However, LyondellBasell has not tested for the presence of listed chemical substances.

This product contains the following chemicals regulated by New Jersey's Worker and Community Right to Know Act:

57-55-6 Propylene Glycol

No components are subject to the Massachusetts Right to Know Act.

This product contains the following chemicals regulated by Pennsylvania's Right to Know Act:

57-55-6 Propylene Glycol

**Disclaimer**

Information in this document is accurate to the best of our knowledge at the date of publication. The document is designed to provide users general information for safe handling, use, processing, storage, transportation, disposal and release and does not constitute any warranty or quality specification, either express or implied, including any warranty of merchantability or fitness for any particular purpose. Users shall determine whether the product is suitable for their use and can be used safely and legally.

In addition to any prohibitions of use specifically noted in this document, LyondellBasell may further prohibit or restrict the sale of its products into certain applications. For further information, please contact a LyondellBasell representative or visit the LyondellBasell website at: <https://www.lyondellbasell.com/en/products-technology/product-safety-stewardship/>
The Trade Name referenced in section 1 is a trademark owned or used by the LyondellBasell family of companies.

Numerical Data Presentation

The presentation of numerical data, such as that used for physical and chemical properties and toxicological values, is expressed using a comma (,) to separate digits into groups of three and a period (.) as the decimal marker. For example, 1,234.56 mg/kg = 1 234,56 mg/kg.

Language Translations

The information presented in this document has been translated from English by a vendor LyondellBasell believes to be reliable. LyondellBasell and its vendor have made a good-faith effort to verify the accuracy of the translation, but assume no liability or other responsibility for any errors that may have occurred. Please refer to our web site (www.lyondellbasell.com) for the original document written in English.

End of Material Safety Data Sheet

SAFETY DATA SHEET

THE DOW CHEMICAL COMPANY

Product name: 2-Ethylhexyl Acrylate, 50 ppm MEHQ

Issue Date: 11/25/2022

Print Date: 02/04/2023

THE DOW CHEMICAL COMPANY encourages and expects you to read and understand the entire (M)SDS, as there is important information throughout the document. We expect you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

1. IDENTIFICATION

Product name: 2-Ethylhexyl Acrylate, 50 ppm MEHQ

Recommended use of the chemical and restrictions on use

Identified uses: Chemical intermediate.

Uses advised against: Unreacted monomer is not appropriate for use in cosmetic applications, such as artificial nail products.

COMPANY IDENTIFICATION

THE DOW CHEMICAL COMPANY
2211 H.H. DOW WAY
MIDLAND MI 48674
UNITED STATES

Customer Information Number:

SDSQuestion@dow.com

EMERGENCY TELEPHONE NUMBER

24-Hour Emergency Contact: CHEMTREC +1 800-424-9300

Local Emergency Contact: 800-424-9300

2. HAZARDS IDENTIFICATION

Hazard classification

GHS classification in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200)

Flammable liquids - Category 4

Skin irritation - Category 2

Skin sensitisation - Sub-category 1B

Specific target organ toxicity - single exposure - Category 3

Label elements

Hazard pictograms

Signal word: **WARNING!**

Hazards

Combustible liquid.
Causes skin irritation.
May cause an allergic skin reaction.
May cause respiratory irritation.

Precautionary statements

Prevention

Keep away from heat/ sparks/ open flames/ hot surfaces. No smoking.
Avoid breathing mist or vapours.
Wash skin thoroughly after handling.
Use only outdoors or in a well-ventilated area.
Contaminated work clothing must not be allowed out of the workplace.
Wear protective gloves/ eye protection/ face protection.

Response

IF ON SKIN: Wash with plenty of soap and water.
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/ doctor if you feel unwell.
If skin irritation or rash occurs: Get medical advice/ attention.
Take off contaminated clothing and wash before reuse.
In case of fire: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide to extinguish.

Storage

Store in a well-ventilated place. Keep container tightly closed.
Store in a well-ventilated place. Keep cool.
Store locked up.

Disposal

Dispose of contents and/or container to an approved waste disposal plant.

Other hazards

No data available

3. COMPOSITION/INFORMATION ON INGREDIENTS

Synonyms: Ethyl hexyl acrylate

This product is a substance.

Substance name: Ethyl hexyl acrylate

CASRN: 103-11-7

Component	CASRN	Concentration
Ethyl hexyl acrylate	103-11-7	>= 99.6 - <= 100.0 %

4. FIRST AID MEASURES

Description of first aid measures

General advice:

First Aid responders should pay attention to self-protection and use the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists refer to Section 8 for specific personal protective equipment.

Inhalation: Move person to fresh air and keep comfortable for breathing. If not breathing, give artificial respiration; if by mouth to mouth use rescuer protection (pocket mask, etc). If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

Skin contact: Remove material from skin immediately by washing with soap and plenty of water. Remove contaminated clothing and shoes while washing. Seek medical attention if irritation or rash occurs. Wash clothing before reuse. Discard items which cannot be decontaminated, including leather articles such as shoes, belts and watchbands. Suitable emergency safety shower facility should be available in work area.

Eye contact: Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.

Ingestion: Do not induce vomiting. Give one cup (8 ounces or 240 ml) of water or milk if available and transport to a medical facility. Do not give anything by mouth unless the person is fully conscious.

Most important symptoms and effects, both acute and delayed:

Causes skin irritation. May cause an allergic skin reaction. May cause respiratory irritation.

Indication of any immediate medical attention and special treatment needed

Notes to physician: Maintain adequate ventilation and oxygenation of the patient. May cause asthma-like (reactive airways) symptoms. Bronchodilators, expectorants, antitussives and corticosteroids may be of help. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed 24-48 hours for signs of respiratory distress. If burn is present, treat as any thermal burn, after decontamination. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Because rapid absorption may occur through the lungs if aspirated and cause systemic effects, the decision of whether to induce vomiting or not should be made by a physician. Due to irritant properties, swallowing may result in burns and/or ulceration of mouth, stomach and lower gastrointestinal tract with subsequent stricture. Aspiration of vomitus may cause lung injury. Suggest endotracheal or esophageal control if lavage is done. No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. Excessive exposure may aggravate preexisting asthma and other respiratory disorders (e.g. emphysema, bronchitis, reactive airways dysfunction syndrome).

5. FIREFIGHTING MEASURES

Extinguishing media

Suitable extinguishing media: Alcohol-resistant foam. Dry chemical. Dry sand.

Unsuitable extinguishing media: High volume water jet. Do not use direct water stream..

Special hazards arising from the substance or mixture

Hazardous combustion products: Carbon oxides.

Unusual Fire and Explosion Hazards: Flash back possible over considerable distance.. Exposure to combustion products may be a hazard to health.. Closed containers may rupture via pressure build-up when exposed to fire or extreme heat.. Vapours may form explosive mixtures with air..

Advice for firefighters

Fire Fighting Procedures: Use water spray to cool unopened containers.. Evacuate area.. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.. Contain fire water run-off if possible. Fire water run-off, if not contained, may cause environmental damage.. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of reignition has passed.. Do not use a solid water stream as it may scatter and spread fire..

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Remove undamaged containers from fire area if it is safe to do so.

Special protective equipment for firefighters: In the event of fire, wear self-contained breathing apparatus.. Use personal protective equipment..

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Remove all sources of ignition. Use personal protective equipment. Follow safe handling advice and personal protective equipment recommendations.

Environmental precautions: Do not release the product to the aquatic environment above defined regulatory levels. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

Methods and materials for containment and cleaning up: Non-sparking tools should be used. Soak up with inert absorbent material. Suppress (knock down) gases/vapours/mists with a water spray jet. Clean up remaining materials from spill with suitable absorbant. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container.

See sections: 7, 8, 11, 12 and 13.

7. HANDLING AND STORAGE

Precautions for safe handling: Do not get on skin or clothing. Do not breathe vapours or spray mist. Avoid contact with eyes. Do not swallow. Keep container tightly closed. Keep away from heat and sources of ignition. Take precautionary measures against static discharges. Take care to prevent spills, waste and minimize release to the environment. Handle in accordance with good industrial hygiene and safety practice. CONTAINERS MAY BE HAZARDOUS WHEN EMPTY. Since emptied containers retain product residue follow all (M)SDS and label warnings even after container is emptied. Use with local exhaust ventilation. See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.

Conditions for safe storage: Keep in properly labelled containers. Store locked up. Keep tightly closed. Keep in a cool, well-ventilated place. Store in accordance with the particular national regulations. Keep away from heat and sources of ignition. This product contains inhibitor to stabilize it during shipment and storage. The effectiveness of the inhibitor is dependent on the presence of dissolved oxygen. In order to maintain sufficient dissolved oxygen in the liquid to avoid polymerization, the monomer must always be stored with a vapor space oxygen concentration of 5% to 21% (air). If the material is stored longer than six months (from date of manufacture) in a closed container, replenish the vapor space with fresh air to avoid depletion of the dissolved oxygen.

Storage stability

Shelf life: Use within 12 Month

Storage temperature: < 38 °C (< 100 °F)

Do not store with the following product types: Strong oxidizing agents. Explosives. Gases.
Unsuitable materials for containers: None known.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

If exposure limits exist, they are listed below. If no exposure limits are displayed, then no values are applicable.

Component	Regulation	Type of listing	Value
Ethyl hexyl acrylate	Dow IHG	TWA	3 ppm

Exposure controls

Engineering controls: Use engineering controls to maintain airborne level below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations.

Individual protection measures

Eye/face protection: Use safety glasses (with side shields).

Skin protection

Hand protection: Use gloves chemically resistant to this material. Examples of preferred glove barrier materials include: Polyethylene. Ethyl vinyl alcohol laminate ("EVAL"). Polyvinyl alcohol ("PVA"). Styrene/butadiene rubber. Examples of acceptable glove barrier materials include: Butyl rubber. Avoid gloves made of: Viton. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body

reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

Other protection: Use protective clothing chemically resistant to this material. Selection of specific items such as face shield, boots, apron, or full body suit will depend on the task.

Respiratory protection: Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, use an approved respirator. Selection of air-purifying or positive-pressure supplied-air will depend on the specific operation and the potential airborne concentration of the material. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus.

The following should be effective types of air-purifying respirators: Organic vapor cartridge.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Physical state	Liquid.
Color	Colorless
Odor	Sweet
Odor Threshold	No test data available
pH	No test data available
Melting point/range	Not applicable to liquids
Freezing point	-90 °C (-130 °F) <i>Literature</i>
Boiling point (760 mmHg)	216 °C (421 °F) <i>Literature</i>
Flash point	closed cup 82 °C (180 °F) <i>Literature</i>
Evaporation Rate (Butyl Acetate = 1)	0.3 <i>Literature</i>
Flammability (solid, gas)	Not applicable to liquids
Flammability (liquids)	Not expected to be a static-accumulating flammable liquid.
Lower explosion limit	0.7 % vol <i>Literature</i>
Upper explosion limit	8.2 % vol <i>Literature</i>
Vapor Pressure	0.12 mmHg at 20 °C (68 °F) <i>Literature</i>
Relative Vapor Density (air = 1)	6.4 <i>Literature</i>
Relative Density (water = 1)	0.885 <i>Literature</i>
Water solubility	0.1 g/L at 25 °C (77 °F) <i>Literature</i>
Partition coefficient: n-octanol/water	log Pow: 4.09 <i>Estimated.</i>
Auto-ignition temperature	252 °C (486 °F) <i>Literature</i>
Decomposition temperature	No data available
Dynamic Viscosity	1.54 cP at 25 °C (77 °F) <i>Literature</i>
Kinematic Viscosity	No test data available
Explosive properties	Not explosive
Oxidizing properties	No
Molecular weight	184.3 g/mol <i>Literature</i>

NOTE: The physical data presented above are typical values and should not be construed as a specification.

10. STABILITY AND REACTIVITY

Reactivity: Excessive aging, heat, contamination with polymerization catalysts, oxygen-free atmosphere, inhibitor depletion or ultraviolet light (sunlight) may cause polymerization. Excessive aging, heat, contamination with polymerization catalysts, oxygen-free atmosphere, inhibitor depletion or ultraviolet light (sunlight) may cause polymerization.

Chemical stability: Unstable at elevated temperatures.

Possibility of hazardous reactions: Can react with strong oxidizing agents. Vapours may form explosive mixture with air. Combustible liquid. Inhibitor is added to this product to prevent polymerization. However, this material can undergo hazardous polymerization. An uncontrolled polymerization may produce a rapid release of energy with the potential for an explosion of unvented closed containers. Can react with strong oxidizing agents. Vapours may form explosive mixture with air. Inhibitor is added to this product to prevent polymerization. However, this material can undergo hazardous polymerization.

Conditions to avoid: Exposure to elevated temperatures can cause product to decompose. Do not blanket or purge with an inert gas to avoid depleting the oxygen concentration. Avoid direct sunlight or ultraviolet sources. Heat, flames and sparks.

Inhibitor: Methoxyphenol Inhibitor Concentration (ppm): 40 - 60
Phenothiazine Inhibitor Concentration (ppm): 0.4 - 1.6

Incompatible materials: Avoid contact with oxidizing materials.

Hazardous decomposition products

No hazardous decomposition products are known.

11. TOXICOLOGICAL INFORMATION

Toxicological information appears in this section when such data is available.

Information on likely routes of exposure

Inhalation, Eye contact, Skin contact, Ingestion.

Acute toxicity (represents short term exposures with immediate effects - no chronic/delayed effects known unless otherwise noted)

Acute Toxicity Endpoints:

Not classified based on available information.

Acute oral toxicity

Information for the Product:

Low toxicity if swallowed. Swallowing may result in gastrointestinal irritation or ulceration. Swallowing may result in burns of the mouth and throat.

Based on product testing:

LD50, Rat, male and female, 4,435 mg/kg OECD 401 or equivalent

Information for components:

Ethyl hexyl acrylate

LD50, Rat, male and female, 4,435 mg/kg OECD 401 or equivalent

Acute dermal toxicity

Information for the Product:

Prolonged skin contact is unlikely to result in absorption of harmful amounts.

Based on product testing:

LD50, Rabbit, 7,522 mg/kg

Information for components:

Ethyl hexyl acrylate

LD50, Rabbit, 7,522 mg/kg

Acute inhalation toxicity

Information for the Product:

Prolonged excessive exposure may cause adverse effects. Excessive exposure may cause severe irritation to upper respiratory tract (nose and throat) and lungs. Signs and symptoms of excessive exposure may include: May cause dizziness and drowsiness. Headache. May cause pulmonary edema (fluid in the lungs.) Effects may be delayed.

LC50, Rat, male and female, 8 Hour, vapour, > 1.19 mg/l No deaths occurred following exposure to a saturated atmosphere.

Information for components:

Ethyl hexyl acrylate

LC50, Rat, male and female, 8 Hour, vapour, > 1.19 mg/l Other guidelines No deaths occurred following exposure to a saturated atmosphere.

Skin corrosion/irritation

Causes skin irritation.

Information for the Product:

Based on product testing:

Brief contact may cause severe skin irritation with pain and local redness.

Repeated contact may cause skin burns. Symptoms may include pain, severe local redness, swelling, and tissue damage.

Information for components:

Ethyl hexyl acrylate

Brief contact may cause severe skin irritation with pain and local redness.
Repeated contact may cause skin burns. Symptoms may include pain, severe local redness, swelling, and tissue damage.

Serious eye damage/eye irritation

Not classified based on available information.

Information for the Product:

Based on product testing:
May cause slight temporary eye irritation.
Corneal injury is unlikely.

Information for components:

Ethyl hexyl acrylate

May cause slight temporary eye irritation.
Corneal injury is unlikely.

Sensitization

For skin sensitization:

May cause an allergic skin reaction.

For respiratory sensitization:

Not classified based on available information.

Information for the Product:

For skin sensitization:
Has caused allergic skin reactions in humans.
Has caused allergic skin reactions when tested in guinea pigs.
Has demonstrated the potential for contact allergy in mice.

For respiratory sensitization:
No relevant data found.

Information for components:

Ethyl hexyl acrylate

For skin sensitization:
Has caused allergic skin reactions in humans.
Has caused allergic skin reactions when tested in guinea pigs.
Has demonstrated the potential for contact allergy in mice.

For respiratory sensitization:
No relevant data found.

Specific Target Organ Systemic Toxicity (Single Exposure)

May cause respiratory irritation.

Information for the Product:

Product test data not available.

Information for components:

Ethyl hexyl acrylate

May cause respiratory irritation.

Route of Exposure: Inhalation

Target Organs: Respiratory system

Aspiration Hazard

Not classified based on available information.

Information for the Product:

Aspiration into the respiratory system may occur during ingestion or vomiting. Due to corrosivity, tissue damage or lung injury may occur.

Information for components:

Ethyl hexyl acrylate

Aspiration into the respiratory system may occur during ingestion or vomiting. Due to corrosivity, tissue damage or lung injury may occur.

Chronic toxicity (represents longer term exposures with repeated dose resulting in chronic/delayed effects - no immediate effects known unless otherwise noted)

Specific Target Organ Systemic Toxicity (Repeated Exposure)

Not classified based on available information.

Information for the Product:

In animals, effects have been reported on the following organs:
Respiratory tract.

Information for components:

Ethyl hexyl acrylate

In animals, effects have been reported on the following organs:
Respiratory tract.

Carcinogenicity

Not classified based on available information.

Information for the Product:

Has caused tumors in skin painting tests in animals. Positive findings are believed to be secondary to chronic irritation/tissue injury.

Information for components:

Ethyl hexyl acrylate

Has caused tumors in skin painting tests in animals. Positive findings are believed to be secondary to chronic irritation/tissue injury.

Carcinogenicity

Component

Ethyl hexyl acrylate

List

IARC

Classification

Group 2B: Possibly carcinogenic to humans

Teratogenicity

Not classified based on available information.

Information for the Product:

Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

Information for components:

Ethyl hexyl acrylate

Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

Reproductive toxicity

Not classified based on available information.

Information for the Product:

In animal studies, did not interfere with reproduction. In animal studies, did not interfere with fertility.

Information for components:

Ethyl hexyl acrylate

In animal studies, did not interfere with reproduction. In animal studies, did not interfere with fertility.

Mutagenicity

Not classified based on available information.

Information for the Product:

In vitro genetic toxicity studies were predominantly negative. Animal genetic toxicity studies were negative.

Information for components:

Ethyl hexyl acrylate

In vitro genetic toxicity studies were predominantly negative. Animal genetic toxicity studies were negative.

12. ECOLOGICAL INFORMATION

Ecotoxicological information appears in this section when such data is available.

General Information

Material is toxic to aquatic organisms (LC50/EC50/IC50 between 1 and 10 mg/L in the most sensitive species).

Toxicity

Acute toxicity to fish

Material is moderately toxic to aquatic organisms on an acute basis (LC50/EC50 between 1 and 10 mg/L in the most sensitive species tested).

LC50, *Oncorhynchus mykiss* (rainbow trout), semi-static test, 1.81 mg/l, OECD Test Guideline 203 or Equivalent

Acute toxicity to aquatic invertebrates

EC50, *Daphnia magna* (Water flea), static test, 48 Hour, 1.3 mg/l, OECD Test Guideline 202 or Equivalent

Acute toxicity to algae/aquatic plants

ErC50, *Desmodesmus subspicatus* (green algae), static test, 72 Hour, Growth rate inhibition, 1.71 mg/l, OECD Test Guideline 201 or Equivalent

Long-term (chronic) aquatic hazard

Chronic toxicity to aquatic invertebrates

NOEC, *Daphnia magna* (Water flea), 21 d, number of offspring, 0.19 mg/l

Persistence and degradability

Biodegradability: Material is readily biodegradable. Passes OECD test(s) for ready biodegradability.

10-day Window: Pass

Biodegradation: 70 - 80 %

Exposure time: 15 d

10-day Window: Not applicable

Biodegradation: > 90 %

Exposure time: 14 d

Method: OECD Test Guideline 301C or Equivalent

Theoretical Oxygen Demand: 2.60 mg/mg

Biological oxygen demand (BOD)

Incubation Time	BOD
5 d	17 - 27 %
10 d	19 - 52 %
20 d	19 - 58 %

Photodegradation

Test Type: Half-life (indirect photolysis)

Sensitization: OH radicals
Atmospheric half-life: 6.4 Hour
Method: Estimated.

Bioaccumulative potential

Bioaccumulation: Bioconcentration potential is moderate (BCF between 100 and 3000 or Log Pow between 3 and 5).

Partition coefficient: n-octanol/water(log Pow): 4.09 Estimated.

Bioconcentration factor (BCF): 270 - 282 Fish Estimated.

Mobility in soil

Partition coefficient (Koc): 429 Estimated.

13. DISPOSAL CONSIDERATIONS

Disposal methods: DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. FOR UNUSED AND UNCONTAMINATED PRODUCT, always send to a licensed disposer per applicable regulations. Consult the local waste disposal expert for the appropriate waste disposal method. Recover or recycle, if possible. Otherwise, send it to a licensed disposer.

Contaminated packaging: Empty containers retain product residues. Follow label warnings even after container is emptied. Improper disposal or reuse of this container may be dangerous and illegal. Refer to applicable federal, state and local regulations.

14. TRANSPORT INFORMATION

DOT

Proper shipping name	Combustible liquid, n.o.s.(2-Ethyl hexyl acrylate)
UN number	NA 1993
Class	CBL
Packing group	III

Classification for SEA transport (IMO-IMDG):

Transport in bulk according to Annex I or II of MARPOL 73/78 and the IBC or IGC Code	Not regulated for transport Consult IMO regulations before transporting ocean bulk
---	---

Classification for AIR transport (IATA/ICAO):

Not regulated for transport

This information is not intended to convey all specific regulatory or operational requirements/information relating to this product. Transportation classifications may vary by container volume and may be influenced by regional or country variations in regulations. Additional transportation system information can be obtained through an authorized sales or customer service representative. It is the responsibility of the transporting organization to follow all applicable laws, regulations and rules relating to the transportation of the material.

15. REGULATORY INFORMATION

Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Sections 311 and 312

Flammable (gases, aerosols, liquids, or solids)
Respiratory or skin sensitisation
Skin corrosion or irritation
Specific target organ toxicity (single or repeated exposure)

Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Section 313

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Pennsylvania Worker and Community Right-To-Know Act:

The following chemicals are listed because of the additional requirements of Pennsylvania law:

Components	CASRN
2-Ethylhexyl acrylate	103-11-7

California Prop. 65

WARNING: This product can expose you to chemicals including Ethyl hexyl acrylate, which is/are known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

United States TSCA Inventory (TSCA)

All components of this product are in compliance with the inventory listing requirements of the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

16. OTHER INFORMATION

Product Literature

Additional information on this product may be obtained by calling your sales or customer service contact. Ask for a product brochure. Additional information on this and other products may be obtained by visiting our web page.

Hazard Rating System

Information Source and References

This SDS is prepared by Product Regulatory Services and Hazard Communications Groups from information supplied by internal references within our company.

THE DOW CHEMICAL COMPANY urges each customer or recipient of this (M)SDS to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this (M)SDS and any hazards associated with the product. The information herein is provided in good faith and believed to be accurate as of the effective date shown

above. However, no warranty, express or implied, is given. Regulatory requirements are subject to change and may differ between various locations. It is the buyer's/user's responsibility to ensure that his activities comply with all federal, state, provincial or local laws. The information presented here pertains only to the product as shipped. Since conditions for use of the product are not under the control of the manufacturer, it is the buyer's/user's duty to determine the conditions necessary for the safe use of this product. Due to the proliferation of sources for information such as manufacturer-specific (M)SDSs, we are not and cannot be responsible for (M)SDSs obtained from any source other than ourselves. If you have obtained an (M)SDS from another source or if you are not sure that the (M)SDS you have is current, please contact us for the most current version.

US

SAFETY DATA SHEET

SECTION 1 - Identification

1.1 Product Identifier

- Product Name • CARPOL® GP-3510 Polyol
Synonyms • Polyether Polyol; Glycerine-Propoxylated-Ethoxylated Polyol

1.2 Recommended Use of the Chemical and Restrictions on Use

- Recommended Use • Component of Polyurethane
Restrictions on Use • Industrial use only

1.3 Details of the Supplier of the Safety Data Sheet

- Manufacturer • Carpenter Co.
5016 Monument Ave.
Richmond, Virginia 23230
(804) 233-0606

1.4 Emergency Telephone

- Chemtrec • (800) 424-9300 (24-hr number)

SECTION 2 - Hazards Identification

2.1 Classification of the Substance or Mixture

This material is not classified as hazardous under the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200).

2.2 GHS Label Elements

This material is not classified as hazardous under the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200).

2.3 Hazards Not Otherwise Classified

None identified

SECTION 3 - Composition/Information on Ingredients

3.1 Substance

Name	Identifier	% (weight)
Polyether Polyol	CAS# 9082-00-2	100

3.2 Mixtures

Material does not meet the criteria of a mixture according to United Nations Globally Harmonized System of Classification and Labeling of Chemicals (GHS).

SECTION 4 - First Aid Measures

4.1 Description of First Aid Measures

- | | |
|----------------------------|--|
| By route of inhalation | • Remove victim to fresh air. |
| By route of dermal contact | • Wash thoroughly with soap and water. |
| By route of eye contact | • Flush with plenty of water. |
| By route of ingestion | • If victim is conscious, give 1 to 2 glasses of water.
Do not induce vomiting unless directed to do so by medical personnel. |

4.2 Most Important Symptoms and Effects, Acute and Chronic

Refer to Section 11 Toxicological Information.

4.3 Indication of Immediate Medical Attention and Special Treatment If Needed

Treat symptomatically and supportively.

SECTION 5 - Firefighting Measures

5.1 Extinguishing Media

- | | |
|--------------------------------|--|
| Suitable Extinguishing Media | • Dry chemical, foam, carbon dioxide, water fog or fine spray. |
| Unsuitable Extinguishing Media | • Do not use direct water spray. May spread fire. |

5.2 Special Hazards Arising From the Substance or Mixture

- May produce oxides of carbon on combustion. Smoke may be toxic and/or irritating.

5.3 Special Protective Actions for Firefighters

- Responding personnel must wear positive-pressure, self-contained breathing apparatus (SCBA) and protective firefighting clothing. Spray cool water on fire exposed containers to reduce risk of rupture.

SECTION 6 - Accidental Release Measures

6.1 Personal Precautions, Protective Equipment, and Emergency Procedures

- Isolate the area. Keep unauthorized people away. Do not touch or walk through the spilled material. Spilled material may be slippery. Ensure adequate ventilation in enclosed area. Eliminate all ignition sources. Use protective equipment appropriate for the size of the spill.

6.2 Environmental Precautions

- Prevent from entering into soil, ditches, sewers, waterways and/or groundwater.

6.3 Methods and Materials for Containment and Clean Up

Methods	<ul style="list-style-type: none"> • Stop leak, dam spill, and transfer liquid into a suitable container. • Collect residue with absorbent and transfer into a suitable container for proper disposal.
Materials	<ul style="list-style-type: none"> • Inert absorbent (sand, earth or similar).

6.4 Reference to Other Sections

- Refer to Section 8 for exposure control and personal protective equipment information.
- Refer to Section 12 for ecological information.

SECTION 7: Handling and Storage

7.1 Precautions for Safe Handling

- Keep containers tightly closed when not in use.
- Do not eat, drink, or smoke in working area.
- Avoid contact with eyes and minimize contact with skin
- Use good safety and industrial hygiene practices.
- Wash thoroughly after handling.

7.2 Conditions for Safe Storage, Including any Incompatibilities

Storage	<ul style="list-style-type: none"> • Store materials in a cool, dry place. Do not transport with oxidizers.
Incompatibilities	<ul style="list-style-type: none"> •Oxidizing materials, strong alkalis and acids, Isocyanates.

SECTION 8: Exposure Controls/ Personal Protection

8.1 Control Parameters

Exposure Limits/Guidelines	<ul style="list-style-type: none"> • None established.
----------------------------	---

8.2 Exposure Controls

Engineering Controls	<ul style="list-style-type: none"> • Adequate ventilation systems as needed to control concentrations of airborne contaminants below applicable exposure limits.
Eye/Face Protection	<ul style="list-style-type: none"> • Safety glasses with side shields. Chemical goggles if there is a significant risk of splashing.
Respiratory Protection	<ul style="list-style-type: none"> • None required under normal use. If product is heated or sprayed, appropriate respiratory protection may be needed.
Skin Protection	<ul style="list-style-type: none"> • Wear suitable working clothes and shoes.

- Depending on the potential for exposure, chemical resistant gloves may not be needed (e.g. incidental use). As with any chemical, skin contact should be minimized with good work practices and PPE where needed. Wear chemical resistant gloves appropriate for the intended use. Consult glove manufacturers for assistance in choosing appropriate gloves.

Ingestion

- Do not eat, drink or smoke in work area. Wash hands before eating or smoking.

Additional Protection Measures

- None

SECTION 9: Physical and Chemical Properties

9.1 Information on Physical and Chemical Properties

Material Description			
Physical Form	• Liquid	Odor	• Low odor
Color	• Clear	Odor Threshold	• No data available
General Properties			
Boiling Point	• No data available	Melting Point	• No data available
Decomposition Temperature	• No data available	pH	• 7.0 (ave)
Density (at 25°C)	• No data available	Water Solubility	• Low
Solvent Solubility	• No data available	Viscosity (at 25°C)	• No data available
Explosive Properties	• No data available	Specific Gravity/Relative Density	• 1.01 (H ₂ O=1)
Volatility			
Vapor Pressure	• No data available	Vapor Density	• No data available
Evaporation Rate	• No data available	VOC (Vol.)	• No data available
Volatiles (Vol.)	• No data available		
Flammability

Octanol/Water Partition Coefficient	• No data available		

9.2. Other Information

No additional information available

SECTION 10: Stability and Reactivity

10.1 Reactivity

No dangerous reaction known under conditions of normal use.

10.2 Chemical Stability

Stable under normal temperatures and pressures.

10.3 Possibility of Hazardous Reactions

No hazardous reactions if handled and stored as recommended.

10.4 Conditions to Avoid

Elevated temperatures

10.5 Incompatible Materials

Oxidizing materials, strong alkalis and acids, isocyanates.

10.6 Hazardous Decomposition Products

No data available.

SECTION 11: Toxicological Information

11.1 Information on Toxicological Effects

Acute Toxicity

Chemical	CAS #	LD ₅₀ oral rat	LD ₅₀ dermal rabbit	LC ₅₀ inhalation rat
Polyether Polyol	9082-00-2	>2000 mg/kg	>2000 mg/kg	Not available

Skin Corrosion/Irritation

- Based on available information, skin corrosion/irritation is not expected under normal conditions of use.

Serious Eye Damage/Irritation

- Based on available information, eye damage/irritation criteria are not met.

Respiratory or Skin Sensitization

- Based on available information, sensitization criteria are not met.

Germ Cell Mutagenicity

- Available studies have not indicated this material to be a mutagen.

Carcinogenicity

- This product does not contain any component that is considered a human carcinogen by IARC, ACGIH, OSHA or NTP.

Reproductive Toxicity

- No data available

Specific Target Organ Toxicity (single exposure)

- No data available

Specific Target Organ Toxicity (repeated exposure)

- No data available

Aspiration Hazard

- No data available

11.2 Potential Health Effects

Inhalation

- | | |
|---------|--|
| Acute | • Not expected to be a hazard due to low vapor pressure. |
| Chronic | • None known. |

Skin

- | | |
|---------|---------------|
| Acute | • None known. |
| Chronic | • None known. |

Eye

- | | |
|---------|------------------------------|
| Acute | • May cause mild irritation. |
| Chronic | • None known. |

Ingestion

- | | |
|---------|--|
| Acute | • Small amounts swallowed may cause gastrointestinal discomfort. |
| Chronic | • None known. |

SECTION 12: Ecological Information

12.1 Ecotoxicity

This product is not expected to cause significant effects in the aquatic environment.

12.2 Persistence and Degradability

No data available

12.3 Bioaccumulative Potential

No data available

12.4 Mobility in Soil

No data available

12.5 Other Adverse Effects

No data available

SECTION 13: Disposal Considerations

13.1 Waste Disposal Method

Product Waste

- Do not dump into any sewers, on the ground, or into any body of water.
- All disposal methods must be in compliance with Federal, State/Provincial, and local regulations.

Packaging Waste

- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

SECTION 14: Transport Information

U.S. DOT/IATA/IMDG/ADR/RID

Not regulated as hazardous for shipment.

SECTION 15: Regulatory Information

15.1 Regulatory Status

CERCLA Hazardous Substances (40 CFR 302): None reportable.

SARA 311/312: None reportable.

SARA 313: None reportable.

15.2 US State Regulations

STATE RIGHT-TO-KNOW: To the best of our knowledge, this product contains no chemical known to the State of California to cause cancer, birth defects, or other reproductive harm. (California Health and Safety Code Section 25249.6).

15.3 Canadian Regulations

DSL: All components of this product are listed on, or exempt from the DSL.

15.4 International Inventories*

United States: All components of this product are listed on the TSCA inventory.

Australia: All components of this product are listed on the AICS.

China: All components of this product are listed on the IECSC.

Japan: All components of this product listed on the ENCS.

Korea: All components of this product are listed on the ECL.

Philippines (PICCS): All components of this product are listed on the PICCS.

REACH: Listed as a registered substance.

*=Although a chemical may be listed on a country's inventory, it may not indicate a hazard or regulatory control for use.

SECTION 16: Other Information

16.1 HMIS AND NFPA RATINGS

HMIS Classification

Health: 0

Flammability: 1

Reactivity: 0

NFPA Ratings

Health: 0

Flammability: 1

Instability: 0

Special: None

16.2 EU CLP Relevant Phrase

Not classified

16.3 Preparation By

I.H. Department

16.4 Preparation Date

April 3, 2011

16.5 Last Revision Date

May 22, 2020 – Sections 1 and 15

16.6 Disclaimer/Statement of Liability

The data in this Safety Data Sheet is offered for your consideration, investigation and verification. The data is presented in good faith and was obtained from sources Carpenter believes to be reliable. Carpenter, however, makes no representation as to the completeness or accuracy. Carpenter makes no warranty, express or implied, with respect to the data contained herein. Carpenter cannot anticipate all conditions under which this data and the product may be used. The conditions of handling, storage, use, and disposal of the product are beyond Carpenter's control. Thus, we expressly disclaim responsibility or liability for any loss, damage or expense arising out of reliance on the information contained herein. You are advised to make your own determination as to safety, suitability and appropriate manner of handling, storage, use and disposal.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name : PROPYLENE GLYCOL USP/EP
Synonyms : Propylene Glycol, 1,2-Propanediol, 1,2-Dihydroxypropane, Monopropylene Glycol
Substance name : 1,2-Propanediol
Substance No. : 200-338-0 (EINECS)
Chemical characterization : Glycols

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Solvent; Intermediate; Functional Fluids
Prohibited uses : Active pharmaceutical ingredient (API); Tobacco; Electronic cigarettes (E-cigarettes); Cannabis; Theater fogs; Artificial smoke; Cat food; Sprinkler systems over 30%

1.3 Details of the supplier of the safety data sheet

Company	Registration number	Telephone
E-mail address :		
Responsible/issuing person		

1.4 Emergency telephone number

Poison Center:
National Poisons Information Service
UK: +44 131 242 1383
24 hours all days

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)
Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.2 Label elements

Labeling (REGULATION (EC) No 1272/2008)
Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

SECTION 3: Composition/information on ingredients

3.1 Substances

Substance name : 1,2-Propanediol
EC-No. : 200-338-0 (EINECS)

Components

Chemical name	CAS-No. EC-No.	Concentration (% w/w)
Propylene Glycol	57-55-6 200-338-0	>= 99.5

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice : May cause irritation of the eyes, skin and mucous membranes.
Always observe self-protection methods
Move out of dangerous area.
Remove contaminated shoes and clothing.
Show this material safety data sheet to the doctor in attendance.

If inhaled : Remove to fresh air.
In the case of inhalation of aerosol/mist consult a physician if necessary.
Not expected to present a significant inhalation hazard under anticipated conditions of normal use.
Avoid inhalation of hot vapors or extremely high concentrations of aerosols.

In case of skin contact : Wash skin thoroughly with mild soap and water.

In case of eye contact : Flush eyes with water thoroughly and continuously for 15 minutes.
Remove contact lenses, if present and easy to do. Continue rinsing.
If eye irritation persists, consult a specialist.

If swallowed : Not expected to present a significant ingestion hazard under anticipated conditions of normal use.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms : High doses may cause CNS depression (fatigue, dizziness and possibly loss of concentration, with collapse, coma and death in cases of severe over-exposure).

Risks : May cause eye, skin, and respiratory tract irritation.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Treat symptomatically.
Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media : SMALL FIRE: Use dry chemicals, CO₂, water spray or alcohol-resistant foam. LARGE FIRE: Use water spray, water fog or alcohol-resistant foam.

Unsuitable extinguishing media : Do not use solid water stream.

5.2 Special hazards arising from the substance or mixture

Specific hazards during fire fighting : Heat from fire can generate flammable vapor. When mixed with air and exposed to ignition source, vapors can burn in open or explode if confined. Vapors may be heavier than air. May travel long distances along the ground before igniting and flashing back to vapor source. Fine sprays/mists may be combustible at temperatures below normal flash point. Fight fire from a safe distance/protected location. Heat may build enough pressure to rupture closed containers/spreading fire/increasing risk of burns/injuries. Use water spray/fog for cooling. Avoid frothing/steam explosion. Although water soluble, may not be practical to extinguish fire by water dilution. Notify authorities immediately if liquid enters sewer/public waters.

5.3 Advice for firefighters

Special protective equipment for fire-fighters : Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighter's protective clothing will only provide limited protection.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : Use personal protective equipment. Clean-up to be performed only by trained and properly equipped personnel.

6.2 Environmental precautions

Environmental precautions : Try to prevent the material from entering drains or water courses.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version	Revision Date:	SDS Number:	Date of last issue: 11/05/2021
1.9	01/16/2023	BE129	Date of first issue: 11/29/2010

6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Extinguish ignition sources; stop release; prevent flow to sewers or public waters.
Notify fire and environmental authorities.
Impound/recover large land spill; soak up small spill with inert solids.
Soak up small spills with inert solids.
Use suitable disposal containers.
On water, material is soluble and may float or sink.
Contain/collect rapidly to minimize dispersion.
Disperse residue to reduce aquatic harm.
Report per regulatory requirements.

6.4 Reference to other sections

For personal protection see section 8., For disposal considerations see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling : Handle empty containers with care - residue can burn if heated.
Empty containers should be thoroughly rinsed with copious amounts of clean water.
The rinse water can be used for makeup water for any necessary dilution of the concentrated product before use, or it can be properly discarded.

Advice on protection against fire and explosion : Normal measures for preventive fire protection.

Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Handle empty containers with care - residue may be combustible. Empty containers should be thoroughly rinsed with copious amounts of clean water. The rinse water can be used for makeup water for any necessary dilution of the concentrated product before use, or it can be properly discarded.

Advice on common storage : Carbon/Mild steel with suitable internal coating, or stainless steel

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Further information on storage stability : No decomposition if stored and applied as directed.

7.3 Specific end use(s)

Specific use(s) : See Section 1.2.
Development of Exposure Scenarios for such use are not required by the REACH Regulation other than what is provided in other sections of this SDS.

No use-specific Risk Management Measures are proposed.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Propylene Glycol	57-55-6	STEL (particulate)	30 mg/m ³	WEL (GB)
		TWA (particulate)	10 mg/m ³	WEL (GB)
		STEL (total vapour and particulates)	450 ppm 1,422 mg/m ³	WEL (GB)
		TWA (total vapour and particulates)	150 ppm 474 mg/m ³	WEL (GB)

Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End Use	Exposure routes	Potential health effects	Value
1,2-Propanediol	Workers	Inhalation	Long term	168 mg/m ³
	Remarks: Systemic effects			
	Workers	Inhalation	Long term	10 mg/m ³
Remarks: Local effects				
	General Population	Inhalation		50 mg/m ³
Remarks: Systemic effects				
	General Population	Inhalation		10 mg/m ³
Remarks: Local effects				

Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

Substance name	Environmental Compartment	Value
1,2-Propanediol	Fresh water	260 mg/l
	Remarks: Assessment factor - 50	
	Sea water	26 mg/l
Remarks: Assessment factor - 500		
	Water	183 mg/l
Remarks: Intermittent Releases, Assessment factor -100		
	Fresh water sediment	572 mg/kg dw
	Sea sediment	57.2 mg/kg dw

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

	Soil	50 mg/kg dw
	Sewage Treatment Plant	20000 mg/l
	Remarks:Assessment factor -1	

8.2 Exposure controls

Engineering measures

No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control.

Personal protective equipment

- Eye protection : Use splash goggles when eye contact due to splashing or spraying liquid is possible.
- Hand protection
Material : Chemical resistant gloves made of butyl rubber or nitrile rubber category III according to EN 374.
- Remarks : Not normally considered a skin hazard.
- Skin and body protection : No special clothing/skin protection equipment is recommended under normal conditions of anticipated use.
Where use can result in skin contact, practice good personal hygiene.
- Respiratory protection : No special respiratory protection equipment is recommended under anticipated conditions of normal use.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

- Appearance : liquid (20 °C, 1,013.25 hPa)
- Color : clear
- Odor : Little or no odor.
- Odor Threshold : No value available.
- pH : no data available
- Melting point/range : < -20 °C
- Boiling point/boiling range : 184 °C (1003.20 hPa)
- Flash point : 104 °C(1000.010 hPa)
- Flammability (solid, gas) : Not applicable
- Upper explosion limit / Upper flammability limit : ~ 17.4 vol%
- Lower explosion limit / Lower flammability limit : ~ 2.4 vol%

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version	Revision Date:	SDS Number:	Date of last issue: 11/05/2021
1.9	01/16/2023	BE129	Date of first issue: 11/29/2010

Vapor pressure	:	0.2 hPa (25 °C)
Relative vapor density	:	no data available
Density	:	1.03 g/cm ³ (20 °C)
Solubility(ies)	:	
Water solubility	:	completely soluble (20 °C) pH: 7.1 - 7.8
Partition coefficient: n-octanol/water	:	log Pow: -1.07 (20.5 °C) pH: 6.2 - 6.4
Decomposition temperature	:	Incomplete combustion may produce carbon monoxide and other toxic gases.
Viscosity	:	
Viscosity, kinematic	:	42.1 mm ² /s (25 °C)
Explosive properties	:	Not explosive
Oxidizing properties	:	The substance or mixture is not classified as oxidizing.

9.2 Other information

Surface tension	:	71.6 mN/m, 1.01 g/l, 21.5 °C
Self-ignition	:	> 400 °C

SECTION 10: Stability and reactivity

10.1 Reactivity

Stable under recommended storage conditions.

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions	:	Not expected to occur. This material is stable when properly handled and stored.
---------------------	---	--

10.4 Conditions to avoid

Conditions to avoid	:	High temperatures, oxidizing conditions. May degrade when exposed to light or other radiation sources.
---------------------	---	---

10.5 Incompatible materials

Materials to avoid	:	Reacts with strong oxidizing agents. Strong acids. Isocyanates.
--------------------	---	---

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

10.6 Hazardous decomposition products

Combustion may produce oxides of carbon and other toxic gases.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Components:

Propylene Glycol:

Acute oral toxicity : LD50 Oral (Rat): 22,000 mg/kg

Acute inhalation toxicity : Assessment: The substance or mixture has no acute inhalation toxicity

Acute dermal toxicity : LD50 (Rabbit): > 5,000 mg/kg

Skin corrosion/irritation

Product:

Remarks : Based on skin irritation values, not classified.
May cause slight transient skin irritation.

Components:

Propylene Glycol:

Assessment : Non-irritating to the skin.

Serious eye damage/eye irritation

Product:

Remarks : May produce minimal, fully reversible eye irritation.

Components:

Propylene Glycol:

Assessment : Non-irritating to the eyes.

Respiratory or skin sensitization

Product:

Test Type : Respiratory sensitization
Remarks : no data available

Test Type : Skin sensitization
Remarks : Skin reactions of unknown etiology have been described in some hypersensitive individuals following topical application.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version
1.9

Revision Date:
01/16/2023

SDS Number:
BE129

Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Components:

Propylene Glycol:

Assessment : Not sensitizing

Germ cell mutagenicity

Product:

Germ cell mutagenicity- Assessment : No adverse effect observed.

Components:

Propylene Glycol:

Germ cell mutagenicity- Assessment : Negative for genotoxicity using both in vitro and in vivo tests.

Carcinogenicity

Product:

Carcinogenicity - Assessment : No adverse effect observed.

Components:

Propylene Glycol:

Carcinogenicity - Assessment : No increase in tumors was noted in rats and dogs exposed to high concentrations of propylene glycol via the diet for up to 2 years. The incidence of skin tumors was unaltered in mice following dermal application over a lifetime.

Reproductive toxicity

Product:

Reproductive toxicity - Assessment : No adverse effect observed.
No adverse effect observed.

Components:

Propylene Glycol:

Reproductive toxicity - Assessment : No adverse effect on reproductive performance was seen in male and female mice exposed continuously to high doses of propylene glycol in drinking water for up to 3 months. Results from studies in pregnant rats, mice, hamsters and rabbits demonstrate that propylene glycol is not teratogenic or fetotoxic.

STOT-single exposure

Product:

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Assessment : Based on single exposure toxicity values, not classified.

Components:

Propylene Glycol:

Assessment : The substance or mixture is not classified as specific target organ toxicant, single exposure.

STOT-repeated exposure

Product:

Assessment : Based on repeated exposure toxicity values, not classified., Propylene glycol is of low inherent toxicity in rats and dogs after repeated oral exposure, while cats show species-specific hematological changes in red blood cells (other tissues unremarkable). Rats exposed repeatedly to high aerosol concentrations exhibited signs consistent with irritation of the eyes and nasal mucosa but showed no evidence of systemic toxicity.

Components:

Propylene Glycol:

Assessment : Long-term studies in rodents conducted with high oral doses found no evidence of adverse effects. Ingestion by cats, however, results in species-specific hematological changes.

Repeated dose toxicity

Components:

Propylene Glycol:

Species : Rat, male
NOAEL : 1,700 mg/kg
Application Route : Oral
Remarks : Long-term studies in rodents conducted with high oral doses found no evidence of adverse effects. Ingestion by cats, however, results in species-specific hematological changes.

Species : Rat
LOAEL : 0.16 mg/l
Application Route : Inhalation
Remarks : High aerosol concentrations inhaled by rats caused minor nasal and ocular signs that may have been due to mild irritation or drying effects on mucous membranes.

Further information

Product:

Remarks : no data available

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Components:

Propylene Glycol:

Remarks : Propylene glycol is of low acute toxicity after ingestion or skin contact. It is not a skin irritant, although repeated contact with undiluted product may dry the skin resulting in cracking and/or fissuring. It is not a skin sensitizer, however skin reactions of unknown etiology have been described in some hypersensitive individuals following topical application. Neat liquid may also produce minimal, fully reversible eye irritation. Propylene glycol is of low inherent toxicity in rats and dogs after repeated oral exposure, while cats show species-specific hematological changes in red blood cells (other tissues unremarkable). Rats exposed repeatedly to high aerosol concentrations exhibited signs consistent with irritation of the eyes and nasal mucosa but showed no evidence of systemic toxicity. Results from studies in pregnant rats, mice, hamsters and rabbits demonstrate that propylene glycol is not a teratogen while no adverse effect on reproductive performance was apparent in male and female mice exposed continuously to high doses of propylene glycol in drinking water for up to 3 months. It is not genotoxic in vitro or in vivo. There was no increase in tumors in rats or dogs exposed to high concentrations of propylene glycol via the diet for up to 2 years, while the incidence of skin tumors was unaltered in mice following dermal application over a lifetime.

SECTION 12: Ecological information

12.1 Toxicity

Product:

Ecotoxicology Assessment

Acute aquatic toxicity : Based on acute aquatic toxicity values, not classified.
Chronic aquatic toxicity : Not classified, based on readily biodegradability and low acute toxicity.

Components:

Propylene Glycol:

Toxicity to fish : LC50 (Oncorhynchus mykiss (rainbow trout)): 40,613 mg/l
Exposure time: 96 HOURS
Toxicity to daphnia and other aquatic invertebrates : EC50 (Ceriodaphnia dubia): 18,340 mg/l
Exposure time: 48 HOURS
EC50 (Americamysis bahia (Mysid shrimp)): 18,800 mg/l
Exposure time: 96 HOURS
Toxicity to algae/aquatic : EC50 (Pseudokirchneriella subcapita (formerly Selenastrum

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

plants capricornutum): 19,000 mg/l
Exposure time: 96 HOURS

EC50 (Skeletonema costatum): 19,100 mg/l
Exposure time: 96 HOURS

Toxicity to microorganisms : NOEC (Pseudomonas putida): 20,000 mg/l
Exposure time: 18 HOURS

Toxicity to fish (Chronic toxicity) : Remarks: Not expected to exhibit chronic toxicity to fish.

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOEC: 13,020 mg/l
Exposure time: 7 DAY
Species: Ceriodaphnia dubia

12.2 Persistence and degradability

Components:

Propylene Glycol:

Biodegradability : Result: Biodegradable
Biodegradation: 72 - 100 %

12.3 Bioaccumulative potential

Product:

Bioaccumulation : Remarks: This material is not expected to bioaccumulate.

Components:

Propylene Glycol:

Bioaccumulation : Bioconcentration factor (BCF): 0.09
Remarks: This material is not expected to bioaccumulate.

Partition coefficient: n-octanol/water : log Pow: -1.07 (20.5 °C)

12.4 Mobility in soil

Product:

Distribution among environmental compartments : Stability in soil
Remarks: Low potential for soil adsorption expected

Components:

Propylene Glycol:

Distribution among environmental compartments : Remarks: Environmental releases of propylene glycol will tend to partition to water and soil, with little potential for evaporation.

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

12.5 Results of PBT and vPvB assessment

Product:

Assessment : Not applicable.

Components:

Propylene Glycol:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT).

12.6 Other adverse effects

Product:

Environmental fate and pathways : No additional information available.

Endocrine disrupting potential : The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Components:

Propylene Glycol:

Environmental fate and pathways : This material is not expected to persist in the environment and should pose little if any physical or toxicological hazards.

Additional ecological information : This material is expected to be non-hazardous to aquatic species.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product : Comply with applicable local, state or international regulations concerning solid or hazardous waste disposal and/or container disposal.
Landfill solids at permitted sites.
Burn concentrated liquids, diluting with clean, low viscosity fuel.
Dilute aqueous waste may biodegrade.
Assure effluent complies with applicable regulations.

SECTION 14: Transport information

14.1 UN number

Not regulated for transport

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

14.2 UN proper shipping name

Not regulated for transport

14.3 Transport hazard class(es)

Not regulated for transport

14.4 Packing group

Not regulated for transport

14.5 Environmental hazards

Not applicable

14.6 Special precautions for user

No special precautions required.

14.7 Maritime transport in bulk according to IMO instruments

Description of the goods	PROPYLENE GLYCOL
Pollution category	OS
Ship type	NONE

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Other international regulations

Global Inventory Status

The ingredients of this product are compliant with the following chemical inventory requirements or exemptions.

Country/Region	Inventory	Status Description
Australia	AICS	Listed
Canada	DSL	Listed
China	IECSC	Listed
Europe	REACH	See Compliance Statement*
Japan	ENCS	Listed
Korea	K REACH	Pre-registration period *

United States of America	TSCA	Listed

SAFETY DATA SHEET

PROPYLENE GLYCOL USP/EP, BULK

Version 1.9 Revision Date: 01/16/2023 SDS Number: BE129 Date of last issue: 11/05/2021
Date of first issue: 11/29/2010

Taiwan	TCSCA	Listed
Turkey	KKDIK	Pre-registration period *

* If the product has been purchased domestically from the notifying/registering legal entity of the LyondellBasell group of companies. We confirm that all substances (in this preparation) have been registered in accordance with the deadlines set forth in the applicable regulation. During the "Pre-registration period", we confirm that all substances in this preparation have been pre-registered or, where required under the regulation, registered, and that we have the intention to proceed with their registration in accordance with the deadlines set forth in the regulation. For more information, please contact reach@lyondellbasell.com.

† For more information on the status of this material, please contact chemical control at global.chemical.control@lyondellbasell.com.

15.2 Chemical safety assessment

A Chemical Safety Assessment has been carried out for this substance.

SECTION 16: Other information

SAFETY DATA SHEET

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
Date of first issue: 12/27/2021

Print Date 05/04/2022

SECTION 1. IDENTIFICATION

Product name : DIETHYLENE GLYCOL (IVL)

Manufacturer or supplier's details

Company name of supplier : Indorama Ventures Oxides LLC
Address : 24 Waterway Ave., Suite 1100, The Woodlands, Texas 77380
United States of America (USA)
Telephone : (256) 3405200

E-mail address of person responsible for the SDS : oxide.sds.global@indorama.net
Emergency telephone number : CHEMTREC – United States (English)
Local (City) Northern Virginia: +1 703-741-5970

Recommended use of the chemical and restrictions on use

Recommended use : Component of a Polyurethane System.
Restrictions on use : For industrial use only.

SECTION 2. HAZARDS IDENTIFICATION

GHS classification in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200)

Acute toxicity (Oral) : Category 4

GHS label elements

Hazard pictograms :

Signal Word : Warning

Hazard Statements : H302 Harmful if swallowed.

Precautionary Statements : **Prevention:**
P264 Wash skin thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
Response:
P301 + P312 + P330 IF SWALLOWED: Call a POISON CENTER/ doctor if you feel unwell. Rinse mouth.
Disposal:
P501 Dispose of contents/ container to an approved waste disposal plant.

Other hazards

None known.

SAFETY DATA SHEET

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
Date of first issue: 12/27/2021

Print Date 05/04/2022

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Components

Chemical name	CAS-No.	Concentration (% w/w)
2,2'-oxydiethanol	111-46-6	>= 90 - <= 100

The specific chemical identity and/or exact percentage (concentration) of composition may be withheld as a trade secret.

SECTION 4. FIRST AID MEASURES

- General advice : Move out of dangerous area.
Show this safety data sheet to the doctor in attendance.
Treat symptomatically.
Get medical attention if symptoms occur.
- If inhaled : If inhaled, remove to fresh air.
Get medical attention if symptoms occur.
- In case of skin contact : Wash with water and soap as a precaution.
- In case of eye contact : Flush eyes with water as a precaution.
Remove contact lenses.
Keep eye wide open while rinsing.
If eye irritation persists, consult a specialist.
- If swallowed : Induce vomiting immediately and call a physician.
Keep respiratory tract clear.
Never give anything by mouth to an unconscious person.
If symptoms persist, call a physician.
- Most important symptoms and effects, both acute and delayed : None known.
- Protection of first-aiders : First Aid responders should pay attention to self-protection and use the recommended protective clothing
If potential for exposure exists refer to Section 8 for specific personal protective equipment.
No action shall be taken involving any personal risk or without suitable training.
- Notes to physician : Treat symptomatically.

SECTION 5. FIRE-FIGHTING MEASURES

- Suitable extinguishing media : Water spray
Alcohol-resistant foam
Carbon dioxide (CO₂)
Dry chemical
- Unsuitable extinguishing media : Exercise caution when using a high volume water jet as it may scatter and spread fire
- Hazardous combustion products : Carbon oxides
- Specific extinguishing methods : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
- Further information : No action shall be taken involving any personal risk or without suitable training.
- Special protective equipment for fire-fighters : Wear self-contained breathing apparatus for firefighting if necessary.

SAFETY DATA SHEET

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
Date of first issue: 12/27/2021

Print Date 05/04/2022

SECTION 6. ACCIDENTAL RELEASE MEASURES

- Personal precautions, protective equipment and emergency procedures : Refer to protective measures listed in sections 7 and 8.
- Environmental precautions : Do not flush into surface water or sanitary sewer system. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.
- Methods and materials for containment and cleaning up : Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Keep in suitable, closed containers for disposal.

SECTION 7. HANDLING AND STORAGE

- Advice on protection against fire and explosion : Normal measures for preventive fire protection.
- Advice on safe handling : Avoid formation of respirable particles. Do not breathe vapours or spray mist. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Dispose of rinse water in accordance with local and national regulations.
- Conditions for safe storage : Keep container tightly closed in a dry and well-ventilated place. Keep in properly labelled containers.
- Materials to avoid : For incompatible materials please refer to Section 10 of this SDS.
- Further information on storage stability : Stable under normal conditions.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Ingredients with workplace control parameters

Components	CAS-No.	Value type (Form of exposure)	Control parameters / Permissible concentration	Basis
2,2'-oxydiethanol	111-46-6	TWA	10 mg/m3	US WEEL

Personal protective equipment

- Respiratory protection : Wear respiratory protection when its use is identified for certain contributing scenario.
- Hand protection

- Remarks : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. The suitability for a specific workplace should be discussed with the producers of the protective gloves.

SAFETY DATA SHEET

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
Date of first issue: 12/27/2021

Print Date 05/04/2022

Eye protection : Tightly fitting safety goggles
Skin and body protection : Impervious clothing
Choose body protection according to the amount and concentration of the dangerous substance at the work place.
Hygiene measures : When using do not eat or drink.
When using do not smoke.
Wash hands before breaks and at the end of workday.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance : liquid
Color : colourless, Clear
Odor : sweet
pH : 7
Melting point : 20.3 °F / -6.5 °C
Boiling point/boiling range : 472.8 °F / 244.9 °C
(1,013 hPa)
Flash point : 280 °F / 138 °C
Method: closed cup
Upper explosion limit / Upper flammability limit : 12.3 %(V)
Lower explosion limit / Lower flammability limit : 2 %(V)
Vapor pressure : 0.002666 hPa (68 °F / 20 °C)
ca. 0.77 hPa (176 °F / 80 °C)
Relative vapor density : 3.65
Relative density : 1.118
Density : 1.18 g/cm³ (68 °F / 20 °C)
Solubility(ies)
Water solubility : 1,000 g/l soluble (68 °F / 20 °C)
Solubility in other solvents : Solvent: Methanol
Description: soluble
Partition coefficient: n-octanol/water : log Pow: -1.98
GLP: no
Autoignition temperature : 702 °F / 372 °C
Viscosity
Viscosity, dynamic : 30 mPa.s (77 °F / 25 °C)

SAFETY DATA SHEET

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
Date of first issue: 12/27/2021

Print Date 05/04/2022

Oxidizing properties : The substance or mixture is not classified as oxidizing.
Molecular weight : 106.14 g/mol

SECTION 10. STABILITY AND REACTIVITY

Reactivity : No dangerous reaction known under conditions of normal use.
Chemical stability : Stable under normal conditions.
Possibility of hazardous reactions : No hazards to be specially mentioned.
Conditions to avoid : None known.
Incompatible materials : None known.
Hazardous decomposition products : Carbon monoxide
Carbon dioxide (CO₂)
Aldehydes
Ketones
Burning produces noxious and toxic fumes.
No decomposition if stored and applied as directed.

SECTION 11. TOXICOLOGICAL INFORMATION

Acute toxicity

Product:

Acute oral toxicity : Acute toxicity estimate: 502.51 mg/kg
Method: Calculation method

Components:

2,2'-oxydiethanol:

Acute oral toxicity : Acute toxicity estimate: 500 mg/kg
Assessment: The component/mixture is moderately toxic after single ingestion.

Skin corrosion/irritation

Components:

2,2'-oxydiethanol:

Species : Human
Result : Mild skin irritant
Species : Rabbit
Result : No skin irritation

Serious eye damage/eye irritation

Components:

2,2'-oxydiethanol:

Species : Rabbit
Result : No eye irritation
Exposure time : 24 h

DIETHYLENE GLYCOL (IVL)

Version	Revision Date:	SDS Number:	Date of last issue: 12/27/2021
1.1	02/16/2022	400041019918	Date of first issue: 12/27/2021

Print Date 05/04/2022

Respiratory or skin sensitization
Components:
2,2'-oxydiethanol:

Routes of exposure	:	Skin
Species	:	Guinea pig
Method	:	Directive 67/548/EEC, Annex V, B.6.
Result	:	Does not cause skin sensitisation.

Germ cell mutagenicity
Components:
2,2'-oxydiethanol:

Genotoxicity in vivo	:	Cell type: Somatic
		Application Route: Intraperitoneal injection
		Dose: 500 - 2000 mg/kg
		Method: OECD Test Guideline 474
		Result: negative

Carcinogenicity
Components:
2,2'-oxydiethanol:

Species	:	Rat, male and female
Application Route	:	Oral
Exposure time	:	24 month(s)
Dose	:	25000 mg/l
Result	:	negative

Species	:	Rat, male and female
Application Route	:	Oral
Exposure time	:	24 month(s)
Dose	:	40000 mg/l
Result	:	negative

Species	:	Rat, male and female
Application Route	:	Oral
Exposure time	:	108 weeks
Dose	:	1160 - 1210 mg/kg
Frequency of Treatment	:	7 daily
Result	:	negative

IARC No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

OSHA No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

NTP No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

DIETHYLENE GLYCOL (IVL)

Version	Revision Date:	SDS Number:	Date of last issue: 12/27/2021
1.1	02/16/2022	400041019918	Date of first issue: 12/27/2021

Print Date 05/04/2022

Reproductive toxicity**Components:****2,2'-oxydiethanol:**

Effects on fertility : Species: Mouse, male and female
Application Route: Oral
Dose: 3060 milligram per kilogram

Effects on fetal development : Species: Rabbit
Application Route: Oral
Dose: 1000 milligram per kilogram
Method: OECD Test Guideline 414
Result: No teratogenic effects

STOT-single exposure**Components:****2,2'-oxydiethanol:**

Target Organs : Central nervous system, Kidney
Remarks : Not classified due to data which are conclusive although insufficient for classification.

STOT-repeated exposure**Components:****2,2'-oxydiethanol:**

Routes of exposure : Ingestion
Target Organs : Kidney, Liver, Central nervous system
Assessment : The substance or mixture is not classified as specific target organ toxicant, repeated exposure., May cause damage to organs through prolonged or repeated exposure.

Repeated dose toxicity**Components:****2,2'-oxydiethanol:**

Species : Rat, male and female
NOAEL : 100 mg/kg
Application Route : Ingestion
Exposure time : 5,400 h
Number of exposures : 7 d/w

Species : Rat, male and female
NOEL : 150 mg/kg
Application Route : Ingestion
Exposure time : 672 h

Species : Dog, male
NOAEL : 8000 mg/kg
Application Route : Skin contact
Exposure time : 672 h
Number of exposures : 7 d

DIETHYLENE GLYCOL (IVL)

Version	Revision Date:	SDS Number:	Date of last issue: 12/27/2021
1.1	02/16/2022	400041019918	Date of first issue: 12/27/2021

Print Date 05/04/2022

SECTION 12. ECOLOGICAL INFORMATION**Ecotoxicity****Components:****2,2'-oxydiethanol:**

Toxicity to fish : LC50 (Pimephales promelas (fathead minnow)): 75,200 mg/l
 Exposure time: 96 h
 Test Type: flow-through test
 Test substance: Fresh water
 Remarks: Toxic to aquatic organisms.

Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): > 10,000 mg/l
 Exposure time: 24 h
 Test Type: static test
 Test substance: Fresh water
 Method: DIN 38412

Toxicity to fish (Chronic toxicity) : NOEC (Pimephales promelas (fathead minnow)): 15,380 mg/l
 Exposure time: 17 d
 Test substance: Fresh water

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOEC (Daphnia (water flea)): 8,590 mg/l
 Exposure time: 7 d
 Test substance: Fresh water

Toxicity to microorganisms : IC50: > 1,000 mg/l
 Exposure time: 3 h
 Method: OECD Test Guideline 209

Persistence and degradability**Components:****2,2'-oxydiethanol:**

Biodegradability : Inoculum: activated sludge
 Result: Readily biodegradable.
 Biodegradation: >= 70 %
 Exposure time: 10 - 29 d

Bioaccumulative potential**Product:**

Bioaccumulation : Species: Leuciscus idus (Golden orfe)
 Bioconcentration factor (BCF): 100
 Exposure time: 3 d

Components:**2,2'-oxydiethanol:**

Bioaccumulation : Species: Leuciscus idus (Golden orfe)
 Bioconcentration factor (BCF): 100

SAFETY DATA SHEET

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
Date of first issue: 12/27/2021

Print Date 05/04/2022

Exposure time: 3 d
Test substance: Fresh water
Method: OECD Test Guideline 305

Partition coefficient: n-octanol/water : log Pow: -1.98 (77 °F / 25 °C)

Mobility in soil

Product:

Distribution among environmental compartments : Koc: 1

Other adverse effects

Product:

Ozone-Depletion Potential : Regulation: 40 CFR Protection of Environment; Part 82 Protection of Stratospheric Ozone - CAA Section 602 Class I Substances
Remarks: This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

SECTION 13. DISPOSAL CONSIDERATIONS

Disposal methods

Waste from residues : Dispose of contents and container in accordance with all local, regional, national and international regulations.
Do not dispose of waste into sewer.
Do not contaminate ponds, waterways or ditches with chemical or used container.

Contaminated packaging : Empty remaining contents.
Dispose of as unused product.
Do not re-use empty containers.

SECTION 14. TRANSPORT INFORMATION

International Regulations

UNRTDG

Not regulated as a dangerous good

IATA-DGR

Not regulated as a dangerous good

IMDG-Code

Not regulated as a dangerous good

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable for product as supplied.

Domestic regulation

49 CFR

Not regulated as a dangerous good

DIETHYLENE GLYCOL (IVL)

Version 1.1 Revision Date: 02/16/2022 SDS Number: 400041019918 Date of last issue: 12/27/2021
 Date of first issue: 12/27/2021

Print Date 05/04/2022

SECTION 15. REGULATORY INFORMATION**CERCLA Reportable Quantity**

Components	CAS-No.	Component RQ (lbs)	Calculated product RQ (lbs)
ethane-1,2-diol	107-21-1	5000	*

*: Calculated RQ exceeds reasonably attainable upper limit.

SARA 304 Extremely Hazardous Substances Reportable Quantity

This material does not contain any components with a section 304 EHS RQ.

SARA 302 Extremely Hazardous Substances Threshold Planning Quantity

This material does not contain any components with a section 302 EHS TPQ.

SARA 311/312 Hazards : Acute toxicity (any route of exposure)**SARA 313** : This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.**Clean Air Act**

This product neither contains, nor was manufactured with a Class I or Class II ODS as defined by the U.S. Clean Air Act Section 602 (40 CFR 82, Subpt. A, App.A + B).

This product does not contain any hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act Section 112 (40 CFR 61).

This product does not contain any chemicals listed under the U.S. Clean Air Act Section 112(r) for Accidental Release Prevention (40 CFR 68.130, Subpart F).

The following chemical(s) are listed under the U.S. Clean Air Act Section 111 SOCM I Intermediate or Final VOC's (40 CFR 60.489):

2,2'-oxydiethanol	111-46-6	>= 90 - <= 100 %
-------------------	----------	------------------

Clean Water Act

This product does not contain any Hazardous Substances listed under the U.S. CleanWater Act, Section 311, Table 116.4A.

This product does not contain any Hazardous Chemicals listed under the U.S. CleanWater Act, Section 311, Table 117.3.

This product does not contain any toxic pollutants listed under the U.S. Clean Water Act Section 307

This product does not contain any priority pollutants related to the U.S. Clean Water Act

US State Regulations**Massachusetts Right To Know**

2,2'-oxydiethanol	111-46-6
-------------------	----------

Pennsylvania Right To Know

2,2'-oxydiethanol	111-46-6
ethane-1,2-diol	107-21-1

Maine Chemicals of High Concern

Product does not contain any listed chemicals

Vermont Chemicals of High Concern

ethane-1,2-diol	107-21-1

California Prop. 65

WARNING: This product can expose you to chemicals including ethane-1,2-diol, which is/are known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

The ingredients of this product are reported in the following inventories:

DSL : All components of this product are on the Canadian DSL

AIIC : On the inventory, or in compliance with the inventory

AICS : On the inventory, or in compliance with the inventory

NZIoC : On the inventory, or in compliance with the inventory

ENCS : On the inventory, or in compliance with the inventory

ISHL : On the inventory, or in compliance with the inventory

KECI : On the inventory, or in compliance with the inventory

PICCS : On the inventory, or in compliance with the inventory

IECSC : On the inventory, or in compliance with the inventory

TCSI : On the inventory, or in compliance with the inventory

TSCA : All substances listed as active on the TSCA inventory

TSCA list

No substances are subject to a Significant New Use Rule.

No substances are subject to TSCA 12(b) export notification requirements.

DIPROPYLENE GLYCOL FRAGRANCE

Gen. Variant: SDS_US_GHS

Version 1.2

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE133

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Trade name : DIPROPYLENE GLYCOL FRAGRANCE
CAS Number: : 25265-71-8
Chemical characterization : Glycols
Chemical name : 1,1-Oxydi-2-Propanol
Synonyms : Dipropylene Glycol, DPG, 2,2-Dihydroxyisopropyl Ether,
Methyl-2(Methyl-2) Oxybispropanol

Identified uses : Monomer; Intermediate; Functional Fluids

Prohibited uses : Theater fogs; Artificial smoke

Company Address

Lyondell Chemical Company

2. HAZARDS IDENTIFICATION**GHS Classification**

Not classified as hazardous according to OSHA Hazard Communication Standard 29 CFR 1910.1200 (HazCom 2012).

Label elements

Not classified as hazardous according to OSHA Hazard Communication Standard 29 CFR 1910.1200 (HazCom 2012).

Other hazards

No additional information available.

DIPROPYLENE GLYCOL FRAGRANCE

Gen. Variant: SDS_US_GHS

Version 1.2

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE133

3. COMPOSITION/INFORMATION ON INGREDIENTS**Substances****Components**

Chemical name	CAS-No. EC-No.	Weight %	Component Type
Dipropylene Glycol	25265-71-8	>= 99.5 %	A

Key:
(A) Substance

4. FIRST AID MEASURES

- General advice : May cause irritation of the eyes, skin and mucous membranes. Always observe self-protection methods. Move out of dangerous area. Remove contaminated shoes and clothing. Show this material safety data sheet to the doctor in attendance.
- If inhaled : Not expected to present a significant inhalation hazard under anticipated conditions of normal use. Avoid inhalation of hot vapors or extremely high concentrations of aerosols.

Remove to fresh air. In the case of inhalation of aerosol/mist consult a physician if necessary.
- In case of skin contact : Wash skin thoroughly with mild soap and water.
- In case of eye contact : Flush eyes with water thoroughly and continuously for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, consult a specialist.
- If swallowed : Not expected to present a significant ingestion hazard under anticipated conditions of normal use.

Notes to physician

DIPROPYLENE GLYCOL FRAGRANCE

Gen. Variant: SDS_US_GHS

Version 1.2

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE133

Symptoms	: High doses may cause CNS depression (fatigue, dizziness and possibly loss of concentration, with collapse, coma and death in cases of severe over-exposure).
Hazards	: This product is of low acute toxicity. May cause irritation of the eyes, skin and mucous membranes. Hot vapors may cause lung damage.
Treatment	: Treat symptomatically. Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media	: SMALL FIRE: Use dry chemicals, CO2, water spray or alcohol-resistant foam. LARGE FIRE: Use water spray, water fog or alcohol-resistant foam.
Unsuitable extinguishing media	: Do not use solid water stream.
Specific hazards during fire fighting	: Heat from fire can generate flammable vapor. When mixed with air and exposed to ignition source, vapors can burn in open or explode if confined. Vapors may be heavier than air. May travel long distances along the ground before igniting and flashing back to vapor source. Fine sprays/mists may be combustible at temperatures below normal flash point. Fight fire from a safe distance/protected location. Heat may build enough pressure to rupture closed containers/spreading fire/increasing risk of burns/injuries. Use water spray/fog for cooling. Avoid frothing/steam explosion. Burning liquid may float on water. Although water soluble, may not be practical to extinguish fire by water dilution. Notify authorities immediately if liquid enters sewer/public waters.
Special protective equipment for fire-fighters	: Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighter's protective clothing will only provide limited protection.

DIPROPYLENE GLYCOL FRAGRANCE

Gen. Variant: SDS_US_GHS

Version 1.2

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE133

6. ACCIDENTAL RELEASE MEASURES

- Personal precautions : Use personal protective equipment.
Clean-up to be performed only by trained and properly equipped personnel.
- Environmental precautions : Try to prevent the material from entering drains or water courses.
- Methods for containment /
Methods for cleaning up : Extinguish all ignition sources.
Stop release; prevent flow to sewers/public waters.
Notify fire and environmental authorities.
Impound/recover large land spill; soak up small spill with inert solids.
Soak up small spills with inert solids.
Use suitable disposal containers.
On water, material is soluble and may float or sink.
Contain/collect rapidly to minimize dispersion.
Disperse residue to reduce aquatic harm.
Report per regulatory requirements.

7. Handling and storage**Precautions for safe handling**

- Advice on safe handling : Handle empty containers with care - residue can burn if heated.
Empty containers should be thoroughly rinsed with copious amounts of clean water.
The rinse water can be used for makeup water for any necessary dilution of the concentrated product before use, or it can be properly discarded.
- Advice on protection against fire and explosion : Normal measures for preventive fire protection.
- Fire-fighting class : OSHA/NFPA Class IIIB combustible liquid.

Conditions for safe storage, including any incompatibilities

- Requirements for storage areas and containers : Keep container tightly closed when not in use.
Protect from moisture.
Store away from heat.
Material can attack some forms of plastics.
Do not store together with oxidizing and self-igniting products.
- Advice on common storage : Carbon/Mild steel with suitable internal coating, or stainless steel

DIPROPYLENE GLYCOL FRAGRANCE

Other data : No decomposition if stored and applied as directed.

Specific end use(s)
: See Section 1.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Control parameters****Ingredients with workplace control parameters**

Consult local authorities for acceptable exposure limits.

Exposure controls**Engineering measures**

No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control.

Personal protective equipment

- Respiratory protection : No special respiratory protection is recommended under anticipated conditions of normal use with adequate ventilation. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
- Hand protection : Not normally considered a skin hazard.
Use chemical resistant gloves appropriate to conditions of use.
Wear chemical resistant gloves such as:
Nitrile rubber
Latex
- Eye and face protection : Safety glasses with side-shields
Use splash goggles when eye contact due to splashing or spraying liquid is possible.
- Skin and body protection : No special clothing/skin protection equipment is recommended under normal conditions of anticipated use. Where use can result in skin contact, practice good personal hygiene.
- Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the

hazards and/or potential hazards that may be encountered during use.
Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices.
Wash hands before eating, drinking, smoking, or using toilet facilities.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	: liquid at 20 °C
Color	: Clear, colorless.
Odor	: odorless
Odor Threshold	: Not applicable
Flash point	: 128 - 132 °C at 988.80 hPa (741.66 mm Hg)
Lower explosion limit	: No Data Available.
Upper explosion limit	: No Data Available.
Flammability (solid, gas)	: Not applicable
Oxidizing properties	: The substance or mixture is not classified as oxidizing.
Autoignition temperature	: 332 °C at 989.60 - 1001.80 hPa
Molecular weight	: 134.17 g/mol
Decomposition temperature	: not determined
pH	: 7.4 (as aqueous solution)
Melting point/range	: < -20 °C
Boiling point/boiling range	: 227 °C at 983.60 hPa
Vapor pressure	: 0.013 hPa at 25 °C
Density	: 1.02 g/cm ³ at 20 °C

Water solubility	: Miscible in water.
Partition coefficient: n-octanol/water	: log Pow: -0.462 at 21.7 °C
Viscosity, kinematic	: 118 mm ² /s at 20 °C 32 mm ² /s at 40 °C
Relative vapor density	: ~ 4.6 (Air = 1.0 at 15 - 20°C/59 - 68°F)
Surface tension	: 71.4 mN/m 1.01 g/l at 22 °C
Explosive properties	: Not explosive
Other Information	: No additional information available.

10. STABILITY AND REACTIVITY

Reactivity	: Stable under recommended storage conditions.
Chemical stability	: Stable under recommended storage conditions.
Hazardous reactions	: Not expected to occur. This material is stable when properly handled and stored.
Conditions to avoid	: High temperatures, oxidizing conditions.
Materials to avoid	: Strong acids Isocyanates. Strong oxidizing agents.
Hazardous decomposition products	: Carbon Monoxide and other toxic vapors.
Thermal decomposition	: Thermal decomposition may produce carbon monoxide and other toxic vapors.

11. TOXICOLOGICAL INFORMATION

Product Summary : The below given information is based on the assessment of the product including impurities.

Acute toxicity

DIPROPYLENE GLYCOL FRAGRANCE

Gen. Variant: SDS_US_GHS

Version 1.2

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE133

- Acute oral toxicity** : Based on acute toxicity values, not classified.
Ingestion of high doses may cause discomfort and irritation of the gastrointestinal tract and CNS depression (fatigue, dizziness and possibly loss of concentration, with collapse, coma and death in cases of severe over-exposure).
- : LD50 Oral: > 5,000 mg/kg
Species: Rat
- Acute inhalation toxicity** : Based on acute toxicity values, not classified.
- : LC50 (Inhl): > 2.34 mg/l
Exposure time: 4 HOURS
Species: Rat
- Acute dermal toxicity** : Based on acute toxicity values, not classified.
- : LD50 Dermal: > 5,000 mg/kg
Species: Rabbit
- Skin corrosion/irritation** : Based on skin irritation values, not classified.
May cause slight transient skin irritation.
- Serious eye damage/eye irritation** : Based on eye irritation values, not classified.
- Respiratory or skin sensitization** : Respiratory sensitization
Not classified
No study available.
- : Skin sensitization
Not classified
No adverse effect observed.
- Chronic toxicity**
- Carcinogenicity** : Not classified
No adverse effect observed.
- Germ cell mutagenicity** : Not classified
No adverse effect observed.

DIPROPYLENE GLYCOL FRAGRANCE

Gen. Variant: SDS_US_GHS

Version 1.2

Revision Date 11/22/2019

Print Date 02/09/2023

SDS No.: BE133

Reproductive toxicity

- Effects on fertility /
Effects on or via lactation : Not classified
Male rats and female mice ingesting multi-gram quantities of dipropylene glycol for 90-days exhibited changes in testis and estrous cycle that appeared secondary to clinical- and systemic toxicity, debilitation and death. Data available on related homologues suggest it is unlikely to affect fertility or reproduction at lower exposures that do not cause morbidity or mortality.
- Effects on Development : Not classified
No adverse effect observed.
- Target Organ Systemic Toxicant - Single exposure** : Based on single exposure toxicity values, not classified.
- Target Organ Systemic Toxicant - Repeated exposure** : Based on repeated exposure toxicity values, not classified.
- Aspiration hazard** : Based on physico-chemical values or lack of human evidence, not classified.

12. Ecological information**Ecotoxicology Assessment**

- Short-term (acute) aquatic hazard** : Based on acute aquatic toxicity values, not classified.
- Long-term (chronic) aquatic hazard** : Not classified, based on readily biodegradability and low acute toxicity.
- Toxicity to fish** : Low acute toxicity to fish
Data for close chemical analog.
- Toxicity to daphnia and other aquatic invertebrates** : Low acute toxicity to aquatic invertebrates.
- Toxicity to algae** : Low toxicity to algae.
- Toxicity to bacteria** : Low toxicity to sewage microbes.
- Toxicity to fish (Chronic toxicity)** : QSAR (Quantitative structure-activity relationship) based calculation predicts low chronic toxicity.
- Toxicity to daphnia and other aquatic invertebrates** : QSAR (Quantitative structure-activity relationship) based calculation predicts low chronic toxicity.

(Chronic toxicity)**Persistence and degradability**

- Biodegradability** : Rapidly degradable.
- : Biodegradation: 64.5 - 93.4 %
(After 28 days in a ready biodegradability test)
(freshwater)
- : Partially biodegradable.
- : Biodegradation: 17.3 - 23.6 %
(62 - 64 day ready biodegradability test)
(seawater)

- Stability in water**
Dipropylene Glycol : Not expected to hydrolyze readily.

- Stability in soil**
Dipropylene Glycol : Low potential for soil adsorption expected

Bioaccumulative potential

- Bioaccumulation** : This material is not expected to bioaccumulate.
- : Bioconcentration factor (BCF): 0.3 - 4.6
(QSAR calculated value)

Mobility in soil

- Distribution among environmental compartments** : Type: Stability in soil
no data available
- : Type: Stability in water
no data available

Other adverse effects

- Environmental fate and pathways** : No additional information available.

Other information

- Additional ecological information** : No additional information available.

13. Disposal considerations**Waste treatment methods**

Product : Comply with federal, state, or local regulations for disposal. Landfill solids at permitted sites.
Burn concentrated liquids, diluting with clean, low viscosity fuel.
Avoid flameouts and assure that emissions comply with all applicable standards/regulations.
Dilute aqueous waste may biodegrade.
Assure effluent complies with applicable regulations.

14. TRANSPORT INFORMATION

Not regulated for transport

BLG (MARPOL Annex II)

Description of the goods : DIPROPYLENE GLYCOL
Pollution category : Z
Ship type : 3

15. REGULATORY INFORMATION**TSCA 12b**

No substances are subject to TSCA 12(b) export notification requirements.

Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

No SARA Hazards

DIPROPYLENE GLYCOL FRAGRANCE

SDS No.: BE133

SARA 313

This product contains no known chemicals regulated under SARA 313.

State Reporting

This material does not contain listed substance(s) known to the State of California to cause cancer, birth defects, or other reproductive harm that would require warning under the California Proposition 65 State Drinking Water and Toxic Enforcement Act.

However, LyondellBasell has not tested for the presence of listed chemical substances.

This product contains no known chemicals regulated by New Jersey's Worker and Community Right to Know Act.

No components are subject to the Massachusetts Right to Know Act.

This product contains the following chemicals regulated by Pennsylvania's Right to Know Act:

25265-71-8 Dipropylene Glycol

Other international regulations**Global Inventory Status**

The ingredients of this product are compliant with the following chemical inventory requirements or exemptions.

*Additional Explanatory Status Statements follow the table, as necessary.

Country/Region	Inventory	Status Description
Australia	AICS	Compliant
Canada	DSL	Compliant
China	IECSC	Compliant
Europe	REACH	See REACH Compliance Statement
Japan	ENCS	Compliant
Korea	KECI	Compliant
New Zealand	NZIoC	Compliant
Philippines	PICCS	Compliant
United States of America	TSCA	Compliant
Taiwan	TCSCA	Compliant

REACH status

If the product has been purchased from any company of the LyondellBasell group of companies registered in the European Union, we confirm that the chemical substance in this product has been registered under REACH, in accordance with the deadlines set forth in REACH. (Regulation (EU) No. 1907/2006)

Contact product.safety@lyb.com for additional global inventory information.

End of Material Safety Data Sheet

SAFETY DATA SHEET

THE DOW CHEMICAL COMPANY

Product name: 2-Ethylhexyl Acrylate, 50 ppm MEHQ

Issue Date: 11/25/2022

Print Date: 02/04/2023

THE DOW CHEMICAL COMPANY encourages and expects you to read and understand the entire (M)SDS, as there is important information throughout the document. We expect you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

1. IDENTIFICATION

Product name: 2-Ethylhexyl Acrylate, 50 ppm MEHQ

Recommended use of the chemical and restrictions on use

Identified uses: Chemical intermediate.

Uses advised against: Unreacted monomer is not appropriate for use in cosmetic applications, such as artificial nail products.

COMPANY IDENTIFICATION

THE DOW CHEMICAL COMPANY
2211 H.H. DOW WAY
MIDLAND MI 48674
UNITED STATES

Local Emergency Contact: 800-424-9300

2. HAZARDS IDENTIFICATION

Hazard classification

GHS classification in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200)

Flammable liquids - Category 4

Skin irritation - Category 2

Skin sensitisation - Sub-category 1B

Specific target organ toxicity - single exposure - Category 3

Label elements

Hazard pictograms

Signal word: **WARNING!**

Hazards

Combustible liquid.
Causes skin irritation.
May cause an allergic skin reaction.
May cause respiratory irritation.

Precautionary statements

Prevention

Keep away from heat/ sparks/ open flames/ hot surfaces. No smoking.
Avoid breathing mist or vapours.
Wash skin thoroughly after handling.
Use only outdoors or in a well-ventilated area.
Contaminated work clothing must not be allowed out of the workplace.
Wear protective gloves/ eye protection/ face protection.

Response

IF ON SKIN: Wash with plenty of soap and water.
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/ doctor if you feel unwell.
If skin irritation or rash occurs: Get medical advice/ attention.
Take off contaminated clothing and wash before reuse.
In case of fire: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide to extinguish.

Storage

Store in a well-ventilated place. Keep container tightly closed.
Store in a well-ventilated place. Keep cool.
Store locked up.

Disposal

Dispose of contents and/or container to an approved waste disposal plant.

Other hazards

No data available

3. COMPOSITION/INFORMATION ON INGREDIENTS

Synonyms: Ethyl hexyl acrylate

This product is a substance.

Substance name: Ethyl hexyl acrylate

CASRN: 103-11-7

Component	CASRN	Concentration
Ethyl hexyl acrylate	103-11-7	>= 99.6 - <= 100.0 %

4. FIRST AID MEASURES

Description of first aid measures

General advice:

First Aid responders should pay attention to self-protection and use the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists refer to Section 8 for specific personal protective equipment.

Inhalation: Move person to fresh air and keep comfortable for breathing. If not breathing, give artificial respiration; if by mouth to mouth use rescuer protection (pocket mask, etc). If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

Skin contact: Remove material from skin immediately by washing with soap and plenty of water. Remove contaminated clothing and shoes while washing. Seek medical attention if irritation or rash occurs. Wash clothing before reuse. Discard items which cannot be decontaminated, including leather articles such as shoes, belts and watchbands. Suitable emergency safety shower facility should be available in work area.

Eye contact: Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.

Ingestion: Do not induce vomiting. Give one cup (8 ounces or 240 ml) of water or milk if available and transport to a medical facility. Do not give anything by mouth unless the person is fully conscious.

Most important symptoms and effects, both acute and delayed:

Causes skin irritation. May cause an allergic skin reaction. May cause respiratory irritation.

Indication of any immediate medical attention and special treatment needed

Notes to physician: Maintain adequate ventilation and oxygenation of the patient. May cause asthma-like (reactive airways) symptoms. Bronchodilators, expectorants, antitussives and corticosteroids may be of help. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed 24-48 hours for signs of respiratory distress. If burn is present, treat as any thermal burn, after decontamination. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Because rapid absorption may occur through the lungs if aspirated and cause systemic effects, the decision of whether to induce vomiting or not should be made by a physician. Due to irritant properties, swallowing may result in burns and/or ulceration of mouth, stomach and lower gastrointestinal tract with subsequent stricture. Aspiration of vomitus may cause lung injury. Suggest endotracheal or esophageal control if lavage is done. No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. Excessive exposure may aggravate preexisting asthma and other respiratory disorders (e.g. emphysema, bronchitis, reactive airways dysfunction syndrome).

5. FIREFIGHTING MEASURES

Extinguishing media

Suitable extinguishing media: Alcohol-resistant foam. Dry chemical. Dry sand.

Unsuitable extinguishing media: High volume water jet. Do not use direct water stream..

Special hazards arising from the substance or mixture

Hazardous combustion products: Carbon oxides.

Unusual Fire and Explosion Hazards: Flash back possible over considerable distance.. Exposure to combustion products may be a hazard to health.. Closed containers may rupture via pressure build-up when exposed to fire or extreme heat.. Vapours may form explosive mixtures with air..

Advice for firefighters

Fire Fighting Procedures: Use water spray to cool unopened containers.. Evacuate area.. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.. Contain fire water run-off if possible. Fire water run-off, if not contained, may cause environmental damage.. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of reignition has passed.. Do not use a solid water stream as it may scatter and spread fire..

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Remove undamaged containers from fire area if it is safe to do so.

Special protective equipment for firefighters: In the event of fire, wear self-contained breathing apparatus.. Use personal protective equipment..

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Remove all sources of ignition. Use personal protective equipment. Follow safe handling advice and personal protective equipment recommendations.

Environmental precautions: Do not release the product to the aquatic environment above defined regulatory levels. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

Methods and materials for containment and cleaning up: Non-sparking tools should be used. Soak up with inert absorbent material. Suppress (knock down) gases/vapours/mists with a water spray jet. Clean up remaining materials from spill with suitable absorbant. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container.

See sections: 7, 8, 11, 12 and 13.

7. HANDLING AND STORAGE

Precautions for safe handling: Do not get on skin or clothing. Do not breathe vapours or spray mist. Avoid contact with eyes. Do not swallow. Keep container tightly closed. Keep away from heat and sources of ignition. Take precautionary measures against static discharges. Take care to prevent spills, waste and minimize release to the environment. Handle in accordance with good industrial hygiene and safety practice. CONTAINERS MAY BE HAZARDOUS WHEN EMPTY. Since emptied containers retain product residue follow all (M)SDS and label warnings even after container is emptied. Use with local exhaust ventilation. See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.

Conditions for safe storage: Keep in properly labelled containers. Store locked up. Keep tightly closed. Keep in a cool, well-ventilated place. Store in accordance with the particular national regulations. Keep away from heat and sources of ignition. This product contains inhibitor to stabilize it during shipment and storage. The effectiveness of the inhibitor is dependent on the presence of dissolved oxygen. In order to maintain sufficient dissolved oxygen in the liquid to avoid polymerization, the monomer must always be stored with a vapor space oxygen concentration of 5% to 21% (air). If the material is stored longer than six months (from date of manufacture) in a closed container, replenish the vapor space with fresh air to avoid depletion of the dissolved oxygen.

Storage stability

Shelf life: Use within 12 Month

Storage temperature: < 38 °C (< 100 °F)

Do not store with the following product types: Strong oxidizing agents. Explosives. Gases.
Unsuitable materials for containers: None known.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

If exposure limits exist, they are listed below. If no exposure limits are displayed, then no values are applicable.

Component	Regulation	Type of listing	Value
Ethyl hexyl acrylate	Dow IHG	TWA	3 ppm

Exposure controls

Engineering controls: Use engineering controls to maintain airborne level below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations.

Individual protection measures

Eye/face protection: Use safety glasses (with side shields).

Skin protection

Hand protection: Use gloves chemically resistant to this material. Examples of preferred glove barrier materials include: Polyethylene. Ethyl vinyl alcohol laminate ("EVAL"). Polyvinyl alcohol ("PVA"). Styrene/butadiene rubber. Examples of acceptable glove barrier materials include: Butyl rubber. Avoid gloves made of: Viton. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body

reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

Other protection: Use protective clothing chemically resistant to this material. Selection of specific items such as face shield, boots, apron, or full body suit will depend on the task.

Respiratory protection: Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, use an approved respirator. Selection of air-purifying or positive-pressure supplied-air will depend on the specific operation and the potential airborne concentration of the material. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus.

The following should be effective types of air-purifying respirators: Organic vapor cartridge.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Physical state	Liquid.
Color	Colorless
Odor	Sweet
Odor Threshold	No test data available
pH	No test data available
Melting point/range	Not applicable to liquids
Freezing point	-90 °C (-130 °F) <i>Literature</i>
Boiling point (760 mmHg)	216 °C (421 °F) <i>Literature</i>

Evaporation Rate (Butyl Acetate = 1)	0.3 <i>Literature</i>
Flammability (solid, gas)	Not applicable to liquids
Flammability (liquids)	Not expected to be a static-accumulating flammable liquid.
Lower explosion limit	0.7 % vol <i>Literature</i>
Upper explosion limit	8.2 % vol <i>Literature</i>
Vapor Pressure	0.12 mmHg at 20 °C (68 °F) <i>Literature</i>
Relative Vapor Density (air = 1)	6.4 <i>Literature</i>
Relative Density (water = 1)	0.885 <i>Literature</i>
Water solubility	0.1 g/L at 25 °C (77 °F) <i>Literature</i>
Partition coefficient: n-octanol/water	log Pow: 4.09 <i>Estimated.</i>
Auto-ignition temperature	252 °C (486 °F) <i>Literature</i>
Decomposition temperature	No data available
Dynamic Viscosity	1.54 cP at 25 °C (77 °F) <i>Literature</i>
Kinematic Viscosity	No test data available
Explosive properties	Not explosive
Oxidizing properties	No
Molecular weight	184.3 g/mol <i>Literature</i>

NOTE: The physical data presented above are typical values and should not be construed as a specification.

10. STABILITY AND REACTIVITY

Reactivity: Excessive aging, heat, contamination with polymerization catalysts, oxygen-free atmosphere, inhibitor depletion or ultraviolet light (sunlight) may cause polymerization. Excessive aging, heat, contamination with polymerization catalysts, oxygen-free atmosphere, inhibitor depletion or ultraviolet light (sunlight) may cause polymerization.

Chemical stability: Unstable at elevated temperatures.

Possibility of hazardous reactions: Can react with strong oxidizing agents. Vapours may form explosive mixture with air. Combustible liquid. Inhibitor is added to this product to prevent polymerization. However, this material can undergo hazardous polymerization. An uncontrolled polymerization may produce a rapid release of energy with the potential for an explosion of unvented closed containers. Can react with strong oxidizing agents. Vapours may form explosive mixture with air. Inhibitor is added to this product to prevent polymerization. However, this material can undergo hazardous polymerization.

Conditions to avoid: Exposure to elevated temperatures can cause product to decompose. Do not blanket or purge with an inert gas to avoid depleting the oxygen concentration. Avoid direct sunlight or ultraviolet sources. Heat, flames and sparks.

Inhibitor: Methoxyphenol Inhibitor Concentration (ppm): 40 - 60
Phenothiazine Inhibitor Concentration (ppm): 0.4 - 1.6

Incompatible materials: Avoid contact with oxidizing materials.

Hazardous decomposition products

No hazardous decomposition products are known.

11. TOXICOLOGICAL INFORMATION

Toxicological information appears in this section when such data is available.

Information on likely routes of exposure

Inhalation, Eye contact, Skin contact, Ingestion.

Acute toxicity (represents short term exposures with immediate effects - no chronic/delayed effects known unless otherwise noted)

Acute Toxicity Endpoints:

Not classified based on available information.

Acute oral toxicity

Information for the Product:

Low toxicity if swallowed. Swallowing may result in gastrointestinal irritation or ulceration. Swallowing may result in burns of the mouth and throat.

Based on product testing:

LD50, Rat, male and female, 4,435 mg/kg OECD 401 or equivalent

Information for components:

Ethyl hexyl acrylate

LD50, Rat, male and female, 4,435 mg/kg OECD 401 or equivalent

Acute dermal toxicity

Information for the Product:

Prolonged skin contact is unlikely to result in absorption of harmful amounts.

Based on product testing:

LD50, Rabbit, 7,522 mg/kg

Information for components:

Ethyl hexyl acrylate

LD50, Rabbit, 7,522 mg/kg

Acute inhalation toxicity

Information for the Product:

Prolonged excessive exposure may cause adverse effects. Excessive exposure may cause severe irritation to upper respiratory tract (nose and throat) and lungs. Signs and symptoms of excessive exposure may include: May cause dizziness and drowsiness. Headache. May cause pulmonary edema (fluid in the lungs.) Effects may be delayed.

LC50, Rat, male and female, 8 Hour, vapour, > 1.19 mg/l No deaths occurred following exposure to a saturated atmosphere.

Information for components:

Ethyl hexyl acrylate

LC50, Rat, male and female, 8 Hour, vapour, > 1.19 mg/l Other guidelines No deaths occurred following exposure to a saturated atmosphere.

Skin corrosion/irritation

Causes skin irritation.

Information for the Product:

Based on product testing:

Brief contact may cause severe skin irritation with pain and local redness.

Repeated contact may cause skin burns. Symptoms may include pain, severe local redness, swelling, and tissue damage.

Information for components:

Ethyl hexyl acrylate

Brief contact may cause severe skin irritation with pain and local redness.

Repeated contact may cause skin burns. Symptoms may include pain, severe local redness, swelling, and tissue damage.

Serious eye damage/eye irritation

Not classified based on available information.

Information for the Product:

Based on product testing:

May cause slight temporary eye irritation.

Corneal injury is unlikely.

Information for components:

Ethyl hexyl acrylate

May cause slight temporary eye irritation.

Corneal injury is unlikely.

Sensitization

For skin sensitization:

May cause an allergic skin reaction.

For respiratory sensitization:

Not classified based on available information.

Information for the Product:

For skin sensitization:

Has caused allergic skin reactions in humans.

Has caused allergic skin reactions when tested in guinea pigs.

Has demonstrated the potential for contact allergy in mice.

For respiratory sensitization:

No relevant data found.

Information for components:

Ethyl hexyl acrylate

For skin sensitization:

Has caused allergic skin reactions in humans.

Has caused allergic skin reactions when tested in guinea pigs.

Has demonstrated the potential for contact allergy in mice.

For respiratory sensitization:

No relevant data found.

Specific Target Organ Systemic Toxicity (Single Exposure)

May cause respiratory irritation.

Information for the Product:

Product test data not available.

Information for components:

Ethyl hexyl acrylate

May cause respiratory irritation.

Route of Exposure: Inhalation

Target Organs: Respiratory system

Aspiration Hazard

Not classified based on available information.

Information for the Product:

Aspiration into the respiratory system may occur during ingestion or vomiting. Due to corrosivity, tissue damage or lung injury may occur.

Information for components:

Ethyl hexyl acrylate

Aspiration into the respiratory system may occur during ingestion or vomiting. Due to corrosivity, tissue damage or lung injury may occur.

Chronic toxicity (represents longer term exposures with repeated dose resulting in chronic/delayed effects - no immediate effects known unless otherwise noted)

Specific Target Organ Systemic Toxicity (Repeated Exposure)

Not classified based on available information.

Information for the Product:

In animals, effects have been reported on the following organs:
Respiratory tract.

Information for components:

Ethyl hexyl acrylate

In animals, effects have been reported on the following organs:
Respiratory tract.

Carcinogenicity

Not classified based on available information.

Information for the Product:

Has caused tumors in skin painting tests in animals. Positive findings are believed to be secondary to chronic irritation/tissue injury.

Information for components:

Ethyl hexyl acrylate

Has caused tumors in skin painting tests in animals. Positive findings are believed to be secondary to chronic irritation/tissue injury.

Carcinogenicity

Component

Ethyl hexyl acrylate

List

IARC

Classification

Group 2B: Possibly carcinogenic to humans

Teratogenicity

Not classified based on available information.

Information for the Product:

Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

Information for components:

Ethyl hexyl acrylate

Did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

Reproductive toxicity

Not classified based on available information.

Information for the Product:

In animal studies, did not interfere with reproduction. In animal studies, did not interfere with fertility.

Information for components:

Ethyl hexyl acrylate

In animal studies, did not interfere with reproduction. In animal studies, did not interfere with fertility.

Mutagenicity

Not classified based on available information.

Information for the Product:

In vitro genetic toxicity studies were predominantly negative. Animal genetic toxicity studies were negative.

Information for components:

Ethyl hexyl acrylate

In vitro genetic toxicity studies were predominantly negative. Animal genetic toxicity studies were negative.

12. ECOLOGICAL INFORMATION

Ecotoxicological information appears in this section when such data is available.

General Information

Material is toxic to aquatic organisms (LC50/EC50/IC50 between 1 and 10 mg/L in the most sensitive species).

Toxicity

Acute toxicity to fish

Material is moderately toxic to aquatic organisms on an acute basis (LC50/EC50 between 1 and 10 mg/L in the most sensitive species tested).

LC50, *Oncorhynchus mykiss* (rainbow trout), semi-static test, 1.81 mg/l, OECD Test Guideline 203 or Equivalent

Acute toxicity to aquatic invertebrates

EC50, *Daphnia magna* (Water flea), static test, 48 Hour, 1.3 mg/l, OECD Test Guideline 202 or Equivalent

Acute toxicity to algae/aquatic plants

ErC50, *Desmodesmus subspicatus* (green algae), static test, 72 Hour, Growth rate inhibition, 1.71 mg/l, OECD Test Guideline 201 or Equivalent

Long-term (chronic) aquatic hazard

Chronic toxicity to aquatic invertebrates

NOEC, *Daphnia magna* (Water flea), 21 d, number of offspring, 0.19 mg/l

Persistence and degradability

Biodegradability: Material is readily biodegradable. Passes OECD test(s) for ready biodegradability.

10-day Window: Pass

Biodegradation: 70 - 80 %

Exposure time: 15 d

10-day Window: Not applicable

Biodegradation: > 90 %

Exposure time: 14 d

Method: OECD Test Guideline 301C or Equivalent

Theoretical Oxygen Demand: 2.60 mg/mg

Biological oxygen demand (BOD)

Incubation Time	BOD
5 d	17 - 27 %
10 d	19 - 52 %
20 d	19 - 58 %

Photodegradation

Test Type: Half-life (indirect photolysis)

Sensitization: OH radicals
Atmospheric half-life: 6.4 Hour
Method: Estimated.

Bioaccumulative potential

Bioaccumulation: Bioconcentration potential is moderate (BCF between 100 and 3000 or Log Pow between 3 and 5).
Partition coefficient: n-octanol/water(log Pow): 4.09 Estimated.
Bioconcentration factor (BCF): 270 - 282 Fish Estimated.

Mobility in soil

Partition coefficient (Koc): 429 Estimated.

13. DISPOSAL CONSIDERATIONS

Disposal methods: DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. FOR UNUSED AND UNCONTAMINATED PRODUCT, always send to a licensed disposer per applicable regulations. Consult the local waste disposal expert for the appropriate waste disposal method. Recover or recycle, if possible. Otherwise, send it to a licensed disposer.

Contaminated packaging: Empty containers retain product residues. Follow label warnings even after container is emptied. Improper disposal or reuse of this container may be dangerous and illegal. Refer to applicable federal, state and local regulations.

14. TRANSPORT INFORMATION

DOT

Proper shipping name	Combustible liquid, n.o.s.(2-Ethyl hexyl acrylate)
UN number	NA 1993
Class	CBL
Packing group	III

Classification for SEA transport (IMO-IMDG):

	Not regulated for transport
Transport in bulk according to Annex I or II of MARPOL 73/78 and the IBC or IGC Code	Consult IMO regulations before transporting ocean bulk

Classification for AIR transport (IATA/ICAO):

Not regulated for transport

This information is not intended to convey all specific regulatory or operational requirements/information relating to this product. Transportation classifications may vary by container volume and may be influenced by regional or country variations in regulations. Additional transportation system information can be obtained through an authorized sales or customer service representative. It is the responsibility of the transporting organization to follow all applicable laws, regulations and rules relating to the transportation of the material.

15. REGULATORY INFORMATION

Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Sections 311 and 312

Flammable (gases, aerosols, liquids, or solids)
Respiratory or skin sensitisation
Skin corrosion or irritation
Specific target organ toxicity (single or repeated exposure)

Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Section 313

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Pennsylvania Worker and Community Right-To-Know Act:

The following chemicals are listed because of the additional requirements of Pennsylvania law:

Components	CASRN
2-Ethylhexyl acrylate	103-11-7

California Prop. 65

WARNING: This product can expose you to chemicals including Ethyl hexyl acrylate, which is/are known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

United States TSCA Inventory (TSCA)

All components of this product are in compliance with the inventory listing requirements of the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

16. OTHER INFORMATION

Product Literature

Additional information on this product may be obtained by calling your sales or customer service contact. Ask for a product brochure. Additional information on this and other products may be obtained by visiting our web page.

Information Source and References

This SDS is prepared by Product Regulatory Services and Hazard Communications Groups from information supplied by internal references within our company.

THE DOW CHEMICAL COMPANY urges each customer or recipient of this (M)SDS to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this (M)SDS and any hazards associated with the product. The information herein is provided in good faith and believed to be accurate as of the effective date shown

above. However, no warranty, express or implied, is given. Regulatory requirements are subject to change and may differ between various locations. It is the buyer's/user's responsibility to ensure that his activities comply with all federal, state, provincial or local laws. The information presented here pertains only to the product as shipped. Since conditions for use of the product are not under the control of the manufacturer, it is the buyer's/user's duty to determine the conditions necessary for the safe use of this product. Due to the proliferation of sources for information such as manufacturer-specific (M)SDSs, we are not and cannot be responsible for (M)SDSs obtained from any source other than ourselves. If you have obtained an (M)SDS from another source or if you are not sure that the (M)SDS you have is current, please contact us for the most current version.

BUTYL ACRYLATE**1. PRODUCT AND COMPANY IDENTIFICATION**

NO NUM:DIV IDENTIFIER MAINTAINED FOR THIS SPECIFICATION!

Company

Arkema Inc.
900 First Avenue
King of Prussia, Pennsylvania 19406

Methacrylics

Customer Service Telephone Number: 1-800-338-1015
(Monday through Friday, 8:00 AM to 5:00 PM EST)

Emergency Information

Transportation: CHEMTREC: (800) 424-9300
(24 hrs., 7 days a week)
Medical: Rocky Mountain Poison Center: (866) 767-5089
(24 hrs., 7 days a week)

Product Information

Product name: BUTYL ACRYLATE
Synonyms: BUTYL ACRYLATE
Molecular formula: C7H12O2
Chemical family: acrylates
Molecular weight: 128 g/mol
Product use: Intermediate

2. HAZARDS IDENTIFICATION**Emergency Overview**

Color: colourless
Physical state: liquid
Odor: like fruit

***Classification of the substance or mixture:**

Flammable liquid., Category 3, H226
Inhalation: Acute toxicity, Category 4, H332
Skin irritation, Category 2, H315
Eye irritation, Category 2A, H319
Skin sensitisation, Category 1, H317
Specific target organ toxicity - single exposure, Category 3, H335
Chronic aquatic toxicity, Category 3, H412

*For the full text of the H-Statements mentioned in this Section, see Section 16.

BUTYL ACRYLATE

GHS-Labeling

Hazard pictograms:

Signal word:

Warning**Hazard statements:**

- H226 : Flammable liquid and vapour.
- H315 : Causes skin irritation.
- H317 : May cause an allergic skin reaction.
- H319 : Causes serious eye irritation.
- H332 : Harmful if inhaled.
- H335 : May cause respiratory irritation.
- H412 : Harmful to aquatic life with long lasting effects.

BUTYL ACRYLATE**Precautionary statements:****Prevention:**

P210 : Keep away from heat/sparks/open flames/hot surfaces. No smoking.
P233 : Keep container tightly closed.
P240 : Ground/bond container and receiving equipment.
P241 : Use explosion-proof electrical/ ventilating/ lighting/ equipment.
P242 : Use only non-sparking tools.
P243 : Take precautionary measures against static discharge.
P261 : Avoid breathing gas/mist/vapours/spray.
P264 : Wash skin thoroughly after handling.
P271 : Use only outdoors or in a well-ventilated area.
P272 : Contaminated work clothing should not be allowed out of the workplace.
P280 : Wear protective gloves/ protective clothing/ eye protection/ face protection.
P273 : Avoid release to the environment.

Response:

P303 + P361 + P353 : IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower.
P304 + P340 : IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
P305 + P351 + P338 : IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P312 : Call a POISON CENTER/doctor if you feel unwell.
P321 : Specific treatment (see supplemental first aid instructions on this label).
P333 + P313 : If skin irritation or rash occurs: Get medical advice/ attention.
P337 + P313 : If eye irritation persists: Get medical advice/ attention.
P362 : Take off contaminated clothing and wash before reuse.
P370 + P378 : In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.

Storage:

P403 + P233 : Store in a well-ventilated place. Keep container tightly closed.
P403 + P235 : Store in a well-ventilated place. Keep cool.
P405 : Store locked up.

Disposal:

P501 : Dispose of contents/ container to an approved waste disposal plant.

Supplemental information:**Potential Health Effects:**

If swallowed, may cause gastrointestinal irritation including nausea and vomiting. Vapor causes irritation to the respiratory tract and the eyes. Possible cross sensitization with other acrylates and methacrylates.

3. COMPOSITION/INFORMATION ON INGREDIENTS

BUTYL ACRYLATE

Chemical Name	CAS-No.	Wt/Wt	GHS Classification**
2-Propenoic acid, butyl ester	141-32-2	>= 99 %	H226, H332, H315, H319, H317, H335, H412

**For the full text of the H-Statements mentioned in this Section, see Section 16.

4. FIRST AID MEASURES

4.1. Description of necessary first-aid measures:

Inhalation:

If inhaled, remove to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Skin:

In case of contact, immediately flush skin with soap and plenty of water. Remove contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eyes:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

Ingestion:

If swallowed, DO NOT induce vomiting. Get medical attention. Never give anything by mouth to an unconscious person.

4.2. Most important symptoms/effects, acute and delayed:

For most important symptoms and effects (acute and delayed), see Section 2 (Hazard Statements and Supplemental Information) and Section 11 (Toxicology Information) of this SDS.

4.3. Indication of immediate medical attention and special treatment needed, if necessary:

Unless otherwise noted in Notes to Physician, no specific treatment noted; treat symptomatically.

5. FIREFIGHTING MEASURES

Extinguishing media (suitable):

Water spray, Carbon dioxide (CO₂), Dry chemical, Foam

Extinguishing media (unsuitable):

Water may be ineffective., Do not use a solid water stream as it may scatter and spread fire.

BUTYL ACRYLATE**Protective equipment:**

Fire fighters and others who may be exposed to products of combustion should wear full fire fighting turn out gear (full Bunker Gear) and self-contained breathing apparatus (pressure demand / NIOSH approved or equivalent).

Further firefighting advice:

Fight fire from a protected location.

Explosion hazard

Cool closed containers exposed to fire with water spray.

Closed containers of this material may explode when subjected to heat from surrounding fire.

After a fire, wait until the material has cooled to room temperature before initiating clean-up activities.

Do not allow run-off from fire fighting to enter drains or water courses.

Fire fighting equipment should be thoroughly decontaminated after use.

Vapors are heavier than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, and other flames and ignition sources at locations distant from material handling point.

Fire and explosion hazards:

When burned, the following hazardous products of combustion can occur:

Carbon oxides

Hazardous organic compounds

A large amount of heat can be generated when monomers are exposed to a fire.

Heated sealed containers can explode.

6. ACCIDENTAL RELEASE MEASURES**Personal precautions, Emergency procedures, Methods and materials for containment/clean-up:**

Prevent further leakage or spillage if you can do so without risk. Evacuate area of all unnecessary personnel. Ventilate the area. Eliminate all ignition sources. Avoid generation of vapors. Contain and collect spillage with non-combustible absorbent material such as sodium bicarbonate, sodium carbonate, calcium carbonate, clean sand or non-acidic clay and then wet down (dampen) the mixture with water. Sweep or scoop up using non-sparking tools and place into suitable properly labeled containers for prompt disposal. The sweepings should be wetted down further with water. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits.

Protective equipment:

Appropriate personal protective equipment is set forth in Section 8.

BUTYL ACRYLATE**7. HANDLING AND STORAGE****Handling****General information on handling:**

Avoid breathing vapor or mist.
Avoid contact with skin, eyes and clothing.
Keep away from heat, sparks and flames.
No smoking.
Keep container closed.
Use only with adequate ventilation.
Vapors are heavier than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, and other flames and ignition sources at locations distant from material handling point.
Wash thoroughly after handling.
Check that all equipment is properly grounded and installed to satisfy electrical classification requirements.
Container hazardous when empty.
Follow label warnings even after container is emptied.
RESIDUAL VAPORS MAY EXPLODE ON IGNITION.
DO NOT CUT, DRILL, GRIND, OR WELD ON OR NEAR THIS CONTAINER.
Improper disposal or reuse of this container may be dangerous and/or illegal.
Emptied container retains vapor and product residue.

Storage**General information on storage conditions:**

Keep in a dry, cool place. Store in tightly closed container. Keep away from direct sunlight. Keep container closed when not in use. Store in closed containers, in a secure area to prevent container damage and subsequent spillage. Store in well ventilated area away from heat and sources of ignition such as flame, sparks and static electricity. An air space is required above the liquid in all containers; avoid storage under an oxygen-free atmosphere. Ensure that all storage and handling equipment is properly grounded and installed to satisfy electrical classification requirements. Static electricity may accumulate when transferring material. All metal and groundable storage containers, including but not limited to drums, cylinders, Returnable Intermodal Bulk Containers (RIBCs) and Class C Flexible Intermodal Bulk Containers (FIBCs) must be bonded and grounded during filling and emptying operations. Observe all federal, state and local regulations and National Fire Protection Association (NFPA) Codes which pertain to the specific local conditions of storage and use, including OSHA 29 CFR 1910.106 and NFPA 30, 70, 77, and 497.

Storage stability – Remarks:

The typical shelf-life for this product is 12 months. The stability of this product should be checked periodically; typically every 90 days for bulk containers. Materials recommended for packaging include: stainless steel, aluminum, glass, HDPE, PP or PTFE. Recommended oxygen level is 5 to 8% by volume. Recommended inhibitor level is 10 to 20 ppm. Uninhibited monomer vapors can polymerize and plug relief devices.

Storage incompatibility – General:

Store away from sources of heat and light. Store separate from:

- Free radical generators
- Peroxides
- Strong oxidizing agents
- Amines
- Rust
- Anhydrides
- Aldehydes
- Azides

BUTYL ACRYLATE**Eye protection:**

Where there is potential for eye contact, wear chemical goggles and have eye flushing equipment immediately available.

9. PHYSICAL AND CHEMICAL PROPERTIES

Color:	colourless
Physical state:	liquid
Odor:	like fruit
Odor threshold:	0.3 ppb
Flash point	102 °F (39 °C) (closed cup)
Auto-ignition temperature:	559 °F (293 °C) (Method: Literature)
Lower flammable limit (LFL):	1.5 %(V) (Method: Literature)
Upper flammable limit (UFL):	9.9 %(V) (Method: Literature)
pH:	not determined
Density:	not determined
Specific Gravity (Relative density):	0.898 (68 °F (20 °C))
Vapor pressure:	0.40 mmHg (68 °F (20 °C))
Vapor density:	4.4 kg/m3 (Method: Literature)
Boiling point/boiling range:	297 °F (147 °C)
Melting point/range:	not determined
Freezing point:	-83 °F (-64 °C)
Evaporation rate:	No data available
Solubility in water:	2 g/l 77 °F (25 °C)
Viscosity, dynamic:	0.9 mPa.s 68 °F (20 °C)
Molecular weight:	128 g/mol
Oil/water partition	= 2.38

BUTYL ACRYLATE

coefficient:

Thermal decomposition: No data available

Flammability: See GHS Classification in Section 2

10. STABILITY AND REACTIVITY**Stability:**

This material is chemically stable under normal and anticipated storage, handling and processing conditions. However, this material can undergo hazardous polymerization. See HANDLING AND STORAGE section of this SDS for specified conditions.

Hazardous reactions:

Hazardous polymerisation may occur.

Avoid freezing.

After freezing and thawing, hazardous polymerization can occur if thawed incorrectly.

Materials to avoid:

Free radical generators, Peroxides, Strong oxidizing agents

Amines

Rust

Anhydrides

Aldehydes

Strong bases.

Mercaptans

Halides

Azides

Ethers

Mineral acids

Conditions / hazards to avoid:

An uncontrolled polymerization may produce a rapid release of energy with the potential for an explosion of unvented closed containers or inadequately vented containers. This material polymerizes exothermically in the presence of heat, contamination, oxygen free atmosphere, free radicals, peroxides and inhibitor depletion liberating heat.

Hazardous decomposition products:

Thermal decomposition giving flammable and toxic products :

Carbon oxides

Hazardous organic compounds

11. TOXICOLOGICAL INFORMATION

Data on this material and/or a similar material are summarized below.

Data for BUTYL ACRYLATE**Acute toxicity**

Oral:

BUTYL ACRYLATE

May be harmful if swallowed. (rat) LD50 = 3,143 - 9,050 mg/kg.

Dermal:

May be harmful in contact with skin. (rabbit) LD50 > 2,000 mg/kg.

Inhalation:

Harmful if inhaled. (rat) 4 h LC50 = 10.3 - 14.3 mg/l. (vapor)

Harmful if inhaled. (rat) 1 h LC50 = 23.04 - 33.3 mg/l. (vapor)

Skin Irritation:

Causes skin irritation. (rabbit) Irritation Index: 6.8/ 8.0. (15 min) (occluded exposure)

Causes skin irritation. (rabbit) Irritation Index: 6.5 / 8.0. (4 h)

Eye Irritation:

Causes serious eye irritation. (rabbit)

Skin Sensitization:

May cause allergic skin reaction. Guinea pig maximization test. Skin allergy was observed.

May cause allergic skin reaction. LLNA: Local Lymph Node Assay. (mouse) Produced an allergic reaction.

Repeated dose toxicity

Subchronic drinking water administration to rat / signs: changes in food or water consumption, decreased growth rate

Subchronic oral administration to rat / affected organ(s): liver / signs: increased organ weight

Subchronic inhalation administration to rat / affected organ(s): respiratory tract, eye / Local irritation

Carcinogenicity

Chronic inhalation administration to rat / No increase in tumor incidence was reported.

Chronic dermal administration to mouse / No increase in tumor incidence was reported.

Classified by the International Agency for Research on Cancer as: Group 3: Unclassifiable as to carcinogenicity in humans.

Genotoxicity**Assessment in Vitro:**

No genetic changes were observed in laboratory tests using: bacteria

Both positive and negative responses for genetic changes were observed in laboratory tests using: animal cells

Assessment in Vivo:

No genetic changes were observed in laboratory tests using: hamster, rat

Developmental toxicity

Exposure during pregnancy. Inhalation (Rat) / No birth defects were observed. (levels produced toxic effects in the mothers and offspring)

BUTYL ACRYLATE

Exposure during pregnancy. Oral (Mouse) / Birth defects were observed. (levels produced toxic effects in the mothers and offspring)

Reproductive effects

Repeated exposure by inhalation (rat) / Did not cause damage to the reproductive organs.

Other information

Possible cross sensitization with other acrylates and methacrylates.

Human experience**Skin contact:**

Skin allergy was observed.

12. ECOLOGICAL INFORMATION**Chemical Fate and Pathway**

Data on this material and/or a similar material are summarized below.

Data for BUTYL ACRYLATE**Stability in water:**

Half-life = 4 h (77 °F (25 °C) @pH 11 (Hydrolyses slowly.)

Half-life > 1,100 d (77 °F (25 °C) @pH 7 (Hydrolyses slowly.)

Half-life > 1,000 d (77 °F (25 °C) @pH 3 (Hydrolyses slowly.)

Biodegradation:

Readily biodegradable. (28 d) biodegradation > 80 %

Biological Oxygen Demand:

14 d BOD = 61% ThOD

28 d BOD = 57% ThOD

BOD/COD Ratio:

BOD/COD = 60 % (BOD5)

Bioaccumulation:

Slight potential to bioaccumulate.

Octanol Water Partition Coefficient:

log Pow = 2.38

Ecotoxicology

Data on this material and/or a similar material are summarized below.

Data for BUTYL ACRYLATE

BUTYL ACRYLATE**Aquatic toxicity data:**Toxic. *Cyprinodon variegatus* (sheepshead minnow) 96 h LC50 = 2.1 mg/lToxic. *Oncorhynchus mykiss* (rainbow trout) 96 h LC50 = 5.2 mg/l**Aquatic invertebrates:**Toxic. *Daphnia magna* (Water flea) 48 h EC50 = 8.2 mg/l**Algae:**Toxic. *Pseudokirchneriella subcapitata* (green algae) 96 h EC50 = 2.65 mg/lToxic. *Selenastrum capricornutum* 72 h EC50 = 5.9 mg/l**Microorganisms:**

Activated sludge 3 d EC0 (Respiration inhibition) > 150 mg/l

Chronic toxicity to aquatic invertebrates:*Daphnia magna* (Water flea) 21 d NOEC (reproduction) = 0.14 mg/l**13. DISPOSAL CONSIDERATIONS****Waste disposal:**

Disposal via incineration is recommended. Dispose of in accordance with federal, state and local regulations. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits. Note: Chemical additions to, processing of, or otherwise altering this material may make this waste management information incomplete, inaccurate, or otherwise inappropriate. Furthermore, state and local waste disposal requirements may be more restrictive or otherwise different from federal laws and regulations.

Take appropriate measures to prevent release to the environment.

14. TRANSPORT INFORMATION**US Department of Transportation (DOT)**

UN Number : 2348
Proper shipping name : Butyl acrylates, stabilized
Class : 3
Packaging group : III
Marine pollutant : no

16. OTHER INFORMATION

BUTYL ACRYLATE

Full text of H-Statements referred to under sections 2 and 3.

H226 Flammable liquid and vapour.
H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
H319 Causes serious eye irritation.
H332 Harmful if inhaled.
H335 May cause respiratory irritation.
H412 Harmful to aquatic life with long lasting effects.

Miscellaneous:

Other information: Refer to National Fire Protection Association (NFPA) Codes 30, 70, 77, and 497 and OSHA 29 CFR 1910.106, for safe handling.

Latest Revision(s):

Reference number: 200000034
Date of Revision: 01/21/2017
Date Printed: 01/22/2017

The statements, technical information and recommendations contained herein are believed to be accurate as of the date hereof. Since the conditions and methods of use of the product and of the information referred to herein are beyond our control, ARKEMA expressly disclaims any and all liability as to any results obtained or arising from any use of the product or reliance on such information; **NO WARRANTY OF FITNESS FOR ANY PARTICULAR PURPOSE, WARRANTY OF MERCHANTABILITY OR ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, IS MADE CONCERNING THE GOODS DESCRIBED OR THE INFORMATION PROVIDED HEREIN.** The information provided herein relates only to the specific product designated and may not be applicable when such product is used in combination with other materials or in any process. The user should thoroughly test any application before commercialization. Nothing contained herein constitutes a license to practice under any patent and it should not be construed as an inducement to infringe any patent and the user is advised to take appropriate steps to be sure that any proposed use of the product will not result in patent infringement. See SDS for Health & Safety Considerations.

Arkema has implemented a Medical Policy regarding the use of Arkema products in Medical Devices applications that are in contact with the body or circulating bodily fluids (<http://www.arkema.com/en/social-responsibility/responsible-product-management/medical-device-policy/index.html>) Arkema has designated Medical grades to be used for such Medical Device applications. Products that have not been designated as Medical grades are not authorized by Arkema for use in Medical Device applications that are in contact with the body or circulating bodily fluids. In addition, Arkema strictly prohibits the use of any Arkema products in Medical Device applications that are implanted in the body or in contact with bodily fluids or tissues for greater than 30 days. The Arkema trademarks and the Arkema name shall not be used in conjunction with customers' medical devices, including without limitation, permanent or temporary implantable devices, and customers shall not represent to anyone else, that Arkema allows, endorses or permits the use of Arkema products in such medical devices.

It is the sole responsibility of the manufacturer of the medical device to determine the suitability (including biocompatibility) of all raw materials, products and components, including any medical grade Arkema products, in order to ensure that the final end-use product is safe for its end use; performs or functions as intended; and complies with all applicable legal and regulatory requirements (FDA or other national drug agencies) It is the sole responsibility of the manufacturer of the medical device to conduct all necessary tests and inspections and to evaluate the medical device under actual end-use requirements and to adequately advise and warn purchasers, users, and/or learned intermediaries (such as physicians) of pertinent risks and fulfill any postmarket surveillance obligations. Any decision regarding the appropriateness of a particular Arkema material in a particular medical device should be based on the judgment of the manufacturer, seller, the competent authority, and the treating physician.

Version 1.4

Revision Date 10/08/2020

Print Date 10/09/2020

SDS No.: 3384

Precautionary Statements**: Prevention**

- P210 Keep away from open flames/ hot surfaces. - No smoking.
 P264 Wash hands thoroughly after handling.
 P270 Do not eat, drink or smoke when using this product.
 P273 Avoid release to the environment.
 P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

Response

- P370 + P378 In case of fire: Use dry chemical, carbon dioxide, water spray, or alcohol-resistant foam.
 P301 + P312 IF SWALLOWED: Call a POISON CENTER/ doctor if you feel unwell.
 P330 Rinse mouth.

Storage

- P403 + P235 Store in a well-ventilated place. Keep cool.

Disposal

- P501 Dispose of contents/ container to an approved waste disposal plant.

Other hazards

No additional information available.

3. COMPOSITION/INFORMATION ON INGREDIENTS**Substances**

Chemical nature : Substance

Components

Chemical name	CAS-No. EC-No.	Weight %	Component Type

Print Date 10/09/2020

SDS No.: 3384

4. FIRST AID MEASURES

- General advice : Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. Show this material safety data sheet to the doctor in attendance. Do not leave the victim unattended.
- If inhaled : If symptoms are experienced, move victim to fresh air. Seek medical attention if discomfort persists.
- In case of skin contact : Immediately remove excess chemical and contaminated clothing; thoroughly wash contaminated skin with mild soap and water. If irritation persists after washing, seek medical attention. Thoroughly clean contaminated clothing before reuse; discard contaminated leather goods (gloves, shoes, belts, wallets, etc.).
- In case of eye contact : Thoroughly flush the eyes with large amounts of clean low-pressure water for at least 15 minutes, occasionally lifting the upper and lower eyelids. If irritation persists, seek medical attention.
- If swallowed : IF SWALLOWED: Call a POISON CENTER/ doctor if you feel unwell. Rinse mouth.

Notes to physician

- Symptoms : Inhalation may cause CNS symptoms like headache, dizziness, fatigue, muscular weakness, drowsiness and lack of coordination.
- Hazards : Harmful if swallowed, in contact with skin or if inhaled.
- Treatment : There is good evidence that ethylene glycol monobutyl ether acetate (EGBEA) is hydrolyzed by esterases to its parent glycol ether, ethylene glycol monobutyl ether (EGBE). In vitro results with human red blood suggest that humans are more resistant to the hemolytic effects of EGBE than laboratory test animals such as mice, rats, and rabbits. These results suggest that hemolysis and secondary effects observed in laboratory animals are unlikely to occur in humans except in extreme cases when exposure is severe and/or prolonged. Indicators for treatment and observation include metabolic acidosis, urinary excretion of 2-butoxy acetic acid (BAA), hemolysis, or

SDS No.: 3384

hematuria.

Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.
Provide oxygen and/or ventilation assistance, if needed.

5. FIRE-FIGHTING MEASURES

- Suitable extinguishing media : SMALL FIRE: Use dry chemicals, CO₂, water spray or alcohol-resistant foam
LARGE FIRE: Use water spray, water fog or alcohol-resistant foam
- Specific hazards during fire fighting : Fine sprays/mists may be combustible at temperatures below normal flash point.
Avoid sparks, heat, and open flame.
Vapors can travel to a source of ignition and flash back.
Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Do not get water inside containers.
Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. Always stay away from tanks engulfed in fire.
- Special protective equipment for fire-fighters : Wear positive pressure self-contained breathing apparatus (SCBA).
Structural firefighter's protective clothing will only provide limited protection.

6. ACCIDENTAL RELEASE MEASURES

- Personal precautions : Evacuate personnel to safe areas.
Keep people away from and upwind of spill/leak.
Use personal protective equipment.
Ensure adequate ventilation.
Eliminate all sources of ignition.
- Environmental precautions : Do not allow contact with soil, surface or ground water.
Do not discharge product into the aquatic environment without pretreatment (biological treatment plant).
Prevent product from entering drains.
Prevent further leakage or spillage if safe to do so.
- Methods for containment / : Contain spill with dike to prevent entry into sewers or

GLYCOL ETHER EB ACETATE

Revision Date 10/08/2020

Print Date 10/09/2020

SDS No.: 3384

Methods for cleaning up

waterways.

For large spills, dike and pump into properly labeled containers for reclamation or disposal. For small spills, soak up with absorbent material and place in properly labeled containers for disposal.

All recovered material should be packaged, labeled, transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible.

Additional advice

: Keep non-involved personnel away from the area of spillage. Treat recovered material as described in the section "Disposal considerations".

7. Handling and storage**Precautions for safe handling**

Advice on safe handling

: Containers, even those that have been emptied, will retain product residue and vapor and should be handled as if they were full. Do not eat, drink or smoke in areas where this material is used.

Fire-fighting class

: OSHA/NFPA Class IIIA Combustible Liquid.

Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers

: Store containers in a cool, dry, ventilated, fire resistant area away from sources of ignition and incompatible materials. Keep container tightly closed and properly labeled.

Specific end use(s)

: See Section 1.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Control parameters****Ingredients with workplace control parameters****Occupational Exposure Limits**

Components	CAS-No.	Type	Limit Value	Basis Revision Date	Additional Information

2-butoxyethyl acetate	112-07-2	TWA	20 ppm	US (ACGIH) 2012	
2-Butoxyethanol	111-76-2	TWA	20 ppm	US (ACGIH) 2012	
2-Butoxyethanol	111-76-2	IDLH	700 ppm	NIOSH September 2007	
2-Butoxyethanol	111-76-2	TWA	50 ppm 240 mg/m3	US (OSHA) June 23, 2006	

Consult local authorities for acceptable exposure limits.

Exposure controls**Engineering measures**

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.

Personal protective equipment

- Respiratory protection : When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
- Hand protection : Wear chemical resistant gloves (EN374) such as:
Butyl rubber.
Neoprene.
- Eye and face protection : Wear safety glasses as minimum eye protection. Conditions may warrant the use of chemical goggles and possibly a face shield. Consult your standard operating procedure or safety professional for advice. Use protective eye and face devices that comply with ANSI Z87.1-1987.
- Skin and body protection : Appropriate protective clothing should be worn to prevent skin contact.
- Hygiene measures : Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use.
Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices.
Wash hands before eating, drinking, smoking, or using toilet facilities.
Take off contaminated clothing and wash before reuse.
Wash clothing frequently.

	at 20 °C
	1.3 mm ² /s at 40 °C
Relative vapor density	: 5.5 (Air = 1.0)
Evaporation rate	: 0.03
Explosive properties	: No Data Available.
Other Information	: No additional information available.

10. STABILITY AND REACTIVITY

Reactivity	: Will not occur.
Chemical stability	: Stable under recommended storage conditions.
Hazardous reactions	: Will not occur.
Conditions to avoid	: Forms explosive peroxides on prolonged storage.
Materials to avoid	: Strong acids Strong oxidizing agents. Zinc and Zinc alloys
Hazardous decomposition products	: Not expected to decompose under normal conditions.
Thermal decomposition	: Incomplete combustion may produce carbon monoxide and other toxic gases.

11. TOXICOLOGICAL INFORMATION

Product Summary	: The below given information is based on the assessment of the product including impurities.
Acute toxicity	
Acute oral toxicity	: Classified Harmful if swallowed.
	: LD50: 1,600 mg/kg Species: Rat
Acute inhalation toxicity	: Based on acute toxicity values, not classified.

SDS No.: 3384

- Target Organ Systemic Toxicant - Single exposure** : Based on single exposure toxicity values, not classified.
- Target Organ Systemic Toxicant - Repeated exposure** : Based on repeated exposure toxicity values, not classified.
- : Results from acute and repeat exposure studies in rats, mice and rabbits indicate that EGBE causes injury to red blood cells with subsequent intravascular hemolysis and anemia, and secondary changes in the liver and kidney. Human and guinea pig red blood cells are resistant to EGBE injury and therefore the effects noted in sensitive species are not relevant to humans.
- Aspiration hazard** : Based on physico-chemical values or lack of human evidence, not classified.

12. Ecological information**Ecotoxicology Assessment**

- Short-term (acute) aquatic hazard** : Classified, Harmful to aquatic life.
- Long-term (chronic) aquatic hazard** : Not classified, based on readily biodegradability and low acute toxicity.
- Toxicity to fish** : Harmful to fish.
- : LC50: 22 mg/l
Exposure time: 96 HOURS
Species: Pimephales promelas (fathead minnow)
- Toxicity to daphnia and other aquatic invertebrates** : Harmful to aquatic invertebrates
- : LC50: 37 mg/l
Exposure time: 48 HOURS
Species: Daphnia magna.
Test type: Immobilization
- Toxicity to algae** : Low toxicity to algae.
- Toxicity to bacteria** : Low toxicity to sewage microbes.
- Toxicity to fish (Chronic toxicity)** : no data available
- Toxicity to daphnia and** : Low chronic toxicity to aquatic invertebrates.

14. TRANSPORT INFORMATION

This material does not sustain combustion and is classified as non-regulated material in the United States under the provisions of 49 CFR 173.120(b)(3).

Not regulated for transport

15. REGULATORY INFORMATION**TSCA 12b**

No substances are subject to TSCA 12(b) export notification requirements.

Significant New Use Rules (SNUR)

No substances are subject to a Significant New Use Rule.

SARA 302/304

This product contains no known chemicals regulated under SARA 302/304.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Flammable (gases, aerosols, liquids, or solids) Acute toxicity (any route of exposure)

SARA 313

This product contains the following chemicals subject to the reporting requirements of SARA Title III, Section 313 and 40 CFR 372:

Component	CASRN	Reporting Threshold
2-butoxyethyl acetate	112-07-2	1.0%
2-Butoxyethanol	111-76-2	1.0%

State Reporting

This material does not contain listed substance(s) known to the State of California to cause cancer, birth defects, or other reproductive harm that would require warning under the California Proposition 65 State Drinking Water and Toxic Enforcement Act.

However, LyondellBasell has not tested for the presence of listed chemical substances.

NFPA rating scale (0 = minimal hazard; 4 = severe hazard)

Disclaimer

Information in this document is accurate to the best of our knowledge at the date of publication. The document is designed to provide users general information for safe handling, use, processing, storage, transportation, disposal and release and does not constitute any warranty or quality specification, either express or implied, including any warranty of merchantability or fitness for any particular purpose. Users shall determine whether the product is suitable for their use and can be used safely and legally.

In addition to any prohibitions of use specifically noted in this document, LyondellBasell may further prohibit or restrict the sale of its products into certain applications. For further information, please contact a LyondellBasell representative or visit the LyondellBasell website at: <https://www.lyondellbasell.com/en/products-technology/product-safety-stewardship/>
The Trade Name referenced in section 1 is a trademark owned or used by the LyondellBasell family of companies.

Numerical Data Presentation

The presentation of numerical data, such as that used for physical and chemical properties and toxicological values, is expressed using a comma (,) to separate digits into groups of three and a period (.) as the decimal marker. For example, 1,234.56 mg/kg = 1 234,56 mg/kg.

Language Translations

The information presented in this document has been translated from English by a vendor LyondellBasell believes to be reliable. LyondellBasell and its vendor have made a good-faith effort to verify the accuracy of the translation, but assume no liability or other responsibility for any errors that may have occurred. Please refer to our web site (www.lyondellbasell.com) for the original document written in English.

GLYCOL ETHER EB ACETATE

Gen. Variant: SDS_US_GHS

Version 1.4

Revision Date 10/08/2020

Print Date 10/09/2020

SDS No.: 3384

End of Material Safety Data Sheet

Safety Data Sheet

Oronite

SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

LUBAD 1903

Product Use: Lubricating oil additive

Company Identification

Chevron Oronite Company LLC
3901 Briarpark Dr.
Houston, TX 77042
United States of America

Transportation Emergency Response

Asia: Chevron Emergency Information Centre +(1) 510-231-0623
Australia: 1 800 009 010
China: (+86) 4001-204937
Europe: Oronite SA - Gonfreville Plant +33 2 35 25 55 00
North America: CHEMTREC (800) 424-9300 or (703) 527-3887
South America: Chevron Oronite Brasil Ltda (24 hours) 55 11 4478-1200

Health Emergency

USA: International collect calls accepted. (800) 231-0623 or (510) 231-0623

Product Information

SDS Requests: (+1) 877-512-7200
Technical Information: (+1) 877-512-7200

Oronite D-Tect®, OLOA®, OGA®, OFA®, ODA®, PARATONE®, and TFA® are registered trademarks of the Chevron Oronite Company LLC.

SECTION 2 HAZARDS IDENTIFICATION

CLASSIFICATION:

- Acute aquatic toxicant: Category 3.
- Chronic aquatic toxicant: Category 3.

Environmental Hazards:

- Harmful to aquatic life with long lasting effects.

PRECAUTIONARY STATEMENTS:

Prevention:

- Avoid release to the environment.

Disposal:

- Dispose of contents/container in accordance with applicable local/regional/national/international regulations.

HAZARDS NOT OTHERWISE CLASSIFIED: Heating may release highly toxic and flammable hydrogen sulfide (H₂S). Do not attempt rescue without supplied-air respiratory protection.

SECTION 3 COMPOSITION/ INFORMATION ON INGREDIENTS

COMPONENTS	CAS NUMBER	AMOUNT
Highly refined mineral oil (C15 - C50)	Mixture	35 - 40 %weight
Zinc alkyl dithiophosphate	68649-42-3	5 - 10 %weight
Arenesulfonic acid, alkyl derivatives, metal salts	Trade secret	1 - 5 %weight
Branched alkylphenol and Calcium branched alkylphenol	74499-35-7 & 132752-19-3	< 0.3 %weight

SECTION 4 FIRST AID MEASURES

Description of first aid measures

Eye: No specific first aid measures are required. As a precaution, remove contact lenses, if worn, and flush eyes with water.

Skin: Wash skin with water immediately and remove contaminated clothing and shoes. Get medical attention if any symptoms develop. To remove the material from skin, apply a waterless hand cleaner, mineral oil, or petroleum jelly. Then wash with soap and water. Discard contaminated clothing and shoes or thoroughly clean before reuse.

Ingestion: No specific first aid measures are required. Do not induce vomiting. As a precaution, get medical advice.

Inhalation: No specific first aid measures are required. If exposed to excessive levels of material in the air, move the exposed person to fresh air. Get medical attention if coughing or respiratory discomfort occurs. If exposure to hydrogen sulfide (H₂S) gas is possible during an emergency, wear an approved, positive pressure air-supplying respirator. Move the exposed person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

Most important symptoms and effects, both acute and delayed

IMMEDIATE HEALTH EFFECTS

Eye: Not expected to cause prolonged or significant eye irritation.

Skin: Repeated contact with the skin may cause irritation. Symptoms may include pain, itching, discoloration, swelling, and blistering. Contact with the skin is not expected to cause an allergic skin response.

Ingestion: Not expected to be harmful if swallowed.

Inhalation: Not expected to be harmful if inhaled. Contains a petroleum-based mineral oil. May cause respiratory irritation or other pulmonary effects following prolonged or repeated inhalation of oil mist at airborne levels above the recommended mineral oil mist exposure limit. Symptoms of respiratory irritation may include coughing and difficulty breathing. Hydrogen sulfide has a strong rotten-egg odor. However, with continued exposure and at high levels, H₂S may deaden a person's sense of smell. If the rotten egg odor is no longer noticeable, it may not necessarily mean that exposure has stopped. At low levels, hydrogen sulfide causes irritation of the eyes, nose, and throat. Moderate levels can cause headache, dizziness, nausea, and vomiting, as well as coughing and difficulty breathing. Higher levels can cause shock, convulsions, coma, and death. After a serious exposure, symptoms usually begin immediately.

The U.S. National Institute for Occupational Safety and Health (NIOSH) considers air concentrations of hydrogen sulfide gas greater than 100 ppm to be Immediately Dangerous to Life and Health (IDLH).

DELAYED OR OTHER HEALTH EFFECTS: Not classified

Indication of any immediate medical attention and special treatment needed

Note to Physicians: Administration of 100% oxygen and supportive care is the preferred treatment for poisoning by hydrogen sulfide gas. For additional information on H₂S, see Chevron SDS No. 301.

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

PROTECTION OF FIRE FIGHTERS:

Fire Fighting Instructions: This material will burn although it is not easily ignited. See Section 7 for proper handling and storage. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment, including self-contained breathing apparatus.

Combustion Products: Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids, and gases including carbon monoxide, carbon dioxide, and unidentified organic compounds will be evolved when this material undergoes combustion. Combustion may form oxides of: Nitrogen, Phosphorus, Sulfur, Zinc, Calcium, Boron, Molybdenum, Magnesium.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Protective Measures: Eliminate all sources of ignition in vicinity of spilled material.

Spill Management: Stop the source of the release if you can do it without risk. Contain release to prevent further contamination of soil, surface water or groundwater. Clean up spill as soon as possible, observing precautions in Exposure Controls/Personal Protection. Use appropriate techniques such as applying non-combustible absorbent materials or pumping. Where feasible and appropriate, remove contaminated soil. Place contaminated materials in disposable containers and dispose of in a manner consistent with applicable regulations.

Reporting: Report spills to local authorities and/or the U.S. Coast Guard's National Response Center at (800) 424-8802 as appropriate or required.

SECTION 7 HANDLING AND STORAGE

General Handling Information: The recommended reheating medium is hot water or regulated low pressure steam. Care must be taken not to exceed the temperatures stated above when reheating this material in order to avoid decomposition that releases hazardous fumes. Avoid contaminating soil or releasing this material into sewage and drainage systems and bodies of water.

Precautionary Measures: If adequate engineering controls are used, short term activities such as loading, unloading and in-line blending may occur at temperatures ranging from 80-85°C (176-185°F). During shipment by railcar or tank truck, loading temperatures as high as 80-85°C (176-185°F) may be used and are expected to drop to 66°C (150°F) or lower within 7 days. Storage temperatures for up to 2 weeks should not exceed 66°C (150°F). The recommended long-term (2 weeks or more) storage temperature is ambient to 45°C (113°F) maximum. Do not get in eyes, on skin, or on clothing. Do not breathe gas. Wash thoroughly after handling.

Unusual Handling Hazards: Toxic quantities of hydrogen sulfide (H₂S) may be present in storage tanks and bulk transport vessels which contain or have contained this material. Persons opening or entering these compartments should first determine if H₂S is present. See Exposure Controls/Personal Protection -Section 8. Do not attempt rescue of a person over exposed to H₂S without wearing approved supplied-air or self-contained breathing equipment. If there is a potential for exceeding one-half the occupational exposure standard, monitoring of hydrogen sulfide levels is required. Since the sense of smell cannot be relied upon to detect the presence of H₂S, the concentration should be measured by the use of fixed or portable devices.

Static Hazard: Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary but may not, by themselves, be sufficient. Review all operations which have the potential of generating and accumulating an electrostatic charge and/or a flammable atmosphere (including tank and container filling, splash filling, tank cleaning, sampling, gauging, switch loading, filtering, mixing, agitation, and vacuum truck operations) and use appropriate mitigating procedures.

Container Warnings: Container is not designed to contain pressure. Do not use pressure to empty container or it may rupture with explosive force. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode

and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

GENERAL CONSIDERATIONS:

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

ENGINEERING CONTROLS:

Use in a well-ventilated area.

PERSONAL PROTECTIVE EQUIPMENT

Eye/Face Protection: Wear protective equipment to prevent eye contact. Selection of protective equipment may include safety glasses, chemical goggles, face shields, or a combination depending on the work operations conducted.

Skin Protection: Wear protective clothing to prevent skin contact. Selection of protective clothing may include gloves, apron, boots, and complete facial protection depending on operations conducted. Suggested materials for protective gloves include: Nitrile Rubber, Silver Shield, Viton.

Respiratory Protection: No respiratory protection is normally required.

If material is heated and emits hydrogen sulfide, determine if airborne concentrations are below the occupational exposure limit for hydrogen sulfide. If not, wear an approved positive pressure air-supplying respirator. For more information on hydrogen sulfide, see Chevron SDS No. 301. If user operations generate an oil mist, determine if airborne concentrations are below the occupational exposure limit for mineral oil mist. If not, wear an approved respirator that provides adequate protection from the measured concentrations of this material. For air-purifying respirators use a particulate cartridge. Use a positive pressure air-supplying respirator in circumstances where air-purifying respirators may not provide adequate protection.

Occupational Exposure Limits:

Component	Agency	Form	TWA	STEL	Ceiling	Notation
Highly refined mineral oil (C15 - C50)	ACGIH	--	5 mg/m3	10 mg/m3	--	--
Highly refined mineral oil (C15 - C50)	OSHA Z-1	--	5 mg/m3	--	--	--

Consult local authorities for appropriate values.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Attention: the data below are typical values and do not constitute a specification.

Color: Brown

Physical State: Liquid

Odor: Petroleum odor

Odor Threshold: No data available

pH: Not Applicable

Vapor Pressure: No data available

Vapor Density (Air = 1): No data available

Initial Boiling Point: No data available

Solubility: Insoluble in water.

Freezing Point: No data available

Melting Point: No data available
Density: 0.9703 kg/l @ 15°C (59°F)
Viscosity: 1400 cSt @ 40°C (104°F)
Coefficient of Therm. Expansion / °F: 0.000360
Evaporation Rate: No data available
Decomposition temperature: No data available
Octanol/Water Partition Coefficient: No data available

FLAMMABLE PROPERTIES:

Flammability (solid, gas): Not Applicable

Flashpoint: (Pensky-Martens Closed Cup) 140 °C (284 °F) (Minimum)

Autoignition: No data available

Flammability (Explosive) Limits (% by volume in air): Lower: No data available Upper: No data available

SECTION 10 STABILITY AND REACTIVITY

Reactivity: May react with strong acids or strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

Chemical Stability: This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

Conditions to Avoid: Do not exceed handling and storage temperatures listed in SDS Section 7 (Handling and Storage).

Incompatibility With Other Materials: Not applicable

Hazardous Decomposition Products: Hydrogen Sulfide (See Section 7), Alkyl Mercaptans (See Section 7)

Hazardous Polymerization: Hazardous polymerization will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

Information on toxicological effects

Serious Eye Damage/Irritation: The eye irritation hazard is based on an evaluation of the data for similar products. These data show that a specific component present in this product antagonizes (or decreases the severity of) the eye irritation of the ZnDTP.

Skin Corrosion/Irritation: The material is not considered a skin irritant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Skin Sensitization: The material is not considered a skin sensitizer. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Dermal Toxicity: The material is not considered a dermal toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Oral Toxicity: The material is not considered an oral toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Inhalation Toxicity: The material is not considered an inhalation toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Toxicity Estimate: Not Determined

Germ Cell Mutagenicity: The material is not considered a mutagen. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Carcinogenicity: The material is not considered a carcinogen. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Reproductive Toxicity: The material is not considered a reproductive toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Specific Target Organ Toxicity - Single Exposure: The material is not considered a target organ toxicant (single exposure). The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Specific Target Organ Toxicity - Repeated Exposure: The material is not considered a target organ toxicant (repeated exposure). The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Aspiration Hazard: The material is not considered an aspiration hazard.

ADDITIONAL TOXICOLOGY INFORMATION:

This product contains Arenesulfonic acid, alkyl derivatives, metal salts. This substance may cause skin sensitization, eye irritation, lung effects, skin corrosion. When using this substance, avoid skin contact, avoid ingestion, use skin protection. This product contains petroleum base oils which may be refined by various processes including severe solvent extraction, severe hydrocracking, or severe hydrotreating. None of the oils requires a cancer warning under the OSHA Hazard Communication Standard (29 CFR 1910.1200). These oils have not been listed in the National Toxicology Program (NTP) Annual Report nor have they been classified by the International Agency for Research on Cancer (IARC) as; carcinogenic to humans (Group 1), probably carcinogenic to humans (Group 2A), or possibly carcinogenic to humans (Group 2B).

These oils have not been classified by the American Conference of Governmental Industrial Hygienists (ACGIH) as: confirmed human carcinogen (A1), suspected human carcinogen (A2), or confirmed animal carcinogen with unknown relevance to humans (A3).

Tetrapropenyl phenol (TPP), also known as dodecyl phenol, was tested in a rat oral gavage one-generation reproductive toxicity study (doses of 0, 5, 25, or 125 mg/kg/day) and a rat dietary two-generation reproductive toxicity study (doses of 0, 1.5, 15, or 75 mg/kg/day). Results from the one-generation study demonstrated reduced ovary weights and changes in male reproductive accessory organs (decreased organ weights, decreased secretions, and decreased epididymal sperm concentrations) at 25 mg/kg/day; 5 mg/kg/day was identified as the No Observed Adverse Effect Level (NOAEL). Results from the two-generation study demonstrated prolonged estrous cyclicity, reduced ovary weights, accelerated sexual maturation, decreased mean live litter size, decreased fertility rates, hypospermia, and reduced weights in male reproductive accessory organs at 75 mg/kg/day; 15 mg/kg/day was identified as the NOAEL.

Evaluation of these two primary studies of TPP (one- & two-generation reproductive toxicity studies), as well as supporting data from additional in-vivo & in-vitro studies of both TPP and substances containing TPP & TPP/calcium salts as an impurity resulted in a classification of TPP as a Category 1B under the criteria of the Globally Harmonized System and Regulation (EC) No 1907/2006 (presumed reproductive hazard to humans).

The studies were also evaluated to identify a valid & reliable specific concentration limit (SCL) for reproductive effects, below which reproductive toxicity would not be expected to occur. An SCL of 1.5 wt% TPP & TPP/calcium salts was derived based on the identified NOAEL from the rat dietary two-generation reproductive toxicity study, and confirmed by supporting studies of substances containing TPP as an impurity.

SECTION 12 ECOLOGICAL INFORMATION

ECOTOXICITY

This material is expected to be harmful to aquatic organisms and may cause long-term adverse effects in

the aquatic environment.

The product has not been tested. The statement has been derived from the properties of the individual components.

This material contains one or more components that have a branched alkylphenol impurity that is highly toxic to aquatic organisms (disclosed in Section 3). The components containing the impurity have been tested and are not toxic to aquatic organisms. Therefore the data in Section 3 for the alkylphenol impurity should not be used to classify the product for aquatic toxicity.

MOBILITY

No data available.

PERSISTENCE AND DEGRADABILITY

This material is not expected to be readily biodegradable. The product has not been tested. The statement has been derived from the properties of the individual components.

POTENTIAL TO BIOACCUMULATE

Bioconcentration Factor: No data available.

Octanol/Water Partition Coefficient: No data available

SECTION 13 DISPOSAL CONSIDERATIONS

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by international, country, or local laws and regulations.

SECTION 14 TRANSPORT INFORMATION

The description shown may not apply to all shipping situations. Consult 49CFR, or appropriate Dangerous Goods Regulations, for additional description requirements (e.g., technical name) and mode-specific or quantity-specific shipping requirements.

DOT Shipping Description: NOT REGULATED AS HAZARDOUS MATERIAL FOR TRANSPORTATION UNDER 49 CFR

IMO/IMDG Shipping Description: NOT REGULATED AS DANGEROUS GOODS FOR TRANSPORT UNDER THE IMDG CODE

ICAO/IATA Shipping Description: NOT REGULATED AS DANGEROUS GOODS FOR TRANSPORT UNDER ICAO

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code:
Not applicable

SECTION 15 REGULATORY INFORMATION

EPCRA 311/312 CATEGORIES: Not applicable

REGULATORY LISTS SEARCHED:

01-1=IARC Group 1	05=MA RTK
01-2A=IARC Group 2A	06=NJ RTK
01-2B=IARC Group 2B	07=PA RTK
02=NTP Carcinogen	08-1=TSCA 5(e)
03=EPCRA 313	08-2=TSCA 12(b)
04=CA Proposition 65	

The following components of this material are found on the regulatory lists indicated.

Zinc alkyl dithiophosphate	03, 06, 07
Arenesulfonic acid, alkyl derivatives, metal salts	08-2

U.S. Toxic Substances Control Act (TSCA): The product contains a chemical substance subject to a Consent Order or Significant New Use Rule (SNUR) per 40 CFR 721.11180.

CHEMICAL INVENTORIES:

All components comply with the following chemical inventory requirements: AIIIC (Australia), DSL (Canada), ENCS (Japan), KECI (Korea), NZIoC (New Zealand), PICCS (Philippines), TCSI (Taiwan), TSCA (United States).

One or more components has been notified but may not be listed in the following chemical inventories: IECSC (China). Separate notification may be required.

Please contact Oronite at SDS_REACH@chevron.com for more information concerning EU-REACH.

SECTION 16 OTHER INFORMATION

NFPA RATINGS: Health: 2 Flammability: 1 Reactivity: 0

HMIS RATINGS: Health: 1 Flammability: 1 Reactivity: 0

(0-Least, 1-Slight, 2-Moderate, 3-High, 4-Extreme, PPE:- Personal Protection Equipment Index recommendation, *- Chronic Effect Indicator). These values are obtained using the guidelines or published evaluations prepared by the National Fire Protection Association (NFPA) or the National Paint and Coating Association (for HMIS ratings).

REVISION STATEMENT: SECTION 02 - Hazards Otherwise Not Classified information was modified.

SECTION 03 - Composition information was modified.

SECTION 04 - First Aid - Eye information was modified.

SECTION 04 - First Aid - Inhalation information was modified.

SECTION 04 - First Aid - Note to Physicians information was added.

Section 1. Identification

GHS product identifier : YUBASE 6
Product code : Not available.
Chemical name : Distillates (petroleum), hydrotreated heavy paraffinic
Other means of identification : Baseoil - unspecified; Distillates, petroleum, hydrotreated heavy paraffinic; Mineral oil, petroleum distillates, hydrotreated heavy paraffinic; Distillates (petroleum), hydro-treated heavy paraffinic; Paraffin oil; HYDROTREATED HEAVY PARAFFINIC DISTILLATE; DISTILLATES (PETROLEUM) HYDROFVLD
Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Manufacture of lubricants.

Supplier's details : SK Lubricants Co., Ltd.
 26, Jong-ro, Jongno-gu, Seoul, Korea Telephone: +82-2-2121-5114
 INTL Telephone: 1-800-424-9300 (CHEMTREC)

Emergency telephone number (with hours of operation) : +82-52-208-2114 - Hours of operation: 9:00-18:00

Section 2. Hazards identification

OSHA/HCS status : While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

Classification of the substance or mixture : Not classified.

GHS label elements

Signal word : No signal word.
Hazard statements : No known significant effects or critical hazards.

Precautionary statements

Prevention : Not applicable.
Response : Not applicable.
Storage : Not applicable.
Disposal : Not applicable.

Hazards not otherwise classified : None known.

Section 3. Composition/information on ingredients

Substance/mixture Chemical : Substance

Other means of identification : Distillates (petroleum), hydrotreated heavy paraffinic
 Baseoil - unspecified; Distillates, petroleum, hydrotreated heavy paraffinic; Mineral oil, petroleum distillates, hydrotreated heavy paraffinic; Distillates (petroleum), hydro-treated heavy paraffinic; Paraffin oil; HYDROTREATED HEAVY PARAFFINIC DISTILLATE; DISTILLATES (PETROLEUM) HYDROFVLD

UNAS number/other identifiers

Section 3. Composition/information on ingredients

CAS number : 64742-54-7

Ingredient name	%	CAS number
Distillates (petroleum), hydrotreated heavy paraffinic	100	64742-54-7

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

- Eye contact** : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
- Inhalation** : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
- Skin contact** : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
- Ingestion** : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects

- Eye contact** : No known significant effects or critical hazards.
- Inhalation** : No known significant effects or critical hazards.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : No known significant effects or critical hazards.

Over-exposure signs/symptoms

- Eye contact** : No specific data.
- Inhalation** : No specific data.
- Skin contact** : No specific data.
- Ingestion** : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

- Suitable extinguishing media** : Use an extinguishing agent suitable for the surrounding fire.
- Unsuitable extinguishing media** : None known.

Section 5. Fire-fighting measures

- Specific hazards arising from the chemical** : In a fire or if heated, a pressure increase will occur and the container may burst.
- Hazardous thermal decomposition products** : No specific data.
- Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
- For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

- Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8).
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- Conditions for safe storage, including any incompatibilities** : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Distillates (petroleum), hydrotreated heavy paraffinic	ACGIH TLV (United States, 3/2017). TWA: 5 mg/m ³ 8 hours. Form: Inhalable fraction NIOSH REL (United States, 10/2016). TWA: 5 mg/m ³ 10 hours. Form: Mist STEL: 10 mg/m ³ 15 minutes. Form: Mist OSHA PEL (United States, 6/2016). TWA: 5 mg/m ³ 8 hours.

- Appropriate engineering controls** : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
- Skin protection**
- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance

- Physical state** : Liquid.
- Color** : Clear. Colorless.
- Odor** : Mineral oil. [Slight]
- Odor threshold** : Not available.
- pH** : Not available.
- Melting point** : Not available.

Section 9. Physical and chemical properties

Flash point	: Closed cup: $\geq 220^{\circ}\text{C}$ ($\geq 428^{\circ}\text{F}$)
Vaporization rate	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Not available.
Vapor pressure	: ≤ 0.01 kPa (≤ 0.075006 mm Hg) [room temperature]
Vapor density	: ≥ 5 [Air = 1]
Relative density	: 0.842 [Water = 1]
Solubility	: Not available.
Solubility in water	: Not available.
Partition coefficient: n-octanol/water	: 3.9 to 6
Auto-ignition temperature	: 260 to 371°C (500 to 699.8°F)
Decomposition temperature	: Not available.
Viscosity	: Kinematic (40°C (104°F)): 0.36 cm^2/s (36 cSt)
Flow time (ISO 2431)	: Not available.

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: No specific data.
Incompatible materials	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Distillates (petroleum), hydrotreated heavy paraffinic	LC50 Inhalation Dusts and mists	Rat	> 5.53 mg/l	4 hours
	LD50 Dermal	Rabbit	> 5000 mg/kg	-
	LD50 Oral	Rat	> 5000 mg/kg	-

Irritation/Corrosion

Not available.

Sensitization

Not available.

Mutagenicity

Not available.

Carcinogenicity

Not available.

Section 11. Toxicological information

Conclusion/Summary : The DMSO extract by IP 346 of this substance is less than 3% (typical 0.2% with maximum 0.5%).
Consequently it is not classified as a carcinogen.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on the likely routes of exposure : Routes of entry anticipated: Oral, Dermal, Inhalation.

Potential acute health effects

Eye contact : No known significant effects or critical hazards.
Inhalation : No known significant effects or critical hazards.
Skin contact : No known significant effects or critical hazards.
Ingestion : No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : No specific data.
Inhalation : No specific data.
Skin contact : No specific data.
Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.
Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.
Potential delayed effects : Not available.

Potential chronic health effects

Not available.

General : No known significant effects or critical hazards.
Carcinogenicity : No known significant effects or critical hazards.
Mutagenicity : No known significant effects or critical hazards.
Teratogenicity : No known significant effects or critical hazards.
Developmental effects : No known significant effects or critical hazards.
Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Section 11. Toxicological information

Not available.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Distillates (petroleum), hydrotreated heavy paraffinic	Acute EC50 >100 mg/l	Daphnia	48 hours
	Acute IC50 >100 mg/l	Algae	72 hours
	Acute LC50 >100 mg/l	Fish	96 hours

Persistence and degradability

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
Distillates (petroleum), hydrotreated heavy paraffinic	-	-	Inherent

Bioaccumulative potential

Product/ingredient name	LogP _{ow}	BCF	Potential
Distillates (petroleum), hydrotreated heavy paraffinic	3.9 to 6	-	high

Stability in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	Mexico Classification	ADR/RID	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-	-	-	-

Section 16. Other information

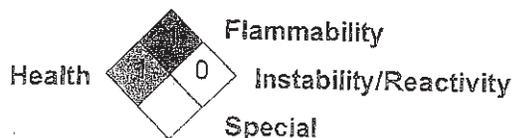

Hazardous Material Information System (U.S.A.)

Health	/	0
Flammability		0
Physical hazards		0

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

National Fire Protection Association (U.S.A.)

Description oSrst aid measures

hfe: No specific first aid measures are required. As a precaution, remove contact lenses, if worn, and flush eyes with water.

3, in: Wash skin with water immediately and remove contaminated clothing and shoes. Get medical attention if any symptoms develop. To remove the material from skin, apply a waterless hand cleaner, mineral oil, or petroleum jelly. Then wash with soap and water. Discard contaminated clothing and shoes or thoroughly clean before reuse.

ngestion: No specific first aid measures are required. Do not induce vomiting. As a precaution, get medical advice.

nyalation: No specific first aid measures are required. If exposed to excessive levels of material in the air, move the exposed person to fresh air. Get medical attention if coughing or respiratory discomfort occurs. If exposure to hydrogen sulfide (H2S) gas is possible during an emergency, wear an approved, positive pressure air-supplying respirator. Move the exposed person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

Most important sf mptoms and eSects5body acute and delaf ed

MMhDTACH HhAUCH hFFhEC3

hfe: Not expected to cause prolonged or significant eye irritation.

3, in: Repeated contact with the skin may cause irritation. Symptoms may include pain, itching, discoloration, swelling, and blistering. Contact with the skin is not expected to cause an allergic skin response.

ngestion: Not expected to be harmful if swallowed.

nyalation: Not expected to be harmful if inhaled. Contains a petroleum-based mineral oil. May cause respiratory irritation or other pulmonary effects following prolonged or repeated inhalation of oil mist at airborne levels above the recommended mineral oil mist exposure limit. Symptoms of respiratory irritation may include coughing and difficulty breathing. Hydrogen sulfide has a strong rotten-egg odor. However, with continued exposure and at high levels, H2S may deaden a person's sense of smell. If the rotten egg odor is no longer noticeable, it may not necessarily mean that exposure has stopped. At low levels, hydrogen sulfide causes irritation of the eyes, nose, and throat. Moderate levels can cause headache, dizziness, nausea, and vomiting, as well as coughing and difficulty breathing. Higher levels can cause shock, convulsions, coma, and death. After a serious exposure, symptoms usually begin immediately.

The U.S. National Institute for Occupational Safety and Health (NIOSH) considers air concentrations of hydrogen sulfide gas greater than 100 ppm to be Immediately Dangerous to Life and Health (IDLH).

DhUAYhd L R L CHhR HhAUCH hFFhEC3: Not classified

ndication oSanf immediate medical attention and special treatment needed

Note to Oyf sicians: Administration of 100% oxygen and supportive care is the preferred treatment for poisoning by hydrogen sulfide gas. For additional information on H2S, see Chevron SDS No. 301.

3hECLN B FRh FGHCNG MhA3PRh3

hXCNGPBHNG MhDTA: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

ORL ChECLN LF FRh FGHCNR3:

Fire Figyting Instrctions: This material will burn although it is not easily ignited. See Section 7 for proper handling and storage. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment, including self-contained breathing apparatus.

Combustion Products: Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids, and gases including carbon monoxide, carbon dioxide, and unidentified organic compounds will be evolved when this material undergoes combustion. Combustion may form oxides of: Nitrogen, Sulfur, Phosphorus, Zinc, Molybdenum, Calcium, Magnesium, Boron.

3hECLN 1 AEEThNCAURhUhA3h MhA3PRh3

Protective Measures: Eliminate all sources of ignition in vicinity of spilled material.

Spill Management: Stop the source of the release if you can do it without risk. Contain release to prevent further contamination of soil, surface water or groundwater. Clean up spill as soon as possible, observing precautions in Exposure Controls/Personal Protection. Use appropriate techniques such as applying non-combustible absorbent materials or pumping. Where feasible and appropriate, remove contaminated soil. Place contaminated materials in disposable containers and dispose of in a manner consistent with applicable regulations.

Reporting: Report spills to local authorities and/or the U.S. Coast Guard's National Response Center at (800) 424-8802 as appropriate or required.

3hECLN 6 HANDUNG AND 3CL RAGh

General Handling Information: The maximum handling temperature is 85°C. The recommended reheating medium is hot water or regulated low pressure steam. Care must be taken not to exceed the temperatures stated above when reheating this material in order to avoid decomposition that releases hazardous fumes. Avoid contaminating soil or releasing this material into sewage and drainage systems and bodies of water.

Precautionary Measures: If adequate engineering controls are used, short term activities such as loading, unloading and in-line blending may occur at temperatures ranging from 80-85°C (176-185°F). During shipment by railcar or tank truck, loading temperatures as high as 80-85°C (176-185°F) may be used and are expected to drop to 66°C (150°F) or lower within 7 days. Storage temperatures for up to 2 weeks should not exceed 66°C (150°F). The recommended long-term (2 weeks or more) storage temperature is ambient to 45°C (113°F) maximum. Do not get in eyes, on skin, or on clothing. Do not breathe gas. Wash thoroughly after handling.

Unusual Handling Hazards: Toxic quantities of hydrogen sulfide (H₂S) may be present in storage tanks and bulk transport vessels which contain or have contained this material. Persons opening or entering these compartments should first determine if H₂S is present. See Exposure Controls/Personal Protection -Section 8. Do not attempt rescue of a person over exposed to H₂S without wearing approved supplied-air or self-contained breathing equipment. If there is a potential for exceeding one-half the occupational exposure standard, monitoring of hydrogen sulfide levels is required. Since the sense of smell cannot be relied upon to detect the presence of H₂S, the concentration should be measured by the use of fixed or portable devices.

Static Hazard: Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary but may not, by themselves, be sufficient. Review all operations which have the potential of generating and accumulating an electrostatic charge and/or a flammable atmosphere (including tank and container filling, splash filling, tank cleaning, sampling, gauging, switch loading, filtering, mixing, agitation, and vacuum truck operations)

and use appropriate mitigating procedures.

Container Warnings: Container is not designed to contain pressure. Do not use pressure to empty container or it may rupture with explosive force. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly.

General Storage Information: The maximum short-term (<2 week(s)) storage temperature is 66°C. The maximum long-term (>2 week(s)) storage temperature is 45°C.

Section 7: Hazardous Information

Section 3: Health Hazards

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the workplace when designing engineering controls and selecting personal protective equipment (PPE). If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, refer to PPE information below.

Factors that affect PPE include, but are not limited to: properties of the chemical, other chemicals which may contact the same PPE, physical requirements (fit & sizing, cut/puncture protection, dexterity, thermal protection, etc.), and potential allergic reactions to the PPE material. It is the responsibility of the user to read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances. Refer to appropriate CEN standards.

Section 4: Handling

Use in a well-ventilated area.

Section 5: Personal Protective Equipment (PPE)

Eye/Face Protection: Wear protective equipment to prevent eye contact. Selection of protective equipment may include safety glasses, chemical goggles, face shields, or a combination depending on the work operations conducted.

Skin Protection: Wear chemical personal protective equipment (PPE) to prevent skin contact. Selection of chemical protective clothing should be performed by an Occupational Hygienist or Safety Professional and be based upon applicable standards (ASTM F739 or EN 374). Using chemical PPE depends upon operations conducted and may include chemical gloves, boots, chemical apron, chemical suit, and complete facial protection. Refer to PPE manufacturers to obtain breakthrough time information to determine how long PPE can be used before it needs to be replaced. Unless specific glove manufacturer data indicates otherwise, the below table is based upon available industry data to assist in the glove selection process and is intended to be used as reference only.

Eye/Face Glove Material	Cyclic Stress (MPa)	Typical Breakthrough Time (minutes)
Butyl	0.7	120
Neoprene	0.61	60
Nitrile	0.8	30
Nitrile	0.23	7
Polyvinyl Chloride (PVC)	1.1	15
Viton Butyl	0.3	120

Respirator Protection: No respiratory protection is normally required.

If material is heated and emits hydrogen sulfide, determine if airborne concentrations are below the occupational exposure limit for hydrogen sulfide. If not, wear an approved positive pressure air-supplying respirator. For more information on hydrogen sulfide, see Chevron SDS No. 301. If user

operations generate an oil mist, determine if airborne concentrations are below the occupational exposure limit for mineral oil mist. If not, wear an approved respirator that provides adequate protection from the measured concentrations of this material. For air-purifying respirators use a particulate cartridge. Use a positive pressure air-supplying respirator in circumstances where air-purifying respirators may not provide adequate protection.

Occupational Exposure Limits:

Component	Agency	Form	CWA	3ChU	ceiling	Notation
Highly refined mineral oil (C15 - C50)	ACGIH	--	5 mg/m3	10 mg/m3	--	--
Highly refined mineral oil (C15 - C50)	OSHA Z-1	--	5 mg/m3	--	--	--

Consult local authorities for appropriate values.

SECTION 3. HAZARD IDENTIFICATION

Attention: The data below are typical values and do not constitute a specification.

Color: Brown
Physical State: Viscous liquid
Odor: Petroleum odor
Odor Threshold: No data available
pH: Not Applicable
Vapor Pressure: No data available
Vapor Density (Air) 1x: No data available
Initial Boiling Point: No data available
Solubility: Insoluble in water.
Freezing Point: No data available
Melting Point: No data available
Density: 0.9715 kg/l @ 15°C (59°F)
Viscosity: 1765 cSt @ 40°C (104°F)
Expansion Coefficient / °F: 0.000360
Evaporation Rate: No data available
Decomposition temperature: No data available
Water Partition Coefficient: No data available

Flammability (Solid/Gas): Not Applicable

Flashpoint: (Pensky-Martens Closed Cup) 140 °C (284 °F) (Minimum)
Autoignition: No data available
Flammability Limits (Lower/Upper): Lower: No data available Upper: No data available

SECTION 9. CHEMICAL SAFETY AND HAZARD

Reactivity: May react with strong acids or strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.
Chemical Stability: This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.
Conditions to Avoid: Do not exceed handling and storage temperatures listed in SDS Section 7 (Handling and Storage).
Incompatible Materials: Not applicable
Hazardous Decomposition Products: Hydrogen Sulfide (See Section 7), Alkyl Mercaptans (See Section 7)

Hazardous Polymerization: Hazardous polymerization will not occur.

3hECLN II CLXEL ULG EAU NFL RMACT N

Information on toxicological effects

Serious Eye Damage/Irritation: The eye irritation hazard is based on an evaluation of the data for similar products. These data show that a specific component present in this product antagonizes (or decreases the severity of) the eye irritation of the ZnDTP.

3, in Corrosion/Irritation: The material is not considered a skin irritant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

3, in Sensitization: The material is not considered a skin sensitizer. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Dermal Toxicity: The material is not considered a dermal toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Oral Toxicity: The material is not considered an oral toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Inhalation Toxicity: The material is not considered an inhalation toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Acute Toxicity Estimate: Not Determined

Germ Cell Mutagenicity: The material is not considered a mutagen. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Carcinogenicity: The material is not considered a carcinogen. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Reproductive Toxicity: The material is not considered a reproductive toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Specific Target Organ Toxicity - Single Exposure: The material is not considered a target organ toxicant (single exposure). The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Specific Target Organ Toxicity - Repeated Exposure: The material is not considered a target organ toxicant (repeated exposure). The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

Aspiration Hazard: The material is not considered an aspiration hazard.

Additional Information:

This product contains Arenesulfonic acid, alkyl derivatives, metal salts. This substance may cause skin sensitization, eye irritation, lung effects, skin corrosion. When using this substance, avoid skin contact, avoid ingestion, use skin protection. This product contains petroleum base oils which may be refined by various processes including severe solvent extraction, severe hydrocracking, or severe hydrotreating. None of the oils requires a cancer warning under the OSHA Hazard Communication Standard (29 CFR 1910.1200). These oils have not been listed in the National Toxicology Program (NTP) Annual Report nor have they been classified by the International Agency for Research on Cancer (IARC) as: carcinogenic to humans (Group 1), probably carcinogenic to humans (Group 2A), or possibly carcinogenic to humans (Group 2B).

These oils have not been classified by the American Conference of Governmental Industrial Hygienists (ACGIH) as: confirmed human carcinogen (A1), suspected human carcinogen (A2), or confirmed animal carcinogen with unknown relevance to humans (A3).

Tetrapropenyl phenol (TPP), also known as dodecyl phenol, was tested in a rat oral gavage one-generation reproductive toxicity study (doses of 0, 5, 25, or 125 mg/kg/day) and a rat dietary two-generation reproductive toxicity study (doses of 0, 1.5, 15, or 75 mg/kg/day). Results from the one-generation study demonstrated reduced ovary weights and changes in male reproductive accessory organs (decreased organ weights, decreased secretions, and decreased epididymal sperm concentrations) at 25 mg/kg/day; 5 mg/kg/day was identified as the No Observed Adverse Effect Level (NOAEL). Results from the two-generation study demonstrated prolonged estrous cyclicity, reduced ovary weights, accelerated sexual maturation, decreased mean live litter size, decreased fertility rates, hypospermia, and reduced weights in male reproductive accessory organs at 75 mg/kg/day; 15 mg/kg/day was identified as the NOAEL.

Evaluation of these two primary studies of TPP (one- & two-generation reproductive toxicity studies), as well as supporting data from additional in-vivo & in-vitro studies of both TPP and substances containing TPP & TPP/calcium salts as an impurity resulted in a classification of TPP as a Category 1B under the criteria of the Globally Harmonized System and Regulation (EC) No 1907/2006 (presumed reproductive hazard to humans).

The studies were also evaluated to identify a valid & reliable specific concentration limit (SCL) for reproductive effects, below which reproductive toxicity would not be expected to occur. An SCL of 1.5 wt% TPP & TPP/calcium salts was derived based on the identified NOAEL from the rat dietary two-generation reproductive toxicity study, and confirmed by supporting studies of substances containing TPP as an impurity.

hELCLXETCY

This material is expected to be harmful to aquatic organisms and may cause long-term adverse effects in the aquatic environment.

The product has not been tested. The statement has been derived from the properties of the individual components.

This material contains one or more components that have a branched alkylphenol impurity that is highly toxic to aquatic organisms (disclosed in Section 3). The components containing the impurity have been tested and are not toxic to aquatic organisms. Therefore the data in Section 3 for the alkylphenol impurity should not be used to classify the product for aquatic toxicity.

ML4TJCY

No data available.

OhR3BChNEh AND DhGRADA4TJCY

This material is not expected to be readily biodegradable. The product has not been tested. The statement has been derived from the properties of the individual components.

OLChNCTAUCL4LAEEMPPUACH

Bioconcentration Factor: No data available.

Octanol/Water Partition Coefficient: No data available

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 1 of 13

ExxonMobil Chemical Company
22777 Springwoods Village Parkway
Spring, TX 77389-1425

Subject: OSHA Hazard Communication 2012 Combustible Dust Labeling

Dear ExxonMobil Customer:

As you may be aware, in March 2012, the U.S. Occupational Safety and Health Administration (OSHA) issued its final Hazard Communication Standard which stated its intent to adopt the United Nations' Globally Harmonized System (GHS) for the classification and labeling of hazardous substances. This updated hazard communication standard requires product labels for hazardous substances and mixtures. In addition to product labels, the standard requires suppliers to provide Safety Data Sheets (SDSs), previously known as Material Safety Data Sheets (MSDSs), for all hazardous products.

The UN GHS does not contain a classification for combustible dust hazards. The combustible dust hazard was an element OSHA desired to include in its standard. As such, OSHA amended the standard definition of 'hazardous chemical' to include 'combustible dust' which has resulted in a hazard classification of certain polymer materials and the need to provide a hazard label. For polymer materials presenting a combustible dust hazard as shipped, a label will be applied to each package. For polymers that do not present a combustible dust hazard in the shipped form, OSHA permits the transmittal of label information with the SDS. Enclosed please find the combustible dust label for the referenced product.

If you have any questions, please direct them to your ExxonMobil Customer Service Representative.

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 2 of 13

Please find below an OSHA HazCom 2012 label for LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - for combustible dust hazard.

LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

SECTION 2 HAZARDS IDENTIFICATION

This material is hazardous according to regulatory guidelines (see (M)SDS Section 15).

CLASSIFICATION:

Combustible Dust

LABEL:

Pictogram: No Pictogram

Signal Word: Warning

Hazard Statements:

May form combustible dust concentrations in air.

Other hazard information:

HAZARD NOT OTHERWISE CLASSIFIED (HNOC): None as defined under 29 CFR 1910.1200.

PHYSICAL / CHEMICAL HAZARDS

WARNING: May form combustible dust concentrations in air (during processing/handling). Thermal burn hazard - contact with hot material may cause thermal burns. Material can accumulate static charges which

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 4 of 13

may cause an ignition. Spilled pellets present a slipping hazard on hard surfaces.

HEALTH HAZARDS

If dust is generated, it could scratch the eyes and cause minor irritation to the respiratory tract. When heated, the vapors/fumes given off may cause respiratory tract irritation.

ENVIRONMENTAL HAZARDS

No significant hazards.

NFPA Hazard ID:	Health: 1	Flammability: 1	Reactivity: 0
HMIS Hazard ID:	Health: 1	Flammability: 1	Reactivity: 0

SECTION 3	COMPOSITION / INFORMATION ON INGREDIENTS
------------------	---

This material is defined as a mixture.

Hazardous Substance(s) or Complex Substance(s) required for disclosure

Name	CAS#	Concentration*	GHS Hazard Codes
TRISNONYL PHENYL PHOSPHITE	26523-78-4	< 0.25%	H317, H400(M factor 1), H410(M factor 1)

* All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

As per paragraph (i) of 29 CFR 1910.1200, formulation is considered a trade secret and specific chemical identity and exact percentage (concentration) of composition may have been withheld. Specific chemical identity and exact percentage composition will be provided to health professionals, employees, or designated representatives in accordance with applicable provisions of paragraph (i).

SECTION 4	FIRST AID MEASURES
------------------	---------------------------

INHALATION

At ambient/normal handling temperatures, no adverse effects due to inhalation of dust are expected. In case of adverse exposure to vapors and / or aerosols formed at elevated temperatures, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Keep at rest.

SKIN CONTACT

Wash contact areas with soap and water. For hot product: Immediately immerse in or flush affected area with large amounts of cold water to dissipate heat. Cover with clean cotton sheeting or gauze and get prompt medical attention.

EYE CONTACT

Flush thoroughly with water for at least 15 minutes. Get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix
Revision Date: 04 Apr 2018
Page 5 of 13

SECTION 5	FIRE FIGHTING MEASURES
------------------	-------------------------------

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO₂) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

FIRE FIGHTING

Fire Fighting Instructions: Assure an extended cooling down period to prevent re-ignition. Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Unusual Fire Hazards: Explosion: Avoid generating dust; fine dust dispersed in air in sufficient concentration and in the presence of an ignition source is a potential dust explosion hazard. Hydrogen fluoride, a corrosive and toxic gas, and other potentially hazardous fluorine-containing compounds may be released upon combustion.

Hazardous Combustion Products: Flammable hydrocarbons, Hydrogen fluoride, Incomplete combustion products, Oxides of carbon, Smoke, Fume

FLAMMABILITY PROPERTIES

Flash Point [Method]: N/A

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/A

SECTION 6	ACCIDENTAL RELEASE MEASURES
------------------	------------------------------------

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

PROTECTIVE MEASURES

Avoid contact with spilled material. Dust Deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (for example, clearing dust surfaces with compressed air). Prevent dust exposure to ignition sources. For example, use non-sparking tools and prohibit smoking, flares, sparks or flames in immediate area. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 6 of 13

SPILL MANAGEMENT

Land Spill: Spilled pellets present a slipping hazard on hard surfaces. Prevent dust cloud. Small Dry Spills: With clean shovel place material into clean, dry container and cover loosely; move containers from spill area.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Skim from surface.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Prevent entry into waterways, sewers, basements or confined areas. For Large Spills: Cover spill with plastic sheet or tarpaulin to minimize spreading.

SECTION 7

HANDLING AND STORAGE

HANDLING

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dust from material can accumulate electrostatic charges due to friction from transfer and mixing operations and cause an electrical spark (ignition source). Provide adequate precautions to ignition sources, such as electrical grounding and bonding, inert atmosphere or non-sparking tools. However, bonding and grounds may not eliminate the hazard for static accumulation. Consult local applicable standards for guidance. Refer to NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids and EN 61241, Electrical Apparatus for Use in the Presence of Combustible Dust for safe handling. Avoid elevated temperatures for prolonged periods of time. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Prevent small spills and leakage to avoid slip hazard. DO NOT handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Care should be taken when storing and handling this product. Apart from the specific nature of the polymer product, conditions such as humidity, sunlight, and temperature have an influence on the way the product behaves during storage and handling. Special attention should be paid to avoid inappropriate stacking of palletized bags or other package units. Indeed, polymer products may be dimensionally unstable under certain conditions. Avoid conditions generating heat during transfer operations.

Loading/Unloading Temperature: [Ambient]

Transport Temperature: [Ambient]

Transport Pressure: [Ambient]

Static Accumulator: This material is a static accumulator.

STORAGE

The type of container used to store the material may affect static accumulation and dissipation. Do not store in open or unlabelled containers.

Storage Temperature: [Ambient]

Storage Pressure: [Ambient]

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 7 of 13

Suitable Containers/Packing: Bulk Containers; Drums; Bags; Boxes; Hopper Cars; Octatiner; Silos
Suitable Materials and Coatings (Chemical Compatibility): Polyethylene; Aluminum

SECTION 8

EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits/standards for materials that can be formed when handling this product: For dusty conditions, OSHA recommends for particulates not otherwise regulated an 8-hour TWA of 15 mg/m³ (total dust), 5 mg/m³ (respirable fraction); ACGIH recommends for insoluble and poorly soluble particles not otherwise specified an 8-hour TWA of 10 mg/m³ (inhalable particles), 3 mg/m³ (respirable particles).

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

No biological limits allocated.

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

Adequate ventilation should be provided so that exposure limits are not exceeded. **SPECIAL PRECAUTIONS:** Should significant vapors/fumes be generated during thermal processing of this product, it is recommended that work stations be monitored for the presence of thermal degradation by-products which may evolve at elevated temperatures (for example, oxygenated components). Processors of this product should assure that adequate ventilation or other controls are used to control exposure. It is recommended that the current ACGIH-TLVs for thermal degradation by-products be observed. Contact your local sales representative for further information. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product are designed and maintained to minimize dust generation and accumulation. Ensure that dust-handling systems (such as exhaust ducts, dusts collectors, vessels, and processing equipment) are designed to minimize the potential for dust ignition and prevent explosion propagation. For example, use explosion relief vents, an explosion suppression system or inert equipment internals. Additional examples of proper equipment include using only appropriately classified electrical equipment and powered industrial trucks.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

Particulate air-purifying respirator approved for dust / oil mist is recommended.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode.

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 8 of 13

Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

If product is hot, thermally protective, chemical resistant gloves are recommended. If contact with forearms is likely, wear gauntlet style gloves.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

If product is hot, thermally protective, chemical resistant apron and long sleeves are recommended.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

SECTION 9	PHYSICAL AND CHEMICAL PROPERTIES
------------------	---

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

GENERAL INFORMATION

Physical State: Solid
Form: Powder, Granule, Pellet
Color: Clear to Opaque, White to Off-White
Odor: None to Mild
Odor Threshold: N/A

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15 °C): 0.9 - 0.95 [In-house method]
Bulk Density: 0.4 g/cc at 20 °C - 1 g/cc at 20 °C [In-house method]
Flammability (Solid, Gas): N/A
Flash Point [Method]: N/A
Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D
Autoignition Temperature: N/A

 Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION

Freezing Point: N/A
 Melting Point: 115°C (239°F) - 130°C (266°F) [In-house method]
 Molecular Weight: > 25000
 Hygroscopic: No

SECTION 10	STABILITY AND REACTIVITY
-------------------	---------------------------------

REACTIVITY: See sub-sections below.

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Avoid elevated temperatures for prolonged periods of time.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

SECTION 11	TOXICOLOGICAL INFORMATION
-------------------	----------------------------------

INFORMATION ON TOXICOLOGICAL EFFECTS

<u>Hazard Class</u>	<u>Conclusion / Remarks</u>
Inhalation	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on chemical structure (polymers).
Irritation: No end point data for material.	Negligible hazard at ambient/normal handling temperatures.
Ingestion	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on chemical structure (polymers).
Skin	
Acute Toxicity: No end point data for material.	Minimally Toxic. Based on chemical structure (polymers).
Skin Corrosion/Irritation: No end point data for material.	Negligible irritation to skin at ambient temperatures. Based on chemical structure (polymers).
Eye	
Serious Eye Damage/Irritation: No end point data for material.	May cause mild, short-lasting discomfort to eyes. Based on chemical structure (polymers).
Sensitization	
Respiratory Sensitization: No end point data for material.	Not expected to be a respiratory sensitizer.

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 10 of 13

Skin Sensitization: No end point data for material.	Not expected to be a skin sensitizer. Based on chemical structure (polymers).
Aspiration: No end point data for material.	Not expected to be an aspiration hazard. Based on physico-chemical properties of the material.
Germ Cell Mutagenicity: No end point data for material.	Not expected to be a germ cell mutagen. Based on chemical structure (polymers).
Carcinogenicity: No end point data for material.	Not expected to cause cancer. Based on chemical structure (polymers).
Reproductive Toxicity: No end point data for material.	Not expected to be a reproductive toxicant. Based on chemical structure (polymers).
Lactation: No end point data for material.	Not expected to cause harm to breast-fed children.
Specific Target Organ Toxicity (STOT)	
Single Exposure: No end point data for material.	Not expected to cause organ damage from a single exposure.
Repeated Exposure: No end point data for material.	Not expected to cause organ damage from prolonged or repeated exposure. Based on chemical structure (polymers).

OTHER INFORMATION

For the product itself:

Dust may be irritating to the eyes and respiratory tract.

Elevated temperatures or mechanical action may form vapors, mists or fumes which may be irritating to the eyes and respiratory tract.

Component concentrations in this formulation would not be expected to cause skin sensitization, based on tests of the components, this formulation, or similar formulations.

Contains:

Additives that are encapsulated in the polymer. Under the normal conditions for processing and use of this polymer the encapsulated additives are not expected to pose any health hazard. However, grinding of the polymer is not recommended without the use of appropriate measures to control exposure (see Section 8 - Engineering Controls).

The following ingredients are cited on the lists below: None.

SECTION 12

ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

Material -- Not expected to be harmful to terrestrial organisms.

MOBILITY

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix
Revision Date: 04 Apr 2018
Page 11 of 13

Material -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

PERSISTENCE AND DEGRADABILITY

Biodegradation:

Material -- Expected to be persistent.

Hydrolysis:

Material -- Transformation due to hydrolysis not expected to be significant.

Photolysis:

Material -- Transformation due to photolysis not expected to be significant.

Atmospheric Oxidation:

Material -- Transformation due to atmospheric oxidation not expected to be significant.

BIOACCUMULATION POTENTIAL

Material -- Potential to bioaccumulate is low.

SECTION 13

DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Suitable routes of disposal are supervised incineration, preferentially with energy recovery, or appropriate recycling methods in accordance with applicable regulations and material characteristics at the time of disposal. Incinerator must be equipped to neutralize or trap hazardous combustion products.

REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrosivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

SECTION 14

TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018
Page 12 of 13

Marine Pollutant: No

AIR (IATA): Not Regulated for Air Transport

SECTION 15	REGULATORY INFORMATION
-------------------	-------------------------------

OSHA HAZARD COMMUNICATION STANDARD: This material is considered hazardous in accordance with OSHA HazCom 2012, 29 CFR 1910.1200.

Listed or exempt from listing/notification on the following chemical inventories: Please contact Customer Service (see Section 1 for supplier contact information).

SARA 302: No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302

CWA / OPA: Plastic pellets are defined by the US EPA under the Clean Water Act (40CFR122.26) as a "significant material" which requires any industrial plant that may expose pellets to storm water to secure a storm water permit. Violations of the rule carry the same penalties as other Clean Water Act violations. Pellets found in storm water runoff are subject to EPA regulations with the potential for substantial fines and penalties.

SARA (311/312) REPORTABLE GHS HAZARD CLASSES: Combustible Dust

SARA (313) TOXIC RELEASE INVENTORY: This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The following ingredients are cited on the lists below:

Chemical Name	CAS Number	List Citations
1-PROPENE, 1,1,2,3,3,3-HEXAFLUORO POLYMER WITH 1,1-DIFLUOROETHENE	9011-17-0	5

SECTION 16	OTHER INFORMATION
-------------------	--------------------------

Product Name: LINEAR LOW DENSITY POLYETHYLENE (PPA, TNPP) - Grades designated by LL prefix

Revision Date: 04 Apr 2018

Page 13 of 13

N/D = Not determined, N/A = Not applicable

KEY TO THE H-CODES CONTAINED IN SECTION 3 OF THIS DOCUMENT (for information only):

H317: May cause allergic skin reaction; Skin Sensitization, Cat 1

H400: Very toxic to aquatic life; Acute Env Tox, Cat 1

H410: Very toxic to aquatic life with long lasting effects; Chronic Env Tox, Cat 1

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

Chemical cover letter information was modified.

Company Mailing Address information was deleted.

Company Mailing Address information was modified.

Section 01: Company Mailing Address information was deleted.

Section 01: Company Mailing Address information was modified.

Section 07: Suitable Containers information was modified.

THIS MSDS COVERS THE FOLLOWING MATERIALS: ExxonMobil™ LLDPE resins: | LL 3001.63

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and examination. It is the user's responsibility to satisfy itself that the product is suitable for the intended use. If buyer repackages this product, it is the user's responsibility to insure proper health, safety and other necessary information is included with and/or on the container. Appropriate warnings and safe-handling procedures should be provided to handlers and users. Alteration of this document is strictly prohibited. Except to the extent required by law, republication or retransmission of this document, in whole or in part, is not permitted. The term, "ExxonMobil" is used for convenience, and may include any one or more of ExxonMobil Chemical Company, Exxon Mobil Corporation, or any affiliates in which they directly or indirectly hold any interest.

SAFETY DATA SHEET POLYVINYL CHLORIDE RESIN

FILE NUMBER: SHINTECH 04
REVISION DATE: 08/30/18
SUPERCEDES DATE: 04/03/17

SECTION 1: PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Shintech PVC, All Grades
SYNONYMS: PVC, Vinyl Resin, polyvinyl chloride

MANUFACTURER: Shintech, Inc.
ADDRESS: 5618 East Highway 332
Freeport, Texas 77541

EMERGENCY PHONE: (979) 233-7861 (Ext. 300)

CHEMICAL NAME: Polyvinyl Chloride
CHEMICAL FAMILY: Organic Polymer
CHEMICAL FORMULA: $(CH_2-CHCl)_n$
CAS No.: 9002-86-2

PRODUCT USE: Polyvinyl Chloride (PVC) Fabrication
PREPARED BY: Shintech Safety Department

SECTION 2: HAZARDS IDENTIFICATION

GHS Classification: Not Classified
EU/ECC: Not Classified - EU directive 67/548/EEC or 1999/45/EC and the CLP EU Regulation 1272/2008/EC
OSHA 1910.1200: Not Classified
Label Elements: Not Required

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS#	EINECS#	GHS Hazard Statement Codes	%
Polyvinyl Chloride Resin	9002-86-2	N/A	N/A	> 99.8

SECTION 4: FIRST AID MEASURES

- EYES:** Immediately flush the eyes with large amounts of room temperature water for a minimum of 15 minutes. Hold the eyelids apart during the flushing operation. Get immediate medical attention if irritation persists.
- SKIN:** Wash affected area with soap and water. Get immediate medical attention if irritation persists.
- INGESTION:** Ingestion of this product under normal conditions does not contribute to any known adverse health effects. If large amounts are ingested get medical attention.
- INHALATION:** Remove the person from the exposure and move to fresh air. Get immediate medical attention if severe coughing or breathing difficulty occurs.

Most Important Symptoms or Effects (acute and delayed): This product does not present health hazards under normal conditions of use. However, mechanical operations associated with the use of PVC material can produce elevated concentrations of airborne PVC particulates. Contact with PVC particulates can be irritating to the eyes and respiratory tract. Avoid contact with the eyes and wear appropriate eye protection when necessary. Operations that produce airborne dusts should be conducted in well ventilated areas. When exposures to airborne PVC particulates exceed the applicable exposure limits, appropriate respiratory protection must be worn. PVC particulates may aggravate any pre-existing respiratory conditions or allergies.

SECTION 5: FIRE-FIGHTING MEASURES

FLASHPOINT: Not Applicable

FLAMMABLE LIMITS (% VOLUME IN AIR)

Lower Explosive Limit (LEL):	Not Applicable
Upper Explosive Limit (UEL):	Not Applicable

AUTOIGNITION TEMPERATURE: 945°F

EXTINGUISHING MEDIA: Water, dry powder, foam, carbon dioxide, or sand is recommended. Water spray is recommended to cool or protect exposed materials or structures. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide inside confined spaces. Collect contaminated fire-fighting water separately.

FIRE FIGHTING PROCEDURES: Avoid inhalation of material or combustion by-products. Wear fire fighter's protective clothing and a NIOSH-approved self-contained breathing apparatus (SCBA).

UNUSUAL FIRE AND EXPLOSIVE HAZARDS: Exposure to fire or explosions can produce hydrogen chloride.

NFPA: Health 0 (Normal)
Fire 1 (Above 200°F)
Reactivity 0 (Stable)
Special None

HMIS: Health 0 (none)
Flammability 1 (Slight)
Reactivity 0 (none)
PPE A (safety glasses)

SECTION 6: ACCIDENTAL RELEASE MEASURES

PERSONAL PROTECTIVE EQUIPMENT: Use the personal protective equipment recommended in Section 8.

SPILL PROCEDURES: Contain spill immediately. Restrict access. PVC is a slipping hazard if spilled. Non-recoverable product, contaminated soil, debris and other materials should be placed in proper containers for reclamation or disposal. Avoid generating dust during containment, clean up, and disposal.

DISPOSAL: Follow the procedures recommended in Section 13.

SECTION 7: HANDLING AND STORAGE

HANDLING: Wear personal protective equipment and follow the exposure control measures recommended in Section 8. Avoid contact with eyes and prolonged breathing of airborne PVC. PVC can acquire a substantial static electrical charge, which may cause a spark. Handling and processing equipment should have electrical grounding. Use good housekeeping practices to minimize PVC particulates, especially dust, from accumulating and minimize dust from becoming airborne. Wash thoroughly after handling.

STORAGE: Store in a cool, dry, properly ventilated place and keep isolated from open flames and other sources of ignition.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Provide general and/or local exhaust ventilation to control airborne levels of PVC dust below the exposure standards and guidelines. Local exhaust ventilation is preferred because it is capable of controlling contaminant emissions at the source and preventing dispersion into the general work area. For additional information on ventilation, refer to the ACGIH text, *Industrial Ventilation, a Manual of Recommended Practices*.

EYE PROTECTION: Wear ANSI approved safety glasses with side shields and/or an appropriate full-face shield. All eye protection should be selected and worn in accordance with the general OSHA PPE standard (29 CFR 1910.132) and the OSHA eye and face protection standard (29 CFR 1910.133).

SKIN PROTECTION: Under normal conditions, the use of additional PPE is not necessary to protect the skin. However, protective clothing, including gloves, aprons, and other outer garments may be desirable in extremely dusty areas. All PPE for skin protection should be selected and worn in accordance with the general OSHA PPE standard (29 CFR 1910.132), the

OSHA eye and face protection standard (29 CFR 1910.133), and the OSHA hand protection standard (29 CFR 1910.138).

RESPIRATORY PROTECTION: Use a NIOSH-approved air purifying respirator with an N95 cartridge where airborne concentrations are expected to exceed exposure limits. All respirators should be selected and worn in accordance with the general OSHA PPE standard (29 CFR 1910.132) and the OSHA respiratory protection standard (29 CFR 1910.134).

EXPOSURE GUIDELINES:

<u>COMPONENT</u>	<u>OSHA PEL</u>	<u>ACGIH TLV</u>	<u>NIOSH IDLH</u>
Dust (total)	15 mg/m ³ (TWA)	Not Established	Not Established
Dust (respirable)	5 mg/m ³ (TWA)	1 mg/m ³ (TWA)	Not Established

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL STATE:	Granulate Solid (free flowing)
COLOR:	White
ODOR:	Odorless
ODOR THRESHOLD:	Not Applicable
PH:	Not Applicable
BOILING POINT/BOILING RANGE	Not Applicable
MELTING/FREEZING POINT:	Not Applicable
FLASH POINT:	Not Applicable
EVAPORATION RATE:	Not Applicable
FLAMMABILITY SOLID:	Not Applicable
UPPER/LOWER EXPLOSIVE LIMITS:	Not Applicable
VAPOR PRESSURE:	Not Applicable
VAPOR DENSITY (AIR):	Not Applicable
WATER SOLUBILITY:	Not Soluble
RELATIVE DENSITY (SPECIFIC GRAVITY):	1.4
WATER SOLUBILITY:	Not Soluble
PARTITION COEFFICIENT: n-octanol/water:	No Data Available
AUTO IGNITION TEMPERATURE:	945°F
DECOMPOSITION TEMPERATURE :	No Data Available
VISCOSITY:	Not Applicable To Solids
MOLECULAR FORMULA:	(CH ₂ -CHCl) _n
MOLECULAR WEIGHT:	20,000 – 150,000 g/mole
VINYL CHLORIDE:	This Polyvinyl Chloride product contains Vinyl Chloride Monomer on the order of 0.1 to 5 ppm by weight.

SECTION 10: STABILITY AND REACTIVITY

STABILITY:	Stable at normal temperatures and pressures
CONDITIONS TO AVOID:	Avoid all possible sources of ignition, heat and flames.

INCOMPATIBLE MATERIALS: Avoid contact with acetal or acetal copolymers and amines (derivatives of ammonia).
HAZARDOUS DECOMPOSITION PRODUCTS: Mostly Hydrogen Chloride.
HAZARDOUS POLYMERIZATION: Has not been reported.

SECTION 11: TOXICOLOGICAL INFORMATION

TOXICITY DATA: There is limited toxicity information available for this product.
CARCINOGENICITY: This product is not considered carcinogenic by OSHA, NTP, or IARC.
REPRODUCTIVE EFFECTS: None reported
MUTAGENICITY: Has not been reported
TERATOGENICITY: Has not been reported

SECTION 12: ECOLOGICAL INFORMATION

ECOTOXICITY: There is limited information available for this product.

ENVIRONMENTAL FATE: There is limited information available for this product.

SECTION 13: DISPOSAL CONSIDERATIONS

WASTE DISPOSAL: Do not dump this product into any sewers, on the ground, or into any body of water. Dispose of in accordance with all applicable federal, state, and local regulations. Waste characterization and compliance with applicable laws are the responsibility of the waste generator.

RCRA P-Series: Not Listed
RCRA U-Series: Not Listed
NPRI: Not Listed

SECTION 14: TRANSPORT INFORMATION

SHIPPING NAME:	Polyvinyl Chloride	IATA HAZARD CLASS:	Not Regulated
DOT HAZARD CLASS:	Not Regulated	IMGD CLASS:	Not Regulated
DOT SHIPPING ID:	Not Required	RID/ADR CODES:	Not Required
PACKING GROUP:	Not Required	PACKING GROUP:	Not Required
LABEL:	Not Required	HAZARD ID:	Not Required

* This product is not regulated as a hazardous material by the U.S. Department of Transportation (DOT), IMGD, EU, United Nations, IATA or the Canadian Transportation of Dangerous Goods (TDG) regulations.

SECTION 15: REGULATORY INFORMATION

GHS Classification / Hazard Statement Codes:	Not Classified
CERCLA Sections 102a/103 (40 CFR 302.4):	Not Regulated
SARA Title III Section 302 (40 CFR 355.30):	Not Regulated
SARA Title III Section 304 (40 CFR 355.40):	Not Regulated
SARA Title III Section 313 (40 CFR 372.65):	Not Regulated
SARA Title III Section 311/312 Hazardous Categories (40 CFR 370.21):	
Acute:	No
Chronic:	No
Fire:	No
Reactive:	No
Sudden Release:	No
California Proposition 65:	PVC is not listed. It is unlikely that unpolymerized vinyl chloride from this resin will contribute to workplace exposures under normal conditions of use but trace exposure cannot be ruled out. Users must determine if vinyl chloride may be released from the use of this product. If so, the appropriate Prop 65 warning language is as follows:  WARNING: This product can expose you to chemicals including vinyl chloride, which are known to the State of California to cause cancer. For more information go to: www.P65Warning.ca.gov
TSCA:	Listed on the Inventory
WHMIS (Canada):	Not Classified
CPR (Canada):	Not Regulated
IDL (Canada):	Not Regulated
DSL (Canada):	Listed on the Inventory
ESIS (Europe):	Not Regulated

OSHA 29 CFR 1910.1017 Vinyl Chloride Standard

Vinyl Chloride Monomer (VCM) is classified as a carcinogen. The U.S. Occupational Safety and Health Administration specifically regulates manufacturing, handling, and processing of Polyvinyl Chloride to control exposures to VCM. Those regulations are published as 29 CFR 1910.1017. Handlers and processors of Polyvinyl Chloride must be familiar with these regulations. None of the information presented in this safety data sheet should be construed to contradict or supersede these regulations.

SECTION 16: OTHER INFORMATION

As the conditions or methods of use of this PVC product are beyond our control, we do not assume any responsibility for and expressly disclaim any liability for any use of this material. Information contained herein is believed to be true and accurate, but all statements or recommendations are made without warranty, express or implied, regarding the accuracy of the information, the hazards connected with use of the material or the results to be obtained from the use of the information or material. Compliance with all applicable federal, state, and local laws and regulations remains the responsibility of the user.

SAFETY DATA SHEET

Section 1 – Product and Company Identification

Material Name - Semolina
 Chemical Category - Food Ingredient

Manufacturer - Ardent Mills, LLC; Ardent Mills, ULC: Molinos de Puerto Rico, LLC
 1875 Lawrence Street
 Denver, CO 80202
www.ardentmills.com

Telephone
 General/Emergency - Call your Ardent Mills' Customer Service Rep

Preparation Date - 10/15/2014
 Last Revision Date - 09/24/2020

Section 2 – Hazards Identification

Emergency Overview

WARNING

May form combustible dust concentrations in air (during processing).

Prevention - Avoid generating fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source

Response - When responding to explosion or any subsequent fire, DO NOT use high pressure extinguishing agent as this may spread the dust and may create an additional ignitable dust cloud.

Storage/Disposal - Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Potential Health Effects

Eyes – Direct contact with eyes may cause temporary irritation

Skin – None known.

Inhalation – Dust may irritate the respiratory system.

Ingestion – Expected to be a low ingestion hazard.

Chronic Effects - May cause allergic reaction in persons sensitive to wheat proteins.

Environmental Effects - Not expected to be harmful to aquatic organisms.

Physical Descriptions

Form – Solid

Color – Creamy yellow particles

Odor – No data available

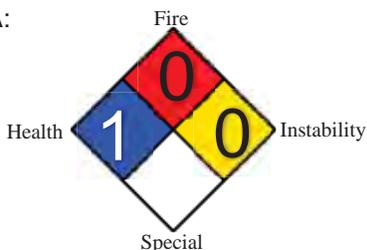

Flash Point – Not relevant

WHMIS – Other Toxic Effects – D2A

EU – Sensitizer – R42

GHS - Specific Target Organ Toxicity Single Exposure – Category 3; Respiratory Tract Irritation, Skin Corrosion/Irritation – Category 3; Serious Eye Damage, Eye Irritation – Category 2B; Respiratory Sensitizer – Category 1

NFPA:

Potential Health Effects

Inhalation

Acute (immediate) – May cause irritation

Chronic (delayed) – According to ACGIH, repeated and prolonged exposure to flour may cause lung effects referred to as “Baker’s Lungs” or allergic sensitization resulting in what is referred to as “Baker’s Asthma”.

Skin

Acute (immediate) – Under normal conditions of use, no health effects are expected.

Chronic (delayed) – Under normal conditions of use, no health effects are expected.

Eye

Acute (immediate) – May cause irritation

Chronic (delayed) – Under normal conditions of use, no chronic effects are expected.

Ingestion

Acute (immediate) – No effects are expected for most people. Listed as food allergen.

Chronic (delayed) – Under normal conditions of use, no chronic effects are expected.

Section 3 – Composition/Information on Ingredients

Hazardous Components

Chemical Name	Identifiers	%(weight)	LD50/LC50	Classifications According to Regulation/Directive	Comments
Semolina	NDA	100%	NDA		

Section 4 – First Aid Measures

Inhalation

- Get medical attention if symptoms occur. Remove to fresh air.

Skin

- No data available.

Eye

- Get medical attention if symptoms occur. If contact with eyes directly, flush with gently flowing fresh water thoroughly.

Ingestion

- Get medical attention if symptoms occur.

Section 5 – Fire Fighting Measures

Extinguishing Media

- Dry chemical, CO2, foam or water fog.

Unsuitable Extinguishing Media

- High pressure water spray may cause a combustible dust cloud.

Firefighting Procedures

- FIRES INVOLVING TANKS OR CAR/TRAILER LOADS: ALWAYS stay away from tanks engulfed in fire. LARGE FIRES: Move containers from fire area if can accomplish without risk.

Unusual Fire & Explosion Hazards

- Fine dust (typically less than 420 microns) associated with this product may represent a combustible dust hazard. Ignition energy (Kst value) vary with particle size.

Hazardous Combustion Products

- None known

Protection of Firefighters

- Wear positive pressure self-contained breathing apparatus (SCBA).

Flash Point

- Not relevant.

Explosion Limits

Upper

- Not relevant

Lower

- Not relevant

Auto-ignition Temperature

- 390 to 500° F (199 to 260° C)

Section 6 – Accidental Release Measures

Personal Precautions

- No data available.

Emergency Procedures

- Keep unauthorized personnel away.

Environmental Precautions

- Avoid run off to waterways and sewers.

Containment/Clean-up Measures

- Carefully shovel or sweep up spilled material and place in suitable container. Use appropriate Personal Protective Equipment (PPE)

Prohibited Materials

- No data available.

Section 7 – Handling and Storage

Handling - Follow good manufacturing practices when handling this product. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Refer to NFPA 61: Standard for the Prevention of Fires and Dust Explosions in the Agricultural and Food Processing Facilities

Storage - No data available.

Special Packaging Materials - None required.

Incompatible Materials or Ignition Sources - None known.

Section 8 – Exposure Controls/Personal Protection

Personal Protective Equipment

Respiratory - Follow the OSHA respirator regulations found in 29 CFR 1910.134 or the European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face - Protective safety glasses recommended.

Hands - No data available.

Skin/Body - None required for normal handling.

General Industrial Hygiene Considerations - Persons who handle grain products must follow good hygienic practices (i.e. wash frequently, and wear clean clothing)

Engineering Measures/Controls - Adequate ventilation systems as needed to control concentrations of airborne contaminants below applicable threshold limit values.

Exposure Limits/Guidelines			
	Result	ACGIH	United States - California
Dust associated with Semolina	TWAs	0.5 mg/m ³ TWA (inhalable fraction) <i>as Flour dust</i>	0.5 mg/m ³ PEL <i>as Flour dust</i>

Exposure Control Notations
ACGIH – Milled Wheat Products as Flour dust: Sensitizers

Exposure Limits Supplemental
ACGIH – Milled Wheat Products as Flour dust: TLV Basis – Critical Effects: (asthma, bronchitis, upper respiratory tract irritation)

Environmental Exposure Controls
No data available

Section 9 – Physical and Chemical Properties

Material Description

Section 10 – Stability and Reactivity

Stability	- Stable when kept dry under normal temperatures and pressures.
Hazardous Polymerization	- Hazardous polymerization will not occur.
Conditions to Avoid	- High humidity and/or wet conditions.
Incompatible Materials	- None known.
Hazardous Decomposition Products	- None known.

Section 11 – Toxicological Information

Other Information	- This product has not been tested as a separate entity. No specific toxicological data is available for the ingredients.
--------------------------	---

Section 12 – Ecological Information

Ecological Fate	- No data available
Persistence/Degradability	- No data available
Bioaccumulation Potential	- No data available
Mobility in Soil	- No data available
Other Information	- Product has not been studied as distributed

Section 13 – Disposal Considerations

Product	- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
----------------	---

Section 14 – Transportation Information

DOT	- Not regulated as a hazardous material.
IATA	- Not regulated as a dangerous good.

Section 15 – Regulatory Information

Not any known regulatory list for hazardous materials.

Section 16 – Other Information

Precautionary Statements - Response

Eyes

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
Immediately call a POISON CENTER or doctor

OTHER INFORMATION

Causes mild skin irritation

3. Composition/information on Ingredients

Substance

Not Applicable.

Mixture

Chemical name	CAS No.	weight-%	Hazardous Material Information Review Act registry number (HMIRA registry #)	Date HMIRA filed and date exemption granted (if applicable)
2-(2-Butoxyethoxy)ethanol	112-34-5	0 - 10%	-	-
Sodium Octyl Sulfate	142-31-4	0 - 10%	-	-

4. First aid measures

Description of first aid measures

General advice

Immediate medical attention is required. Show this safety data sheet to the doctor in attendance.

Inhalation

Remove to fresh air. Get medical attention immediately if symptoms occur.

Product code 711014

/ Product name T-Storm F787B /
3X6 AR-AFFF Bulk Blend

PAGE 3 / 8

Eye contact	Get immediate medical advice/attention. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Keep eye wide open while rinsing. Do not rub affected area.
Skin contact	Wash off immediately with soap and plenty of water for at least 15 minutes. Get medical attention if irritation develops and persists.
Ingestion	Clean mouth with water and drink afterwards plenty of water. Never give anything by mouth to an unconscious person. Do NOT induce vomiting. Call a physician.
Self-protection of the first aider	Avoid contact with skin, eyes or clothing. Wear personal protective clothing (see section 8).

Most Important Symptoms and Effects, Both Acute and Delayed

Symptoms Burning sensation.

Indication of Any Immediate Medical Attention and Special Treatment Needed

Note to physicians Treat symptomatically.

5. Fire-fighting measures

Suitable Extinguishing Media	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Unsuitable extinguishing media	Caution: Use of water spray when fighting fire may be inefficient.
Specific hazards arising from the chemical	No information available.
Hazardous Combustion Products	Carbon oxides. Fluorinated oxides. Nitrogen oxides (NOx). Oxides of sulfur.
Explosion Data	
Sensitivity to Mechanical Impact	None.
Sensitivity to Static Discharge	None.
Special protective equipment for fire-fighters	Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Personal precautions	Avoid contact with skin, eyes or clothing. Use personal protective equipment as required.
Other Information	Refer to protective measures listed in Sections 7 and 8.

Environmental Precautions

Environmental precautions Prevent further leakage or spillage if safe to do so.

Methods and material for containment and cleaning up

Product code 711014

/ Product name T-Storm F787B /
3X6 AR-AFFF Bulk Blend

PAGE 4 / 8

Methods for containment Prevent further leakage or spillage if safe to do so.
Methods for cleaning up Pick up and transfer to properly labeled containers.
Prevention of secondary hazards Clean contaminated objects and areas thoroughly observing environmental regulations.

7. Handling and Storage

Precautions for Safe Handling

Advice on safe handling Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Do not eat, drink or smoke when using this product.

Conditions for safe storage, including any incompatibilities

Storage Conditions Keep containers tightly closed in a dry, cool and well-ventilated place. Store locked up. Keep out of the reach of children.

8. Exposure Controls/Personal Protection

Control Parameters

Exposure Limits

Chemical name	Alberta	British Columbia	Ontario TWA	Quebec
2-(2-Butoxyethoxy)ethanol 112-34-5			TWA: 10 ppm	

OTHER INFORMATION None known.

Appropriate Engineering Controls

Engineering controls Ensure adequate ventilation, especially in confined areas.

Individual protection measures, such as personal protective equipment

Eye/face protection Tight sealing safety goggles.

Hand protection Wear suitable gloves.

Skin and body protection Wear suitable protective clothing.

Respiratory protection No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.

General hygiene considerations Avoid contact with skin, eyes or clothing. Wear suitable gloves and eye/face protection. Do not eat, drink or smoke when using this product.

11. Toxicological Information

Information on Likely Routes of Exposure

Product Information

Inhalation	Specific test data for the substance or mixture is not available.
Eye contact	Specific test data for the substance or mixture is not available. Severely irritating to eyes. Causes serious eye damage. May cause burns. May cause irreversible damage to eyes.
Skin contact	Specific test data for the substance or mixture is not available. May cause irritation.
Ingestion	Specific test data for the substance or mixture is not available. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Information on Toxicological Effects

Symptoms Redness. Burning. May cause blindness.

Numerical Measures of Toxicity

Acute Toxicity

The following values are calculated based on chapter 3.1 of the GHS document .

ATEmix (oral)	22,473.00 mg/kg
ATEmix (dermal)	33,750.00 mg/kg

Component Information

Chemical name	Oral LD50	Dermal LD50	Inhalation LC50
2-(2-Butoxyethoxy)ethanol 112-34-5	= 5660 mg/kg (Rat)	= 2700 mg/kg (Rabbit)	-
Sodium Octyl Sulfate 142-31-4	= 3200 mg/kg (Rat)	-	-

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Skin corrosion/irritation	May cause skin irritation.
Serious eye damage/eye irritation	Classification based on data available for ingredients. Causes burns. Risk of serious damage to eyes.
Respiratory or skin sensitization	No information available.
Germ cell mutagenicity	No information available.
Carcinogenicity	No information available.
Reproductive toxicity	No information available.
STOT - single exposure	No information available.

Product code 711014

/ Product name T-Storm F787B /
3X6 AR-AFFF Bulk Blend

PAGE 7 / 8

STOT - repeated exposure No information available.

Aspiration hazard No information available.

12. Ecological Information

Ecotoxicity

Chemical name	Algae/aquatic plants	Fish	Toxicity to Microorganisms	Crustacea
2-(2-Butoxyethoxy)ethan ol 112-34-5	EC50 (96h) > 100 mg/L Desmodesmus subspicatus	LC50 (96h) static = 1300 mg/L Lepomis macrochirus	-	EC50 (48h) > 100 mg/L Daphnia magna EC50 (24h) = 2850 mg/L Daphnia magna

Persistence and Degradability

Bioaccumulation No information available.

Other Adverse Effects No information available.

13. Disposal Considerations

Waste Treatment Methods

Waste from residues/unused products Dispose of in accordance with local regulations. Dispose of waste in accordance with environmental legislation.
Contaminated packaging Do not reuse empty containers.

OEPA Approved Sampling and Analyses Plans

Preliminary Soil Sampling Work Plan
Norfolk Southern Train Derailment
East Palestine, Ohio
Date: February 10, 2023

Purpose and Scope

Norfolk Southern Railway has developed the following plan to summarize the approach for preliminary soil sampling at the derailment site in East Palestine, Ohio (Site) that occurred on February 3, 2023 and resulted in releases of vinyl chloride, butyl acrylate, ethyl hexyl acrylate, 2-butoxyethyl acetate, ethylene glycol monobutyl ether acetate, lube oil, and isobutylene. This work plan is intended to guide preliminary soil sampling activities to evaluate site conditions and inform waste disposal activities. Two areas of the Site will be evaluated during this preliminary evaluation (Figure 1):

1. The area proximal to the five vinyl chloride cars that were on fire (Area 1)
2. The area between the western extent of Area 1 and the North Pleasant Drive crossing (Area 2)

Additionally, standing water and water within a stormwater sewer in the vicinity of Area 1 will be sampled.

Area 1

Three transects will be established with grab samples collected from the 0 to 0.5-foot below ground surface (bgs) interval:

- Transect A – North of the northern track
- Transect B – Between the two tracks
- Transect C – South of the southern tracks

The following protocol will be followed for sample collection and analysis from these three areas:

- A portion of each sample will be placed into new, single-use, sealed, zip-lock bags and held for a minimum of 10 minutes prior to headspace analysis with a photoionization device (PID) with a calibrated 10.6 electronvolt (eV) lamp.
- A portion of each sample will be collected for laboratory analysis of vinyl chloride per USEPA Method 8260.

Area 2

Three transects will be established:

- Transect D – North of the northern track

DRAFT
Privileged and Confidential

- Transect E – Between the two tracks
- Transect F – South of the southern tracks

The following protocol will be followed for sample collection and analysis from these three areas:

- A track-mounted GeoProbe® will be utilized to advance soil borings at sample locations spaced approximately 50 feet apart. The soil borings will be advanced to the depth of groundwater.
- Soil will be collected continuously during boring advancement for lithologic descriptions. Upon retrieval of the 4-foot soil core, the soil will be logged in 2-foot intervals and screened with a PID.
- A surface soil sample (0 to 2 feet bgs) taken from hand auger clearing cuttings will be collected for laboratory analysis of the analytical parameters indicated below.
- A subsurface soil sample with the highest PID from the 2 feet bgs to the depth of groundwater will be submitted for analysis. If PID readings are 0.0 throughout the boring, a sample from the 2-foot interval immediately above groundwater will be collected submitted for laboratory analysis.
- The samples will be analyzed for the parameters indicated below:
 - VOCs (USEPA Method 8260)
 - SVOCs (USEPA Method 8270)
 - Butyl acrylate (USEPA Method 8260)
 - Ethyl hexyl acrylate (USEPA Method 8260)
 - Methyl acrylate (USEPA Method 8260)
 - 2-butoxyethyl acetate (ethylene glycol mono butyl ether acetate) (USEPA Method 8270)

Standing Water and Stormwater

There are two pools of standing water to the south of Area 1. Two samples will be collected from the larger of the two pools, and one sample will be collected from the second, smaller pool. Additionally, one liquid sample will be collected from a stormwater sewer located near the northeast corner of the Ceram Fab building. The four liquid samples will be submitted to the laboratory for analysis of vinyl chloride per USEPA Method 8260. Additional sample volume from these locations will be collected for potential total VOC (USEPA Method 8260) and SVOC (USEPA Method 8270) analysis.

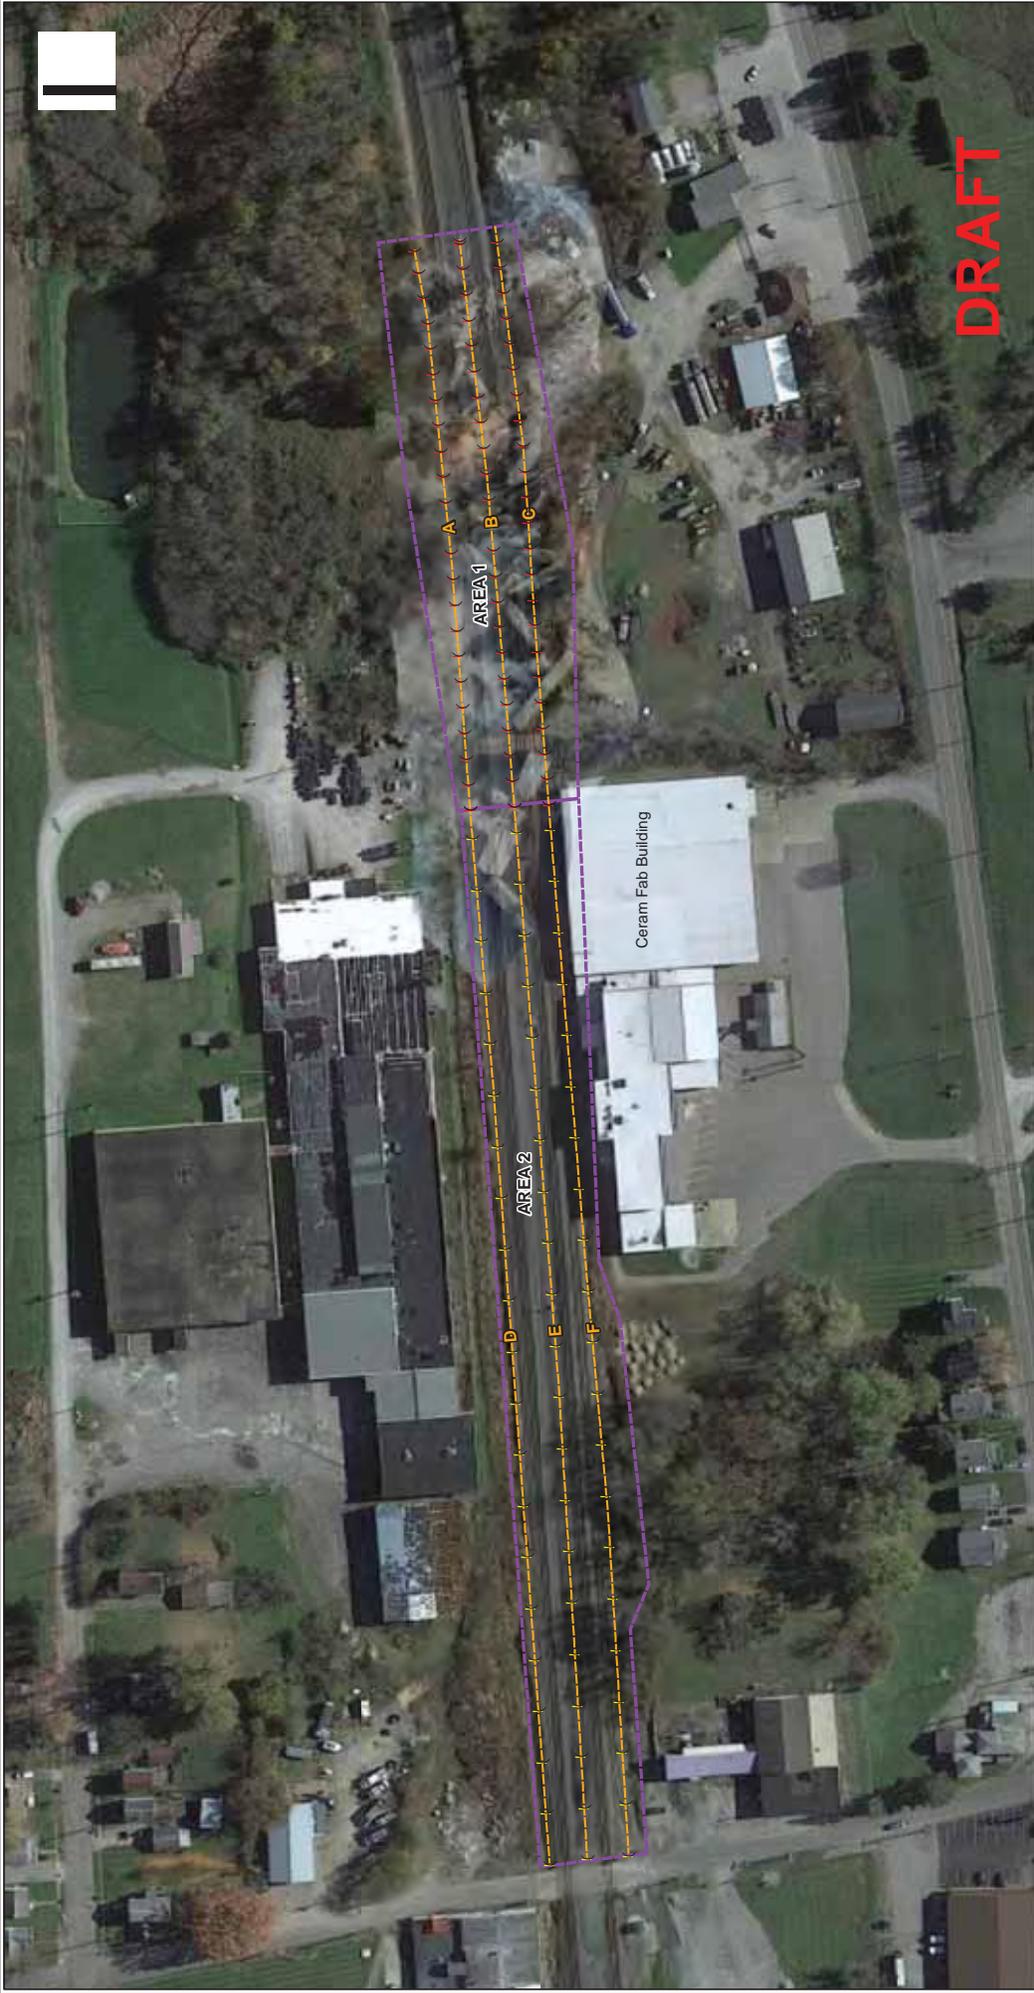

Sample Handling

Samplers will wear fresh nitrile gloves at each location and may be required to wear additional personal protective equipment (PPE). Sample locations will be recorded via GPS. Samples will be preserved in accordance with analytical method requirements, sealed in coolers, and couriered to Eurofins Environment Testing North Central of Barberton, Ohio laboratory under chain-of-

DRAFT
Privileged and Confidential

custody protocols and within specified holding times. Rush laboratory sample turn-around time will be requested.

Preliminary Soil Sampling Work Plan
Norfolk Southern Train Derailment
East Palestine, Ohio
Date: February 10, 2023

Please address the following comments being provided by Ohio EPA on the Preliminary Soil Sampling Work Plan dated February 10, 2023:

General comment

1. When sampling for volatile organic compounds (VOCs) in soil, U.S. EPA SW-846, Method 5035 should be used for sample acquisition and subsequent analysis, in conjunction with U.S. EPA SW-846, Method 8260.

Area 1

2. When collecting a grab sample for vinyl chloride analysis, an additional aliquot should be collected and held for future use for waste characterization purposes.
3. Preliminary assessment activities are requested to extend 250 feet east of the current Area 1 proposed boundary using the sampling protocol for Area 2. This area may be identified using a different designation.
4. Further assessment activities are requested after receipt of the vinyl chloride results. Please coordinate with Ohio EPA regarding future assessment activities.

Standing Water and Stormwater

5. As identified by Ohio EPA's Emergency Response Program, these accumulations of liquids were requested to be addressed through immediate removal. While still achieving this request, these liquids should be sampled prior to removal. In addition, these liquids should be segregated for subsequent characterization and management.

Frank,

Norfolk Southern has received the comments to the Preliminary Soil Sampling Plan and generally agrees with the comments. In response to comment 5 the night crew conducted oil removal from that ditch. The water will be allowed to recharge in that ditch and samples collected as outlined in the Work Plan. The water from that ditch has been placed in a dedicated frac tank. The sampling in the Vinyl Chloride Area will begin immediately.

Thanks
Dan Hunt

Frank,

Attached is the Preliminary Soil Sampling Plan. Norfolk Southern is proposing to only collect Vinyl Chloride samples in the wreck area. After receipt of the data and discussions with OEPA we will decide on the TCLP sampling locations and frequency. The additional sampling outside of the wreck area will be conducted as discussed yesterday. We currently have a field sampling crew onsite and if we need to jump on a call to discuss the sampling plan please let me know.

Thanks

Date: Sunday, February 12, 2023 7:21:16 AM
Attachments: [image001.png](#)

Frank,

This email is to inform you of deviations from the Preliminary Soil Sampling Plan. The deviation referenced below were discussed with Karen Nesbit (USEPA) and Daniel Hunt (NS) in the field during the Area-2 Transect E drilling activities.

- During the drilling, a stiff mottled clay was observed below the railroad ballast. The clay was encountered less than two feet below grade across the investigation area. A small amount of perched water was typically observed above the clay in the ballast material. The clay extended to at least eight feet below ground surface (bgs). Although the sampling plan indicated terminating borings at the water table, because the clay appeared to be acting as a confining unit to any impacts in the above ballast material it was determined that the best course of action was to terminate the boring at eight feet while we were still in the clay. This would prevent any chance of potential downward migration of impacts should the clay layer be fully penetrated. Because the clay was so dense it was difficult to determine if the water table was encountered during the drilling.
- To help determine if the groundwater table was encountered during the drilling a temporary 1-inch piezometer was installed in borehole E2-14. The piezometer will be checked in the morning to determine if groundwater is present.
- Due to the presence of the interceptor trench some of the Transect E boring locations are currently inaccessible. Confirmation soil samples from these locations at the base of the excavation will be collected following soil removal actions.

Additional deviations that need to be discussed with OEPA is the location of transect D in Area 2. Due to the location of the north ditch the transect will need to be moved to the north side of the ditch to allow access for the drill rig.

**Draft Soil Stockpile Sampling
Norfolk Southern Train Derailment
East Palestine, Ohio
Date: February 13, 2023**

East Palestine OH Derailment - Waste Management Plan, adding PFAS/PFOA sampling

Call Notes:

In addition to commodities released by the derailment the local fire department has indicated that approximately 40 gallons of T-storm AFFF concentrate was utilized by the local fire department to control the fire, prior to NS arrival at the response site. The fire department is not able to provide the exact location where the AFFF was utilized. Based on the SDS (included in Attachment 1 of the WMP) and knowledge of the product this type of AFFF contains per- and polyfluoroalkyl substances known as PFAS and PFOA.

Based on the known release of a small volume of AFFF, the WMP has been amended to include PFAS/PFOA as potential COCs released to the environment as a result of response actions. The sampling plan for wastewater and soil will also be amended to include PFAS and PFOA as potential COCs. For PFAS we recommend EPA537 and EPA537(m) for liquids and solids. There are other methods, and Disposal Facilities have indicated that they will accept alternative methods as long as PFOS and PFOA are analyzed, at a minimum.

The sampling procedures for wastes will not be changed, each frac tank will be sampled individually and for the soil one composite sample will be collected per 100 CY for PFAS/PFOA. Analytical requirements associated with Site characterization and remediation will be addressed in the RAP, this memo is a working document and is specific to waste for offsite disposal only.

Based on discussions with disposal facilities, several of the proposed hazardous waste facilities (Texas Modular, US Ecology, WM Vickery Deep Well) have indicated that they will accept the water on the basis of the volume of AFFF used and the volume of water generated (calculated mass balance). For these facilities the profiles document that 40 gal AFFF 3%-6% concentrate was utilized during the initial response activities. By the end of the 1st week of response approximately 200K gallons of water (surface water and fire water) had been generated. A calculated value of 0.02% AFFF is listed on the composition of the wastewater profiles.

Subject: [EXTERNAL] Hazardous waste transportation involving rail

Dan:

As I understand, Norfolk Southern is considering shipment of hazardous waste generated from this incident involving rail. In general, the hazardous waste would be pumped from a Frac tank at the incident site into a tanker truck and then transported over road (accompanied with a hazardous waste manifest as required by the applicable Ohio Administrative Code (OAC)). The transporter would then proceed to a rail siding and transfer the hazardous waste from the tanker truck to a rail tank car for final delivery to an authorized hazardous waste management facility. This transfer location at the rail siding would be a transfer facility as described in OAC rule 3745-50-10(T)(8). Transfer facility requirements are identified in OAC rule 3745-53-12.

Please see OAC rule 3745-53-20 which identifies manifest use requirements. In particular, please see OAC rule 3745-53-20(F) for shipments involving rail.

Additional compliance assistance information is available at:

Ohio EPA guidance document - Hazardous Waste Consolidation (see transfer facility):
https://epa.ohio.gov/static/Portals/32/pdf/Hazardous_Waste_Consolidation_Guidance.pdf

U.S. EPA interpretative letter regarding hazardous waste manifest use for transporters and transfer facilities (RO 11953): <https://rcrapublic.epa.gov/files/11953.pdf>

U.S. EPA interpretative letter regarding hazardous waste manifesting requirements applicable to rail transporters (RO 14791): <https://rcrapublic.epa.gov/files/14791.pdf>

Staging Pile Sampling Plan
Norfolk Southern Train Derailment
East Palestine, Ohio
Date: February 17, 2023

Frank Zingales – Ohio Environmental Protection Agency

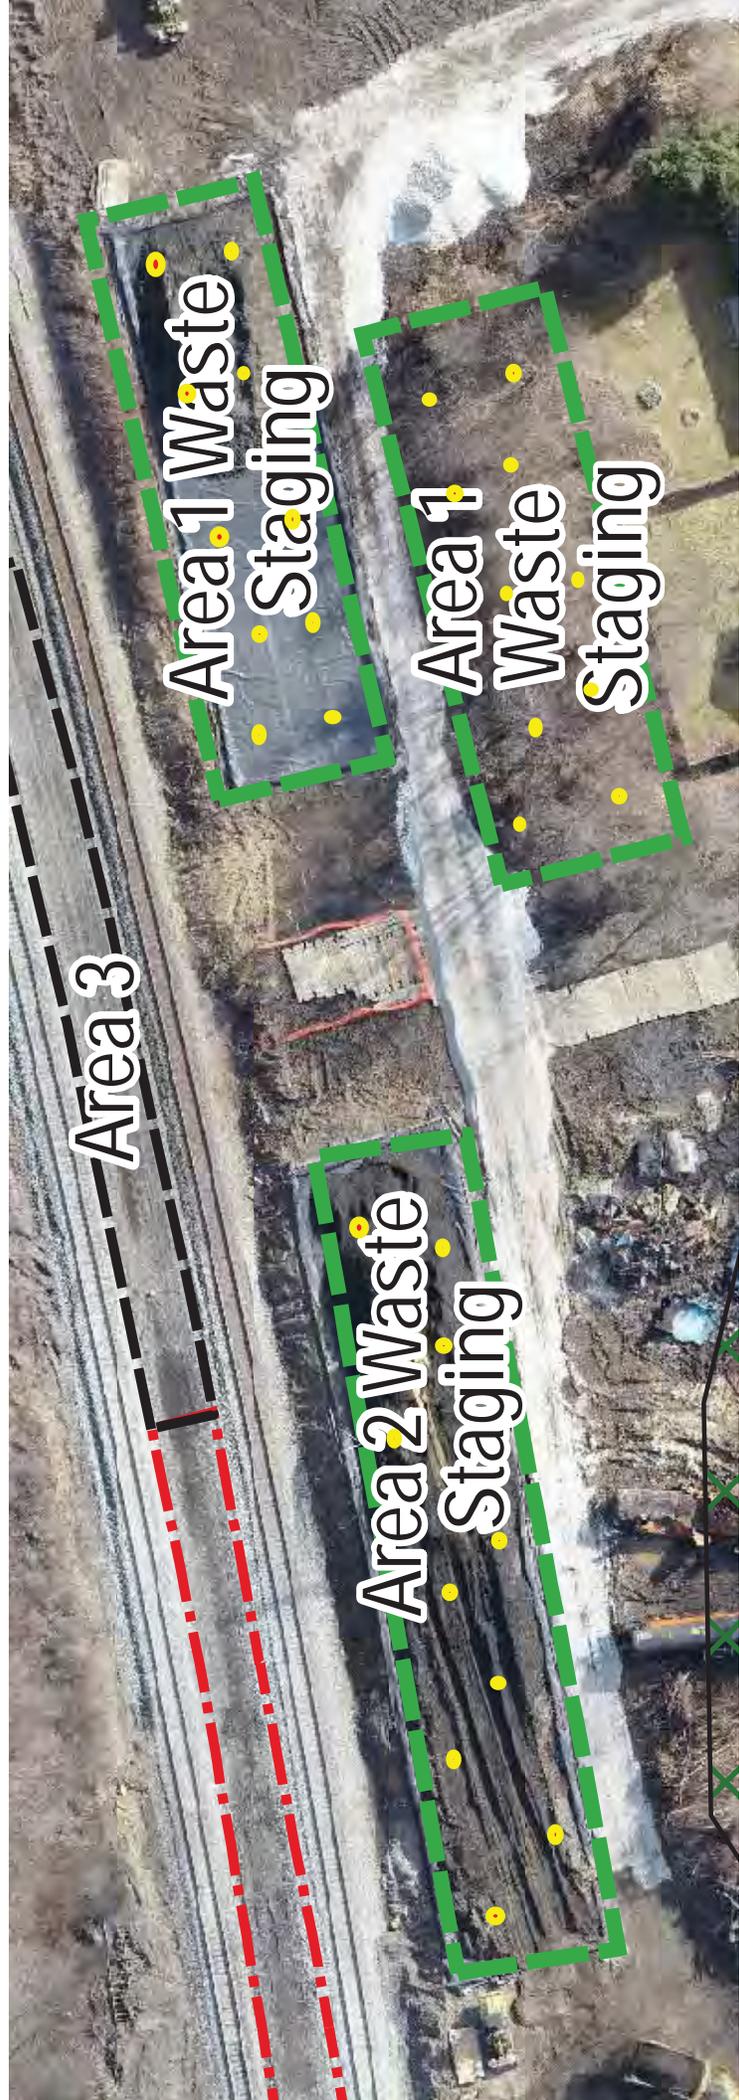

Michelle Clayton – Arcadis U.S., Inc.

This Staging Pile Sampling Plan documents the waste staging pile sampling procedures for the following five staging piles:

- Two stockpiles have been generated from the excavation of Investigation Area 1, Area 1 Waste Staging Area A and Area 1 Waste Staging Area B.
- Area 2 staging pile
- South Trench staging pile
- North staging pile

Samples will be collected as follows, for all waste staging piles.

- For the purpose of identifying underlying hazardous constituents (UHCs) and ensuring compliance with Universal Treatment Standards a total of 10 grab samples will be collected from each staging pile (see figure below). Samples will be collected at various depths within the staging piles, with a minimum depth of 12 inches below the surface. Sample depths will be incorporated into the sample identification listed on the Chain of Custody (i.e. WC-WS1-A1(3-4')).
- All grab samples will be submitted for total volatile organic compounds (VOCs), total semivolatile organic compounds (SVOCs), and toxicity characteristic leaching procedure (TCLP) metals.
- For the purpose of determining if the waste carries any characteristic waste codes the laboratory (Eurofins) will generate two 5-point composite samples for each staging pile. Compositing will be in accordance with laboratory approved procedures.
- Composite samples will be analyzed for: TCLP VOC, TCLP SVOC, TCLP pesticides/herbicides, and total polychlorinated biphenyls. One sample per staging pile will be analyzed for per- and polyfluoroalkyl substances (PFAS)/ perfluorooctanoic acid (PFOA).

- Proposed Sample Location (actual locations may be adjusted in the field)
Samples will be collected at various depths within the staging piles

Dan:

To clarify regarding the North Ditch Soil. When the lab generates the two 5-point composite samples from the 10 grab samples collected, will they be run for TCLP VOC, TCLP SVOC, TCLP pesticides/herbicides, and total polychlorinated biphenyls (this would be consistent with the other sampling efforts)?

Thanks, Frank

Subject: FW: East Palestine Derailment Roll Off Box Waste Sampling Plan

Dan,

The plan for the North Ditch roll-off boxes appears to be adequate with the following condition:

All boxes will be opened and field screened to determine if there are different VOC concentrations present in any of the boxes. If any boxes appear to be different from the other boxes, these should be sampled separately.

We would request additional time to consider the sampling plan for the pellets.

Regards

Karen

Subject: East Palestine Derailment Roll Off Box Waste Sampling Plan

Frank,

Below is a summary of the proposed sampling approach for the waste streams that were placed into roll-offs.

NORTH DITCH SOIL - All of the north Ditch soil was generated during the same excavation and will be managed as a single waste stream (i.e. stockpile). The north ditch soil is contained in 22 roll-off boxes.

- Arcadis will randomly select 10 of those boxes to collect the grab samples.
- Samples will be collected with a hand auger from various depths and locations within the roll-off boxes. All samples will be collected from a minimum of 12 inches depth.
- Consistent with the stockpile sampling approach, we will collect 10 grab samples for Total VOC, Total SVOC, TCLP metals (for the purpose of UHC/UTS compliance).
- The lab will generate two 5-point composite samples from the 10 grab samples collected.

PLASTIC PELLETS WITH SOME SOIL - There are 18 boxes of plastic pellets 6 boxes with plastic pellets and soil and (total of 24 boxes). The soil in the plastic pellet boxes was collected from the over excavation of the soil under the pellets.

- Arcadis will randomly select 10 of those boxes to collect the grab samples.
- Samples will be collected with a hand auger from various depths and locations within the roll-off boxes. All samples will be collected from a minimum of 12 inches depth.
- Consistent with the stockpile sampling approach, we will collect 10 grab samples for Total VOC, Total SVOC, TCLP metals (for the purpose of UHC/UTS compliance).
- The lab will generate two 5-point composite samples from the 10 grab samples collected.

Thanks

Dan Hunt

Subject: Waste Pile #4/South Side of RR Tracks
Date: Friday, February 24, 2023 7:41:09 PM

Dan/Michelle –

As communicated to me today, Waste Pile #4 (last pile to be generated on south side of RR tracks) will be sampled and analyzed using the same methodology as the other waste piles. The sampling methodology is identified in our email communications, including acknowledged comments, from February 17, 2023. As we are well aware, turnaround time (TAT) by the laboratory is critical to the continued off-site management of all wastes. Please use an expedited TAT for these samples.

Please contact me with any questions.

South Track Stockpile Waste Sampling Plan
Norfolk Southern Train Derailment
East Palestine, Ohio
Date: March 10, 2023

Attn: Hillary Young, Oklahoma Dept. Of Environmental Quality (OK DEQ)
Mike Edwards, OK DEQ
Kelly Dixon, OK DEQ
Jim Wilkins, OK DEQ
Paul Bratti, Clean Harbor
Alan Adair, Clean Harbor
Dan Hunt, Norfolk Southern

This Stockpile Sampling Plan documents the sampling procedures for the soil that was excavated from beneath the main line 1 - south track. Approximately 14,000 CY of soil was generated during the remedial activities. The soil is currently staged in a stockpile south of the track.

Samples will be collected as follows:

- For the purpose of identifying underlying hazardous constituents (UHCs) 14 grab samples will be collected. Horizontal sample locations will be randomly chosen. Sample depths will be a minimum of 12 inches below the surface. Sample depths will be incorporated into the sample identification listed on the Chain of Custody.
- All grab samples will be submitted for total volatile organic compounds (VOCs), total semivolatile organic compounds (SVOCs), and toxicity characteristic leaching procedure (TCLP) metals.
- For the purpose of determining if the waste exhibits any characteristic waste codes the laboratory (Eurofins) will generate two 7-point composite samples from the 14 grab samples. Compositing will be in accordance with laboratory approved procedures.
- Composite samples will be analyzed for: TCLP VOC, TCLP SVOC, TCLP pesticides/herbicides, and total polychlorinated biphenyls. One composite sample will be analyzed for dioxins/furans.

Attachment 6

**Carroll/Columbiana/Harrison Solid Waste Management District,
2018-2032 Solid Waste Management Plan, Appendix P -
Designation**

APPENDIX P DESIGNATION

A. Statement Authorizing/Precluding Designation

Due to the SWMD's proximity to other states, the Policy Committee and Board of Directors determined the need to establish designation, providing for all disposal facilities that desired to accept waste from Carroll, Columbiana and Harrison counties the opportunity to do so provided they signed a contract with the SWMD, agreed to provide accurate documentation of the waste going into their facility and paid the same fee that all other facilities were contracted to pay. This leveled the playing field for haulers and disposal facilities in and out-of-state.

Pursuant to Section 3734.53(E)(1) of the Ohio Revised Code, the Board of Directors of the SWMD is hereby authorized to continue with facility designations as they are currently and to establish new facility designations under Section 343.014 of the Ohio Revised Code.

If a facility has not requested designation during the original designation process, they may submit a request for a waiver for facility designation. The request must be in writing and provide information regarding the type and amount of material, the facility to be used, the duration of the waiver, the reason for requesting the waiver and the impact on Plan implementation and financing. The SWMD Board of Directors may request additional information from the applicant for a waiver if the information it receives is incomplete. Once the application is submitted and complete, the SWMD Board of Directors will determine, within 90 days, whether to approve or disapprove the waiver request. The SWMD Board of Directors may grant the request for waiver if the Board of Directors determines that:

1. The waiver is not inconsistent with projections contained in the SWMD's approved plan under Sections 3734.53(A)(6) and (A)(7) of the Ohio Revised Code; and
2. The issuance of the waiver will not adversely affect implementation and financing of the plan.

B. Designated Facilities

Appendix P Designation

The SWMD has designated thirty-seven (37) solid waste facilities as the only facilities that may accept solid waste generated within the District. Each designated solid waste facility is contractually required to provide monthly reports regarding the generator/hauler, amount of solid waste received, and the type of material received from each of our three (3) counties.

DESIGNATION AGREEMENT

THIS AGREEMENT, made and entered into as of the _____ day of _____, 20__ by and between the Board of Directors, in its capacity as the governing body (the "Board"), of the Carroll-Columbiana-Harrison Joint Solid Waste Management District, with offices located at 618 B Canton Road N.W., Carrollton, Ohio, 44615, (the "District") and _____ with an office located at _____ (the "Contractor").

RECITALS

WHEREAS, the Board has reserved the authority to establish facility designations in accordance with Section 343.014 of the Ohio Revised Code in Section VI E. of the District Solid Waste Management Plan (the "Plan"), approved by the Director of the Ohio Environmental Protection Agency on May 26, 2005 ; and

WHEREAS, the Board has determined that to finance implementation of the Plan, it is necessary to contract with and designate solid waste facilities, whereby such designated facilities agree to pay a fee to the District as consideration for designation (the "Contract Fee") as authorized pursuant to sections 343.01(H), 343.014, 343.02 and 343.022 of the Ohio Revised Code; and

WHEREAS, the Board has previously designated facilities under its authority, but has determined that said designations should be periodically updated; and

WHEREAS, the Board adopted a Resolution of Intent to Designate on May 12, 2009, a Resolution of Intent to Establish Designation on June 15, 2009, and a Resolution Designating Solid Waste Facilities on November 3, 2009 and has completed all of the actions required by Section 343.014 of the Ohio Revised Code; and

WHEREAS, the Contractor owns and operates a solid waste landfill or solid waste transfer station under the name of _____ located at _____ (the "Contractor's Facility"), as more particularly described in attached Exhibit A, and has submitted a Request for Designation for the Contractor's Facility in response to the Invitation for Designation; and

WHEREAS, the Board has reviewed the Contractor's Request for Designation and has determined that the Contractor's Facility meets the requirements of the Invitation for Designation, and the Board desires to designate the Contractor's Facility for the receipt of solid waste generated within the District for the transfer or disposal of solid waste.

NOW, THEREFORE, in consideration of the promises and mutual covenants contained herein, the parties agree as follows:

ARTICLE I – DISTRICT’S DESIGNATION OF CONTRACTOR’S FACILITY

- 1.1 The District hereby designates the Contractor’s Facility pursuant to Section 343.014 of the Ohio Revised Code, as now existing or hereafter amended, as a solid waste facility authorized to receive solid waste generated within the District for the transfer or disposal of solid waste.
- 1.2 The parties acknowledge and agree that Section 343.01(I)(2) of the Ohio Revised Code provides that solid waste generated within the District can be transferred to or disposed of only at facilities designated by the Board under Section 343.014 of the Ohio Revised Code, and that such designations by the Board includes or will include facilities other than the Contractor’s Facility on the same terms and conditions as this Agreement. It is further the understanding of the parties that the District does not contemplate requiring any person, municipal corporation, township or other political subdivision located within the District to deliver or cause to be delivered any solid wastes to any particular designated facility.

ARTICLE II – CONTRACTOR’S OBLIGATIONS

- 2.1 The Contractor shall perform and complete in a workmanlike manner all work required to operate and maintain the Contractor’s Facility, or cause the Contractor’s Facility to be operated and maintained, in compliance with all applicable federal, state and local laws as well as the terms and conditions of any applicable licenses or permits.
- 2.2 The Contractor agrees to pay to the District a Contract Fee on all solid waste generated within the District that is received at the Contractor’s Facility, from the effective date of this Designation Agreement until this Agreement is terminated as provided herein. The Contractor agrees to pay to the District a Contract Fee of Three Dollars and Fifty Cents (\$ 3.50) per ton of solid waste generated within the District that is received at the Contractor’s Facility on and after January 2, 2010 and during the remainder of the term of this Agreement. Each month, the Contractor shall submit to the District a monthly certified Contract Fee statement, on a form prescribed by the District, on which the Contractor shall separately identify the tonnage (expressed in tenths of a ton) of solid waste generated within the District that was delivered to the Contractor’s Facility during the preceding calendar month, and the amount of the Contract Fee due on that tonnage. The Contractor shall forward to the District payment in the amount of the Contract Fee identified in the monthly report together with the submittal of the monthly report. Both the Contract Fee statement and the Contract Fee payment must be received by the District by the 25th of each month. If the Contractor’s Facility is a solid waste transfer station upon which the Contract Fee has been paid in accordance with this Agreement, the District agrees that solid waste transferred from such facility shall not be subject to the Contract Fee upon delivery of that solid waste to a solid waste disposal facility. The Board may change the amount of the Contract Fee upon advance written notice of ninety (90) days to the Contractor, provided the Board uniformly changes the amount of the Contract Fee payable by all designated solid waste facilities, and provided that the Board uniformly changes the amount of any Waiver Fee paid by any solid waste facility that has been granted a waiver, such that all designated solid waste facilities pay the same Contract Fee or Waiver Fee.

Appendix P Designation

- 2.3 Failure to make timely payment of the Contract Fee as provided herein will result in a \$100 per day penalty for each day beyond the 25th day of each month that payment is late. Continued failure to make timely payment of the Contract Fee shall constitute a default by the Contractor for which the District may terminate this Designation Agreement, and thereby terminate the right of the Contractor's Facility to receive and accept solid waste generated within the District. Such termination shall be in addition to any other default rights or remedies the District may have at law or in equity.

SECTION III - TERM

- 3.1 This Agreement shall be effective as of _____ with payment of the Contract Fee to commence on solid waste generated within the District and received at the Contractor's Facility after _____.
- 3.2 The District or Contractor may terminate this Agreement for any reason upon written notice of ninety (90) days to the other party.
- 3.3 The District and Contractor understand that this Agreement may be subject to periodic renewal, under the same or similar terms and conditions.

SECTION IV - MISCELLANEOUS

- 4.1 This Agreement may be assigned by the Contractor to any successor in interest at the Contractor's Facility with the consent of the District. Such consent shall not be unreasonably withheld by the District.
- 4.2 This Agreement shall be binding upon and shall inure to the benefit of the parties, and their successors, respective heirs, personal representatives, and assigns.
- 4.3 This Agreement shall constitute the entire understanding between the parties.
- 4.4 No amendments or variations of the terms and conditions of this Agreement shall be valid unless the same are in writing and signed by all parties.
- 4.5 This Agreement shall be construed and enforced pursuant to the laws of the State of Ohio.
- 4.6 Any action regarding this Agreement shall be brought in a court of competent jurisdiction in Carroll County, Ohio.

Appendix P Designation

IN WITNESS WHEREOF, the parties by their duly authorized officers, trustees or partners, have executed this Agreement in duplicate as of the date set forth above.

WAIVER AGREEMENT

The Board of Directors ("the Board"), in its capacity as the governing body of the Carroll-Columbiana-Harrison Joint Solid Waste Management District ("the District"), a joint solid waste management district established pursuant to section 343.011 of the Revised Code, enters into this Waiver Agreement with _____, with a solid waste disposal or transfer station located at _____ ("the Facility"), or its appropriate parent, subsidiaries or affiliates (the "Grantee"), which shall become effective on the date of last execution (the "Effective Date").

RECITALS

WHEREAS, the District is a political subdivision of the State of the Ohio charged with the management of solid waste generated within the District; and

WHEREAS, in accordance with Chapters 343 and 3734 of the Revised Code, the District's Solid Waste Management Plan (the "District Plan"), as now existing or as updated hereafter, and rules adopted by the Board as now existing or as amended hereafter (the "District Rules"), all solid waste generated within the District (the "District Solid Waste") shall be delivered only to solid waste facilities designated by the District unless a waiver granted by the District pursuant to Section 343.01(1)(2) of the Revised Code authorizes the delivery of District Solid Waste to undesignated solid waste facilities; and

WHEREAS, Grantee requests a waiver from the Board, and the Board, pursuant to Section 343.01(1)(2) of the Revised Code finds that the waiver request from Grantee is not inconsistent with the projections contained in the District Plan and will not adversely affect the implementation and financing of the District Plan; and

WHEREAS, the Board and Grantee desire to document the waiver (the "Waiver") granted by the Board to Grantee in this Waiver Agreement.

NOW, THEREFORE, in consideration of the promises and covenants contained herein and the mutual benefits to be gained hereby, the parties incorporate the foregoing recitals and agree as follows:

1. Pursuant to the terms and conditions contained herein, the Board grants and Grantee accepts the Waiver which authorizes Grantee to accept District Solid Waste at the Grantee's Facility.
2. The Grantee, in consideration of the Waiver granted herein, shall pay to the District a fee levied on each ton of District Solid Waste that is accepted at the Facility (the "Waiver Fee"). The amount of the Waiver Fee may be modified from time-to-time by the Board, in the exercise of the sole discretion of the Board, and shall be an amount equal to the Waiver Fee paid by any other person granted a waiver by the Board. The Waiver fee shall also at all times be equal to the fee paid to the District as consideration for designation (the "Contract Fee"). The Board has established a Contract Fee of Three

Appendix P Designation

Dollars and Fifty Cents (\$ 3.50) per ton of solid waste generated within the District that is received at Designated Facilities on and after January 2, 2010.

3. Grantee also agrees to comply with all existing District Rules established by the Board, or any subsequently adopted rules; agrees not to challenge any amendments to the District Plan; or bring any action against the District relating to compliance with the District Plan or District Rules.
4. Grantee agrees to maintain daily records at the Facility identifying: (a) the amount of District Solid Waste in tons that Grantee accepts at the Facility pursuant to this Waiver Agreement; and (b) the name and address of each hauler that delivers District Solid Waste to the Facility. The District, or its authorized representatives, shall have the right to inspect and copy the daily records maintained by Grantee pursuant hereto during the regular business hours of Grantee's Facility.
5. Grantee shall pay the Waiver Fee in accordance with the rules established and amended by the District from time-to-time, and the payment procedures set forth in the subparagraphs below:
 - a. By the 25th day of each calendar month, Grantee shall remit to the District the total Waiver Fees owed for the total number of tons (expressed in tenths of a ton) of District Solid Waste received at the Facility during the previous calendar month.
 - b. With each monthly payment of the Waiver Fee, Grantee shall provide the information requested on any "Waiver Fee Submittal Form" as prescribed by the District. The "Waiver Fee Submittal Form" may be amended from time-to-time by the District.
 - c. Failure to make timely payment of the Waiver Fee as provided herein will result in a \$100 per day penalty for each day beyond the 25th day of each month that payment is late. Continued failure to make timely payment of the Waiver Fee shall constitute a default by the Grantee for which the District may terminate this Waiver Agreement, and thereby terminate the right of the Grantee's Facility to receive and accept solid waste generated within the District. Such termination shall be in addition to any other default rights or remedies the District may have at law or in equity.
6. The term of this Waiver Agreement shall commence on the Effective Date and shall terminate on _____. The District and Grantee understand that this Waiver Agreement may be subject to periodic renewal, under the same or similar terms and conditions. The District or Grantee may terminate this Waiver Agreement for any reason upon written notice of ninety (90) days to the other party.
7. The Grantee shall perform and complete in a workmanlike manner all work required to operate and maintain the Grantee's Facility, or cause the Grantee's Facility to be operated and maintained, in compliance with all applicable federal, state and local laws as well as the terms and conditions of any applicable licenses or permits.

Appendix P Designation

- 8. This Waiver Agreement may be assigned by the Grantee to any successor in interest at the Grantee's Facility with the consent of the District. Such consent shall not be unreasonably withheld by the District.
- 9. This Waiver Agreement shall be binding upon and shall inure to the benefit of the parties, and their successors, respective heirs, personal representatives, and assigns and this Waiver Agreement shall constitute the entire understanding between the parties. No amendments or variations of the terms and conditions of this Waiver Agreement shall be valid unless the same are in writing and signed by all parties. This Waiver Agreement shall be construed and enforced pursuant to the laws of the State of Ohio and any action regarding this Waiver Agreement shall be brought in a court of competent jurisdiction in Carroll County, Ohio.
- 10. If the District determines that the Grantee has violated or breached any of Grantee's payment and/or reporting obligations, Grantee shall cure such breach within thirty (30) days of receipt of written notice of such breach from the District. If Grantee fails to cure such breach within thirty (30) days, the District shall have the right to terminate this Waiver Agreement effective on the thirty-first (31st) day after Grantee has received written notice of the breach of payment or reporting obligations as termination for cause. Other circumstances which entitle the District to terminate this Waiver Agreement upon thirty (30) days written notice for cause include violation of the District's Rules, or violation of other terms of this Agreement. There is no obligation or expectation that there exists an opportunity to cure any alleged breach of this Waiver Agreement other than those outlined above.
- 11. All notices, payments, reports, certificates, requests or other communications hereunder shall be in writing and shall be deemed given if delivered in person to the individual or to a member of the company or organization for whom the notice is intended, or delivered by certified mail, return receipt requested, to the appropriate following address:

Secondary Containment Standard Operating Procedures

**Secondary Containment Management
Norfolk Southern Train Derailment
East Palestine, Ohio
Date: April 12, 2023**

Secondary Containment Management for Temporary units and the Area of Contamination

Wastes generated as a result of the train derailment are currently stored in staging piles, temporary units (TUs) and containers (drums and totes). Locations of designated waste storage areas are provided in Figure 1 of the Waste Management Plan. All storage areas are equipped with secondary containment that is designed and constructed of suitable materials (e.g., non-earthen materials) to prevent any waste or precipitation collected in the system from reaching the environment. Below is a description of the secondary containment in place at each waste storage area.

- Tank Farms 5 and 6 have welded HDPE liner covering the entire tank farm area with additional HDPE installed under the temporary storage tanks. Rig mats have been placed over the liner to prevent punctures. A containment berm was created using hay bale berms overlain by HDPE liner.
- Tank Farms 2, 3 and 4 and Stand by Tank Farms 1, 2 and 3 and the wastewater treatment plant have individual HDPE liners installed under each temporary storage tank and container storage areas.
- Tank Farm 1 contains two modular tanks were installed within a single secondary containment consisting of an impermeable liner (120 mil Linear Low-Density Polyethylene (LLDPE) liner manufactured by ATARFIL), steel sheet piles, and earthen berms.
- Soil generated within the Area of Contamination is consolidated into staging piles that are placed on a welded HDPE liner system. The containment berm is constructed with hay bale that are covered by the HDPE liner.
- Additional secondary containments (buckets/ kiddie pools) are placed under hose connections during loading and offloading of the temporary storage tanks. Secondary containment utilized during loading and offloading operations for the modular tanks is provided in the Modular Tank Summary Sheet (April 7,2023, Arcadis)

At a minimum, all tanks, containers, staging piles and secondary containment systems are inspected daily. Inspections are recorded in the project files and available for review upon request. If a container or tank is found leaking or unfit for use, the container or tank will be immediately addressed, and the released waste will be immediately transferred to another suitable container or tank. If a secondary containment system is found compromised (unable to collect or prevent a release to the environment), the secondary containment will be repaired. The repair must be sufficient to prevent any waste or precipitation collected in the system from reaching the environment. If unable to be repaired, the unit will be taken out of service.

If waste or rain water is identified in the secondary containment that released waste (solid or liquid) or accumulated precipitation will be removed from the secondary containment as soon as practicable but not later than 24 hours. If waste or precipitation is released outside of secondary containment, the release will be immediately stopped and cleaned-up. Any released waste, accumulated precipitation and/or resulting clean-up materials will be collected and characterized for offsite disposal at a permitted facility.

Any releases outside of secondary containment will be collected and contained. For solid materials, the waste will be returned to the original or intended container or stockpile. Any sidewall of the secondary containment that is compromised will be reenforced with hay bales or similar structurally sound material. For liquids that are released outside of secondary, the impacted surface material will be excavated and containerized in labeled roll-offs or drums and may be consolidated with similar waste streams.

Temporary Unit Inspection Form

RCRA Container Accumulation Area Checklist—Large Quantity Generators

Date: _____ Time: _____ Inspector's Name: _____

Checked/Observations/ Repairs made	Requirement	Regulatory Citation
Satellite Accumulation Area		
	Waste is accumulated at or near the point of generation and “under the control of the operator.”	§262.15(a)
	Container has less than 55 gallons of HW or less than 1 quart/1 kg of acute HW.	§262.15(a)
	Container is in good condition and non-leaking.	§262.15(a)(1)
	Waste is compatible with container that it is stored in.	§262.15(a)(2)
	Only compatible wastes are accumulated in the container, and the container is separated from nearby incompatible materials.	§262.15(a)(3)
	Container is closed except when adding, removing, or consolidating waste, or when temporary venting is necessary.	§262.15(a)(4)
	Container is marked with the words “Hazardous Waste” and an indication of the hazards of the contents.	§262.15(a)(5)
	Satellite area complies with all preparedness and prevention requirements noted below.	§262.15(a)(8)
90-Day Container Accumulation Area		
Container Requirements—Part 262, Subpart A		
	Accumulation start dates are ≤90 days old, unless an extension has been approved by the state per §262.17(b).	§262.17(a)
	Container complies with Subpart CC air emission controls.	§262.17(a)(1)(i)
	Container is in good condition and non-leaking.	§262.17(a)(1)(ii)
	Waste is compatible with container that it is stored in.	§262.17(a)(1)(iii)
	Container is closed except when adding or removing waste.	§262.17(a)(1)(iv)(A)
	Container is not stored in a way that would cause it to spill or leak.	§262.17(a)(1)(iv)(B)
	Weekly inspections are conducted.	§262.17(a)(1)(v)
	Ignitable and reactive wastes are stored at least 15 meters (50 feet) from facility's property line (unless a waiver from this requirement is in facility files).	§262.17(a)(1)(vi)(A)
	Ignitable and reactive wastes are separated and protected from sources of ignition or reaction, and “No Smoking” signs are posted.	§262.17(a)(1)(vi)(B)
	Only compatible wastes are accumulated in the container, and the container is separated from nearby incompatible materials.	§262.17(a)(1)(vii)
	Container is marked with the words “Hazardous Waste” and an indication of the hazards of the contents.	§262.17(a)(5)(i)(A-B)
	Container is marked with the accumulation start date.	§262.17(a)(5)(i)(C)
	90-day area complies with all preparedness and prevention requirements noted below.	§262.17(a)(6)
Preparedness and Prevention—Part 262, Subpart M		
	Area is maintained in a manner to prevent fire, explosions, or spills.	§262.251
	Area must be equipped with (unless hazards posed would not require): 1. Internal communications to signal emergency to facility personnel. 2. Communication device to alert local emergency response personnel. 3. Fire extinguishers, spill control equipment, and decontamination equipment. 4. Fire suppression: adequate water supply or foam producing equipment.	§262.252
	Testing and maintenance of equipment.	§262.253
	Immediate access to communication equipment when handling hazardous waste.	§262.254
	Adequate aisle space.	§262.255

Pre-Transport Requirements—Part 262, Subpart C		
	Packaging: Containers meet all applicable standards for the type of waste they hold. (See DOT regs at 49 <i>CFR</i> Parts 173, 178, and 179.)	\$262.30
	Labeling (DOT Warning Labels): (See DOT regs at 49 <i>CFR</i> Part 172).	\$262.31
	<p>Marking: Containers of 119 gallons or less must comply with DOT regs at 49 <i>CFR</i> Part 172. This includes the “proper shipping name”—49 <i>CFR</i> 172.301. Containers must also be marked with the following words and information:</p> <ol style="list-style-type: none"> 1. “HAZARDOUS WASTE—Federal Law Prohibits Improper Disposal. If found, contact the nearest police or public safety authority or the U.S. Environmental Protection Agency.” 2. Generator’s name and address. 3. Generator’s EPA ID number. 4. Manifest tracking number. 5. Hazardous waste codes.¹ 	\$262.32

¹In lieu of marking containers with hazardous waste codes, a nationally recognized electronic system (such as bar codes) may be used.

HW = Hazardous waste

TANK CAR INSPECTION FORM
 Re: Vinyl Chloride Impacted Water
 RCRA (U043), DOT Class 9, UN3082

Location: *Norfolk Southern Corp. - Lordstown, Ohio*

Date of Pre-Load Inspection:
Date of Post-Load Inspection:
Tank Car Number:
Tank Car Specification:

Pre-Loading Inspection Items:

	O.K.	Defect	If Defect, Comment...
General Visual Inspection, No Obvious Damage to Car			
Safety Appliances (ladders, handrails, steps walkways)			
Running Gear (springs, wheels, couplers, sill, etc.)			
Car Stenciling is on car, within Qual. dates, & readable			
Placard Holder Brackets in Place & in Working Order			
Hand Brakes Operable & Applied for the transfer			
Wheels Chocked prior to the transfer			
Derail Device or Switch Aligned Away & Locked			
Blue Flag(s) Deployed > 50 feet from end of car(s)			
Visual Inspection for Missing or Loose Bolts, Nuts, etc.			
Visual Inspection for Missing or Poor Manway Gasket			
Visual Inspection for Missing or Poor BOV Gasket			
No Indications of Leaks from the tank car			
Was there a security seal on this car at arrival to the transload siding? (y/n)			If Yes, Seal #

Loading & Post-Loading Inspection Items:

	O.K.	Defect	If Defect, Comment...
Valves & Fittings Not Leaking & Closed Tightly			
Secondary Closure Plugs or Flanges & Chains Secured			
All transfer fittings & tools removed from housing			
Lid for Protective Housing Closed, Pinned, and Sealed			
Proper Placards are Present, In Position, & Readable			
Post Load Leak Test (Snoop and/or L.E.L. Meter)			
Tank Car Weight & Outage Limits Not Exceeded*			

*Calculate Below Prior to Answering

Security Seal Applied to Loaded Car? (y/n)	Seal Number Applied to Loaded Car:
--	------------------------------------

Tank Car Product Load Volume Data:

(X) Tank Car Shell Capacity: <i>US Gals.</i>	This wastewater Specific Gravity = 1.0
Do you have the Outage Chart for this car*? (y/n)	Gauge the Outage in Loaded Car: <i>Inches</i>

*If no, you must obtain this outage chart to continue.

(Y) From Outage Chart & Gauge Measurement Data, How Many Gallons of Outage Space? <i>US Gals.</i>

Is the Outage Space in the car at least 2% of the tank car shell capacity? (y/n)
--

(Z) Calculate Gross Volume in car. Subtract (Y) from (X). Total gals.capacity - outage gallons = gross gallons.

Estimated Tank Car Gallons (Z) = <i>US Gals.</i>	Load Weight: Multiply Net Gallons x 8.34 pounds/gal.
Manifest# <i>US Gals.</i>	Load Weight = <i>pounds</i>
Manifest# <i>US Gals.</i>	Max Load Weight Stenciled = <i>pounds</i>
Manifest# <i>US Gals.</i>	Is Load Weight > Than Stenciled Weight?(y/n)
Manifest# <i>US Gals.</i>	

Estimated Volume from Trucks = <i>US Gals.</i>

Incident Name: East Palestine Train Derailment 02032023		Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]	
Objective			
1) Integrate outreach efforts by Unified Command Group organizations.			
2) Review cleanup plans to ensure protection of human health.			
a. Expedite removal and proper disposal of contaminated soil and wastewater.			
3) Evaluate potential public health impacts of track removal operations and train traffic.			
a. Evaluate ongoing air releases.			
b. Ensure communication of potential public impacts prior to activities.			
4) Establish measurable targets for specific operational objectives.			
5) Implement public health assessment of the public and responders.			
6) Integrate operations of all Unified Command Group organizations including Norfolk Southern (NS).			
7) Develop and review work plan(s) for home cleaning efforts and soil sampling.			
8) Establish long-term unified command and incident command posts.			
Operational Period Command Emphasis (Safety Message, Priorities, Key Decisions/Directions)			
MANAGEMENT OBJECTIVES			
1. Ensure the health and safety of the public and response personnel.			
2. Maintain and enhance the unified response organization with local/state/federal agencies and NS.			
3. Collect, manage, and communicate multimedia environmental data with local/state/federal agencies and the community in a timely manner.			
4. In coordination with local leaders, conduct public health assessment, data evaluation, and community engagement.			
5. Speak with one voice on public health, natural resources, and environmental conditions (air, soil and water) through transparency and effective communications in coordination with partners in a timely manner.			
6. Provide updates to congressional delegations and the media regarding response progress.			
7. Direct and oversee NS assessment and remediation activities to ensure protection of human health and the environment.			
General Situation Awareness (Safety bullets, Weather, etc.)			
1. Be aware of increased press and VIP visits. Refer all questions to PIO/JIC.			
2. Be aware and respectful of enhanced security measures in ICP areas/clinics.			
3. Obtain and use incident credential.			
4. Be vigilant of odors and air emissions from soil excavation/removal operations			
5. Respect parking restrictions and be respectful of residents/businesses.

ICS 204 - Assignment List

Division: East Taggart NS

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - NS	Williams, Joseph	Norfolk Southern	Exemption 6 - PII	
Division/Group Supervisor	Gerard, Jordan	US EPA Region 4	404-562-8642	
Division/Group Supervisor	Deutsch, Scott	Norfolk Southern	Exemption 6 - PII	
Division/Group Supervisor	Skelton, Scott	CTEH	Exemption 6 - PII	
Division/Group Supervisor	OER	Ohio EPA		

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
SPSI	McCarty, Drew	10	Exemption 6 - PII	Tank Car Cleaning
HEPACO	Bryant, Justin	2	Exemption 6 - PII	Vac Truck work(1 vac truck)
Cronin	Cronin, Rob	8	Exemption 6 - PII	Magnet work/excavation on North Side behind Blaze Industries
Cranemaster	Mosqueda, Jesse	6	Exemption 6 - PII	Railcar shearing and scrap load out South side dirt work, site prep

Assignments

- 1) Continued heavy equipment work on north side for grading and excavation of site
- 2) South side will continue grading and lay down of primary and secondary soil containment using LLDPE for the load out of south side Main #1.
- 3) Continue to prep for track removal of South Main #1 - estimated begin upon UCG approval.
- 4) Remove track and excavate underlying soils consistent w/ approved workplan.
- 5) Continue potholing / storm sewer pipe investigation.

*Project has been ongoing and will involve noted objectives beginning 2-27-23.

Special Instructions

Work site air monitoring will dictate PPE.

ICS 204 - Assignment List

Group: Surface Water Sampling

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - NS	Williams, Joseph	Norfolk Southern	Exemption 6 - PII	
Site Remediation Branch Director	Kollar, Kurt	Ohio EPA	Exemption 6 - PII	
Site Remediation Branch Deputy Director	Cole, Jackie	US EPA R5	312-597-4421	
Site Remediation Branch Deputy Director	Hunt, Daniel	Norfolk Southern	4042734472	
Division/Group Supervisor	Hawkins, Jody	CTEH	Exemption 6 - PII	

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
Sampling Teams	Sharp, Tanner	8	Exemption 6 - PII	FOB

Assignments

- Water Quality Monitoring
- Surface Water Sample collection

Equipment:

- Horiba water quality meter
- Mobile data collection
- appropriate collection

Special Instructions

Report to Matthew Gernand, Steve Aufdenkampe
 Forward Operating Base (FOB): 40 South Market Street, East Palestine, OH

ICS 204 - Assignment List

Group: Waste Water Transfer NS

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - NS	Williams, Joseph	Norfolk Southern	Exemption 6 - PII	
Disposal Group Supervisor	Patten, David	Norfolk Southern	Exemption 6 - PII	
Disposal Group Supervisor	Vrabec, Adam	US EPA R5	312-448-3853	
Site Remediation Branch Deputy Director	DER			

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
CTEH	JT Wilson	1	Exemption 6 - PII	Air Monitoring
SPSI	Tom Wildman / Greg Palmer	4	Exemption 6 - PII	Waste Transfer

Assignments

- 1) Transfer liquid waste from tank trucks to tank cars using BMP as prescribed in AAR Pamphlet 34 tank car loading instructions.
- 2) Proper spill containment, contingency spill release equipment will be in place with proper manifest trailer for load out by NS to approved facilities.
- 3) Support transload to railcars at NS yard in Lordstown, OH.

Special Instructions

Work site air monitoring will dictate PPE.

ICS 204 - Assignment List

Group: Waste Water Truck Loading NS

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - NS	Maguire, Andrew	US EPA R5	312-758-8672	
Disposal Group Supervisor	Patten, David	Norfolk Southern	Exemption 6 - PII	
Disposal Group Supervisor	Vrbac, Adam			
Distribution Group Supervisor	Hood, Zach	USCG AST	Exemption 6 - PII	
Division/Group Supervisor	DERR-HEW			

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
SRS	Day, Chip	5	Exemption 6 - PII	
Arcadis/SPSI	Wetzel, Brain / Lindley, Josh	3	Exemption 6 - PII	Manifest Handling
Cronin	Cronin, Rob	4	Exemption 6 - PII	Frac-Tank off loading to truck for transit
Hepaco	Frazzini, Ted	4	Exemption 6 - PII	Frac-Tank off loading to truck for transit

Assignments

- 1) On-going downsize Mobile storage tank footprint on North side of site at Blaze Industries on South side of Taggart Rd.
- 2) Continue appropriate scheduling and trans-load of contaminated water to trucks for haul to appropriate and designated facility.
- 3) Manage load out of water from containment areas.
- 4) Follow traffic plans to and from loadout area(s).
- 5) Track and report daily volumes.

Special Instructions

Work-site air monitoring will dictate PPE

ICS 204 - Assignment List

Group: Solid Debris Loadout

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - NS	Williams, Joseph	Norfolk Southern	Exemption 6 - PII	
Site Remediation Branch Director	Kollar, Kurt	Ohio EPA	Exemption 6 - PII	
Site Remediation Branch Deputy Director	Cole, Jackie	US EPA R5	312-597-4421	
Site Remediation Branch Deputy Director	Hunt, Daniel	Norfolk Southern	4042734472	
Division/Group Supervisor	Shanks, Bryan	Norfolk Southern	Exemption 6 - PII	

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
SPSI	Drew McCarty	5	Exemption 6 - PII	Waste pile management and load up
Arcadis	Jay Reid	2	Exemption 6 - PII	Manifest handling
Green Rock	Craig Fisk / Chad Runnion	2	Exemption 6 - PII	Truck management / manifesting

Assignments

- 1) Ongoing load out of semi-trucks of impacted soils, segregated by profile and constituent impact.
- 2) Site is inclusive of contained truck wash and scaling operations. BMP's are in place to ensure minimized impact off pile.
- 3) In addition, during load out of acrylate impacted soils, strategic and targeted application of acrylate killer Acronel 27 and Acronel SS-30 to reduce odor accumulation at designation.
- 4) This will be performed on the pile not in the loaded truck and each SDS is available on request.

Special Instructions

Work site air monitoring will dictate PPE.

ICS 204 - Assignment List

Group: Surface Water / Sediment Quality NS

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief	Maguire, Andrew	US EPA R5	312-758-8672	
Site Remediation Branch Director	Kollar, Kurt	Ohio EPA	Exemption 6 - PII	
Site Remediation Branch Deputy Director	Cole, Jackie	US EPA R5	312-597-4421	
Site Remediation Branch Deputy Director	Hunt, Daniel	Norfolk Southern	4042734472	
Division/Group Supervisor	Williams, Nathan	Norfolk Southern	Exemption 6 - PII	
Division/Group Supervisor	Hunsicker, Chris	Norfolk Southern	Exemption 6 - PII	
Division/Group Supervisor	OER	Ohio EPA		

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
Hepaco	Ted Frazzini		Exemption 6 - PII	Leslie and Sulphur Run

Assignments

- 1) Ongoing aeration and sparging of Sulphur and Leslie Run from under track culvert to the backside of the East Palestine WWTP.
- 2) Continue to armor and assess location based on last rain fall event. Coordinate with OEPA for any proposed operational changes.
- 3) Day operations include cleaning inlets and outlets of pumps/aerators; Continue Sulphur Run and Leslie Run bank and bottom washing to remove and collect contaminates.
- 4) Night Operations include cleaning the inlets and outlets of pumps/aerators

Special Instructions

Work site air monitoring will dictate PPE.

ICS 204 - Assignment List

Group: Mobile Air Monitoring

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - US EPA	Maguire, Andrew	US EPA R5	312-758-8672	
Division/Group Supervisor	Mickunas, Dave	US EPA	9195414191	
Division/Group Supervisor	Wilson, JT	CTEH	Exemption 6 - PII	
Division/Group Supervisor	Megan Combs			
Division/Group Supervisor	Edmunds, Jordan	Tetra Tech	Exemption 6 - PII	

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
START ST	Edmunds, Jordan	2	Exemption 6 - PII	FOB
US EPA TAGA ST	Mickunas, Dave	2	9195414191	FOB
US EPA PHILIS	Kaelin, Larry	1	7323216625	FOB
CTEH	Wilson, JT	1	Exemption 6 - PII	FOB

Assignments

- 1) Monitor at pre-established community locations per AMSP
- 2) Monitor locations near active waste loading area (Dustrak)
- 3) Collect data using Survey 123 form
- 4) Report exceedances immediately to OPS Section Chief
- 5) Plan for integration of TAGA operations during rail excavation
- 6) Integrate NS/CTEH monitoring into team
- 7) Provide daily summaries to J. Cashmere by 1800 (shift change)

Equipment: iPads, Dustrak, MultiRAE Pro monitors

Special Instructions

Use buddy system, high viz vests. Increased safety vigilance/awareness. Teams accompanied by law enforcement. Refer media inquires to JIC.

ICS 204 - Assignment List

Group: Stationary Air Monitoring/Sampling

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - US EPA	Maguire, Andrew	US EPA R5	312-758-8672	
Division/Group Supervisor	Marks, Josh	USCG AST	Exemption 6 - PII	
Division/Group Supervisor	Giugliano, Claudio	USCG AST	Exemption 6 - PII	
Division/Group Supervisor	DeLong, Mike	Mannik Smith Group	Exemption 6 - PII	
Division/Group Supervisor	Wilson, JT	CTEH	Exemption 6 - PII	

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
USCG AST (Day)	Marks, Josh	2	Exemption 6 - PII	FOB
USCG AST (Night)	Giugliano, Claudio	2	Exemption 6 - PII	FOB

Assignments

- 1) Maintain 20 station network (equipment, VIPER connection, calibrations) on 24hr basis
- 2) Maintain new locations near active waste loading area (AreaRAE, Dustrak)
- 3) Report exceedances to OPS Section Chief
- 4) Collect daily (24hr) SUMMA canister at Leake Oil and upwind locations for analysis
- 5) Ensure security and integrity of equipment by routine visits to each location. Report tampering/vandalism to OPS Section Chief and 911.
- 6) Integrate NS/CTEH monitoring network into team
- 7) Provide daily summaries to OPS Section Chief by 1800 (shift change)

Equipment: AreaRAE Pros, SUMMA canisters, Dustrak, VIPER network equipment, MultiRAE Pros, Safer Suit Software

Special Instructions

Safety Issues: Follow COVID Protocols
 Be aware of traffic and trains near monitoring locations (use designated routes)
 Use the buddy system, wear high-viz vests
 Report any health concerns/issues to OPS Section Chief or SO
 Refer media inquiries to JIC

ICS 204 - Assignment List

Group: Residential Air Screening

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - US EPA	Maguire, Andrew	US EPA R5	312-758-8672	
Division/Group Supervisor	Smerage, Talia	Mannik Smith Group	Exemption 6 - PII	
Division/Group Supervisor	Wilson, JT	CTEH	Exemption 6 - PII	

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
START	Smerage, Talia	2	Exemption 6 - PII	FOB
CTEH	Wilson, JT	2	Exemption 6 - PII	FOB
Columbiana Co Sheriff	TBD	1		FOB

Assignments

- 1) Obtain daily schedule for target homes.
- 2) Conduct indoor air screening at target residences per 'Home Safely' plan.
- 3) Collect data using Mobile Data Studio/Survey 123 software.
- 4) Report exceedances according to plan (Mark Dudle, NS).
- 5) Provide summary of findings form to resident upon completion.
- 6) Expand target residences to 1.15 mi radius from incident location (+150).
- 7) Provide daily summaries to OPS Section Chief by 1800.

Equipment:

SPM Flex (hydrogen chloride), Gastec (vinyl chloride if VOC detect), MultiRAE Pro, Drager XPID, colorimetric tubes

Special Instructions

Safety Issues:

Use buddy system, high viz vests. Increased safety vigilance/awareness. Teams accompanied by law enforcement. Refer media inquires to JIC.

ICS 204 - Assignment List

Group: Public Health

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Division/Group Supervisor	Shugart, Jill	CDC/ATSDR	Exemption 6 - PII	
Operations Section Chief - US EPA	Vins, Wesley	Columbiana Co HD	Exemption 6 - PII	
Division/Group Supervisor	Watkins, Sharon	PA DOH	Exemption 6 - PII	

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
Columbiana Co. Health Department	Vins, Wesley	2	Exemption 6 - PII	FOB
Ohio Dept. of Health	Himes, Lance	5	Exemption 6 - PII	FOB
Pennsylvania DOH	Watkins, Sharon	2	Exemption 6 - PII	FOB
CDC/ATSDR	Shugart, Jill	20	Exemption 6 - PII	FOB
US EPA R5	Fusinski, Keith	1	Exemption 6 - PII	FOB

Assignments

OH clinic @ 20 W. Martin St., E. Palestine, OH (phone: 234-564-7755 or 7888)
 PA Health Resource Center @ 3590 Darlington Rd, Darlington, PA

- PA Health Resource Center: Darlington Township Municipal Building, 3590 Darlington Rd, Darlington, PA 16115
- 1) Operate public health centers (OH clinic, PA health resource center)
 - 2) Conduct Assessment of Chemical Exposures 'ACE' investigation (OH, PA, 1st responders) survey administration
 - 3) Monitor community concerns and identify trend(s)
 - 4) Assist w/ messaging & materials for community clinics/health centers, Welcome Center, public meetings
 - 5) Coordinate with Community Task Force teams (6) – door to door canvassing
 - 6) Provide technical assistance/data to partner agencies
 - 7) Report activity summaries and coordinate w/ partners via 'daily sync' meeting

Special Instructions

COVID protocols, buddy system/accountability, local field escorts

ICS 204 - Assignment List

Group: Drinking Water

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - US EPA	Maguire, Andrew	US EPA R5	312-758-8672	
Division/Group Supervisor	Harrison, Richard	ORSANCO	Exemption 6 - PII	
Division/Group Supervisor	Dinkins, Sam	ORSANCO	Exemption 6 - PII	
Division/Group Supervisor	Vins, Wesley	Columbiana Co HD	Exemption 6 - PII	
Drinking Water Supervisor	Ross, Katie	Stantec		

Assignments

- 1) Maintain 24hr fixed monitoring network on Ohio River, one site at increased. frequency at all monitoring locations down to Evansville, IN.
- 2) Advise local water utilities on status/sample results to ensure water supply safety.
- 3) Assist utility w/ daily sample taken at East Liverpool, OH station.
- 4) Continue providing daily updates for distribution.
- 5) Continue local monitoring groundwater samples (3 teams) (CCHD)
- 6) Incorporate NS sampling efforts.

Issue/Equipment: Provide resource needs to EPA. Systems calibrated for target chemicals.

Special Instructions

Provide resource needs to US EPA Operations Section Chief as soon as possible
Refer media inquiries to PIO/JIC

ICS 204 - Assignment List

Group: Pennsylvania Response

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - US EPA	Maguire, Andrew	US EPA R5	312-758-8672	
Division/Group Supervisor	DiDonato, Ann	US EPA R3	215-287-8157	
Division/Group Supervisor	Moore, Brian	PA DEP	717-787-5715	

Assignments

- 1) Maintain list of resident inquiries/requests.
- 2) Conduct private well sampling w/ target area.
- 3) Continue investigation of particulate depositional area downwind of site (coordinate w/ ENVL on lab method).
- 4) Provide daily updates to OPS Section Chief.

Issues: Continue integrating PA DEP personnel.

Special Instructions

Follow COVID protocols
Refer media inquiries to PIO/JIC

ICS 204 - Assignment List

Group: Remediation

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

Operations Personnel

Position	Name	Affiliation	Contact Number(s)	Shift
Operations Section Chief - US EPA	Maguire, Andrew	US EPA R5	312-758-8672	
Disposal Group Supervisor	Kollar, Kurt	Ohio EPA	Exemption 6 - PII	
Division/Group Supervisor	Cole, Jackie	US EPA R5	312-597-4421	
Division/Group Supervisor	Hunt, Daniel	Norfolk Southern	4042734472	
Division/Group Supervisor	Witherspoon, Melissa	Ohio EPA		

Resources Assigned

Identifier	Leader	#	Contact Number(s)	Reporting Location, Instructions, Notes
Ohio EPA	Ballser, Wade	1	Exemption 6 - PII	FOB

Assignments

- 1) Oversee and direct response/mitigation/transportation & disposal efforts.
- 2) Conduct surface water/groundwater/public water system sampling.
- 3) Implement track removal/replacement plan in coordination w/ OEPA, ENVL once approved by UCG.

Special Instructions

Safety Issues:
 Follow COVID protocols
 Follow CTEH HASP on site
 Obtain Responsible Party/CTEH escort(s) prior to entering scene
 Report media inquiries to JIC

ICS 223 - Health and Safety Message	Version Name: 02/27/2023 07:12:01		
Incident Name: East Palestine Train Derailment 02032023	Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]		
Major Hazards and Risks			
Narrative			
<ul style="list-style-type: none"> • Report any safety, health, and security concerns to SO, supervisor, OPS chief, and law enforcement if necessary. • Report any exposure related symptoms due to working in/near contaminants as soon as possible to SO or Supervisor. Visit the Public Health Unit clinics to report even mild symptoms (i.e., headaches) • All field workers must attend the daily safety brief/check-in and verify when field work is concluded. • Maintain vigilance and awareness of work area, location in the community, especially within the vicinity of the derailment site (hot zone). • If entering the controlled access zone on foot be sure to decon prior to leaving to reduce contaminated soil/material from being tracked out. • Increased truck traffic should follow site traffic plan. • If on foot, be mindful of vehicles at all times and stay within designated areas. • Follow the HASP and JHAs which detail each task being performed with associated risk analysis. • Use proper PPE for assigned task: • Required- supportive boots/shoes/steel toes, gloves, safety vest/logo gear. • Observe caution when driving especially in early/late hours. • Maintain situational awareness and respect and site safety measures. • Use the 'buddy system' at all times. • Get sufficient rest and take breaks as needed to manage fatigue. • Take proper precaution, safety measures and proper PPE to be donned before using any chemicals/standards. • Use the Covid symptom checker at: https://www.cdc.gov/screening/. If you have symptoms, it is recommended to isolate (go back to home or hotel room) and test for COVID-19. • Dial 911 for all emergencies.

ICS 230 - Daily Meeting Schedule

Incident Name: East Palestine Train Derailment 02032023

Period: Period 6 [03/02/2023 07:00 - 03/04/2023 07:00]

<i>Meeting Name & Date/Time</i>	<i>Purpose</i>	<i>Attendees</i>	<i>Location</i>
Operations Briefing - Incident Command Post 02/28/2023 07:30	Present the IAP to the Operations Section oncoming shift supervisors and other Command & General Staff personnel.	Facilitator: Planning Section Chief (PSC), Operations Section Chief, Safety Officer, START	ICP - 40 Market Street, East Palestine
Unified Command Meeting 02/28/2023 08:00	General Discussion	AA/CA, PSC, UC	
Command & General Staff Meeting 02/28/2023 09:30	Provide opportunity for IC/UC to present decisions and management direction to the Command & General Staff members.	Facilitator: Planning Section Chief (PSC), AA/CA, C&G, EOC, UC	
Special Meeting: Environmental (External) 02/28/2023 12:00	INVITATION ONLY		
Tactics Meeting 03/01/2023 11:00	Create tactical operations plan for the next operational period to meet IC/UC objectives.	Facilitator: Planning Section Chief (PSC), Data Specialist, Environmental Unit Leader, GIS Specialist, Logistics Section Chief, Operations Section Chief, Planning Section Chief, Resource Unit Leader, Safety Officer, Situation Unit Leader	
Planning Meeting 03/01/2023 16:00	Describe strategies and tactical plan to achieve IC/UC's direction, priorities and objectives for the next operational period.	Facilitator: Planning Section Chief (PSC), AA/CA, EOC, Finance Section Chief, Liaison Officer, Logistics Section Chief, Operations Section Chief, Planning Section Chief, Public Information Officer, Resource Unit Leader, Safety Officer, Situation Unit Leader, UC

240-180588-1

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
F1	MS and/or MSD recovery exceeds control limits.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.

GC Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

LCMS

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
F3	Duplicate RPD exceeds the control limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present

Narrative

Job Narrative 240-180588-1

Comments

No additional comments.

Receipt

The samples were received on 2/17/2023 9:00 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 4.6° C and 5.5° C.

GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-563073 was outside the method criteria for the following analyte: Carbon Disulfide. An MRL standard at or below the reporting limit (RL) was analyzed with the affected samples: WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8), WC-WS1-A8 (4-5) (240-180588-9), (CCVIS 240-563073/3), (LCS 240-562767/2-A) and (MB 240-562767/1-A) and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

Method 8260D: An MS/MSD was done in preparation batch 240-562767 and analytical batch 240-563073 however it was reported in a different analytical batch. The affected samples are WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8) and WC-WS1-A8 (4-5) (240-180588-9).

Method 8260D: The method blank for preparation batch 240-562767 and analytical batch 240-563073 contained Acetone above the reporting limit (RL). This compound is considered a common laboratory contaminant. The associated samples: WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8), WC-WS1-A8 (4-5) (240-180588-9), (LCS 240-562767/2-A) and (MB 240-562767/1-A) were not re-extracted and/or re-analyzed because the concentration of the common lab contaminant in the method blank was less than 5 times the RL.

Method 8260D: The MS/MSD for preparation batch 240-562767 and analytical batch 240-563092 is not reported because it was analyzed in another batch.

Method 8260D: The continuing calibration verification (CCV) analyzed in batch 240-563092 was outside the method criteria for the following analyte: Carbon disulfide. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270E: The following samples were diluted due to the nature of the sample matrix: WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8), WC-WS1-A8 (4-5) (240-180588-9), WC-WS1-A9 (3-4) (240-180588-10), WC-WS1-A10 (2-3) (240-180588-11), (240-180588-G-11-B MS) and (240-180588-G-11-C MSD). Elevated reporting limits (RLs) are provided.

Method 8270E: The laboratory control sample (LCS) for preparation batch 240-562526 and analytical batch 240-562828 recovered outside control limits for the following analyte: Atrazine. This analyte was biased high in the LCS and was not detected in the associated samples: WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8), WC-WS1-A8 (4-5) (240-180588-9), WC-WS1-A9 (3-4) (240-180588-10) and WC-WS1-A10 (2-3) (240-180588-11); therefore, the data have been reported.

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-562828 recovered above the upper control limit for

Case Narrative

Client: Norfolk Southern Corporation

Job ID: 240-180588-1

Job ID: 240-180588-1 (Continued)

Laboratory: Eurofins Canton (Continued)

2-Nitrophenol. The samples associated with this CCV were non-detect for the affected analyte; therefore, the data have been reported. The associated samples are impacted: WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8), WC-WS1-A8 (4-5) (240-180588-9), WC-WS1-A9 (3-4) (240-180588-10) and WC-WS1-A10 (2-3) (240-180588-11).

Method 8270E: The continuing calibration verification (CCV) associated with batch 240-562828 recovered outside acceptance criteria, low biased, for bis (2-chloroisopropyl) ether, 4-Nitrophenol, Benzaldehyde and Bis(2-chloroethyl)ether. A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples: WC-WS1-A1 (2-3) (240-180588-1), WC-WS1-A2 (2.5-3.5) (240-180588-2), WC-WS1-A3 (3-4) (240-180588-3), WC-WS1-A4 (5-6) (240-180588-4), WC-WS1-A5 (1-2) (240-180588-5), WC-WS1-A6 (3-4) (240-180588-7), WC-WS1-A7 (2-3) (240-180588-8), WC-WS1-A8 (4-5) (240-180588-9), WC-WS1-A9 (3-4) (240-180588-10) and WC-WS1-A10 (2-3) (240-180588-11) were non-detect for the analytes, the data has been reported.

Method 8270E: The following samples were diluted due to the nature of the sample matrix: WC-WS1-COMP (A1-A5) (240-180588-6), WC-WS1-COMP (A6-A10) (240-180588-12) and (240-180588-A-6-G MS). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

Method 8082A: The following samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur: WC-WS1-COMP (A1-A5) (240-180588-6) and WC-WS1-COMP (A6-A10) (240-180588-12).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

LCMS

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable ($\leq 6^{\circ}\text{C}$, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A

Eurofins Canton

Job Notes

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to the NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory. This report is confidential and is intended for the sole use of Eurofins Environment Testing North Central, LLC and its client. All questions regarding this report should be directed to the Eurofins Environment Testing North Central, LLC Project Manager who has signed this report.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing North Central, LLC Project Manager.

Qualifiers

Dioxin

Qualifier	Qualifier Description
I	Value is EMPC (estimated maximum possible concentration).

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Narrative

**Job Narrative
240-180588-2**

Receipt

The samples were received on 2/17/2023 9:00 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 4.6°C and 5.5°C

Report revised on 3/10/2023 to report Total Dioxins calculations.

Dioxin

Method 8290A: Any peak area that is the result of interferences from poly-chlorinated diphenyl ethers observed in the sample has been removed from the calculated results prior to reporting the data for totals.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Detection Summary

Client: Norfolk Southern Corporation
 Project/Site: NS East Palestine

Job ID: 240-180588-2

Client Sample ID: WC-WS1-COMP (A1-A5)

Lab Sample ID: 240-180588-6

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
1,2,3,4,6,7,8-HpCDD	220		5.7	2.3	ng/Kg	1	✳	8290A	Total/NA
